Re: Docket No. EMP-110 Sub 0, *In the Matter of Application of Sumac Solar LLC for a Certificate of Public Convenience and Necessity to Construct a 120-MW Solar Facility in Bertie County, North Carolina – Second Updated Site Plan*

Dear Ms. Campbell:

Attached please find a revised site plan (Second Revised Schedule 6) for the proposed solar project in the above-referenced docket.

The Applicant has updated the site plan for the Project to remove from the proposed facility the westernmost parcel of land on the previous site plan (Parcel Number 6719588786, designated as “Block 1” on page 7 of the previously-filed site plan) and all associated equipment.

Through ongoing efforts to refine the design of the Sumac Solar facility, the Applicant has discovered an opportunity to remove a parcel from the planned project while maintaining the projected output of the facility. Parcel Number 6719588786 was selected for removal as it is located most closely to the Town of Windsor and residential land use. This is an example of the Applicant’s holistic approach to developing high quality solar facilities

Other than the removal of this parcel, the Second Updated Site plan is identical to the Updated Site Plan filed on May 5, 2020. Thank you.

Sincerely,

Ben Snowden
Counsel for Sumac Solar LLC
