### **Message**

I would like the right to be able to use a true MECHANICAL analog meter - no digital or electronic components at all. I am currently working to opt-out of Duke Energy's digital "smart meter" which I have personal health concerns about and they are making it very difficult to go up against a huge corporation. I would like to have a choice regarding what is installed on my home rather than being told I have to conform to what Duke Energy says is safe. Because Duke Energy has a monopoly on the power supply in the area that I live, I have no other options but to use their services. Please consider limiting their power of authority on what technology they deem as "safe" on my house as I'm an informed and educated consumer and appreciate having a choice in the matter. Thank you.
