NC Utilities Commission

Dear Utilities Commission,

When it comes to our electricity, I want to pay for the actual energy I use without unfair shifts in cost being proposed by Duke which would hike our rates.

Rate hike requests by Duke Energy Progress would not only force us to pay for the company's coal ash cleanup, but includes a grid improvement plan that is excessive: \$8.7 billion over ten years. Since the company earns a return on its infrastructure spending, "gold plating" grid improvements with unnecessary items makes our rates unaffordable.

That is why your oversight of the company's spending plan is essential. I agree with interveners who suggest this spending be dealt with elsewhere.

Additionally, the company's monthly customer charge is too high (\$14 a month before we even turn on a light). I agree with other parties it should be rolled back to \$11.15 a month.

I understand the company also has an obligation to its shareholders, but the return on equity the company is seeking is too high and could cost residential payers billions in unnecessary costs.

I hope you recognize consumer's interests and support the Public Staff's and other interveners' recommendations to trim the rate hike requests and to lower the return on equity to the 9.3% percent.

Docket Number: E-2 Sub 1219

Sincerely,

Mr. Walter J Zwaryczuk

NC Utilities Commission

Dear Utilities Commission,

When it comes to our electricity, I want to pay for the actual energy I use without unfair shifts in cost being proposed by Duke which would hike our rates.

Rate hike requests by Duke Energy Progress would not only force us to pay for the company's coal ash cleanup, but includes a grid improvement plan that is excessive: \$8.7 billion over ten years. Since the company earns a return on its infrastructure spending, "gold plating" grid improvements with unnecessary items makes our rates unaffordable.

That is why your oversight of the company's spending plan is essential. I agree with interveners who suggest this spending be dealt with elsewhere.

Additionally, the company's monthly customer charge is too high (\$14 a month before we even turn on a light). I agree with other parties it should be rolled back to \$11.15 a month.

I understand the company also has an obligation to its shareholders, but the return on equity the company is seeking is too high and could cost residential payers billions in unnecessary costs.

I hope you recognize consumer's interests and support the Public Staff's and other interveners' recommendations to trim the rate hike requests and to lower the return on equity to the 9.3% percent.

Docket Number: E-2 Sub 1219

Sincerely,

Mrs. Judith Coplea

Subject: NO to shift in Duke Energy Progress rates

Mar 5, 2020

NC Utilities Commission

Dear Utilities Commission,

I used to work for CP& L. WE cared for the customer and worked to provide superior service at low cost to eastern NC. Duke just works for profits. I so wish NC still had 2 electric companies.

When it comes to our electricity, I want to pay for the actual energy I use without unfair shifts in cost being proposed by Duke which would hike our rates.

Rate hike requests by Duke Energy Progress would not only force us to pay for the company's coal ash cleanup, but includes a grid improvement plan that is excessive: \$8.7 billion over ten years. Since the company earns a return on its infrastructure spending, "gold plating" grid improvements with unnecessary items makes our rates unaffordable.

That is why your oversight of the company's spending plan is essential. I agree with interveners who suggest this spending be dealt with elsewhere.

Additionally, the company's monthly customer charge is too high (\$14 a month before we even turn on a light). I agree with other parties it should be rolled back to \$11.15 a month or less.

I understand the company also has an obligation to its shareholders, but the return on equity the company is seeking is too high and could cost residential payers billions in unnecessary costs. I own stock in Duke. I do not support the rate shift or hikes.

I hope you recognize consumer's interests and support the Public Staff's and other interveners' recommendations to trim the rate hike requests and to lower the return on equity to the 9.3% percent.

NC Utilities Commission

Dear Utilities Commission,

When it comes to our electricity, I want to pay for the actual energy I use without unfair shifts in cost being proposed by Duke which would hike our rates.

Rate hike requests by Duke Energy Progress would not only force us to pay for the company's coal ash cleanup, but includes a grid improvement plan that is excessive: \$8.7 billion over ten years. Since the company earns a return on its infrastructure spending, "gold plating" grid improvements with unnecessary items makes our rates unaffordable.

That is why your oversight of the company's spending plan is essential. I agree with interveners who suggest this spending be dealt with elsewhere.

Additionally, the company's monthly customer charge is too high (\$14 a month before we even turn on a light). I agree with other parties it should be rolled back to \$11.15 a month.

I understand the company also has an obligation to its shareholders, but the return on equity the company is seeking is too high and could cost residential payers billions in unnecessary costs.

I hope you recognize consumer's interests and support the Public Staff's and other interveners' recommendations to trim the rate hike requests and to lower the return on equity to the 9.3% percent.

Docket Number: E-2 Sub 1219

Sincerely,

Mr. GLENN MEGANCK
