E-7 Sub 1155

### Message

As a ratepayer and building professional in Western North Carolina, I cannot stress enough how much DEP's Residential New Construction Program has done to promote efficiency, save money, and reduce greenhouse gases. The incentive has produced quantifiable savings, and we have seen firsthand more savings in the DEP territory versus DEC where the incentive has been in place for several years. Having the incentives available in DEC territory would be good for residents of our state. I am asking the Commission to weigh in on this matter and to direct DEC and the gas utilities to come up with a solution that will allow this incentive to be available for DEC customers. Thank you, Nathan Monroe

I think this program should expand. it will encourage our customers to invest in additional energy saving items on there home. It also will encourage builders to build more energy efficient homes, which is good for the customer, the builder and the environment.
