RE: NCUC Docket No. E-100 Sub 90  
NC GreenPower Board Appointments

Dear Ms. Jarvis:

Per the approved program plan, the North Carolina Utilities Commission (NCUC) issued an order on August 31, 2018 accepting nominations to appoint two Director's seats to NC GreenPower's Board of Directors. The appointment term for each seat will be for three years. Listed below are the individuals and their respective seats that expired on September 30, 2018:

Chris Larsen	Solar/Wind Technology Representative
Beth Ritter	Environmental/Consumer Advocate

At the April 8, 2004 Board of Directors meeting, the NC GreenPower Board passed a motion to provide input to the NCUC regarding nominations for NC GreenPower Board appointments. It was passed that the Executive Committee of the NC GreenPower Board would serve as a Nominating Committee for the Board and would discuss the qualifications of the submitted candidates. The Nominating Committee would send to the NCUC a list of any preferred individuals with the appropriate experience, including the current Director in the seat if he/she is interested in continuing to serve.

After careful consideration, the Executive Committee recommends appointing Chris Larsen to the Solar/Wind Technology seat and Beth Ritter to the Environmental/Consumer Advocate seat based on their expertise, past involvement and familiarity with NC GreenPower. While there are two vacant seats, we are not currently requesting that the NCUC repost to fill the Small Hydro Technology nor the Biomass Technology Representative seats.

NC GreenPower is pleased to have received nominations from such well-qualified candidates and respectfully requests the NCUC to consider the Nominating Committee's recommendation as they appoint the appropriate nominees.

Sincerely,

Vice President
