Dear North Carolina Utilities Commissioners,

The N.C. Utilities Commission should side with Faith Community Church and NC WARN and allow third party sales of renewable electricity. Also please work to eliminate laws that give Duke Energy a monopoly position over renewables and open the state to competition.

Take care,

I'd like to make it known that I do not support Duke Energy, their environmental policies, or their monopoly position in our great state. They are damaging our environment, our political climate, and our economy. I want there to be equal footing for renewable energy against these massively subsidized, quasi-legal, fat-cat monopolies.

Thank you,

Allow third parties, like Faith Community Church, to sell electricity in NC. If you represent the public, you must not allow monopolies to block progress. Please open the State to competition. Thank you!
