Subject: Position on NC WARN and Greensboro Church

FILED
SEP 06 2016

Clerk's Office
N.C. Utilities Commission

I would like to understand the position of the NCUC on NC WARNS installation of solar power at Faith Community Church in Greensboro. This seems on the surface to be very anti consumer, and to be strictly to the benefit of a publically regulated monopoly Duke Energy, one that has caused tremendous ecological damage everywhere it operates. Please explain the commissions position and why a \$60K fine is deemed appropriate.

Sincerely,
Allen Mayers
