RE: NCUC Docket No. E-100 Sub 90  
NC GreenPower Solar+ Schools program modification

Dear Ms. Campbell:

On October 15, 2019, the NC Utilities Commission (NCUC) issued an order approving the NC GreenPower Solar+ Schools program.

Due to technological advances, as well as the variety of building types encountered across North Carolina, NC GreenPower requests that Solar+ Schools be allowed to expand the solar array designs acceptable in our program. Currently, Solar+ Schools installs 3-5 kW top-of-pole mounted and roof-mounted systems; we would like to broaden the program to include solar awnings and other designs to accommodate the needs of different styles of buildings we work with each year.

NC GreenPower respectfully requests the NCUC to consider our request and if approved, for it to be effective beginning with our current Program Year 2020 schools.

Sincerely,

Victoria McCann  
Vice President
