Subject: Docket E-100 Sub 140

Clerk's Office
North Carolina
Utilities Commission

BUILD SOLAR POWER COLLECTION SITES IN NORTH CAROLINA AS QUICKLY AS POSSIBLE!

Already the needs of our state population and the commercial institutions that employ and serve North Carolinians is greater than conventional electrical power meets. Duke Energy power production pollutes the air, soil and water. **STOP** Duke Energy! That corporation speaks as if they favor solar power production, but they do little to support its development and growth in our state. Force Duke to shut down its polluting methods while shifting to solar as soon as possible. If they don't comply, fine them heavily and cultivate a groundswell of public support to have their license to produce electricity cancelled.

This is an opportunity to reverse the antiquated methods of this state's major polluter so we can focus industry and service organizations to help us restore a clean environment!

To all our environmentally conscious friends: ***PASS THIS MESSAGE TO ALL !***
