RE: NCUC Docket No. E-100, Sub 90
NC GreenPower 50/50 Hybrid Pilot Program

Dear Ms. Jarvis:

At the July 13, 2017 NC GreenPower Board of Directors meeting, staff reviewed the activities and progress of the “50/50 Hybrid” Pilot Years 1, 2 and 3. Due to potential external market changes, staff recommended and the Board approved extending the 50/50 Hybrid Pilot for a fourth year to continue gathering data to analyze the impact of the Solar Schools initiative. This recommended Pilot Year 4 would conclude at the end of 2018 and a final summary report would be provided to the North Carolina Utilities Commission (NCUC) by December 31, 2018. Any changes to the program in 2018 due to external market factors will be brought promptly to the attention of the NCUC.

In NC GreenPower’s December 29, 2016 letter to the NCUC, we stated that a summary report on Pilot Year 3 of the 50/50 Hybrid Pilot program would be submitted to the NCUC by the end of December 2017; it remains our intent to submit this summary report in December as originally proposed.

NC GreenPower respectfully requests and appreciates the NCUC’s consideration to extend the 50/50 Hybrid Pilot as described.

Sincerely,

Victoria McCann
Vice President
