Hello, I am writing again as a very concerned, and informed, citizen in Asheville, NC. I am urging Duke Energy to allow it's customers use of actual analog meters, instead of being forced to use "smart meters" or even worse their version of radio-off smart meters as an opt-out. THAT is a cop-out. Like other states that have gone through these reviews, including my HOME STATE of New Mexico, please require that Duke remove their requirement of a Doctor's Letter- that is version of being hazed and invaded upon regarding private medical records, Folks. I also request that Duke be required to remove the language from their implementation plan allowing them to unilaterally end a customer's right to opt-out of smart meters. Thank you for doing your part in protecting citizens and customers. We have a right to clean energy, and that includes the above. Yours Truly,  
Patti Elledge

I am requesting Duke to remove language in the proposed plan that allows Duke Energy to arbitrarily decide to discontinue the opt-out program by simply saying it's no longer "feasible." There should always be a way for people to avoid having a device forced upon them that puts dirty electricity on their home, causes many people immediate acute symptoms, can cause damage to the nervous system, the endocrine system and the immune system, and can cause cancer particularly those of us with autoimmune.
