

A. EXECUTIVE SUMMARY

Aqua proposes interconnecting Wells #1&7 and installing an AdEdge Iron (Fe) and Manganese (Mn) filter system to treat the combined flow at Carlyle Manor Well #1, P49. This system is part of the Bayleaf Master System comprised of 122 active wells and 117 points of entry (POEs). Mn levels at well #7 are greater than 0.3 mg/L which makes it one of Aqua's Group 1 Priority Secondary Water Quality Projects as per the Water Quality Plan. The latest Mn concentration at the POE was 0.472 mg/L as of 7/16/2018. Based on studies performed by AWWA and other organizations, elevated concentrations of Mn are being linked to cause adverse health effects. Preliminary engineering studies indicate that Green Sand filtration is the most effective and permanent solution since it physically removes Fe and Mn.

B. PROPOSED SYSTEM REQUIRING TREATMENT

TABLE 1: Approved and Active Wells in Proposed System

Well Name and No.	Capacity (GPM)		Max, Avg., Min Pump Runtime (hrs./day)	**Latest POE Inorganic Sampling Results								
	App.	Max, Avg., Min from Past 3 Years		Fe (mg/L)***	Mn (mg/L)	Fe/Mn Loading Rate (lbs./day)	Fe/Mn Loading Rate (lbs./yr.)	Average Fe/Mn Loading Rate Per Residential Customer (lbs./yr.)				
#1, P49	73	Inactive*	Inactive*	0.746	0.159	~0.6 (if operated)	~214	~0.85				
#4, P3B	44	52	36	12	21	9	1	0.935	0.566	~0.3	~91	~0.4
#6, P60	86	68	55	31	21	10	4	0.0595	0.290	~0.1	~35	~0.14
#7, P1D	165	101	102	67	21	9	3	0.496	0.472	~0.4	~126	~0.5

*Taken offline due to unacceptable water quality

**Loading rates based on 12-hour runtimes if well is offline due to poor water quality, as in the case of well #1 above.

***Raw samples are taken directly at the wellhead before chemical treatment and point of entry (POE) samples are taken after chemical injection and treatment but before the tank and distribution system.

Figure 1. Proposed water supply main from Carlyle Manor #7 to #1 with consolidated filtration at Well #1

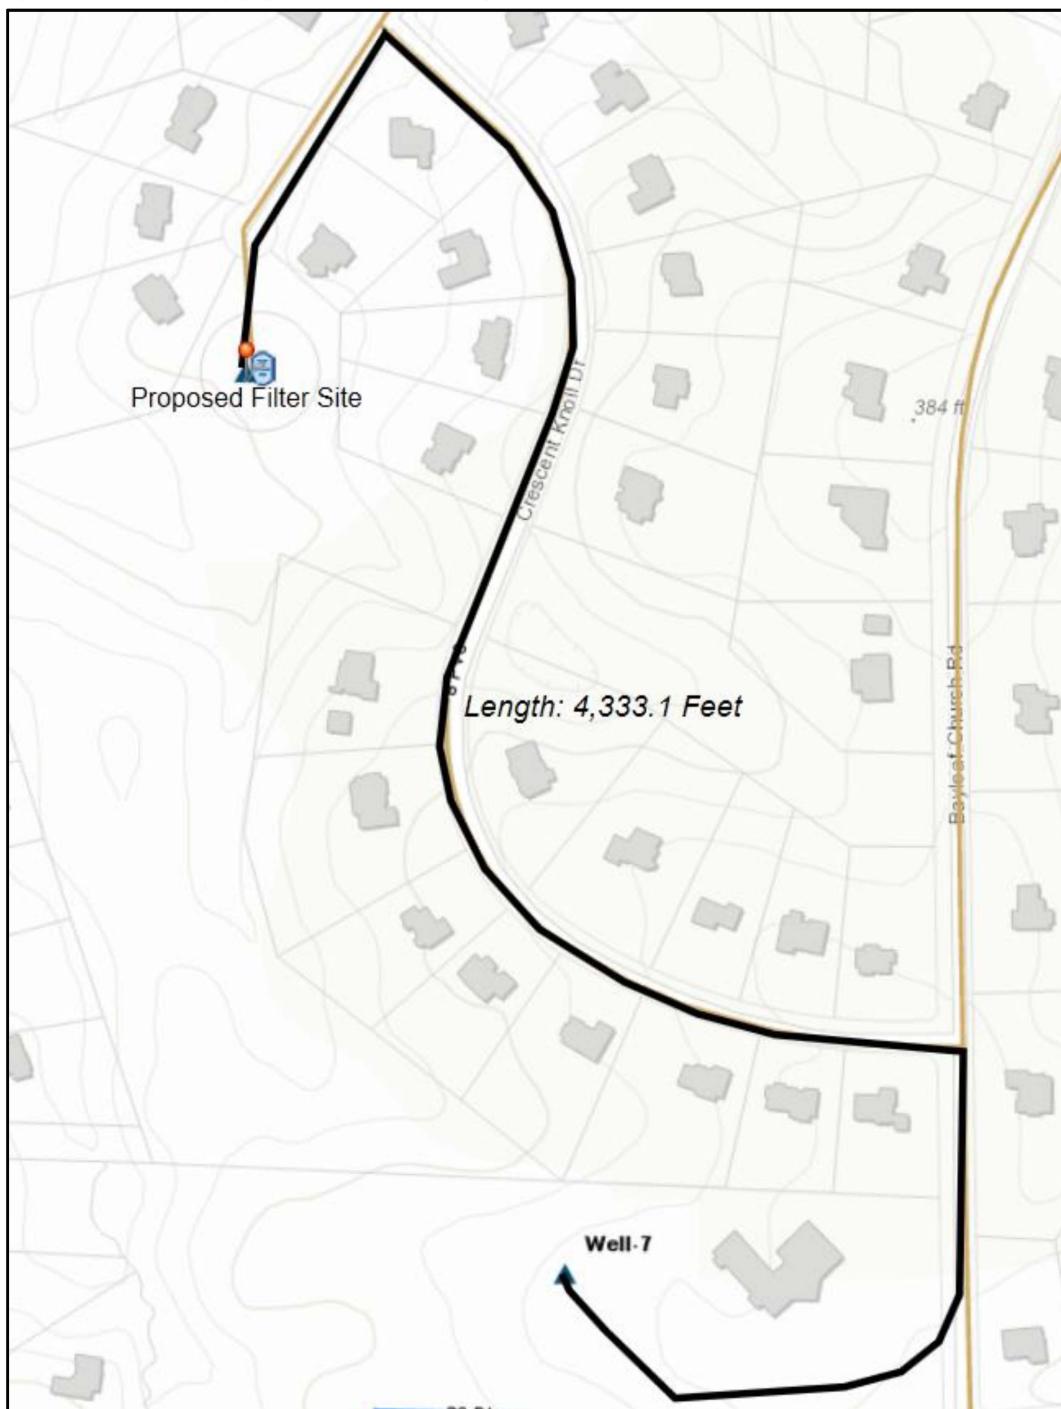

TABLE 2: Existing Storage at Well Sites

Well Name and No.	Storage Description		Most Recent Cleaning Date	
	Type	Gallons	Tank	Dist. System
Bayleaf System	Elevated	1,750,000	2012	Feb. 2018
Bayleaf System	Hydro	10,000		Feb. 2018
Bayleaf System	Ground	104,500		Feb. 2018

*These wells use existing storage in Bayleaf Master System.

6. Past Three (3) Years Flushing Occurrences, list month/year:

Response: March 2017, February 2018, March 2019.

7. Next Planned Distribution System Flushing Occurrence

Response: March 2020.

8. List of chemicals being used:

TABLE 3: Existing Chemicals Used at Well Site

Well Name and No.	Chemical Description			
	Cl ₂	OP-37	NaOH	SeaQuest
#1, P49	X	N/A	N/A	X
#4, P3B	X	N/A	N/A	X
#6, P60	X	N/A	N/A	X
#7, P1D	X	N/A	N/A	X

9. Current description of the water treatment system for each well over the past three (3) years, including specific names of chemicals and dates of changes:

Response: Well #7 switched from OP 37 to SeaQuest in August 2015 and wells #4&6 switched in October 2015 to sequester the Fe and Mn and clean the distribution lines, as well as to prevent further mineral accumulation on the pipe walls. Started distribution and POE total and soluble sampling in September 2017 and added raw sampling in December 2017. Aqua removed the Harmsco particulate cartridge filter at Well #4 once Fe/Mn filtration was brought online in September 2019. Aqua will continue to flush distribution system annually.

10. Planned changes (if any) for chemical treatment within the next six (6) months:

Response: None.

11. Comments on Approved/Current Well Capacity.

Response: None.

C. CURRENT SECONDARY WATER QUALITY CONCERNS

1. How many wells require treatment? 2*
2. Can system operate with single well offline? No*

* Based on the historical demands of the Bayleaf Master System, every well is required to meet demand. Subsequently, the production from Carlyle Manor Wells #1&7 is required and cannot be taken offline or remain offline.

3. Are combined Fe/Mn concentrations above 1 mg/L or Mn above 0.3 mg/L? Yes*

*The latest POE Mn concentration at Well #7 is 0.472 mg/L.

4. Date of most recent POE Fe/Mn sampling results 7/16/2018

7/10/2017	0.0595			0.290		

5. Describe previous actions to improve secondary water quality and describe results (i.e.; installation of particulate filters and sequestering agents).

Response: The system switched from OP 37 to SeaQuest in August and October 2015 to sequester the Fe and Mn. Flushed distribution system annually since 2011 and will continue to flush water mains annually. Aqua began collecting and testing POE total and soluble sampling in Sept. 2017 and the most recent results are noted in Table 4 above. The intent of the sequestering agent is to physically chelate or hold Fe and Mn in a soluble state, ideally decreasing the insoluble concentration and resolving water discoloration issues. Because Fe usually reaches the surface in mostly an insoluble state, it is very challenging to convert insoluble Fe back into a soluble state unless the chemical dose of the sequestering agent is increased heavily. Also, sufficiently long contact time is a necessary criterion to make this

happen. Aqua installed a Harmsco particulate cartridge filter in June 2017 but no real reduction in total or insoluble Fe and Mn has been observed. Because sequestering does not physically remove Mn, Aqua is concerned that its efforts to reduce total Mn will not be effective without adding a Fe/Mn treatment system or equivalent treatment system such as a those using solid phase Manganese Dioxide.

D. UTILITY COMMISION REQUIRED INFORMATION

- | | |
|---|-----------------|
| 1. Well Location Map | <u>Attached</u> |
| 2. DEH/PWS Approval Letter | <u>Attached</u> |
| 3. Original 24 hr. Pump Status Report | <u>Attached</u> |
| 4. Past 36 months of pump status reports | <u>Attached</u> |
| 5. Inorganic Analysis Report submitted to DEH for well approval | <u>Attached</u> |
| 6. Past 6 yrs. inorganic analysis from each wellhead | <u>Attached</u> |
| 7. Past 3 yrs. Fe/Mn analyses, both soluble and insoluble. | <u>Attached</u> |

Note: For item (6) above, provide information on baseline (w/o treatment – raw samples taken at the well head) and point of entry (after treatment).

E. CUSTOMER COMPLAINT DATA

- | | |
|---|-----------------|
| 1. Total number of customer complaints in past 6 months | <u>6</u> |
| 2. Total number of customer complaints in past 12 months | <u>10</u> |
| 3. For past 6 months, do customer secondary water complaints exceed 10% of the number of active customers? | <u>No</u> |
| 4. Provide 12-month list of all water quality complaints | <u>Attached</u> |
| 5. Provide 12-month list of all completed water quality work orders | <u>Attached</u> |
| 6. Describe most common customer complaint over the past 12-month period relating to secondary water quality, i.e.; discolored water, taste, or odor. | |

Response: Brown, black, and yellow discolored water complaints.

F. PROPOSED SECONDARY WATER QUALITY TREATMENT

1. Proposed treatment recommendation: AdEdge Water Technologies Treatment system

2. Proposed System Cost:

COST ESTIMATE						
Interconnection between Carlyle Manor Well #1&7 and installing filtration at CM #1						
TASK	DESCRIPTION	QTY	UNIT	UNIT COST	TOTAL	
1	Interconnect Construction	4350	Foot	\$ 45	\$ 195,750	
2	CM Well #1&7 Filter Skid (includes sales tax and freight cost)	1	LS	\$ 140,800	\$ 161,008	
3	BW Recycle System (includes sales tax)	1	LS	\$ 50,000	\$ 53,625	
4	Sludge Management System (includes sales tax)	1	LS	\$ 40,000	\$ 42,900	
	Construction of Filter House,					
5	Backwash Disposal System, Well House Upgrades (based on costs from similar size projects)	1	LS	\$ 250,000	\$ 250,000	
6	Engineering, Permitting, Bidding & CA/CO	1	LS	\$ 40,000	\$ 40,000	
12	Aqua Direct Cost @ 5%				\$ 37,164.15	
13	Contingencies @ 5%				\$ 39,022.36	
				TOTAL CAPITAL COSTS:	\$ 819,469.51	
14	AFUDC @ 7%				\$ 57,362.87	
				TOTAL ESTIMATED PROJECT COSTS:	\$ 876,832	

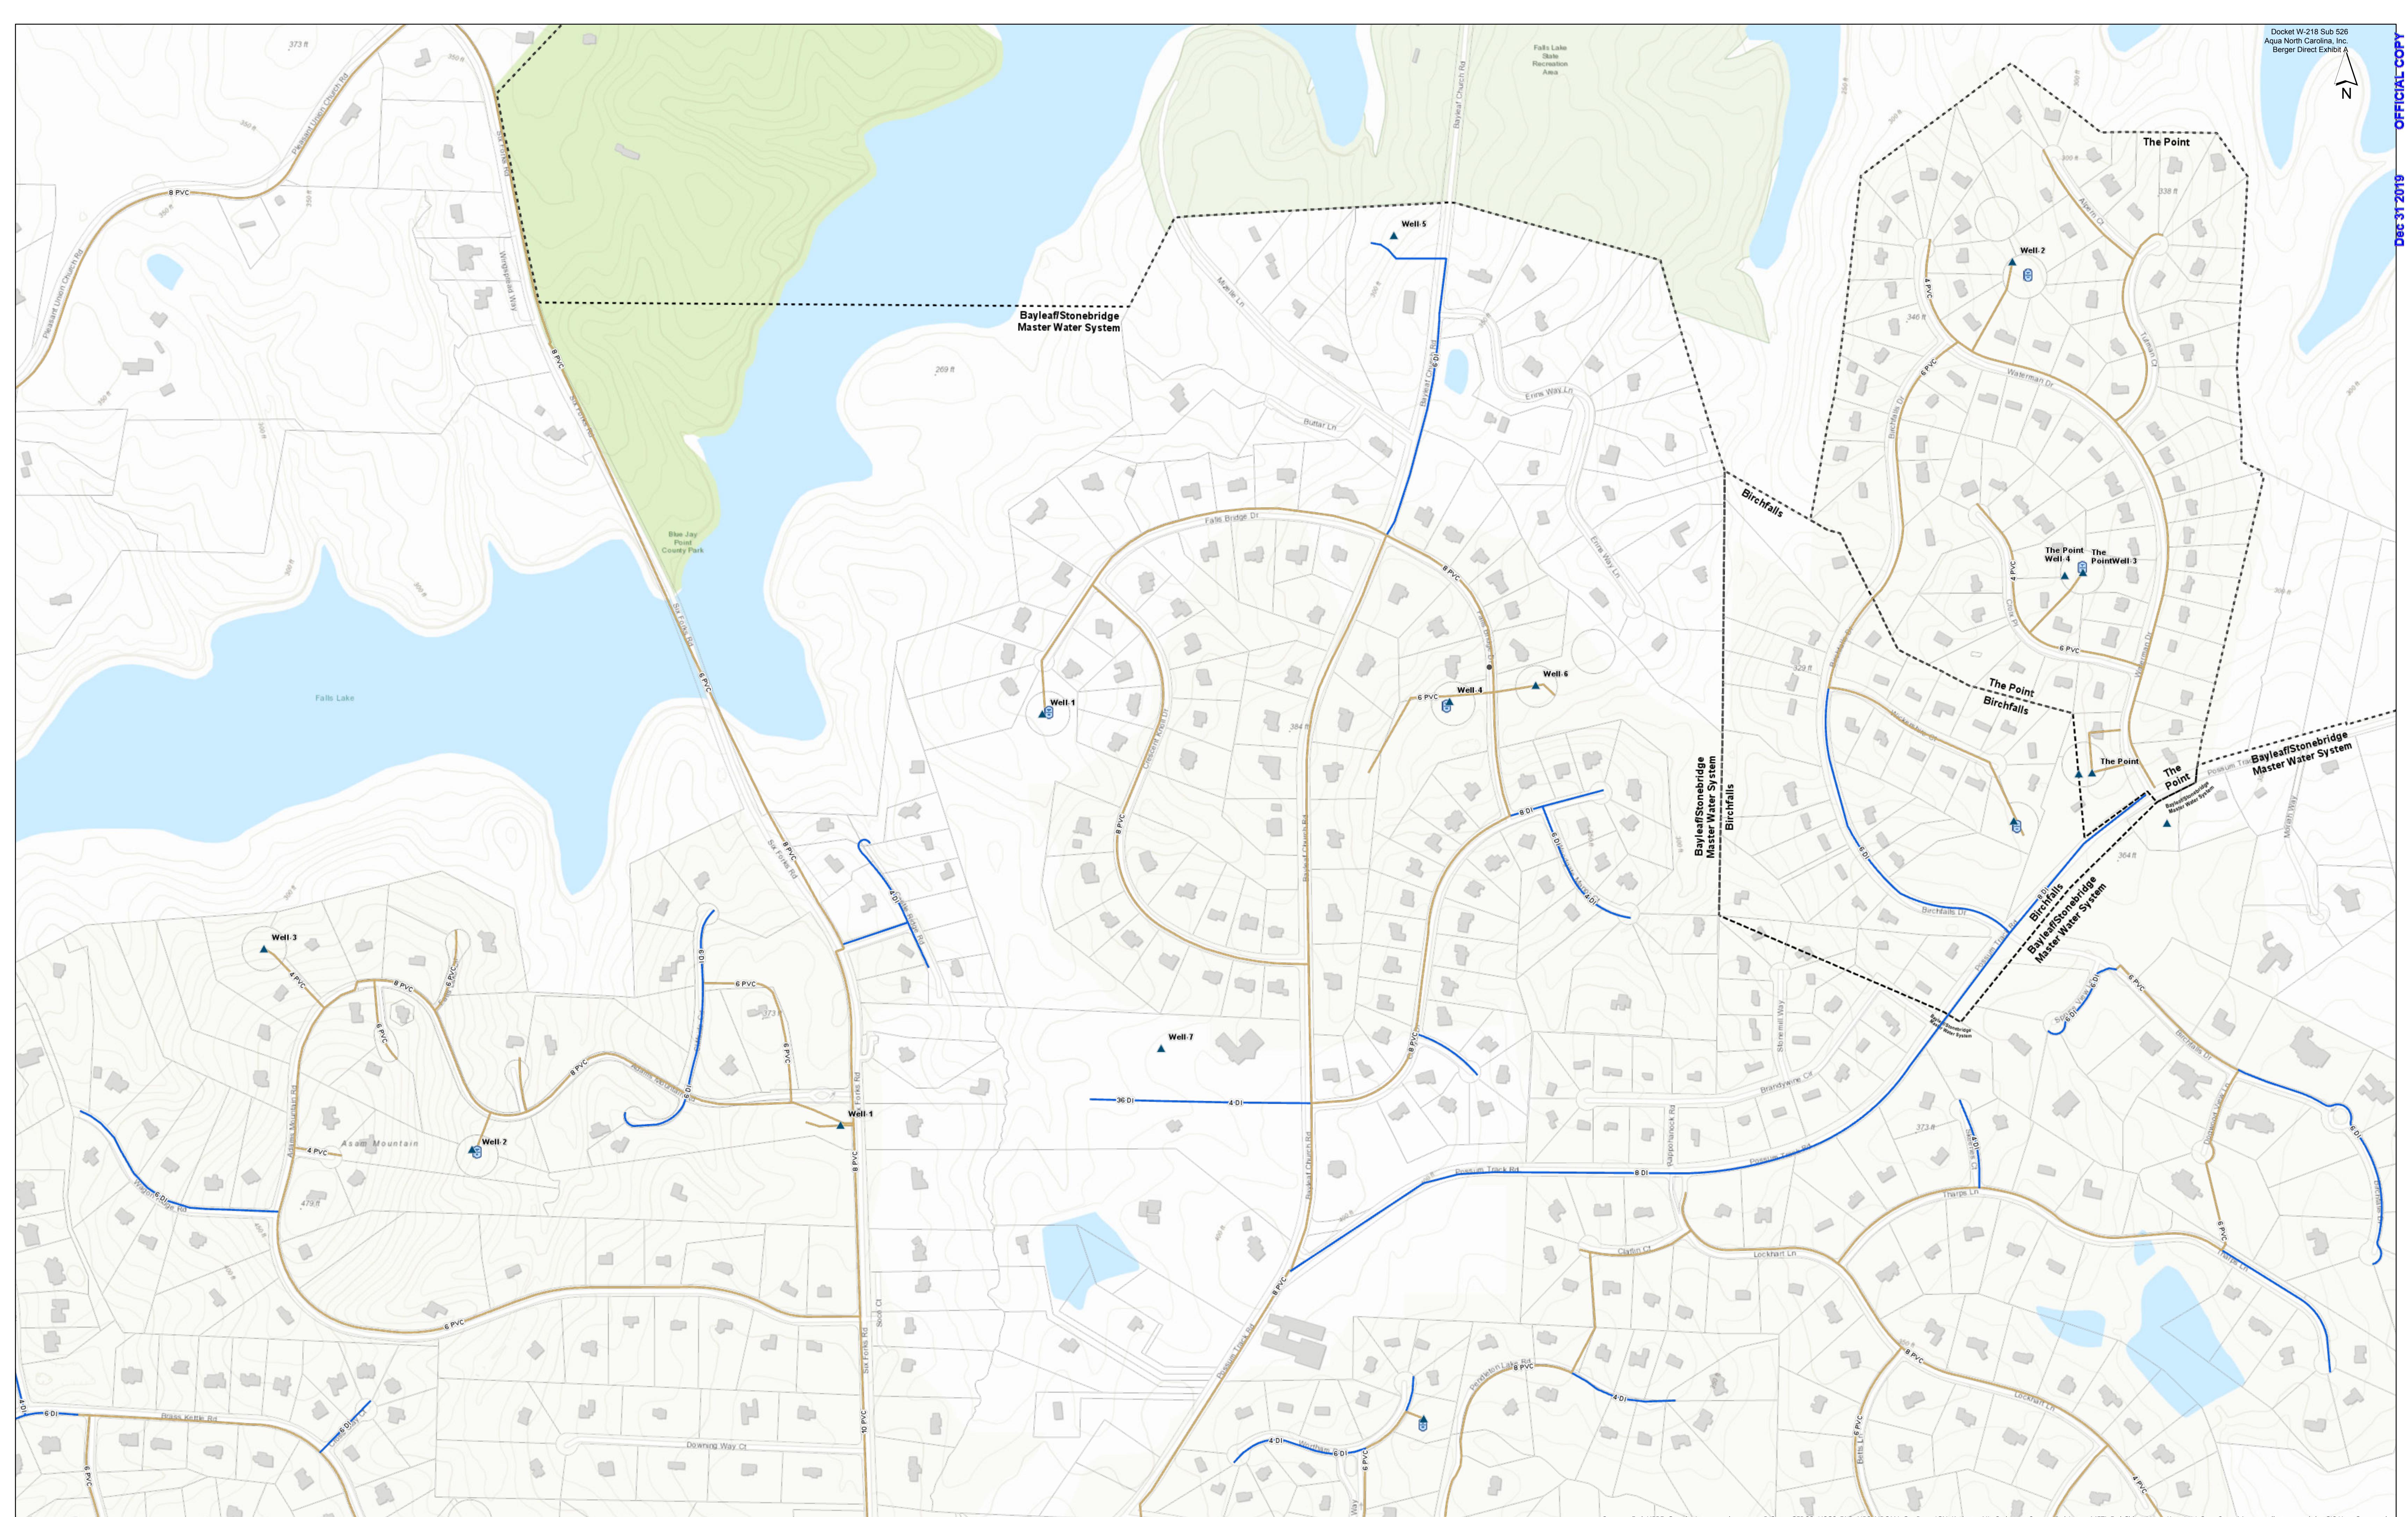

COST ESTIMATE						
Construct New Filter Buildings and Install AdEdge Filter Skids at CM #1&7 + Recycle, Sludge Management Systems						
TASK	DESCRIPTION	QTY	UNIT	UNIT COST	TOTAL	
1	CM Well #1 Filter Skid	1	LS	\$ 100,000	\$ 117,250	
2	BW Recycle System	1	LS	\$ 30,000	\$ 32,175	
3	Sludge Management System	1	LS	\$ 20,000	\$ 21,450	
4	CM Well #7 Filter Skid	1	LS	\$ 111,800	\$ 119,906	
5	BW Recycle System	1	LS	\$ 30,000	\$ 32,175	
6	Sludge Management System	1	LS	\$ 20,000	\$ 21,450	
	Construction of Filter House,					
7	Backwash Disposal System, Well House Upgrades - CM #1	1	LS	\$ 160,000	\$ 160,000	
	Construction of Filter House,					
8	Backwash Disposal System, Well House Upgrades - CM #7	1	LS	\$ 200,000	\$ 200,000	

9	Engineering & Construction Administration Costs	2	LS	\$	30,000	\$	60,000
12	Aqua Direct Cost @		5%			\$	38,220.28
13	Contingencies @		5%			\$	40,131.29
					TOTAL CAPITAL COSTS:	\$	842,757.06
14	AFUDC @		7%			\$	58,992.99
					TOTAL ESTIMATED PROJECT COSTS:	\$	901,750

Note: The above information is for planning purposes only and is subject to change based on further engineering evaluations, water quality analyses, site conditions, and other site-specific discoveries and information

3. Estimated annual operating and maintenance expenses: \$1,000.00
4. Comments: Mn levels at these wells are consistently greater than 0.3 mg/L which makes it one of Aqua's Group 1 Priority Secondary Water Quality Projects as per the 2018 Water Quality Plan. The elevated level of Mn also poses a health risk to customers that must be addressed. Aqua will use 273 (108+165) GPM as the treatment system design (max) flow rate.

For these reasons, Aqua proposes interconnecting Wells #1&7 and installing an AdEdge Iron (Fe) and Manganese (Mn) filter system to treat water at the new combined point of entry (POE) at Carlyle Manor Well #1, P49.

Re Well Water System
Carlyle at Falls Lake, Phase I
Bayleaf Master Water System
Wake County
ID #03-92-373

Dear Mr Grantmyre:

Enclosed please find one copy of the "Application for Approval" together with one copy of the referenced plans and specifications bearing the Division of Environmental Health stamp of approval and signature of the Public Water Supply Section Chief for the referenced project. These plans and specifications are approved under Division of Environmental Health serial number 98-01924, dated January 14, 1999.

Plans and specifications prepared by Don C Kennedy, P E , call for the construction of a well with a 73 gpm 15 horsepower motor Grundfos Model No 80S200-20 submersible pump, well house, chlorine, Aqua-Mag sequestering agent and caustic soda chemical feeding equipment, approximately 9,900 feet of 8-inch, 300 feet of 6-inch and 1,000 feet of 4-inch water mains, valves and other appurtenances to serve Carlyle at Falls Lake Subdivision, Phase I with 98 lots located off S R 2003 (Bayleaf Church Road) The plans also call for extending the existing distribution system of Bayleaf Master Water System by installing approximately 300 feet of 10-inch and 2,100 feet of 8-inch water mains with valves along S R 2005 (Honeycutt Road) and S R 2003 (Bayleaf Church Road) to tie into the water distribution system of Carlyle at Falls Lake Subdivision

Public water system rules require that a registered professional engineer verify that construction has been completed in accordance with these approved plans and specifications. In order to complete the approval of this project, please furnish us a copy of the engineer's verification affixed with his/her professional engineering seal immediately upon completion of construction. Customer connections shall not be made until the construction verification letter is received by this office.

One copy of each enclosed document is being forwarded to our Raleigh Regional Office. The third copy is being retained in our permanent files.

Cary, North Carolina 27519

Re: Engineering Plans and Specifications Approval
Well #4
Carlyle Subdivision
Bayleaf Master Water System
Wake County
I.D. # 03-92-373

This is not an Authorization to Construct

Dear Mr. Grantmyre:

Enclosed please find one copy of the "Application for Approval..." together with one copy of the referenced engineering plans and specifications bearing the Division of Environmental Health stamp of approval and signature of the Public Water Supply Section Chief for the referenced project. These engineering plans and specifications are approved under Division of Environmental Health serial number 02-00759, dated June 18, 2002.

Engineering plans and specifications prepared by Don C. Kennedy, P.E., call for the installation of a 44 gpm Well #4 with 10 hp submersible well pump, well house with well head piping assembly, liquid chlorination and polyphosphate chemical feed system, connection piping, valves and other appurtenances located off Falls Bridge Drive.

Please note that an "Authorization to Construct" requires both this approval of Engineering Plans and Specifications and submittal of a complete Engineer's Report and Water System Management Plan. No construction shall be undertaken, and no contract for construction, alteration, or installation shall be entered into until the Department issues an Authorization to Construct letter in accordance with 15A NCAC 18C .0305(a).

One copy of each enclosed document is being forwarded to our Raleigh Regional Office. The third copy is being retained in our permanent files.

If we can be of further service, please call on us at (919) 733-2321.

Sincerely,

A handwritten signature in black ink, appearing to read "J. Wayne Munden".

Re: Engineering Plans and Specifications Approval
Redrill of Carlyle Well #4 by
Aqua North Carolina
to serve Bayleaf Master Water System
Wake County
Water System No.: NC039273
Serial No.: 10-00480

This is not an Authorization to Construct

Dear Mr. Roberts:

Enclosed please find one copy of the "Application for Approval..." together with one copy of the referenced engineering plans and specifications bearing the Division of Environmental Health stamp of approval for the referenced project. These engineering plans and specifications are approved under serial number 10-00480, dated May 21, 2010.

Engineering plans and specifications prepared by Edward O. Sasser, Jr., P.E., call for the installation and construction of a re-drilled Carlyle Well #4, equipped with a 7.5-horsepower Goulds Model 40GS75 submersible pump, providing up to 38 gallons per minute (the 24-hour drawdown test demonstrated a yield of 57 gallons per minute). When completed, the Bayleaf Master system will have 120 wells approved to provide 5,784 gallons per minute, eight ground tanks providing 99,500 gallons of storage, six elevated tanks providing 1,750,000 gallons of storage and a distribution system serving up to 6,514 connections.

Please note that an "Authorization to Construct" requires both this approval of Engineering Plans and Specifications and submittal of a complete Water System Management Plan. No construction shall be undertaken, and no contract for construction, alteration, or installation shall be entered into until the Department issues an Authorization to Construct letter in accordance with 15A NCAC 18C.0305(a).

These plans and specifications cited in the foregoing application are approved insofar as the protection of public health is concerned as provided in the rules, standards and criteria adopted under the authority of Chapter 130A-317 of the General Statutes. This approval does not constitute a warranty of the design, construction or future operation of the water system.

Re: **Final Approval**
Final Approval Date: 6/23/2010
CARLYLE #4 (REDRILLED)
Serial No.: 10-00480
Water System No.: NC0392373
WAKE COUNTY

Dear Sir/Madam:

The Department received an engineer's certification statement and an applicant's certification statement concerning the above referenced project. The engineer's certification verifies that the construction of the referenced project has been completed in accordance with the engineering plans and specifications approved under Department Serial Number 10-00480. The applicant's certification verifies that an Operation and Maintenance Plan and Emergency Management Plan have been completed and are accessible to the operator on duty at all times and available to the Department upon request and that the system will have a certified operator as required by 15A NCAC 18C .1300.

The Department has determined that the requirements specified in 15A NCAC 18C .0303(a) and (c) have been met and, therefore, issues this **Final Approval** in accordance with Rule .0309(a).

If Public Water Supply can be of further service, please call (919) 733-2321.

Sincerely,

Tony C. Chen, P.E.

Re: Engineering Plans and Specifications Approval
Well # 6
Carlyle Subdivision
Bayleaf Master Water System
Heater Utilities, Inc.
Wake County
I.D.# 03-92-373

This is not an Authorization to Construct

Dear Mr. Grantmyre:

Enclosed please find one copy of the "Application for Approval..." together with one copy of the referenced engineering plans and specifications bearing the Division of Environmental Health stamp of approval and signature of the Public Water Supply Section Chief for the referenced project. These engineering plans and specifications are approved under Division of Environmental Health serial number 02-01593, dated January 3, 2003.

Engineering plans and specifications prepared by Don C. Kennedy, P.E., call for the installation of an 83 gpm Well # 6 with 15 hp submersible well pump, well house with well head piping assembly, liquid chlorination and polyphosphate chemical feed system, 4-inch connection water main, valves and other appurtenances located off Falls Bridge Drive.

We are not formally approving the use of the sequestration agent and its injection apparatus; however, we are allowing it to be tried in lieu of the installation of manganese removal equipment. Should the use of the sequestration agent and the injection apparatus not provide trouble-free, satisfactory water to the customers, it is the responsibility of the owner to submit to us for approval plans and specifications covering the necessary manganese removal equipment. After having gained approval, the equipment must be installed and operated without undue delays.

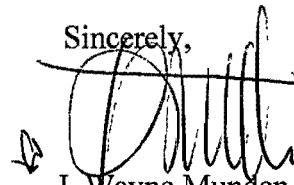

Page 2
Grantmyre
January 7, 2003

Please note that an "Authorization to Construct" requires both this approval of Engineering Plans and Specifications and submittal of a complete Engineer's Report and Water System Management Plan. No construction shall be undertaken, and no contract for construction, alteration, or installation shall be entered into until the Department issues an Authorization to Construct letter in accordance with 15A NCAC 18C .0305(a).

One copy of each enclosed document is being forwarded to our Raleigh Regional Office. The third copy is being retained in our permanent files.

If we can be of further service, please call on us at (919) 733-2460.

Sincerely,

J. Wayne Munden, P.E., Head

Re: Engineering Plans and Specifications Approval
New Well and Water Main Extension
Aqua North Carolina, Inc.
Bayleaf Master - Carlyle Well No. 7
Water System No: NC0392373, Wake County
Serial No.: 12-00820

Dear Mr. Roberts:

Enclosed please find one copy of the "Application for Approval..." together with one copy of the referenced engineering plans and specifications bearing the Division of Water Resources stamp of approval for the referenced project. These engineering plans and specifications for the new well and water main extension are approved under Serial Number 12-00820, dated December 10, 2012.

Engineering plans and specifications prepared by David Ridout, P.E., call for the construction of new water mains and one new well to serve the Bayleaf Master system in Wake County. The plans propose the following:

- One Goulds model 150L25 (25 HP) 145 GPM submersible pump at 474 feet TDH with the well yield capacity of 165 GPM, based on 24-hour drawdown test;
- One well house;
- Chlorine and polyphosphate chemical treatment by chemical feed pumps;
- Approximately 860 linear feet (LF) of four-inch water main from Well No. 7 to connect to the existing distribution system along Bayleaf Church Road;
- Valves, meter, chemical feed lines and other appurtenances.

Please note that an "Authorization to Construct" requires both this approval of Engineering Plans and Specifications and submittal of a complete Water System Management Plan. No construction shall be undertaken, and no contract for construction, alteration, or installation shall be entered into until the Department issues an Authorization to Construct letter in accordance with 15A NCAC 18C.0305(a).

The Public Water Supply Section (PWS Section) does not object to the use of a sequestration agent and its injection apparatus for iron and manganese. The PWS Section is allowing sequestration to be tried in lieu of the installation of iron and manganese removal equipment. Should the use of the sequestration agent and its injection apparatus not provide trouble free, satisfactory water to the customers, it is the responsibility of the owner to submit plans and specifications to the PWS Section that propose iron and manganese removal equipment.

Docket W-218 Sub 526
Aqua North Carolina, Inc.
Berger Direct Exhibit A

These plans and specifications cited in the foregoing application are approved insofar as the protection of public health is concerned as provided in the rules, standards and criteria adopted under the authority of Chapter 130A-317 of the General Statutes. This approval does not constitute a warranty of the design, construction or future operation of the water system.

One copy of each enclosed document is being forwarded to our Raleigh Regional Office. The third copy is being retained in our permanent files.

If Technical Services Branch of this Section can be of further service, please call (919) 707-9100.

Sincerely,

James Coats

NEW WELL INORGANIC CHEMICAL ANALYSIS

(continued)

WATER SYSTEM ID #: 03-92-373

Name of Water System: BAYLEAF

Facility ID No.: D01

Sample Point: TW7

Collection Date	Collection Time
10/13/10	02:28 pm

LABORATORY ID #: 37724

CONTAM CODE	CONTAMINANT	METHOD CODE	REQUIRED REPORTING LIMIT (R.R.L.)	NOT DETECTED (i.e < R.R.L.) (X)	QUANTIFIED RESULTS	ALLOWABLE LIMIT*
1915	Hardness	2340B	1 mg/L		153 mg/L	N/A
1925	pH	150.1	N/A	N/A	7.9 units	6.5-8.5 units
1927	Total Alkalinity as CaCO ₃	2320B	1 mg/L		160 mg/L	N/A
1930	Total Dissolved Solids	2540C	10 mg/L		160 mg/L	500 mg/L

*Note: Concentrations for Lead and Copper are action levels not MCLs.

	DATE:	TIME:
ANALYSES BEGUN:	10/14/2010	12:43 pm
ANALYSES COMPLETED:	10/25/2010	11:14 am

INORGANIC CHEMICAL ANALYSIS

WATER SYSTEM ID #: 03-92-373

County: Wake

Name of Water System: Bayleaf

Sample Type: Entry Point Special/Non-compliance

Location Where Collected: Well: 1(IOC) - CARLYLE MANOR(212) - END OF FALLS BRIDGE ROAD

Facility ID No: P49

Location Code: 049

Collected By: Don Wilson

Mail Results to:

Aqua NC - Cary (AQ002)

Attn: Mark English

202 MacKenan Court

Cary, NC 27511

Collection Date

08/04/14

Collection Time

11:30 am

Phone #: (919) 653-5779

Fax #: 0 -

LABORATORY ID #: 37724

SAMPLE UNSATISFACTORY

RESAMPLE REQUIRED
