Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Scott Denham

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Jenn Hilliard

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

As a Duke Energy customer I believe that it should do everything it can to stop its use of fossil fuels and, instead, invest in renewable, clean energy sources. If there were a guarantee a rate hike would be used for this purpose I would support it and gladly contribute to a fund to help low income people afford the increase. However, without any plan or guarantee I am opposed to a rate hike.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Linda Peterson
404 Woodlark Ct
