SP100 SUB 31

Hello-

It is imperative for the future wellbeing of our planet and to eliminate our dependence on fossil fuels. While Duke Energy is a trusted name in the Carolinas, they do not deserve to have a monopoly on power production and especially on Solar energy. The Republican controlled state government in North Carolina has already yielded to the power of this massive energy company and enough is enough. Duke's request to sanction the Black church in Greensboro is the lowest of lows. Show Duke Energy they have to answer to the people of our great state.

Sincerely,

Scott
