Docket

E-2 sub 834

Message

Smart meters should include devices to reduce admissions at no cost to the consumer. Public Hearings should have been held before they were approved. Now people using Faraday covers to protect themselves are being told they are subject to fines for "tampering" and said devices will be removed! So, they install something that may harm us without protective devices to cut emissions 98% and then punish people for protecting themselves. Outrageous!
