Message

I am sensitive enough to EMF that I can usually tell when the wi-fi in the home is on or off. When it has been on for awhile, I often feel aches in my temporal lobes and can develop a slight headache. When the analog meter was replaced with an opt-out smart meter, I started feeling aches stronger than I do with just the wi-fi and more chronically even though the wi-fi is off. I paid Andrew McAfee from Raleigh ES to come do an EMF tracing on my home. We could find no measurable radiation from the opt-out smart meter, but he shared with me that I have not been the only one affected by one. It has helped for me to turn off circuit breakers to my bedroom at his recommendation and thus get deeper, more restorative sleep, but I still feel adversely affected by the opt-out smart meter. I request to be allowed to use an analog meter. Thank you.
