Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Timothy Steele

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

How disturbing but not surprising that these storage facilities and the pipeline be built in Robeson County, one of the most deprived and poorest counties in NC! I am ashamed for the shamelessness of Duke Energy and hope these projects can be stopped and renewable energy will win out!

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Dear North Carolina Utilities Commission,

As an educator in NC this adds an additional layer of financial burden. I have not received a raise for six years and doesn't seem likely again this year. While \$12 a month may seem insignificant it has a ripple effect for my monthly obligations. It has a negative impact on the state's economy as it reduces my spending. Make a decision that meets the needs of the majority of our families.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Richard Loeppert

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Geraldine Jove
7064 Harper Glen Rd
