*Clerk's Office
N.C. Utilities Commission*

Dear Mr. Finley:

I think that the NC Utilities Commission should review the proposed Anderson, SC natural gas plant proposed by Duke Energy.

Even though the proposed Anderson, SC plant is not physically located in North Carolina, and the NC Utilities Commission is not required to certify that it is in the public interest before it is built. Unless they are proactive and take discretionary action now, the Commission will not address the cost and necessity of the plant until construction is finished and Duke Energy asks the Commission for a rate increase to pay for construction.

North Carolina ratepayers would pay 70% of the cost of the plant.
I do not want to pay for this plant, nor do I want such an environmentally dangerous plant to be built.

Thank you for your time and attention.

Sincerely,
Mary Anne McDonald, DrPH, MA

Clerk's Office
N.C. Utilities Commission

Dear Ed Finley and NC Utilities Commission,

Please do not ignore the scientific community. Everyday ways of more sustainable energy are studied, utilized, and improved upon. Please do not let Duke build a gas-burning plant in Anderson, South Carolina. It is unethical and unlawful for them to do so with out your consent.

Please regulate the monopoly that is Duke. The rate payers are very limited in influence. Stand up for the air and water of North Carolina for today and your children's tomorrow.

Please do not support construction of the plant in Anderson, SC. I believe that the construction of this plant is too costly, and the environmental impacts from fracking are too great to allow this to happen. NCUC must use its discretionary authority to help protect ratepayers in North Carolina for years to come.

Please conduct a rigorous review of the Anderson, SC natural gas plant before it is built. Although this plant will not be located in NC, the rate increase will be felt here and affect all those using Duke's monopoly.
Please be diligent in protecting customers.

thank you,
Onja Bock

**Clerk's Office
N.C. Utilities Commission**

I request that the NC Utilities Commission conduct a full and thorough review, including detailed economic and environmental analyses, of the proposed Anderson, SC, plant. We need to examine the full costs and the justification for construction of an additional plant. Ratepayers are already being asked by Duke to pay the costs of coal ash cleanup, something the Utilities Commission should require Duke to pay for from its huge profits. By neglecting its responsibilities (and NC not regulating) for proper coal ash disposal, the company has liabilities which do NOT belong to the ratepayers.

Adding an unnecessary plant now without full and complete study as well as public input and public review is improper.

Take the action to require Duke Energy to justify ALL its actions and explain them to the public.

Thank you,
Beverley & Rufus Getzen
