Please conduct a full review of Duke Energy's proposed Anderson, SC natural gas plant. Expectations are that the rate payers will be socked with the cost of this new plant, while we are still not addressing efficiency and renewable options. Hydraulic fracturing uses massive amounts of clean water which it pollutes with toxic chemicals, and it releases methane into the atmosphere, contributing to global warming. We do not want to continue down this path while also saddling rate payers with more expense. Thank you!

Please, do a thorough review of the necessity for any new power plants before building a new natural gas plant in Anderson, SC. And look into ways to decrease demand for electricity! Fracking is horrendous for the environment and has polluted countless people's water.

Mr Finley -

I am writing on behalf of citizens concerned about potential Duke energy rate hikes, new fracking, and unnecessary power plants being built. Please conduct a full and transparent review of the Anderson, SC natural gas plant before it is built!

Thanks,
Jon Shain

Please do conduct a full and completely transparent review of the proposed natural gas plant in Anderson, SC before it becomes a fait d'accompli. Is it really needed? How will it affect rates in NC?

Action needs to be taken now before the plant is constructed and all of a sudden Duke requests a rate increase. We taxpayers should not be beholden to a monopoly that is building something not needed in this era of lowering energy usage and increasing use of renewable energy resources.

Thank you for your concern in this vital matter.

Sincerely,

Win Southworth
Asheville, NC

What is the point of spending a BILLION dollars for an energy plant that is not needed? I respectfully and firmly ask the NC Utilities Commission to conduct a complete and transparent review of the Anderson, SC natural gas plant BEFORE it is built! Especially as 70% of the cost is supposed to fall on the ratepayers. The total cost of fracking, the source of the gas for this plant, should also be taken into consideration. Fracking uses a lot of water, pollutes our ground water, destroys the land around it and adds pollution to the air. Please do a thorough review before the public.
Thank you.

We do not want to pay for the gas plant in Anderson, SC- not even in our state. Please review Duke Power's plans to build this plant and make us pay for it. This is a plant we don't even need. We need conservation and renewables which Duke fights only because they can't make millions from it. They claim all the usual against relying on renewables but it is all blather. They just want the money.
