NC Utilities Commission:

In order to create a resilient energy economy, in a competitive marketplace, you must allow third party sales of renewable energy. Duke Energy should not have a monopoly on the energy that the citizens of North Carolina depend on. Rule against Duke Energy in docket SP-100 Sub 31.

SP100 SUB 31

NC WARN should be able to sell solar electricity to a church. Don't cave in to the misguided executives at Duke energy who feel that the only way they can make a profit is by having a monopoly. That's un-American!

SP100 SUB 31

I believe the power from the sun is essentially free and therefor the church should be able to use solar panels and Duke should butt out. Duke has done things their way for so long. They say they can't afford to clean up their ash and spills. what have they done with their money, Bribe politicians??? Allow solar power and other clean and cheaper energy.

When we lived in Lincoln Co, we had a much larger house and moved to one with half the square footage. It costs as much or more for our electric bill to Duke now in Gaston Co, than it did to heat and light the one in Lincoln Co under Rutherford Electric.

Thanks,

Pat Wang

We do not support what Duke Energy is doing in this case.
