BEFORE THE

NORTH CAROLINA UTILITIES COMMISSION

DOMINION ENERGY, INC.

DOCKET NO. E-22, SUB 551 DOCKET NO. G-5, SUB 585

DIRECT TESTIMONY

OF

THOMAS F. FARRELL, II

JUNE 22, 2018

- Q. PLEASE STATE YOUR FULL NAME, BUSINESS ADDRESS, AND
 OCCUPATION.
- A. My name is Thomas F. Farrell, II, and my business address is 120 Tredegar
 Street, Richmond, Virginia 23219. I am Chairman, President and Chief
 Executive Officer of Dominion Energy, Inc. ("Dominion Energy").
- 6 Q. PLEASE STATE YOUR EDUCATIONAL BACKGROUND AND
 7 EXPERIENCE.
- I earned my undergraduate degree in economics in 1976 and my law degree in 8 A. 9 1979, both from the University of Virginia. I joined Dominion Energy in 1995 10 and have served as an officer of Dominion Energy and many of its subsidiaries. I served as Executive Vice President of Dominion Energy from 1999 to 2003 11 12 and President and Chief Operating Officer from January 2004 to December 2005. In January 2006, I was named President and Chief Executive Officer of 13 14 Dominion Energy and was elected Chairman of Dominion Energy's Board of 15 Directors in April 2007.
- 16In addition to my roles at Dominion Energy, I am the presiding director17of Altria Group Inc. and a member of the Board of Directors of AEGIS18Insurance Company. I also serve on the Board of Directors of the Edison19Electric Institute, of which I was Chairman from 2011 to 2012, and served as20chairman of the Institute of Nuclear Power Operations from 2013 to 2015.
- I am on the Board of Trustees of the Virginia Museum of Fine Arts and
 am Chairman of the Richmond Performing Arts Center. I am past Chairman of
 the Colonial Williamsburg Foundation and currently serve on its board. I am

also a past Chairman of the Board of Trustees of the Virginia Business Council.
 I am a former member of the University of Virginia Board of Visitors, where I
 served as Rector, and am the former Chairman of the Governor's Commission
 on Higher Education. I also served on the State Council of Higher Education
 for Virginia.

6 Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?

7 The purpose of my direct testimony is to provide an overview of the proposed A. 8 transaction whereby the parent of Public Service Company of North Carolina, 9 Inc. ("PSNC"), SCANA Corporation ("SCANA"), will become a wholly-10 owned subsidiary of Dominion Energy. I also will provide an overview of 11 Dominion Energy, affirm the commitments Dominion Energy is making as part 12 of its application in this proceeding ("Joint Application"), and discuss how the business combination will benefit PSNC, its customers, and the citizens of 13 14 North Carolina. It is my firm belief that the combination is in the public interest 15 and will benefit PSNC, its customers, and the State of North Carolina. The 16 combination will continue and support the State's economic development 17 efforts and its position as an excellent place to do business.

18 Q. HOW IS YOUR TESTIMONY ORGANIZED?

- 19 A. My testimony is organized as follows:
- 20 I. Merger summary
- 21 II. Dominion Energy's identity, management, and experience
- 22 III. Plan for future operations of PSNC and combination commitments and23 benefits

- 1
- IV. Conclusion

2		I. Merger Summary
3	Q.	PLEASE PROVIDE AN OVERVIEW OF THE COMBINATION.
4	A.	On January 2, 2018, Dominion Energy, Sedona Corp. ("Sedona"), and SCANA
5		entered into an Agreement and Plan of Merger ("Merger Agreement") setting
6		forth the terms of the merger. Sedona is a South Carolina corporation and a
7		wholly-owned subsidiary of Dominion Energy created solely to accomplish the
8		merger. Pursuant to the Merger Agreement, Sedona and SCANA will merge,
9		with SCANA being the surviving entity. PSNC is currently owned by SCANA.
10		After the combination, SCANA will become a wholly-owned subsidiary of
11		Dominion Energy, and PSNC will remain a direct, wholly-owned subsidiary of
12		SCANA and will continue to exist as a separate legal entity. Dominion Energy
13		Witness James R. Chapman will provide more details on the merger transaction.
14	Q.	HAS THE MERGER BEEN APPROVED BY DOMINION ENERGY'S
15		BOARD OF DIRECTORS?
16	А.	Yes. Dominion Energy's Board unanimously approved and authorized the
17		merger on January 2, 2018.
18		II. Dominion Energy's Identity, Management and Experience
10	Q.	PLEASE PROVIDE SOME BACKGROUND ABOUT DOMINION
20	×۰	ENERGY.
21	А.	Dominion Energy is one of the largest producers and transporters of electricity
22		and natural gas in the United States. As of December 31, 2017, Dominion

1 Energy's portfolio of assets included approximately 26,000 megawatts ("MW") 2 of electric generating capacity, 64,200 miles of electric transmission and distribution lines, and approximately 66,600 miles of natural gas transmission, 3 gathering, distribution, and storage pipelines. As of December 31, 2017, 4 5 Dominion Energy served nearly six million utility and retail energy customers 6 and operated one of the nation's largest underground natural gas storage systems, with approximately one trillion cubic feet of storage capacity. 7 Dominion Energy has approximately 16,200 full-time employees in the states 8 9 in which it operates. As a holding company, Dominion Energy owns direct and 10 indirect subsidiaries that in turn own the properties through which their 11 respective businesses are conducted.

- 12 Q. WHAT IS DOMINION ENERGY'S FINANCIAL STATUS?
- A. Dominion Energy has deep financial resources. As of December 31, 2017,
 Dominion Energy's assets totaled \$76.6 billion and revenues for the year ended
 in 2017 were \$12.6 billion. Additional details about Dominion Energy's
 financial status are addressed by Dominion Energy Witness Chapman.
- 17 Q. PLEASE BRIEFLY DESCRIBE DOMINION ENERGY'S STATE
 18 REGULATED PUBLIC UTILITIES.
- A. Dominion Energy operates four major state regulated electric and natural gas
 utilities: Virginia Electric and Power Company (which does business in
 Virginia under the name "Dominion Energy Virginia" and in North Carolina
 under the name "Dominion Energy North Carolina"); The East Ohio Gas
 Company (which does business under the name "Dominion Energy Ohio");

Hope Gas, Inc. (which does business under the name "Dominion Energy West Virginia"); and Questar Gas Company (which does business in Utah under the name "Dominion Energy Utah," in Wyoming under the name "Dominion Energy Wyoming," and in Idaho under the name "Dominion Energy Idaho").
Dominion Energy Witness Craig C. Wagstaff will address the operations of Dominion Energy's natural gas utilities.

1

2

3

4

5

6

Virginia Electric and Power Company is regulated in Virginia by the 7 8 Virginia State Corporation Commission and in North Carolina by this 9 Commission. Virginia Electric and Power Company generates, transmits, and 10 distributes electricity for sale in Virginia and North Carolina to approximately 11 2.6 million customer accounts. Virginia Electric and Power Company operates 12 approximately 19,925 MW of electric generation facilities, 6,600 miles of electric transmission lines, and approximately 57,000 miles of electric 13 14 Virginia Electric and Power Company's electric distribution lines. 15 transmission, and sales for resale, of electric power in interstate commerce are regulated by the Federal Energy Regulatory Commission. 16

17 Specific to North Carolina, Dominion Energy North Carolina has 18 provided electric service in this State since the late 1920s. Today Dominion 19 Energy North Carolina serves approximately 120,000 residential, commercial, 20 governmental, and industrial customers, with a service territory of about 9,200 21 square miles in northeastern North Carolina, including Roanoke Rapids, 22 Ahoskie, Williamston, Elizabeth City, and the Outer Banks. Dominion Energy 23 is committed to providing safe, reliable, and cost-effective service to, and being

2		forward to bringing that commitment to service and citizenship to the
3		communities served by PSNC.
4	Q.	WHAT VALUES DOES DOMINION ENERGY EMPLOY IN
5		CONNECTION WITH ITS OPERATIONS?
6	A.	Our mission at Dominion Energy is to serve our customers in a safe, reliable,
7		and cost-effective manner and to strengthen our communities, minimize
8		environmental impacts, reward our stockholders, and live our values. We
9		execute on that mission through a set of four core values:
10		• Safety is our highest priority – in the workplace and in the community.
11		The work we do can be challenging. Our fundamental goal is to send
12		every employee home every day with zero injuries and to keep the
13		communities in which we serve safe. PSNC can expect customer,
14		employee and public safety to be a priority for Dominion Energy.
15		• Excellence is our goal and expectation. We set high performance
16		standards and are committed to continuous improvement in all areas of
17		our business. The odds of long-term success improve when we go
18		beyond "good" and strive for "great." Our aim is not to be the biggest
19		energy company, just the best.
20		• Ethics, meaning integrity, corporate responsibility to the environment
21		and the community, and individual responsibility and accountability, go
22		hand-in-hand with bottom line results. We cannot and will not take

a good citizen of, the communities we serve in North Carolina, and we look

1

Ethical behavior matters, and our reputation depends on it.
Teamwork is a unifying outlook that transcends organizational

shortcuts to achieve our goals and fulfill our obligations to stakeholders.

Teamwork is a unifying outlook that transcends organizational
 boundaries and focuses on our shared mission and purpose. We know
 that strong, sustainable performance depends on how well we support
 each other in executing our business plan.

1

2

7 Q. HAS DOMINION ENERGY BEEN RECOGNIZED FOR ITS OPERATIONS 8 AND PERFORMANCE?

9 A. Yes, it has. Over the past several years, we have been recognized as either No. 10 1 or No. 2 on Fortune's list of "Most Admired" electric and gas 11 utilities. Among the reasons for that distinction is how we operate and maintain 12 our assets, invest and allocate owner capital, and enhance our culture of safety 13 and service. Dominion Energy has also been lauded as an excellent corporate 14 citizen with its inclusion among Forbes' "Just 100" - which recognizes a 15 variety of factors, including producing quality goods, treating customers well, 16 minimizing environmental impact, supporting the communities served, and 17 treating workers well. Part of that ethos as a good corporate citizen includes 18 how we treat military veterans. Dominion Energy has received the highest 19 honor from the U.S. Department of Defense for its support of employees who 20 serve in the National Guard or Reserve - the Employer Support Freedom 21 Award. We are routinely ranked among the top utilities by *Military Times Edge* 22 as "Best for Vets" for the energy sector, and each year GI Jobs places our 23 company as one of the Country's top "Military-Friendly Employers" and "Spouse-Friendly Employers." Our commitment to safety, ethics, excellence
 and teamwork has made Dominion Energy a successful company, and I look
 forward to PSNC being part of that success.

4 Q. PLEASE EXPAND ON DOMINION ENERGY'S COMMITMENT TO THE 5 COMMUNITIES IT SERVES.

6 A. Dominion Energy believes that it is important for the local utility to be a 7 contributor to, and an active participant in, the communities it serves. In 2017, 8 Dominion Energy and our philanthropic arm, the Dominion Energy Charitable 9 Foundation, awarded nearly \$28 million in charitable grants to about 2,000 10 nonprofit organizations in the states served by Dominion Energy companies. 11 Further, Dominion Energy employees donated more than 124,000 hours of 12 volunteer service to their communities. As another example of Dominion 13 Energy's commitment to the communities it serves, over the past 35 years, 14 Dominion Energy Virginia and Dominion Energy North Carolina have helped 15 nearly 800,000 families and individuals through payment assistance and 16 providing energy-saving upgrades at no charge, including weatherization 17 services, education, and outreach.

18 Supporting the men and women who have worn a U.S. military uniform 19 in service to their country is also an important priority for Dominion Energy. 20 From 2010 to 2017, Dominion Energy hired more than 1,000 veterans—almost 21 20% of new hires during that period. Approximately 1,665 Dominion Energy 22 employees are veterans, about 11.5% of our workforce. In 2017, Dominion 23 Energy hired 187 military veterans through its "Troops to Energy Jobs"

> Direct Testimony of Thomas F. Farrell, II Docket No. E-22, Sub 551 Docket No. G-5, Sub 585 Page 8 of 15

program to support the veterans' transition to civilian careers and address
Dominion Energy's need for skilled and disciplined workers. Additionally,
Dominion Energy supports our veteran employees by offering paid time off for
Guard and Reserve duty in addition to vacation and sick leave, extending
benefits to cover deployed reservists and their dependents, and paying a 100%
salary differential for up to five years for deployed military employees.

7 Q. HOW DOES DOMINION ENERGY FULFILL ITS COMMITMENT TO8 ENVIRONMENTAL SUSTAINABILITY?

9 A. In addition to complying with all applicable environmental laws and
10 regulations, Dominion Energy makes environmental concerns an integral part
11 of our planning and decision-making process and devotes substantial resources
12 to implementing effective environmental and sustainability programs. For
13 example, since 2008, Dominion Energy has reduced methane emissions
14 through years of taking increasingly stringent voluntary actions in our natural
15 gas operations.

16Dominion Energy incorporates environmental sustainability concepts in17the design of its newly constructed buildings as well. Two recent Dominion18Energy properties were constructed in Bridgeport, West Virginia for our19Dominion Energy Transmission, Inc. employees and in Boston Heights, Ohio20as an Ohio Training Center. Both properties achieved a LEED Silver status.1

¹ Leadership in Energy and Environmental Design ("LEED") is a green building rating system devised by the U.S. Green Building Council. LEED provides a framework to create healthy, highly efficient, and cost-saving green buildings.

1		Dominion Energy also makes significant investments to keep our
2		properties operating efficiently using the latest construction practices.
3	III.	Plan for Future Operations of PSNC and Combination Commitments
4		and Benefits
5	Q.	PLEASE DESCRIBE DOMINION ENERGY'S PLAN FOR OPERATING
6		PSNC FOLLOWING THE COMBINATION.
7	A.	Following the combination, Dominion Energy plans to operate PSNC in
8		substantially the same manner as it is operated today, enhanced by Dominion
9		Energy's broad and deep experience in the successful management of natural
10		gas systems. Dominion Energy intends the combination to be about growth,
11		and its gas utility subsidiaries, like PSNC, have a track record of providing safe,
12		reliable, and cost-effective service to customers while making prudent capital
13		investments required to grow and maintain their respective systems. Dominion
14		Energy Witness Wagstaff addresses the plans for operating PSNC in more
15		detail.
16	Q.	WILL THE COMMISSION RETAIN ITS REGULATORY AUTHORITY
17		OVER PSNC AND DOMINION ENERGY NORTH CAROLINA AFTER
18		THE MERGER?
19	A.	Yes, the Commission will continue to exercise its regulatory authority over
20		PSNC and Dominion Energy North Carolina after the merger, thereby ensuring
21		continued protection of the interests of North Carolina customers.

1 О. WILL THE COSTS OF THE COMBINATION BE PASSED TO 2 CUSTOMERS OF DOMINION ENERGY NORTH CAROLINA OR PSNC? 3 No. The combination will not have a net adverse impact on the rates and A. 4 services of Dominion Energy North Carolina or PSNC. No transaction fees, 5 integration costs, or any acquisition premium that will result from the 6 combination will be passed on to the customers of PSNC or Dominion Energy North Carolina. 7

8 Q. HOW WILL PSNC BENEFIT FROM BEING PART OF DOMINION9 ENERGY?

10 Dominion Energy has more than a century of extensive experience operating A. 11 electric and natural gas public utilities. Together, the major public utility 12 subsidiaries that I noted above currently serve over six million residential, commercial and industrial customers in regulated and retail markets. Dominion 13 14 Energy's experience in owning and operating its public utility subsidiaries 15 means that it comes to the merger with a deep understanding of the 16 responsibilities and general opportunities and challenges of current U.S. electric 17 and gas utilities. This directly applicable knowledge will benefit PSNC.

First, and as part of that experience and understanding, Dominion Energy's proven leadership team is unfailingly committed to the safe, reliable, cost-effective and environmentally responsible provision of utility services to its customers. That commitment will apply equally to its operation of PSNC once the transaction is consummated. Dominion Energy's regulated utilities, including Dominion Energy North Carolina, also share the same values as PSNC, including in addition to a focus on safe, reliable, and cost-effective service, a commitment to employees and the communities served, and integrity in all aspects of their businesses, as is attested to by both organizations' customer satisfaction ratings.

1

2

3

4

5

6 In addition, as discussed further in Dominion Energy Witness 7 Chapman's testimony, PSNC will benefit from ownership by Dominion Energy 8 due to Dominion Energy's great financial strength and buying power, its broad 9 expertise in business planning, and its focus on efficiency of business 10 operations over the long term.

11 As a result of the merger, PSNC's customers, communities, employees, 12 and regulators, as well as SCANA shareholders (many of whom are employees, retirees or other North Carolina citizens), will see numerous and significant 13 benefits, on both an immediate and a long-term basis, from ownership by 14 15 Dominion Energy. These benefits will include the advantages of a larger, more 16 diversified company, the retention of a strong corporate citizenship and 17 presence of PSNC in North Carolina, the shared values I described above, and 18 continued effective state regulation.

19 Q. IS DOMINION ENERGY MAKING ANY OTHER COMMITMENTS IN20 CONNECTION WITH THE MERGER?

A. Yes. As reflected in the Joint Application, Dominion Energy is making a
number of commitments that will benefit PSNC, its customers, and the

communities that it serves. Dominion Energy Witnesses Chapman and Wagstaff will discuss the majority of these commitments, all of which I affirm.

1

2

I do want to highlight a few of these commitments here in my direct testimony as particularly indicative of Dominion Energy's intention of making this merger a success for PSNC and its employees, customers, and communities. First, Dominion Energy will maintain PSNC's corporate headquarters in Gastonia, North Carolina. In addition, PSNC's workforce will be financially protected until January 1, 2020.

9 Upon closing of the merger, Dominion Energy intends that its board of 10 directors will take all necessary action, as soon as practical after the merger, to 11 appoint a mutually agreeable current member of the SCANA Board or 12 SCANA's executive management team as a director to serve on Dominion 13 Energy's board of directors.

PSNC's generous historical charitable giving levels—all funded by shareholders—also will be increased. Dominion Energy recognizes the significant role that public utilities play in the communities they serve, and will continue that role for PSNC going forward.

Finally and importantly, as I noted earlier, the combination will not have a net adverse impact on the rates and services of Dominion Energy North Carolina or PSNC. No transaction fees, integration costs, or any acquisition premium that will result from the combination will be passed on to the customers of PSNC or Dominion Energy North Carolina.

1		IV. Conclusion
2	Q.	WHAT OTHER WITNESSES ARE PRESENTING DIRECT TESTIMONY
3		ON BEHALF OF DOMINION ENERGY?
4	А.	The other witnesses presenting direct testimony on behalf of Dominion Energy
5		are Witnesses Wagstaff and Chapman.
6		Mr. Wagstaff is President – Gas Distribution, Gas Infrastructure Group
7		of Dominion Energy. He will provide testimony concerning how Dominion
8		Energy plans to operate PSNC following the combination, the operational
9		benefits of the combination to PSNC and its customers, and the commitments
10		Dominion Energy is making that relate to natural gas operational matters.
11		Mr. Chapman is Senior Vice President – Combinations and Acquisitions
12		and Treasurer of Dominion Energy. He will provide testimony concerning
13		financial information supporting the proposed combination. Mr. Chapman will
14		also discuss a number of additional commitments Dominion Energy has made,
15		and describe how Dominion Energy's financial strength will benefit PSNC and
16		its customers.
17		In addition, David Hunger, Vice President of Charles River Associates,
18		will testify regarding whether the merger will have adverse impacts on
19		wholesale or retail electricity and natural gas markets in North Carolina.
20	Q.	WHAT ARE YOU ASKING THE COMMISSION TO DO REGARDING
21		THE JOINT APPLICATION?
22	А.	The Merger Agreement is contingent upon the parties obtaining the necessary
23		regulatory approvals. Dominion Energy requests that the Commission approve
		Direct Testimony of Thomas F. Farrell, II

1		the merger and find it to be justified by the public convenience and necessary
2		as required by § 62-111(a) of the North Carolina General Statutes.
3	Q.	DO YOU HAVE ANY CONCLUDING REMARKS?
4	A.	Yes. Dominion Energy looks forward to being able to invest in the future of
5		PSNC, focusing on the objectives of safety, customer satisfaction, reliable
6		economic service, environmental stewardship, and collaborative and productive
7		relationships with customers, regulators and other governmental entities and

- 8 interested stakeholders.
- 9 Q. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
- 10 A. Yes, it does.

BEFORE THE

NORTH CAROLINA UTILITIES COMMISSION

SCANA CORPORATION

DOCKET NO. E-22, SUB 551 DOCKET NO. G-5, SUB 585

DIRECT TESTIMONY

OF

JIMMY E. ADDISON

JUNE 22, 2018

1	О.	PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND POSITION.
	•	

- A. My name is Jimmy E. Addison and my business address is 220 Operation Way,
 Cayce, South Carolina. I am the Chief Executive Officer of SCANA
 Corporation ("SCANA") and each of its subsidiaries, including Public Service
 Company of North Carolina, Inc. ("PSNC") and South Carolina Electric & Gas
 Company ("SCE&G").
- 7 Q. PLEASE DESCRIBE YOUR EDUCATION AND BUSINESS8 BACKGROUND.
- 9 A. I have a Bachelor of Science Degree in Business Administration and a Master of 10 Accountancy Degree from the University of South Carolina and am a Certified 11 Public Accountant in South Carolina. Before joining SCANA in March 1991, I 12 was employed for seven years as an Audit Manager by the certified public 13 accounting firm Deloitte & Touche, and then became a partner in the public 14 accounting firm Hughes, Boan and Addison. I assumed my current positions with 15 SCANA on January 1, 2018. Before that, I served as Executive Vice President and Chief Financial Officer for SCANA and its subsidiaries. 16
- 17 Q. HAVE YOU EVER TESTIFIED BEFORE THIS COMMISSION?
- 18 A. Yes. I presented testimony in each of PSNC's last three rate cases, Docket No.
- 19 G-5, Sub 481, filed in 2006, Docket No. G-5, Sub 495, filed in 2008, and Docket
- 20 No. G-5, Sub 565, filed in 2016.

Q. WHAT IS THE PURPOSE OF THE TESTIMONY YOU ARE PRESENTING IN THIS PROCEEDING?

- A. The purpose of my testimony is to describe the proposed combination of
 SCANA and Dominion Energy, Inc. ("Dominion Energy"), which would result
 in SCANA becoming a wholly-owned subsidiary of Dominion Energy. I will
 outline the terms of the proposed merger, provide background on the merger
 transaction, and discuss in general terms why the merger is in the public interest
 and should be approved.
- 9 Q. WHAT OTHER WITNESSES ARE PRESENTING DIRECT TESTIMONY10 ON BEHALF OF SCANA?
- A. D. Russell Harris, President and Chief Operating Officer of PSNC, will provide
 background information concerning PSNC and will address the benefits of the
 merger from PSNC's perspective.
- 14 Q. PLEASE DESCRIBE THE MERGER AGREEMENT ENTERED INTO BY15 SCANA AND DOMINION ENERGY.
- A. On January 2, 2018, SCANA and Dominion Energy entered into an Agreement
 and Plan of Merger ("Merger Agreement"), a copy of which is attached to the
 Joint Application as Exhibit 1. Under the terms of the Merger Agreement,
 Sedona Corp. ("Sedona"), a South Carolina corporation and wholly-owned
 subsidiary of Dominion Energy, will be merged into SCANA; Sedona will
 cease to exist and SCANA will survive as a wholly-owned subsidiary of
 Dominion Energy; and each share of SCANA's common stock issued and

- outstanding will be converted into 0.6690 shares of Dominion Energy common
 stock.
- 3 Q. WHEN THE MERGER IS COMPLETED WHAT WILL HAPPEN TO PSNC?
- A. PSNC will remain a direct, wholly-owned subsidiary of SCANA and will
 continue to exist as a separate legal entity.
- 6 Q. WHAT ARE SCANA AND DOMINION ENERGY ASKING THE7 COMMISSION TO DO IN THIS PROCEEDING?
- A. The Merger Agreement is contingent upon the parties obtaining the necessary
 regulatory approvals. We are asking the Commission to approve the merger
 and find it to be justified by the public convenience and necessity as required
 by Section 62-111(a) of the General Statutes of North Carolina, which provides
 that all mergers or combinations affecting or resulting in a change of control of
 a public utility must be approved by the Commission.
- 14 Q. WHAT OTHER REGULATORY APPROVALS ARE NECESSARY TO15 CLOSE THE PROPOSED MERGER?
- 16 A. The Merger Agreement identifies the following required regulatory approvals,
 17 each of which must be obtained as a condition for consummating the merger:
- Expiration or early termination of the 30-day waiting period under
 the federal Hart-Scott-Rodino Antitrust Improvements Act. The
 Federal Trade Commission granted early termination on February 1,
 2018.
- Issuance by the Federal Energy Regulatory Commission of an order
 authorizing the merger under Section 203 of the Federal Power Act.

- Issuance by the Nuclear Regulatory Commission of an order under
 Section 184 of the Atomic Energy Act consenting to the indirect
 transfer of control of existing licenses.
- Issuance by the Georgia Public Service Commission ("GPSC") of
 an order approving the indirect change in ownership of SCANA
 subsidiary SCANA Energy Marketing, Inc., a natural gas marketer
 in Georgia. The GPSC issued its order of approval on March 22,
 2018.

9 The Merger Agreement also has a condition requiring that the Public Service 10 Commission of South Carolina ("PSCSC") issue an order that approves the 11 merger or makes certain findings regarding the merger and, in addition, 12 approves the proposed cost recovery plan with respect to SCE&G's 13 abandonment of its nuclear project, which I discuss further below.

14 Q. PLEASE DISCUSS THE EVENTS LEADING UP TO THE MERGER15 AGREEMENT.

16 A. The proposed merger arose out of a series of events related to SCE&G's 17 decision to abandon the project to construct and operate two nuclear units in 18 South Carolina. In March 2017, Westinghouse Electric Company, the primary 19 contractor for the project, filed for bankruptcy with the intent of invalidating 20 the price and performance guarantees it had agreed to in the contract to 21 construct the project. When SCE&G's co-owner subsequently announced that 22 it had decided to cease all funding for the nuclear project, SCE&G determined 23 that it would not be prudent to proceed with construction without a partner to

1		share costs and risks. On August 1, 2017, SCE&G filed a petition asking the
2		PSCSC to review matters raised by the decision to abandon the nuclear project,
3		but withdrew the petition two weeks later under pressure from Governor
4		McMaster, legislative leaders, and others.
5		On September 26, 2017, the South Carolina Office of Regulatory Staff
6		filed a petition with the PSCSC seeking an immediate order reducing SCE&G's
7		rates by \$445 million annually and eliminating all rate recovery associated with
8		the nuclear project. As SCE&G indicated in its filings in that matter, granting
9		such a request could have led to the rapid economic deterioration of SCE&G
10		and SCANA.
11		During the summer and early fall of 2017, SCE&G sought to engage
12		South Carolina leadership in negotiations to resolve the nuclear abandonment
13		issues. On November 16, 2017, SCE&G presented to the public a rate and
14		regulatory plan to resolve these issues. This proposal was not received
15		favorably and, during the following weeks, SCE&G concluded that it would not
16		be able to offer a settlement proposal on a standalone basis that would be well
17		received.
18	Q.	PLEASE DESCRIBE THE SUBSTANTIVE BUSINESS COMBINATION
19		DISCUSSIONS WITH DOMINION ENERGY.
20	A.	While Dominion Energy had initiated preliminary discussions with SCANA
21		about a possible combination in the summer of 2017, no substantive merger
22		discussions had resulted from those contacts. At a meeting with SCANA's
23		senior leaders on November 27, 2017, Dominion Energy Chief Executive

1		Officer Thomas Farrell described a possible resolution of SCE&G's nuclear
2		abandonment issues that Dominion Energy could provide and that would go far
3		beyond anything that SCE&G or SCANA could offer without undue financial
4		risk. SCANA's leadership team determined that Dominion Energy's proposed
5		solution should be seriously evaluated. SCANA's Board of Directors convened
6		two days later and concurred. Detailed negotiations ensued.
7		After conducting extensive due diligence and negotiation, SCE&G's
8		leadership presented a business combination agreement to SCANA's Board.
9		On January 2, 2018, SCANA's Board unanimously approved the agreement and
10		recommended its adoption by shareholders. The proposed merger with
11		Dominion Energy was announced the following day.
12	Q.	WHAT FACTORS DID SCANA'S BOARD CONSIDER IN MAKING ITS
13		DECISION TO APPROVE THE MERGER AGREEMENT?
14	A.	A key factor in the SCANA Board's approval of the Merger Agreement was
15		Dominion Energy's financial ability to address the impact of the nuclear project
16		abandonment. The Board also took into consideration many other factors. The
17		definitive proxy solicitation sets out the factors that were considered, both
18		positive and negative. After weighing all these factors, SCANA's Board
19		unanimously concluded that the Merger Agreement was in the best interests of
20		SCANA and its shareholders.

Direct Testimony of Jimmy E. Addison Docket No. E-22, Sub 551 Docket No. G-5, Sub 585 Page 6 of 7

Q. DO YOU HAVE AN OPINION AS TO WHETHER THE PROPOSED MERGER TRANSACTION IS IN THE PUBLIC INTEREST?

- A. Yes, I believe the transaction is in the public interest because of the potential
 benefits to the customers SCANA and its subsidiaries serve and the states and
 communities in which they operate.
- 6 Q COULD YOU ELABORATE ON THOSE BENEFITS?
- 7 Yes. From an overall SCANA perspective, the merger transaction will provide A. 8 the resources necessary to resolve the issues surrounding SCE&G's 9 abandonment of the nuclear project and remove the related regulatory and 10 political uncertainty that is causing SCANA's weakened financial condition 11 and that could result in further negative financial impacts on SCANA, including 12 possible bankruptcy. Moreover, SCANA will become part of a much larger 13 company with a considerably stronger balance sheet and access to greater 14 financial resources. The combined corporate organization also will have more 15 geographic and business diversity and will offer greater economies of scale in 16 providing or acquiring services to support the SCANA companies and their 17 customers. As I stated previously, Mr. Harris will address the benefits of the 18 proposed merger to PSNC specifically.
- 19 Q. DOES THIS CONCLUDE YOUR TESTIMONY?
- 20 A. Yes, it does.

BEFORE THE

NORTH CAROLINA UTILITIES COMMISSION

SCANA CORPORATION

DOCKET NO. E-22, SUB 551 DOCKET NO. G-5, SUB 585

DIRECT TESTIMONY

OF

D. RUSSELL HARRIS

JUNE 22, 2018

1	Q.	PLEASE STATE YOUR NAME, BUSINESS ADDRESS, AND POSITION.

- 2 My name is D. Russell Harris and my business address is 220 Operation Way, A. Cayce, South Carolina. I am Senior Vice President of Gas Distribution for 3 SCANA Corporation ("SCANA"). I serve as President and Chief Operating 4 5 Officer of Public Service Company of North Carolina, Inc. ("PSNC"), President 6 of Gas Operations for South Carolina Electric & Gas Company ("SCE&G"), 7 and President of SCANA Energy Marketing, Inc. ("SEMI"). These three 8 SCANA subsidiaries provide natural gas services to approximately 1.3 million customers in the states of North Carolina, South Carolina, and Georgia. 9
- 10 Q. PLEASE BRIEFLY OUTLINE YOUR EDUCATIONAL BACKGROUND11 AND PROFESSIONAL EXPERIENCE.
- A. I am a 1986 graduate of Clemson University with a Bachelor of Science in
 Electrical Engineering. In 1990, I received a Master of Business Administration
 from the University of South Carolina. Upon graduation from college, I began
 my career with SCANA working in SCE&G's electric operations. From 1986
 to 1992 I worked for SCE&G as a Customer Service Engineer and in 1992
 became District Manager Electric Operations. From 1997 to 2003 I served as
 Vice President Wires Operation for SCE&G.

For the past fifteen years, I have had management responsibilities over various aspects of SCANA subsidiaries' natural gas operations. In 2003, I became Vice President – Operations for PSNC and was promoted to President and Chief Operating Officer in January 2006. In 2012, I was named Senior Vice President of SCANA and in 2013 was given additional management responsibilities over SCE&G's Gas Operations and over SCANA's Gas
 Services Group. In 2014, I assumed management responsibilities over
 SCANA's Customer Services Group. On January 1, 2018, I became President
 of SEMI.

5 Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THIS COMMISSION?

- A. Yes. I presented testimony in each of PSNC's last three rate cases, Docket No.
 G-5, Sub 481, filed in 2006, Docket No. G-5, Sub 495, filed in 2008, and Docket
 No. G-5, Sub 565, filed in 2016.
- 9 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS10 PROCEEDING?
- A. The purpose of my testimony is to provide background on PSNC's operations,
 its relationship with SCANA, and its regulation by the Commission, and to
 describe how PSNC, its customers, and the communities it serves will benefit
 from the proposed merger of SCANA and Dominion Energy, Inc. ("Dominion
 Energy"). I am also co-sponsoring the Cost-Benefit Analysis attached to the
 Joint Application as Exhibit 4.
- 17 Q. PLEASE DESCRIBE PSNC'S UTILITY OPERATIONS.

A. PSNC is a North Carolina public utility engaged in the business of selling,
distributing, and transporting natural gas subject to this Commission's
jurisdiction. It was formed in 1938 when Gastonia businessman Charles B.
Zeigler merged two manufactured gas distribution companies that served 3,800
customers. PSNC now provides natural gas service to more than 550,000
customers in 96 cities, towns, and surrounding areas in a service territory that

comprises all or parts of 28 counties in North Carolina. PSNC's service
 territory includes the Raleigh/Durham/Chapel Hill, Asheville/Hendersonville,
 and Gastonia/Concord/Statesville areas. At the end of 2017, PSNC had 607
 miles of transmission mains and more than 22,000 miles of distribution mains
 and related service facilities.

6 Q. PLEASE DISCUSS PSNC'S RELATIONSHIP WITH SCANA.

7 In 2000, PSNC became a wholly-owned subsidiary of SCANA following the A. 8 Commission's approval of the merger transaction in Docket No. G-5, Sub 400. 9 At that time, SCANA Services, Inc. ("SCANA Services") was established as a 10 service company for the purpose of providing or arranging for services to 11 SCANA's subsidiaries pursuant to agreements setting forth the services 12 involved and addressing the allocation of costs. PSNC obtains many essential 13 services from SCANA Services, including information technology, 14 environmental, legal, accounting, tax, human resources, and risk management. 15 Although PSNC issues its own debt, it relies solely on SCANA for its equity financing. 16

17 Q. WHAT REGULATIONS GOVERN THE RELATIONSHIPS AMONG PSNC18 AND ITS SCANA AFFILIATES?

A. The Commission order approving PSNC's merger with SCANA included
regulatory conditions and a Code of Conduct intended to protect customers
from any adverse effects of the merger. The Code of Conduct sets forth rules
that govern transactions involving PSNC and its affiliates and includes
minimum guidelines concerning such things as separation of operations, non-

- its affiliates and to obtain Commission approval before paying compensation to an affiliate. For example, the Service Agreement between PSNC and SCANA Services, as well as four amendments to the agreement, have been filed with
- 7 Services, as well as four amendments to
- 8 and approved by the Commission.

and cost allocation.

1

2

3

4

5

6

9 Q. WHAT IS PSNC'S POSITION CONCERNING SCANA'S COMBINATION10 WITH DOMINION ENERGY?

disclosure of confidential system and customer information, nondiscrimination,

that require PSNC to file with the Commission agreements between PSNC and

These Commission-ordered requirements are in addition to state statutes

11 PSNC unreservedly supports the proposed merger because of the financial and A. 12 operational benefits it will receive as a member of the Dominion Energy family 13 of companies. Dominion Energy companies have an excellent record of 14 providing safe and reliable utility service and maintaining efficient and cost-15 effective utility operations. They are known for their exceptional customer 16 service. Dominion Energy has a reputation for supporting the communities it 17 serves and promoting economic development. Dominion Energy takes a long-18 term view of the utility business, investing in the people, facilities, and systems 19 needed to sustain the provision of outstanding utility service and to maintain 20 strong ties to local communities. In short, Dominion Energy offers many 21 advantages to PSNC and its customers.

Q. PLEASE DISCUSS THE BENEFITS TO PSNC ASSOCIATED WITH THE PROPOSED MERGER.

3 The benefits to PSNC from the proposed merger include those set forth in the A. 4 Cost-Benefit Analysis I am co-sponsoring. When the merger is completed, 5 PSNC will become part of a much larger corporate organization with more 6 geographic and business diversity and greater financial and operational scale. 7 PSNC will have access to an array of services provided by Dominion Energy's 8 centralized service company which, because of its larger size and buying power, 9 should provide cost advantages to PSNC over time. PSNC also will benefit 10 from the adoption of best practices across a broader range of service experience, 11 which should improve employee and public safety, customer service, and 12 operational cost-effectiveness.

13 Q. ARE THERE ANY ADDITIONAL BENEFITS OF THE MERGER?

A. Yes. The merger will enhance PSNC's ability to finance the investments
 necessary to continue providing safe, reliable, and cost-effective operations
 across a growing customer base. First, PSNC should have better access to
 equity capital through Dominion Energy's greater financial resources.

18 Moreover, the merger should positively affect PSNC's credit ratings. 19 PSNC currently has long-term issuer credit ratings of BBB from Standard & 20 Poor's and BBB- from Fitch Ratings, which reflect downgrades made on 21 September 29, 2017. These downgrades coincided with developments in 22 regulatory proceedings pending in South Carolina involving SCE&G's

	abandonment of nuclear units that were under construction, which is discussed
	in the direct testimony of SCANA witness Jimmy E. Addison.
Q.	HOW WILL THE MERGER AFFECT PSNC'S OPERATIONS?
A.	I do not anticipate any immediate or substantial changes to the way PSNC
	operates. Dominion Energy has indicated that, after the merger, PSNC will be
	managed as a separate regional business with responsibility for making
	decisions that achieve customer service, safety, reliability, and environmental
	objectives. Dominion Energy plans to keep PSNC's headquarters in Gastonia
	and to maintain field offices across PSNC's service territory.
Q.	HOW WILL THE MERGER AFFECT PSNC'S CUSTOMERS?
A.	The merger should appear seamless to our customers and they should continue
	to receive the safe and reliable service they have come to expect. The benefits
	that I previously discussed should have a positive impact on our customers.
	Furthermore, the merger will not adversely affect rates as none of the costs of
	the merger will be passed on to PSNC's customers.
Q.	HOW WILL THE MERGER AFFECT PSNC'S REGULATION BY THE
	COMMISSION?
A.	PSNC's provision of natural gas service will continue to be fully regulated by
	the Commission after the merger. PSNC expects to continue operating under
	regulatory conditions and a Code of Conduct as it has since the merger with
	SCANA. SCANA and Dominion Energy intend to make a supplemental filing
	in this proceeding of proposed regulatory conditions and a joint Code of
	Conduct for PSNC and Virginia Electric and Power Company, d/b/a Dominion
	A. Q. A.

- 1 Energy North Carolina, the existing Dominion Energy subsidiary also regulated
- 2 by the Commission. Additionally, PSNC will file any new affiliate agreements
- 3 with the Commission in accordance with state law.
- 4 Q. DOES THIS COMPLETE YOUR TESTIMONY?
- 5 A. Yes, it does.

BEFORE THE

NORTH CAROLINA UTILITIES COMMISSION

DOMINION ENERGY, INC.

DOCKET NO. E-22, SUB 551 DOCKET NO. G-5, SUB 585

DIRECT TESTIMONY

OF

CRAIG C. WAGSTAFF

JUNE 22, 2018

- Q. PLEASE STATE YOUR FULL NAME, BUSINESS ADDRESS, AND
 OCCUPATION.
- A. My name is Craig C. Wagstaff and my business address is 333 South State
 Street, Salt Lake City, Utah. I am President of Gas Distribution, Gas
 Infrastructure Group of Dominion Energy, Inc. ("Dominion Energy").
- 6 Q. PLEASE STATE YOUR EDUCATIONAL BACKGROUND AND
 7 EXPERIENCE.
- A. I am a graduate of the University of Utah and Weber State University. I also
 earned a master's degree in organizational leadership and business management
 from Gonzaga University and completed Southern Methodist University
 Business School's Energy Leadership Program.
- I joined Questar Gas Company in 1984 and held various leadership
 positions with Questar Gas Company throughout my career. I assumed my
 current position with Dominion Energy in 2017.
- In addition to my role at Dominion Energy, I serve on the Boards of
 Directors of the Western Energy Institute, Envision Utah, of which I am the
 Chair, and on the leadership council of the American Gas Association. I am
 also the past Chair of Junior Achievement Utah.
- I also serve on the advisory boards of the Women's Leadership Institute
 and the University of Utah's David Eccles School of Business. I am also on the
 Board of Trustees of EDCUtah and the Board of Governors of the Salt Lake
 Chamber.

1 Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THIS COMMISSION?

- 2 A. No, I have not previously testified before this Commission.
- 3 Q. ARE YOU SPONSORING ANY EXHIBITS IN THIS CASE?
- 4 A. Yes, I am sponsoring Exhibit 3 to the Joint Application.
- 5 Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?
- 6 A. My direct testimony describes Dominion Energy's natural gas operations in 7 support of the proposed transaction whereby the parent of Public Service Company of North Carolina, Inc. ("PSNC"), SCANA Corporation ("SCANA"), 8 9 will become a wholly-owned subsidiary of Dominion Energy. I also will 10 discuss how Dominion Energy plans to operate PSNC following the 11 combination, the operational benefits of the combination to PSNC and its 12 customers, and the commitments Dominion Energy is making that relate to 13 natural gas operational matters.
- 14 Q. HOW IS YOUR TESTIMONY ORGANIZED?
- 15 A. My testimony is organized as follows:
- 16 I. Dominion Energy's operations and values
- 17 II. Plan for operating PSNC after the combination
- 18 III. Operational benefits of the combination
- 19 IV. Conclusion

Direct Testimony of Craig C. Wagstaff Docket No. E-22, Sub 551 Docket No. G-5, Sub 585 Page 2 of 16

60	
Š	
ิณ	
5	

1		I. Dominion Energy's Operations and Values
2	Q.	PLEASE PROVIDE A GENERAL OVERVIEW OF DOMINION ENERGY'S
3		NATURAL GAS OPERATIONS.
4	A.	The Dominion Energy family of companies has been engaged in the business
5		of providing natural gas service to customers for more than a century. Over
6		those years, that legacy has expanded such that our portfolio of gas assets as of

December 31, 2017 included approximately 66,000 miles of natural gas
 transmission, gathering, distribution, and storage pipelines. Dominion Energy
 currently serves nearly six million utility and retail energy customers and has
 approximately 16,200 full-time employees in the states in which it operates.

Q. PLEASE DESCRIBE DOMINION ENERGY'S MAJOR REGULATED
 PUBLIC UTILITY SUBSIDIARIES THAT PROVIDE NATURAL GAS
 SERVICES.

A. Dominion Energy's major regulated public utility subsidiaries providing natural
gas services include The East Ohio Gas Company (which does business under
the name "Dominion Energy Ohio"), Hope Gas, Inc. (which does business
under the name "Dominion Energy West Virginia"), and Questar Gas Company
(which does business in Utah under the name "Dominion Energy Utah," in
Wyoming under the name "Dominion Energy Wyoming," and in Idaho under
the name "Dominion Energy Idaho").

The following summaries provide more detail about these subsidiaries:
Dominion Energy Ohio is regulated by the Public Utilities Commission

23

of Ohio and serves approximately 1.2 million retail natural gas

Jun 22 2018

distribution customers in more than 400 eastern and western Ohio communities, including the cities of Cleveland, Akron, Canton, Youngstown, Marietta and Lima. Dominion Energy Ohio operates 18,920 miles of distribution lines, approximately 3,000 miles of transmission, gathering, and storage lines, and 170 billion cubic feet of underground storage capacity.

1

2

3

4

5

6

- Dominion Energy West Virginia is regulated by the Public Service
 Commission of West Virginia and serves approximately 112,000 retail
 natural gas distribution customers in West Virginia, including the cities
 of Clarksburg, Parkersburg and Morgantown. Dominion Energy West
 Virginia operates 3,196 miles of distribution lines.
- 12 Dominion Energy Utah is regulated by the Public Service Commission 13 of Utah. The Idaho Public Utilities Commission has contracted with the 14 Public Service Commission of Utah for rate oversight of Dominion 15 Energy Idaho. Dominion Energy Wyoming is regulated by the 16 Wyoming Public Service Commission. Together, Questar Gas 17 Company serves over one million retail natural gas distribution 18 customers in Utah, Wyoming, and Idaho, and owns and operates 19 distribution systems and has approximately 29,647 miles of street 20 mains, service lines and interconnecting pipelines.

Q. HOW DOES DOMINION ENERGY MANAGE THE DAILY OPERATIONS OF ITS NATURAL GAS SUBSIDIARIES?

A. Although the assets of its subsidiaries remain wholly within those legal entities
 (each of which has its own officers, directors, and management teams),
 Dominion Energy manages and reports on its consolidated natural gas
 operations through the Gas Infrastructure Group operating segment.

7 The Gas Infrastructure Group operating segment includes Dominion 8 Energy's gas transmission, storage, and gathering operations, including 9 producer service activities, as well as its gas distribution and storage services. 10 The Gas Infrastructure Group serves approximately 2.3 million gas distribution 11 utility customers across the five local distribution companies operating in five 12 states discussed above.

13 The common leadership and management of the similarly situated 14 businesses that compose Dominion Energy's Gas Infrastructure Group 15 operating segment provide significant value to each of the individual businesses 16 through the sharing of best practices in such areas as operations, safety, 17 customer service, and environmental stewardship. In this way, each of 18 Dominion Energy's regulated natural gas subsidiaries benefits from the 19 experience and knowledge of the collective group, while day-to-day operations 20 and community engagement are managed at the state, regional and local level.

Q. PLEASE DESCRIBE DOMINION ENERGY'S REGIONAL AND LOCAL NATURAL GAS UTILITY STRUCTURE.

3 A. The Gas Infrastructure Group reports to the Dominion Energy headquarters in 4 Richmond, Virginia through 2 regional business units ("RBU"). The operations 5 in Ohio and West Virginia are managed by a RBU in Cleveland, Ohio, while 6 the operations in Utah, Wyoming and Idaho are managed by a RBU in Salt Lake City, Utah. These RBUs oversee the operations work activities and service 7 restoration efforts in the local offices in their respective states. There are 32 8 9 local offices in Ohio, 9 local offices and training facilities in West Virginia, 17 10 local offices and training facilities in Utah, and 3 local offices and training 11 facilities in Wyoming.

12 Q. DOES DOMINION ENERGY UTILIZE A SHARED SERVICES13 COMPANY?

14 A. Yes. Dominion Energy has a centralized service company, Dominion Energy 15 Services, Inc. ("DES"), through which the Dominion Energy businesses secure 16 necessary administrative and corporate services support. This shared services 17 organization provides expert and cost-effective service to the Dominion Energy 18 operating subsidiaries in such areas as information technology, cyber security, 19 environmental compliance, environmental permitting, supply chain. 20 accounting, legal matters, and media relations. Through centralization, 21 Dominion Energy's service company is able to create economies of scale and 22 provide a level of expertise, service, and resources more effectively and 23 efficiently than stand-alone departments at each subsidiary level would be able

1

2

to provide. As a result, Dominion Energy's service company promotes the provision of reliable and cost-effective service to customers.

SCANA currently employs a similar services company model through 3 SCANA Services, Inc. ("SCANA Services"). After the combination, it is 4 5 anticipated that PSNC will continue to receive some common services through SCANA Services and will benefit from other common services received from 6 DES. Over time, as part of the integration process, the corporate functions and 7 the staffing levels will be reviewed to determine those corporate functions that 8 9 will remain local to support business operations and those that will be 10 centralized into a common service company such that economies of scale consistent with Dominion Energy's size will reached. 11

12 WHAT VALUES DOES DOMINION ENERGY **EMPLOY** IN Q. 13 CONNECTION WITH ITS NATURAL GAS PUBLIC UTILITY 14 **OPERATIONS?**

A. As Dominion Energy Witness Thomas F. Farrell, II explains, Dominion
Energy's regulated natural gas utilities share the same values as PSNC,
including a focus on safe, reliable, and cost-effective service, a commitment to
employees and the communities served, and integrity in all aspects of their
businesses, as is attested to by both organizations' customer satisfaction ratings.
These values help focus our efforts on cost-effectively meeting our customers'
growing energy needs safely and reliably.

Q. PLEASE EXPAND ON DOMINION ENERGY'S COMMITMENT TO SAFETY.

A. Safety is one of Dominion Energy's core values. As a result, Dominion Energy
has one of the best safety records in the industry. For 2017, in more than 32
million hours worked, Dominion Energy employees recorded 96 workplace
OSHA-recordable injuries (an incidence rate of 0.60) and 47 workplace injuries
resulting in lost days or reassignment of duties (a rate of 0.29). Dominion
Energy's ultimate goal is zero injuries.

9 Q. WHAT ARE SOME OF THE SPECIFIC BEST PRACTICES DOMINION
10 ENERGY USES TO ACHIEVE SUCH FAVORABLE SAFETY RESULTS?

11 Dominion Energy has a safety culture. Practices like monthly safety calls, A. 12 beginning meetings with a safety minute, and training keep this principle in the forefront of employees' minds. Also, due to the organization of the Gas 13 14 Infrastructure Group, the RBUs are able to share best practices, which helps to 15 improve the safety performance for the entire organization. Dominion Energy 16 further emphasizes safety with safety-related bonus goals. Additionally, the 17 Dominion Energy natural gas utilities have shown their commitment to safety 18 by investing about \$300 million in capital each year for pipeline replacements 19 to ensure the integrity of their gas systems.

1	Q.	YOU HAVE MENTIONED DOMINION ENERGY'S COMMITMENT TO
2		CUSTOMER SERVICE. PLEASE PROVIDE SOME DETAIL ON THIS
3		ASPECT OF DOMINION ENERGY'S NATURAL GAS OPERATIONS.

4 A. Customers of regulated natural gas utilities expect safe and reliable service. The 5 natural gas utilities in the Gas Infrastructure Group respond to customers' outage-related service requests quickly - with particular emphasis on 6 Dominion Energy Ohio, Dominion Energy Utah, 7 emergency situations. Dominion Energy West Virginia, and Dominion Energy Wyoming measure and 8 9 report to their respective state Commissions on a number of customer service 10 metrics. A summary of two of these metrics is shown in the table below.

Customer Service	Ohio	Utah	WV	WY
Standards				
Emergency call response	98.9%	98.3%	95.7%	99.2%
within 60 minutes				
Customer Complaint	1.3 days	3 days	1 day	3.5 days
Resolution				

11

12 Q. CAN YOU HIGHLIGHT SOME EXAMPLES OF DOMINION ENERGY13 HELPING LOW-INCOME USERS OF NATURAL GAS?

A. Yes. Assisting low-income customers in the community is a priority for
Dominion Energy, as demonstrated by our significant contributions to programs
that help pay for the energy costs of low-income customers. For example,
EnergyShare in Ohio is a gas assistance program to help customers with their
heating bills once government assistance has expired. In Utah, the low income

assistance program provides \$1.5 million annually to help low-income
 customers with their winter heating bills.

3 Q. HOW DOES DOMINION ENERGY FULFILL ITS COMMITMENT TO 4 ENVIRONMENTAL SUSTAINABILTIY THROUGH ITS NATURAL GAS 5 OPERATIONS?

6 A. Since 2008, Dominion Energy has reduced methane emissions through 7 years of taking increasingly stringent voluntary actions in our natural gas 8 operations. We began by working on reducing our lost and unaccounted 9 for gas rate. More than five years ago, we joined EPA's Natural Gas 10 STAR program which emphasized best management practices to 11 voluntarily reduce methane emissions. Interested in further reducing our 12 methane emissions we joined Methane Challenge as a founding member. Collectively our efforts have resulted in an estimated savings of natural 13 14 gas of nearly 10 billion cubic feet. We have added additional initiatives 15 to continue a comprehensive methane strategy that will further reduce 16 methane emissions over the next five years at an even more rapid pace. Based on these programs, we estimate that by 2022, our efforts in these 17 18 programs already identified will result in an estimated savings of 19 19 billion cubic feet of natural gas.

> Direct Testimony of Craig C. Wagstaff Docket No. E-22, Sub 551 Docket No. G-5, Sub 585 Page 10 of 16

1			II.	Plan for Ope	rating PSN	C After t	he Co	ombination	
2	Q.	HOW	DOES	DOMINION	ENERGY	PLAN	ТО	OPERATE	PSNC
3		FOLLO	OWING '	THE COMBIN	ATION?				

4 A. Following the combination, Dominion Energy plans to operate PSNC in 5 substantially the same way as it is operated today, enhanced by Dominion 6 Energy's broad and deep experience in the successful management of natural gas systems. Like PSNC, Dominion Energy's natural gas utility subsidiaries 7 8 have a track record for making capital investments required to provide safe, 9 reliable, and cost-effective service to customers. Safety in the workplace and 10 in the community is Dominion Energy's highest priority. Dominion Energy 11 and PSNC also share a history of operating with integrity and a firm 12 commitment to their employees and the communities they serve. PSNC will continue to receive certain shared or common services provided to it as part of 13 14 a larger organization. Further, Dominion Energy intends to maintain PSNC's 15 customer service at no less than current levels and will strive for improvements 16 to such service.

17 Q. PLEASE ADDRESS PSNC'S ORGANIZATIONAL STRUCTURE AFTER18 THE COMBINATION.

A. Dominion Energy has no current plans to change the organizational structure of
 PSNC operations as a result of the combination. Exhibit 3 to the Joint
 Application contains charts showing the organization of Dominion Energy prior
 to (pages 1-4) and after (pages 5-9) the combination.

- Q. WILL THE COMMISSION CONTINUE TO EXERCISE ITS
 REGULATORY AUTHORITY OVER PSNC?
- A. Yes, the Commission will continue to exercise its regulatory authority over
 PSNC, thereby ensuring continued protection of the interests of North Carolina
 customers.
- 6 Q. IS DOMINION ENERGY WILLING TO MAKE COMMITMENTS AND TO
 7 PROVIDE ASSURANCES RELATING TO THE OPERATIONS OF PSNC?
- 8 A. Yes. I believe that the commitments I sponsor, as well as those sponsored by
 9 Dominion Energy Witnesses Farrell and James R. Chapman, will protect and
 10 benefit PSNC, its customers, and the State of North Carolina.
- Q. PLEASE SUMMARIZE THE COMMITMENTS DOMINION ENERGY IS
 WILLING TO MAKE RELATED TO THE FUTURE OPERATION OF
 PSNC.
- 14 A. I am sponsoring the following commitments of Dominion Energy related to the
 15 operations of PSNC following the combination:
- Dominion Energy intends to maintain PSNC's headquarters in
 Gastonia, North Carolina.
- Dominion Energy will manage PSNC from an operations standpoint as
 a separate regional business under Dominion Energy with responsibility
 for making decisions that achieve the objectives of customer
 satisfaction, reliable service, customer, public, and employee safety,
 environmental stewardship, and collaborative and productive
 relationships with customers, regulators, other governmental entities,

1		and interested stakeholders.
2	•	Dominion Energy will maintain PSNC's customer service at no less
3		than current levels and will strive for continued improvements.
4	•	Dominion Energy will not diminish PSNC's focus on installing,
5		upgrading, and maintaining facilities necessary for safe and reliable
6		operations.
7	•	Dominion Energy will maintain the pipeline integrity programs of
8		PSNC at or above current levels.
9	•	Dominion Energy commits to maintaining compensation levels for
10		employees of SCANA and its subsidiaries, including PSNC, following
11		the closing of the merger until January 1, 2020. Further, Dominion
12		Energy will give employees of SCANA and its subsidiaries, including
13		PSNC, due and fair consideration for other employment and promotion
14		opportunities within the larger Dominion Energy organization, both
15		inside and outside of North Carolina, to the extent any such employment
16		positions are re-aligned, reduced, or eliminated in the future as a result
17		of the combination.
18	•	Dominion Energy commits to increasing SCANA's historical level of
19		corporate contributions to charities identified by SCANA's leadership
20		by \$1,000,000 per year for at least five years after the closing of the
21		merger, and will maintain or increase historical levels of community
22		involvement, low-income funding, and economic development efforts

Jun 22 2018

1

in SCANA's current operation areas.

2 III. Operational Benefits of the Combination
3 Q. WHAT ARE THE OPERATIONAL BENEFITS OF THE COMBINATION
4 TO PSNC AND ITS CUSTOMERS?

A. PSNC will benefit from being part of a corporate organization that has enhanced
 geographic, business, and regulatory diversity, along with greater financial and
 operational scale. Dominion Energy has extensive experience in the natural gas
 industry and, through its energy subsidiaries, has an established record for
 formulating its policies and plans through customer or stakeholder processes.

10 As one of the largest and safest operators of energy infrastructure assets, 11 the combined company and its subsidiaries will benefit from the adoption of 12 best practices across an expanded platform of service, which stands to improve employee safety, increase customer service, and minimize operational costs. 13 14 For example, Dominion Energy brought its operational experience to Carolina 15 Gas Transmission Corporation, now known as Dominion Energy Carolina Gas 16 Transmission ("DECGT"), which it acquired in 2015. Since that time, DECGT 17 has continued its 18-year trend in reducing both the number and severity of 18 injuries. During that same time, contract pipeline capacity has increased to 19 South Carolina customers by 25%, with January 2018 serving as the highest 20 throughput month in DECGT's history.

21 Dominion Energy's operations also provide geographical diversity that 22 will strengthen SCANA and PSNC. A benefit of geographic diversity is that if 23 a natural disaster were to occur in PSNC's service area after the combination,

1		PSNC would have access to resources such as call centers, operations, and				
2		management outside the affected area that it can use to address the emergency.				
3		With an enhanced national presence, the combined company and its				
4		subsidiaries will benefit from having a relevant and informed perspective and				
5		effect on energy policy discussions that stand to positively affect the quality,				
6		safety, reliability, and cost of the services offered to customers.				
7	Q.	HAS DOMINION ENERGY DEMONSTRATED SUCCESS IN				
8		OPERATING UTILITY SUBSIDIARIES?				
9	A.	Yes. The operations of the utility subsidiaries of Dominion Energy provide				
10		demonstrable evidence that PSNC will continue its emphasis on key utility				
11		performance areas such as reasonable customer rates, reliable customer service,				
12		customer and employee safety, and commitment to employees and communities				
13		served. Dominion Energy and its subsidiaries also have a demonstrated history				
14		of emphasizing the importance of positive relationships with customers,				
15		regulators, legislators, and consumer representatives.				
16		IV. Conclusion				
17	Q.	WOULD YOU PLEASE SUMMARIZE YOUR TESTIMONY?				
18	A.	Yes. I have described Dominion Energy's commitment to the operations of our				
19		natural gas utility subsidiaries. Now Dominion Energy seeks to expand that				
20		commitment to include PSNC, its customers, and the communities that it serves.				
21		I have described the operating benefits of the combination for PSNC and those				
22		stakeholders, and have presented a series of specific operational commitments				

23 that will protect PSNC and this Commission's ability to regulate it in the public interest. These commitments will be of substantial value to the customers,
 employees, and communities served by PSNC as well as the State of North
 Carolina.

Dominion Energy and PSNC have a shared commitment to customer and employee safety, reliable and cost-effective service, environmental stewardship, and productive relationships with customers, regulators, other governmental entities, and interested stakeholders. We look forward to executing on these shared commitments.

9 Q. DOES THIS CONCLUDE YOUR TESTIMONY?

10 A. Yes, it does.

Jun 22 2018

BEFORE THE

NORTH CAROLINA UTILITIES COMMISSION

DOMINION ENERGY, INC.

DOCKET NO. E-22, SUB 551 DOCKET NO. G-5, SUB 585

DIRECT TESTIMONY

OF

JAMES R. CHAPMAN

JUNE 22, 2018

- Q. PLEASE STATE YOUR FULL NAME, BUSINESS ADDRESS, AND
 OCCUPATION.
- A. My name is James R. Chapman and my business address is 120 Tredegar Street,
 Richmond, Virginia 23219. I am Senior Vice President Mergers and
 Acquisitions and Treasurer of Dominion Energy, Inc. ("Dominion Energy").
- 6 Q. PLEASE STATE YOUR EDUCATIONAL BACKGROUND AND
 7 EXPERIENCE.
- 8 A. I earned a bachelor's degree in history and political science from Auburn
 9 University and a Masters of Business Administration from the University of
 10 Virginia's Darden School of Business.
- I joined Dominion Energy in September 2013 and was named to my 11 12 current post in February 2016. I have over 25 years of experience in corporate 13 finance, capital markets, and mergers and acquisitions, primarily in the power 14 and utility industry. Prior to joining Dominion Energy, I held roles including 15 managing director and head of Asia Pacific Power & Utilities Investment 16 Banking at Barclays, as well as similar senior roles at Barclays and its 17 predecessor firm, Lehman Brothers. In my career, I have worked with dozens 18 of power sector and utility companies with strategic and financing transactions 19 on five continents.
- I served on the Dean's Global Advisory Council at the Darden School of Business, am a strategic advisor to Virunga Power, a rural electric utility in East Africa, and am on the board of managers of Iroquois Gas Transmission System.

- A. Yes, I provided testimony before the Commission in support of Dominion
 Energy North Carolina's 2016 general rate case, Docket No. E-22, Sub 532.
- 4 Q. ARE YOU SPONSORING ANY EXHIBITS IN THIS CASE?
- A. I am sponsoring Exhibits JRC-1 and JRC-2, which are attached to my direct
 testimony, and am co-sponsoring the Cost-Benefit Analysis, which was filed as
 Exhibit 4 to the joint application ("Joint Application").
- 8 Q. WHAT IS THE PURPOSE OF YOUR DIRECT TESTIMONY?
- 9 A. My direct testimony explains the proposed transaction whereby the parent of
 10 Public Service Company of North Carolina, Inc. ("PSNC"), SCANA
 11 Corporation ("SCANA"), will become a wholly owned subsidiary of Dominion
 12 Energy. I also will provide financial information supporting the proposed
 13 business combination. In addition, I will discuss a number of additional
 14 commitments Dominion Energy has made, and describe how Dominion
 15 Energy's financial strength will benefit PSNC and its customers.
- 16 Q. HOW IS YOUR TESTIMONY ORGANIZED?
- 17 A. My testimony is organized as follows:
 - I. Description of the combination
- II. Dominion Energy's financial condition and anticipated results of thecombination
- 21 III. Additional financial commitments and benefits of the combination
- 22 IV. Conclusion

18

Jun 22 2018

1

Description of the Combination

2 Q. PLEASE DESCRIBE THE COMBINATION.

I.

3 On January 2, 2018, Dominion Energy, Sedona Corp. ("Sedona"), a South A. 4 Carolina corporation and a wholly-owned subsidiary of Dominion Energy 5 created solely to accomplish the merger, and SCANA entered into an 6 Agreement and Plan of Merger ("Merger Agreement") setting forth the terms of the merger. The use of an entity such as Sedona, created solely for this 7 purpose, is very common in transactions of this nature. A copy of the Merger 8 9 Agreement is attached to the Joint Application as Exhibit 1 and is sponsored by 10 SCANA Witness Jimmy E. Addison. Through the combination, Sedona and 11 SCANA will merge, with SCANA being the surviving entity, which will 12 continue as a wholly owned subsidiary of Dominion Energy.

13 Q. HOW WILL SCANA STOCK BE TREATED?

14A.As provided by the Merger Agreement, upon consummation of the merger, each15issued and outstanding share of common stock of SCANA (other than the16cancelled shares as defined in Section 2.01(b) of the Merger Agreement) will17be converted into the right to receive 0.6690 validly issued, fully paid and non-18assessable shares of common stock of Dominion Energy at the time of merger,19with cash to be paid in lieu of the issuance of any fractional share of Dominion20Energy common stock.

A. Upon consummation of the merger, each issued and outstanding share of
common stock of Sedona will be converted into one share of common stock of
SCANA as the surviving corporation. Thus, as a result of the combination,
Dominion Energy (which currently owns all the stock of Sedona) will own all
the stock of SCANA.

8 II. Dominion Energy's Financial Condition and Anticipated Results of the 9 Combination

10 Q. PLEASE DESCRIBE DOMINION ENERGY'S FINANCIAL CONDITION.

11 A. Dominion Energy is one of the nation's largest producers and transporters of 12 energy. Dominion Energy's common equity is publicly traded on the New York Stock Exchange under the ticker symbol "D" and, as of April 2018, had a public 13 14 equity market capitalization of over \$42 billion. Dominion Energy is a member 15 of prominent general and industry-specific equity market indices including the 16 S&P 500, the Dow Jones Composite Average, and the Philadelphia Stock 17 Exchange Utility Index. Dominion Energy's operations are heavily weighted 18 to state- and federally-regulated energy infrastructure operations, which in my 19 opinion are viewed favorably by many equity and debt investors for their stable 20 earnings and cash flows.

Dominion Energy's assets as of December 31, 2017, totaled \$76.6 billion; revenues in 2017 were \$12.6 billion; and net income attributable to Dominion Energy in 2017 was \$3.0 billion. Dominion Energy's financial statements are provided as part of the Dominion Energy 2017 Annual Report
 on Form 10-K ("Dominion Energy 10-K"), which I am sponsoring as Exhibit
 JRC-1.

Dominion Energy and its larger issuing utility subsidiaries are Well-4 5 Known Seasoned Issuers ("WKSI") under Securities and Exchange 6 Commission rules and are frequent issuers of public securities, and Dominion Energy's smaller utility subsidiaries are also frequent issuers of various types 7 of debt securities. Accordingly, we maintain regular dialogue with public 8 9 equity and debt investors as well as rating agencies. Dominion Energy also 10 maintains revolving credit facility capacity of \$6.0 billion with commitments 11 from 21 large domestic and international financial institutions that expire in 12 early 2023. Dominion Energy's liquidity, including total cash and cash equivalents at any one time, is typically well in excess of \$2.0 billion, and 13 excess availability under Dominion Energy's credit facilities at December 31, 14 15 2017 was approximately \$2.1 billion.

16 Q. WHAT ARE DOMINION ENERGY'S CURRENT CREDIT RATINGS?

A. Dominion Energy's predominantly stable regulated operations, strong access to
capital markets, ample liquidity, large scale, geographic and regulatory
diversity of operations, and experienced leadership team all contribute to its
strong investment grade profile. Upon announcement of the combination,
Moody's affirmed the ratings for Dominion Energy (Baa2) and revised its
outlook to negative from stable. S&P also affirmed its ratings for Dominion
Energy (BBB+ Issuer Rating) and also revised its rating outlook for Dominion

Energy and its rated subsidiaries to negative from stable. Fitch affirmed both its credit ratings (BBB+) and outlook (stable) for Dominion Energy. A summary of these credit ratings and recent actions are provided in Exhibit JRC-2.

5 Q. HOW DOES DOMINION ENERGY HANDLE FINANCING WITH 6 RESPECT TO ITS UTILITY SUBSIDIARIES THAT ISSUE PUBLIC 7 SECURITIES?

Dominion Energy's four issuing utility subsidiaries are Virginia Electric and 8 A. 9 Power Company, Dominion Energy Gas Holdings, LLC, Questar Gas 10 Company, and Dominion Energy Questar Pipeline, LLC, which are each 11 publicly rated and issue third-party debt. These entities are financed through a 12 combination of three sources: (i) operating cash flows; (ii) third-party debt; and (iii) intercompany debt and equity. Virginia Electric and Power Company, 13 14 Dominion Energy Gas Holdings, LLC, Questar Gas Company, and Dominion 15 Energy Questar Pipeline, LLC make financing decisions to maintain targeted 16 credit ratings. Each entity is operated and financed on an "arm's length" basis, 17 without the comingling of any assets or liabilities with either the parent 18 company or any other subsidiaries of Dominion Energy. Further, Dominion 19 Energy does not permit any lending of cash or other capital from a utility 20 subsidiary to any other entity within the Dominion Energy family (in other 21 words, there is no "money pool" for these regulated utility subsidiaries).

Q. HOW DOES DOMINION ENERGY PLAN TO HANDLE THE FINANCING
 OF PSNC FOLLOWING THE COMBINATION?

A. Dominion Energy views PSNC's existing capitalization as prudent and plans to
maintain PSNC's existing proportions of debt and equity capital, consistent
with existing regulatory guidelines. PSNC will remain a standalone, publicly
rated entity that issues debt, in line with current practices.

7 III. Additional Commitments and Benefits of the Combination

8 Q. IS DOMINION ENERGY MAKING ADDITIONAL FINANCE-RELATED

9 COMMITMENTS AND PROVIDING ASSURANCES THAT WILL

10 ADDRESS POTENTIAL CONCERNS OF THE COMMISSION AND

11 OTHER INTERESTED STAKEHOLDERS?

A. Yes. I believe that the commitments I sponsor, as well as those sponsored by
Dominion Energy Witnesses Thomas F. Farrell, II and Craig C. Wagstaff, will
protect and benefit PSNC, its customers, and the State of North Carolina.

15 Q. PLEASE LIST THESE COMMITMENTS.

- A. I am sponsoring the following additional commitments of Dominion Energy
 related to PSNC following the combination:
- Dominion Energy, through SCANA, will provide equity, as needed, to
 PSNC with the intent of maintaining PSNC's current capital structure
 and improving credit ratings;
- Dominion Energy intends to maintain credit metrics that are supportive
 of strong investment-grade credit ratings for PSNC; and

1		• PSNC and Dominion Energy North Carolina will not seek recovery of
2		any acquisition premium (goodwill) costs, transition costs, or
3		transaction costs associated with the combination from their customers.
4	Q.	ARE THERE ADDITIONAL FINANCIAL BENEFITS OF THE
5		COMBINATION FOR PSNC?
6	A.	Yes. In addition to the benefits provided to PSNC and its customers through
7		the commitments discussed above, Dominion Energy expects that the
8		combination will provide the following financial benefits:
9		• PSNC will benefit from being part of a corporate organization that has
10		enhanced geographic, business, and regulatory diversity and a greater
11		financial and operational scale;
12		• PSNC will ultimately benefit from participation in Dominion Energy's
13		service company model wherein each of Dominion Energy's operations
14		has access to an array of services, support, and economies of scale;
15		• PSNC will benefit by having an enhanced ability to finance capital
16		investments that ensure safe, reliable, and cost-effective operations
17		across a growing customer base; and
18		• Dominion Energy's long-term investment focus means that Dominion
19		Energy intends to own PSNC for the long term, lending stability to, and
20		confidence in, PSNC's continued commitment to providing safe,
21		reliable, and cost-effective natural gas services to its customers in North
22		Carolina.

Q. PLEASE ELABORATE ON HOW PSNC WILL BENEFIT FROM BEING
 PART OF A CORPORATE ORGANIZATION THAT HAS ENHANCED
 GEOGRAPHIC AND REGULATORY DIVERSITY AND GREATER
 FINANCIAL AND OPERATIONAL SCALE.

A. Upon completion of the merger, Dominion Energy and SCANA will serve
nearly 6.6 million total utility customers combined, and generate approximately
\$17 billion of total annual revenue. The combined company will own and
operate electric and gas utilities in 8 states across the Mid-Atlantic, Mid-West,
and the Intermountain West regions of the United States. Dominion Energy
anticipates that this will provide the following benefits:

- As a national franchise with geographic diversity, the combined
 company and its subsidiaries will benefit from reduced risk
 concentration associated with specific state and regional performance;
- As a diverse portfolio of operations across the energy spectrum, the
 combined company and its subsidiaries will also benefit from reduced
 risk concentration to specific industry, commodity, or regulatory trends;
 and
- As one of the largest and most active regulated energy infrastructure
 company participants in public equity and debt capital markets, the
 combined company and its subsidiaries will benefit from an enhanced
 ability to efficiently finance growth and reliability to the benefit of
 customers.

Jun 22 2018

1		IV. Conclusion
2	Q.	WOULD YOU PLEASE SUMMARIZE YOUR TESTIMONY?
3	A.	Yes. I believe that the proposed combination will bring benefits to PSNC, its
4		customers, and the State of North Carolina, and will serve the public interest.
5		PSNC and its customers will benefit from the enhanced scale of managerial and
6		financial resources that Dominion Energy will provide. PSNC will continue to
7		provide efficient, reliable, and safe service at a reasonable cost through the
8		various commitments made by Dominion Energy. Dominion Energy looks
9		forward to being able to invest in the future of PSNC.
10	Q.	DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?
11	A.	Yes, it does.

Kewaunee	Kewaunee nuclear power station
Keys Energy Project	Project to provide 107,000 Dths/day of firm transportation service from Cove Point's interconnect with Transco in Fairfax County, Virginia to Keys Energy Center, LLC's power generating facility in Prince George's County, Maryland
Kincaid	Kincaid power station
κV	Kilovolt
_eidy South Project	Project to provide 155,000 Dths/day of firm transportation service from Clinton County, Pennsylvania to Loudoun County, Virginia
Liability Management Exercise	Dominion exercise in 2014 to redeem certain debt and preferred securities
LIBOR	London Interbank Offered Rate
lFO	Last-in-first-out inventory method
Line TL-388	A 37-mile, 24-inch gathering pipeline extending from Texas Eastern, LP in Noble County, Ohio to its terminus at
	Dominion's Gilmore Station in Tuscarawas County, Ohio
iquefaction Project	A natural gas export/liquefaction facility currently under construction by Cove Point
NG	Liquefied natural gas
_ocal 50	International Brotherhood of Electrical Workers Local 50
_ocal 69	Local 69, Utility Workers Union of America, United Gas Workers
_ordstown Project	Project to provide 129,000 Dths/day of firm transportation service to the Lordstown power station in northeast Ohio
LTIP	Long-term incentive program
MAP 21 Act	Moving Ahead for Progress in the 21st Century Act
Massachusetts Municipal	Massachusetts Municipal Wholesale Electric Company
MATS	Utility Mercury and Air Toxics Standard Rule
ncf	Thousand cubic feet
ncfe	Thousand cubic feet equivalent
MD&A	Management's Discussion and Analysis of Financial Condition and Results of Operations
MGD	Million gallons a day
Villstone	Millstone nuclear power station
MISO	Midcontinent Independent System Operator, Inc.
MLP	Master limited partnership, also known as publicly traded partnership
Moody's	Mody's Investors Service
Morgans Corner	Morgans Corner Solar Energy, LLC
MW	Megawatt
//Wh	-
	Megawatt hour
NAAQS	National Ambient Air Quality Standards
NAV	Net asset value
NedPower	NedPower Mount Storm LLC, a wind-turbine facility joint venture between Dominion and Shell in Grant County, West Virginia
NEIL	Nuclear Electric Insurance Limited
NERC	North American Electric Reliability Corporation
NG	Collectively, North East Transmission Co., Inc. and National Grid IGTS Corp.
NGL	Natural gas liquid
NJNR	NJNR Pipeline Company
NO2	Nitrogen dioxide
North Anna	North Anna nuclear power station
North Carolina Commission	North Carolina Utilities Commission
Northern System	Collection of approximately 131 miles of various diameter natural gas pipelines in Ohio
NOX	Nitrogen oxide

Wexpro Agreement	An agreement effective August 1981, which sets forth the rights of Questar Gas to receive certain benefits from Wexpro's operations, including cost-of-service gas
Wexpro II Agreement	An agreement with the states of Utah and Wyoming modeled after the Wexpro Agreement that allows for the addition of properties under the cost-of-service methodology for the benefit of Questar Gas customers
Whitehouse	A 20 MW utility-scale solar power station in Louisa County, VA
Voodland	A 19 MW utility-scale solar power station in Isle of Wight County, VA
Wyoming Commission	Wyoming Public Service Commission

7

Part I

Item 1. Business

GENERAL

Dominion, headquartered in Richmond, Virginia and incorporated in Virginia in 1983, is one of the nation's largest producers and transporters of energy. Dominion's strategy is to be a leading provider of electricity, natural gas and related services to customers primarily in the eastern and Rocky Mountain regions of the U.S. As of December 31, 2016, Dominion's portfolio of assets includes approximately 26,400 MW of generating capacity, 6,600 miles of electric transmission lines, 57,600 miles of electric distribution lines, 14,900 miles of natural gas transmission, gathering and storage pipeline and 51,300 miles of gas distribution pipeline, exclusive of service lines. As of December 31, 2016, Dominion serves over 6 million utility and retail energy customers and operates one of the nation's largest underground natural gas storage systems, with approximately 1 trillion cubic feet of storage capacity.

In September 2016, Dominion completed the Dominion Questar Combination for total consideration of \$4.4 billion and Dominion Questar became a wholly-owned subsidiary of Dominion. Dominion Questar is a Rockies-based integrated natural gas company. Questar Gas, a whollyowned subsidiary of Dominion Questar, is consolidated by Dominion, and is a voluntary SEC filer. However, its Form 10-K is filed separately and is not combined herein.

In March 2014, Dominion formed Dominion Midstream, an MLP designed to grow a portfolio of natural gas terminaling, processing, storage, transportation and related assets. In October 2014, Dominion Midstream launched its initial public offering and issued 20,125,000 common units representing limited partner interests. Dominion has recently and may continue to investigate opportunities to acquire assets that meet its strategic objective for Dominion Midstream. At December 31, 2016, Dominion owns the general partner, 50.9% of the common and subordinated units and 37.5% of the convertible preferred interests in Dominion Midstream, which owns a preferred equity interest and the general partner interest in Cove Point, DCG, Questar Pipeline and a 25.93% noncontrolling partnership interest in Iroquois. Dominion Midstream is consolidated by Dominion, and is an SEC registrant. However, its Form 10-K is filed separately and is not combined herein.

Dominion is focused on expanding its investment in regulated electric generation, transmission and distribution and regulated natural gas transmission and distribution infrastructure. Dominion expects 80% to 90% of earnings from its primary operating segments to come from regulated and long-term contracted businesses.

Dominion continues to expand and improve its regulated and long-term contracted electric and natural gas businesses, in accordance with its existing five-year capital investment program. A major impetus for this program is to meet the anticipated increase in demand in its electric utility service territory. Other drivers for the capital investment program include the construction of infrastructure to handle the increase in natural gas production from the Marcellus and Utica Shale formations, to upgrade Dominion's gas and electric transmission and distribution networks, and to meet environmental requirements and standards set by various regulatory bodies. Investments in utilityscale solar generation are expected to be a focus in meeting such environmental requirements, particularly in Virginia. In September 2014, Dominion announced the formation of Atlantic Coast Pipeline. Atlantic Coast Pipeline is focused on constructing an approximately 600-mile natural gas pipeline running from West Virginia through Virginia to North Carolina, to increase natural gas supplies in the region.

Dominion has transitioned to a more regulated, less volatile earnings mix as evidenced by its capital investments in regulated infrastructure, including the Dominion Questar Combination, and in infrastructure whose output is sold under long-term purchase agreements as well as the sale of the electric retail energy marketing business in March 2014. Dominion's nonregulated operations include merchant generation, energy marketing and price risk management activities and natural gas retail energy marketing operations. Dominion's operations are conducted through various subsidiaries, including Virginia Power and Dominion Gas.

Virginia Power, headquartered in Richmond, Virginia and incorporated in Virginia in 1909 as a Virginia public service corporation, is a whollyowned subsidiary of Dominion and a regulated public utility that generates, transmits and distributes electricity for sale in Virginia and North Carolina. In Virginia, Virginia Power conducts business under the name "Dominion Virginia Power" and primarily serves retail customers. In North Carolina, it conducts business under the name "Dominion North Carolina Power" and serves retail customers located in the northeastem region of the state, excluding certain municipalities. In addition, Virginia Power sells electricity at wholesale prices to rural electric cooperatives, municipalities and into wholesale electricity markets. All of Virginia Power's stock is owned by Dominion.

Dominion Gas, a limited liability company formed in September 2013, is a wholly-owned subsidiary of Dominion and a holding company. It serves as the intermediate parent company for certain of Dominion's regulated natural gas operating subsidiaries, which conduct business activities through a regulated interstate natural gas transmission pipeline and underground storage system in the Northeast, mid-Atlantic and Midwest states, regulated gas transportation and distribution operations in Ohio, and gas gathering and processing activities primarily in West Virginia, Ohio and Pennsylvania. Dominion Gas' principal wholly-owned subsidiaries are DTI, East Ohio, DGP and Dominion Iroquois. DTI is an interstate natural gas transmission pipeline company serving a broad mix of customers such as local gas distribution companies, marketers, interstate and intrastate pipelines, electric power generators and natural gas producers. The DTI system links to other major pipelines and markets in the mid-Atlantic, Northeast, and Midwest including Dominion's Cove Point pipeline. DTI also operates one of the largest underground natural gas storage systems in the U.S. In August 2016, DTI transferred its gathering and processing facilities to DGP. East Ohio is a regulated natural gas distribution operation serving residential, commercial and industrial gas sales and transportation customers. Its service territory includes Cleveland, Akron, Canton, Youngstown and other eastern and western Ohio communities. In May 2016, Dominion Gas sold 0.65% of the noncontrolling partnership interest in Iroquois, a FERC-regulated interstate natural gas pipeline in New York and Connecticut, to TransCanada. At December 31, 2016, Dominion Gas holds a

24.07% noncontrolling partnership interest in Iroquois. All of Dominion Gas' membership interests are owned by Dominion.

Amounts and information disclosed for Dominion are inclusive of Virginia Power and/or Dominion Gas, where applicable.

EMPLOYEES

At December 31, 2016, Dominion had approximately 16,200 full-time employees, of which approximately 5,200 employees are subject to collective bargaining agreements. At December 31, 2016, Virginia Power had approximately 6,800 full-time employees, of which approximately 3,100 employees are subject to collective bargaining agreements. At December 31, 2016, Dominion Gas had approximately 2,800 full-time employees, of which approximately 2,000 employees are subject to collective bargaining agreements.

WHERE YOU CAN FIND MORE INFORMATION ABOUT THE COMPANIES

The Companies file their annual, quarterly and current reports, proxy statements and other information with the SEC. Their SEC filings are available to the public over the Internet at the SEC's website at http://www.sec.gov. You may also read and copy any document they file at the SEC's public reference room at 100 F Street, N.E., Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the public reference room.

The Companies make their SEC filings available, free of charge, including the annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports, through Dominion's internet website, http://www.dom.com, as soon as reasonably practicable after filing or furnishing the material to the SEC. Information contained on Dominion's website is not incorporated by reference in this report.

ACQUISITIONS AND DISPOSITIONS

Following are significant acquisitions and divestitures by the Companies during the last five years.

ACQUISITION OF DOMINION QUESTAR

In September 2016, Dominion completed the Dominion Questar Combination for total consideration of \$4.4 billion and Dominion Questar became a wholly-owned subsidiary of Dominion. In December 2016, Dominion contributed Questar Pipeline to Dominion Midstream. See Note 3 to the Consolidated Financial Statements and *Liquidity and Capital Resources* in Item 7. MD&A for additional information.

ACQUISITION OF WHOLLY- OWNED MERCHANT SOLAR PROJECTS

Throughout 2016, Dominion completed the acquisition of various whollyowned merchant solar projects in Virginia, North Carolina and South Carolina for \$32 million. The projects are expected to cost approximately \$425 million to construct, including the initial acquisition cost, and are expected to generate approximately 221 MW.

Throughout 2015, Dominion completed the acquisition of various wholly-owned merchant solar projects in California and Virginia for \$381 million. The projects cost \$588 million to construct, including the initial acquisition cost, and generate 182 MW.

Throughout 2014, Dominion completed the acquisition of various wholly-owned solar development projects in California for \$200 million. The projects cost \$578 million to construct, including the initial acquisition cost, and generate 179 MW.

See Note 3 to the Consolidated Financial Statements for additional information.

ACQUISITION OF NON-WHOLLY-OWNED MERCHANT SOLAR PROJECTS

In 2015, Dominion acquired 50% of the units in Four Brothers and Three Cedars from SunEdison for \$107 million. In November 2016, NRG acquired the 50% of units in Four Brothers and Three Cedars previously held by SunEdison. The facilities began commercial operations in the third quarter of 2016, with generating capacity of 530 MW, at a cost of \$1.1 billion. See Note 3 to the Consolidated Financial Statements for additional information.

SALE OF INTEREST IN MERCHANT SOLAR PROJECTS

In September 2015, Dominion signed an agreement to sell a noncontrolling interest (consisting of 33% of the equity interests) in all of its then whollyowned merchant solar projects, 24 solar projects totaling 425 MW, to SunEdison. In December 2015, the sale of interest in 15 of the solar projects closed for \$184 million with the sale of interest in the remaining projects completed in January 2016 for \$117 million. Upon closing, SunEdison sold its interest in these projects to Terra Nova Renewable Partners. See Note 3 to the Consolidated Financial Statements for additional information.

DOMINION MIDSTREAM ACQUISITION OF INTEREST IN IROQUOIS

In September 2015, Dominion Midstream acquired from NG and NJNR a 25.93% noncontrolling partnership interest in Iroquois. The investment was recorded at \$216 million based on the value of Dominion Midstream's common units at closing. The common units issued to NG and NJNR are reflected as noncontrolling interest in Dominion's Consolidated Financial Statements. See Note 3 to the Consolidated Financial Statements for additional information.

ACQUISITION OF DCG

In January 2015, Dominion completed the acquisition of 100% of the equity interests of DCG from SCANA Corporation for \$497 million in cash, as adjusted for working capital. In April 2015, Dominion contributed DCG to Dominion Midstream. See Note 3 to the Consolidated Financial Statements for additional information.

SALE OF ELECTRIC RETAIL ENERGY MARKETING BUSINESS

In March 2014, Dominion completed the sale of its electric retail energy marketing business. The proceeds were \$187 million, net of transaction costs. The sale of the electric retail energy marketing business did not qualify for discontinued operations classification. See Note 3 to the Consolidated Financial Statements for additional information.

SALE OF PIPELINES AND PIPELINE SYSTEMS

In March 2014, Dominion Gas sold the Northern System to an affiliate that subsequently sold the Northern System to Blue Racer for consideration of \$84 million. Dominion Gas' consideration consisted of \$17 million in cash proceeds and the extinguishment of affiliated current borrowings of \$67 million and Dominion's consideration consisted of cash proceeds of \$84 million.

In September 2013, DTI sold Line TL-388 to Blue Racer for \$75 million in cash proceeds.

In December 2012, East Ohio sold two pipeline systems to an affiliate for consideration of \$248 million. East Ohio's consideration consisted of \$61 million in cash proceeds and the extinguishment of affiliated long-term debt of \$187 million and Dominion's consideration consisted of a 50% interest in Blue Racer and cash proceeds of \$115 million.

See Note 9 to the Consolidated Financial Statements for additional information on sales of pipelines and pipeline systems.

ASSIGNMENTS OF SHALE DEVELOPMENT RIGHTS

In March 2015, Dominion Gas and a natural gas producer closed on an amendment to a December 2013 agreement, which included the immediate conveyance of approximately 9,000 acres of Marcellus Shale development rights and a two-year extension of the term of the original agreement. The conveyance of development rights resulted in the recognition of \$43 million of previously deferred revenue. In April 2016, Dominion Gas and the natural gas producer closed on an amendment to the agreement, which included the immediate conveyance of a 32% partial interest in the recognition of the remaining approximately 70,000 acres. This conveyance resulted in the recognition of the remaining \$35 million of previously deferred revenue.

Also in March 2015, Dominion Gas conveyed to a natural gas producer approximately 11,000 acres of Marcellus Shale development rights underneath one of its natural gas storage fields and received proceeds of \$27 million and an overriding royalty interest in gas produced from the acreage.

In September 2015, Dominion Gas closed on an agreement with a natural gas producer to convey approximately 16,000 acres of Utica and Point Pleasant Shale development rights underneath one of its natural gas storage fields. The agreement provided for a payment to Dominion Gas, subject to customary adjustments, of \$52 million and an overriding royalty interest in gas produced from the acreage.

In November 2014, Dominion Gas closed on an agreement with a natural gas producer to convey over time approximately 24,000 acres of Marcellus Shale development rights underneath one of its natural gas storage fields. The agreement provides for

payments to Dominion Gas, subject to customary adjustments, of approximately \$120 million over a period of four years, and an overriding royalty interest in gas produced from the acreage.

In December 2013, Dominion Gas closed on agreements with two natural gas producers to convey over time approximately 100,000 acres of Marcellus Shale development rights underneath several natural gas storage fields. The agreements provide for payments to Dominion Gas, subject to customary adjustments, of approximately \$200 million over a period of nine years, and an overriding royalty interest in gas produced from that acreage.

See Note 10 to the Consolidated Financial Statements for additional information on these sales of Marcellus acreage.

SALE OF BRAYTON POINT, KINCAID AND EQUITY METHOD INVESTMENT IN ELWOOD

In August 2013, Dominion completed the sale of Brayton Point, Kincaid and its equity method investment in Elwood to Energy Capital Partners and received proceeds of \$465 million, net of transaction costs. The historical results of Brayton Point's and Kincaid's operations are presented in discontinued operations.

OPERATING SEGMENTS

Dominion manages its daily operations through three primary operating segments: DVP, Dominion Generation and Dominion Energy. Dominion also reports a Corporate and Other segment, which includes its corporate, service company and other functions (including unallocated debt). In addition, Corporate and Other includes specific items attributable to Dominion's other operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

Virginia Power manages its daily operations through two primary operating segments: DVP and Dominion Generation. It also reports a Corporate and Other segment that primarily includes specific items attributable to its operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

Dominion Gas manages its daily operations through its primary operating segment: Dominion Energy. It also reports a Corporate and Other segment that primarily includes specific items attributable to its operating segment that are not included in profit measures evaluated by executive management in assessing the segment's performance or in allocating resources and the effect of certain items recorded at Dominion Gas as a result of Dominion's basis in the net assets contributed.

While daily operations are managed through the operating segments previously discussed, assets remain wholly-owned by the Companies and their respective legal subsidiaries. A description of the operations included in the Companies' primary operating segments is as follows:

Primary Operating			Virginia	Dominion
Segment	Description of Operations	Dominion	Power	Gas
DVP	Regulated electric distribution	х	Х	
	Regulated electric transmission	х	x	
Dominion Generation	Regulated electric fleet	х	Х	
	Merchant electric fleet	х		
Dominion Energy	Gas transmission and storage	X(1)		х
	Gas distribution and storage	x		х
	Gas gathering and processing	x		х
	LNG import and storage	х		
	Nonregulated retail energy marketing	х		

(1) Includes remaining producer services activities.

For additional financial information on operating segments, including revenues from external customers, see Note 25 to the Consolidated Financial Statements. For additional information on operating revenue related to the Companies' principal products and services, see Notes 2 and 4 to the Consolidated Financial Statements, which information is incorporated herein by reference.

DVP

The DVP Operating Segment of Dominion and Virginia Power includes Virginia Power's regulated electric transmission and distribution (including customer service) operations, which serve approximately 2.6 million residential, commercial, industrial and governmental customers in Virginia and North Carolina.

DVP's existing five-year investment plan includes spending approximately \$8.4 billion from 2017 through 2021 to upgrade or add new transmission and distribution lines, substations and other facilities to meet growing electricity demand within its service territory and maintain reliability and regulatory compliance. The proposed electric delivery infrastructure projects are intended to address both continued customer growth and increases in electricity consumption by the typical consumer. In addition, data centers continue to contribute to anticipated demand growth.

Revenue provided by electric distribution operations is based primarily on rates established by state regulatory authorities and state law. Variability in earnings is driven primarily by changes in rates, weather, customer growth and other factors impacting consumption such as the economy and energy conservation, in addition to operating and maintenance expenditures. Operationally, electric distribution continues to focus on improving service levels while striving to reduce costs and link investments to operational results. SAIDI performance results, excluding major events, were 137 minutes at the end of 2016, which is higher compared to the three-year average of 123 minutes, due to storm-related outages across all seasons. Virginia Power's overall customer satisfaction, however, improved year over year when compared to 2015 J.D. Power and Associates' scoring. In the future, safety, electric service reliability and customer service will remain key focus areas for electric distribution. Revenue provided by Virginia Power's electric transmission operations is based primarily on rates approved by FERC. The profitability of this business is dependent on its ability, through the rates it is permitted to charge, to recover costs and earn a reasonable return on its capital investments. Variability in earnings primarily results from changes in rates and the timing of property additions, retirements and depreciation.

Virginia Power is a member of PJM, a RTO, and its electric transmission facilities are integrated into PJM wholesale electricity markets. Consistent with the increased authority given to NERC by EPACT, Virginia Power's electric transmission operations are committed to meeting NERC standards, modernizing its infrastructure and maintaining superior system reliability. Virginia Power's electric transmission operations will continue to focus on safety, operational performance, NERC compliance and execution of PJM's RTEP.

COMPETITION

DVP Operating Segment—Dominion and Virginia Power

There is no competition for electric distribution service within Virginia Power's service territory in Virginia and North Carolina and no such competition is currently permitted. Historically, since its electric transmission facilities are integrated into PJM and electric transmission services are administered by PJM, there was no competition in relation to transmission service provided to customers within the PJM region. However, competition from non-incumbent PJM transmission owners for development, construction and ownership of certain transmission facilities in Virginia Power's service territory is now permitted pursuant to FERC Order 1000, subject to state and local siting and permitting approvals. This could result in additional competition to build and own transmission infrastructure in Virginia Power's service area in the future and could allow Dominion to seek opportunities to build and own facilities in other service territories.

REGULATION

DVP Operating Segment—Dominion and Virginia Power

Virginia Power's electric distribution service, including the rates it may charge to jurisdictional customers, is subject to regulation by the Virginia and North Carolina Commissions. Virginia Power's wholesale electric transmission rates, tariffs and terms of service are subject to regulation by FERC. Electric transmission siting authority remains the jurisdiction of the Virginia and North Carolina Commissions. However, EPACT provides FERC with certain backstop authority for transmission siting. See *State Regulations and Federal Regulations* in *Regulation* and Note 13 to the Consolidated Financial Statements for additional information.

PROPERTIES

DVP Operating Segment—Dominion and Virginia Power

Virginia Power has approximately 6,600 miles of electric transmission lines of 69 kV or more located in North Carolina, Virginia and West Virginia. Portions of Virginia Power's electric transmission lines cross national parks and forests under permits entitling the federal government to use, at specified charges, any surplus capacity that may exist in these lines. While Virginia Power owns and maintains its electric transmission facili-

Jun 22 2018

ties, they are a part of PJM, which coordinates the planning, operation, emergency assistance and exchange of capacity and energy for such facilities.

As a part of PJM's RTEP process, PJM authorized the following material reliability projects (including Virginia Power's estimated cost):

- Surry-to-Skiffes Creek-to-Whealton (\$280 million);
- Mt. Storm-to-Dooms (\$240 million);
- Idylwood substation (\$110 million);
- Dooms-to-Lexington (\$130 million);
- Cunningham-to-Elmont (\$110 million);
- Landstown voltage regulation (\$70 million);
- Warrenton (including Remington CT-to-Warrenton, Vint Hill-to-Wheeler-to-Gainesville, and Vint Hill and Wheeler switching stations) (\$110 million);
- Remington/Gordonsville/Pratts Area Improvement (including Remington-to-Gordonsville, and new Gordonsville substation transformer) (\$110 million);
- Gainesville-to-Haymarket (\$55 million);
- Kings Dominion-to-Fredericksburg (\$50 million);
- Loudoun-Brambleton line-to-Poland Road Substation (\$60 million);
- Cunningham-to-Dooms (\$60 million);
- Carson-to-Rogers Road (\$55 million);
- Dooms-Valley rebuild (\$60 million); and

• Mt. Storm-Valley rebuild (\$225 million). Virginia Power plans to increase transmission substation physical courity and expects to invest \$300 million.\$400 million through 2

security and expects to invest \$300 million-\$400 million through 2022 to strengthen its electrical system to better protect critical equipment, enhance its spare equipment process and create multiple levels of security.

In addition, Virginia Power's electric distribution network includes approximately 57,600 miles of distribution lines, exclusive of service level lines, in Virginia and North Carolina. The grants for most of its electric lines contain rights-of-way that have been obtained from the apparent owners of real estate, but underlying titles have not been examined. Where rights-of-way have not been obtained, they could be acquired from private owners by condemnation, if necessary. Many electric lines are on publiclyowned property, where permission to operate can be revoked.

Virginia legislation in 2014 provides for the recovery of costs, subject to approval by the Virginia Commission, for Virginia Power to move approximately 4,000 miles of electric distribution lines underground. The program is designed to reduce restoration outage time by moving its most outage-prone overhead distribution lines underground, has an annual investment cap of approximately \$175 million and is expected to be implemented over the next decade. In August 2016, the Virginia Commission approved the first phase of the program encompassing approximately 400 miles of converted lines and \$140 million in capital spending (with approximately \$123 million recoverable through Rider U). In December 2016, Virginia Power filed its application with the Virginia Commission to recover costs associated with the first and second phases of this program. The second phase will convert an estimated 244 miles at a cost of \$110 million.

SOURCES OF ENERGY SUPPLY

DVP Operating Segment—Dominion and Virginia Power

DVP's supply of electricity to serve Virginia Power customers is produced or procured by Dominion Generation. See *Dominion Generation* for additional information.

SEASONALITY

DVP Operating Segment—Dominion and Virginia Power

DVP's earnings vary seasonally as a result of the impact of changes in temperature, the impact of storms and other catastrophic weather events, and the availability of alternative sources for heating on demand by residential and commercial customers. Generally, the demand for electricity peaks during the summer and winter months to meet cooling and heating needs. An increase in heating degree days for DVP's electric utility-related operations does not produce the same increase in revenue as an increase in cooling degree days, due to seasonal pricing differentials and because alternative heating sources are more readily available.

Dominion Generation

The Dominion Generation Operating Segment of Virginia Power includes the generation operations of the Virginia Power regulated electric utility and its related energy supply operations. Virginia Power's utility generation operations primarily serve the supply requirements for the DVP segment's utility customers. The Dominion Generation Operating Segment of Dominion includes Virginia Power's generation facilities and its related energy supply operations as well as the generation operations of Dominion's merchant fleet and energy marketing and price risk management activities for these assets.

Dominion Generation's existing five-year investment plan includes spending approximately \$8.0 billion from 2017 through 2021 to construct new generation capacity to meet growing electricity demand within its service territory and maintain reliability. The most significant project currently under construction is Greensville County, which is estimated to cost approximately \$1.3 billion, excluding financing costs. See *Properties* and *Environmental Strategy* for additional information on this and other utility projects.

In addition, Dominion's merchant fleet includes numerous renewable generation facilities, which include a fuel cell generation facility in Connecticut and solar generation facilities in operation or development in nine states, including Virginia. The output of these facilities is sold under long-term power purchase agreements with terms generally ranging from 15 to 25 years. See Note 3 to the Consolidated Financial Statements for additional information regarding certain solar projects.

Earnings for the *Dominion Generation Operating Segment of Virginia Power* primarily result from the sale of electricity generated by its utility fleet. Revenue is based primarily on rates established by state regulatory authorities and state law. Approximately 82% of revenue comes from serving Virginia jurisdictional customers. Base rates for the Virginia jurisdiction are set using a modified cost-of-service rate model, and are generally designed to allow an opportunity to recover the cost of providing utility service and earn a reasonable return on investments used to provide that service. Earnings variability may arise when revenues are impacted by factors not reflected in current rates, such as the impact of weather on customers' demand for services. Likewise, earnings may reflect variations in the timing or nature of expenses as compared to those contemplated in current rates, such as labor and benefit costs, capacity expenses, and the timing, duration and costs of scheduled and unscheduled outages. The cost of fuel and purchased power is generally collected through fuel cost-recovery mechanisms established by regulators and does not materially impact net income. The cost of new generation facilities is generally recovered through rate adjustment clauses in Virginia. Variability in earnings from rate adjustment clauses reflects changes in the authorized ROE and the carrying amount of these facilities, which are largely driven by the timing and amount of capital investments, as well as depreciation. See Note 13 to the Consolidated Financial Statements for additional information.

The Dominion Generation Operating Segment of Dominion derives its earnings primarily from the sale of electricity generated by Virginia Power's utility and Dominion's merchant generation assets, as well as from associated capacity and ancillary services. Variability in earnings provided by Dominion's nonrenewable merchant fleet relates to changes in marketbased prices received for electricity and capacity. Market-based prices for electricity are largely dependent on commodity prices, primarily natural gas, and the demand for electricity, which is primarily dependent upon weather. Capacity prices are dependent upon resource requirements in relation to the supply available (both existing and new) in the forward capacity auctions, which are held approximately three years in advance of the associated delivery year. Dominion manages the electric price volatility of its merchant fleet by hedging a substantial portion of its expected nearterm energy sales with derivative instruments. Variability also results from changes in the cost of fuel consumed, labor and benefits and the timing, duration and costs of scheduled and unscheduled outages. Variability in earnings provided by Dominion's renewable merchant fleet is primarily driven by weather.

COMPETITION

Dominion Generation Operating Segment—Dominion and Virginia Power

Virginia Power's generation operations are not subject to significant competition as only a limited number of its Virginia jurisdictional electric utility customers have retail choice. See *Electric* under *State Regulations* in *Regulation* for more information. Currently, North Carolina does not offer retail choice to electric customers.

Dominion Generation Operating Segment-Dominion

Dominion Generation's recently acquired and developed renewable generation projects are not currently subject to significant competition as the output from these facilities is primarily sold under long-term power purchase agreements with terms generally lasting between 15 and 25 years. Competition for the nonrenewable merchant fleet is impacted by electricity and fuel prices, new market entrants, construction by others of generating assets and transmission capacity, technological advances in power generation, the actions of environmental and other regulatory authorities and other factors. These competitive factors may negatively impact the merchant fleet's ability to profit from the sale of electricity and related products and services.

Unlike Dominion Generation's regulated generation fleet, its nonrenewable merchant generation fleet is dependent on its ability to operate in a competitive environment and does not have a predetermined rate structure that provides for a rate of return on its capital investments. Dominion Generation's nonrenewable merchant assets operate within functioning RTOs and primarily compete on the basis of price. Competitors include other generating assets bidding to operate within the RTOs. Dominion Generation's nonrenewable merchant units compete in the wholesale market with other generators to sell a variety of products including energy, capacity and ancillary services. It is difficult to compare various types of generation given the wide range of fuels, fuel procurement strategies, efficiencies and operating characteristics of the fleet within any given RTO. However, Dominion applies its expertise in operations, dispatch and risk management to maximize the degree to which its nonrenewable merchant fleet is competitive compared to similar assets within the region.

REGULATION

Dominion Generation Operating Segment—Dominion and Virginia Power

Virginia Power's utility generation fleet and Dominion's merchant generation fleet are subject to regulation by FERC, the NRC, the EPA, the DOE, the Army Corps of Engineers and other federal, state and local authorities. Virginia Power's utility generation fleet is also subject to regulation by the Virginia and North Carolina Commissions. See *Regulation, Future Issues and Other Matters* in Item 7. MD&A and Notes 13 and 22 to the Consolidated Financial Statements for more information.

The Clean Power Plan and related proposed rules discussed represent a significant regulatory development affecting this segment. See *Future Issues and Other Matters* in Item 7. MD&A.

PROPERTIES

For a listing of Dominion's and Virginia Power's existing generation facilities, see Item 2. Properties.

Dominion Generation Operating Segment-Dominion and Virginia Power

The generation capacity of Virginia Power's electric utility fleet totals approximately 21,700 MW. The generation mix is diversified and includes gas, coal, nuclear, oil, renewables, biomass and power purchase agreements. Virginia Power's generation facilities are located in Virginia, West Virginia and North Carolina and serve load in Virginia and northeastern North Carolina.

Virginia Power is developing, financing and constructing new generation capacity to meet growing electricity demand within its service territory. Significant projects under construction or development are set forth below:

- Virginia Power plans to construct certain solar facilities in Virginia. See Note 13 to the Consolidated Financial Statements for more information.
- Virginia Power is considering the construction of a third nuclear unit at a site located at North Anna. See Note 13 to the Consolidated Financial Statements for more information on this project.
- In March 2016, the Virginia Commission authorized the construction of Greensville County and related transmission

OFFICIAL COP

interconnection facilities. Commercial operations are expected to commence in late 2018, at an estimated cost of approximately \$1.3 billion, excluding financing costs.

Dominion Generation Operating Segment—Dominion

The generation capacity of Dominion's merchant fleet totals approximately 4,700 MW. The generation mix is diversified and includes nuclear, natural gas and renewables. Merchant nonrenewable generation facilities are located in Connecticut, Pennsylvania and Rhode Island, with a majority of that capacity concentrated in New England. Dominion's merchant renewable generation facilities include a fuel cell generation facility in Connecticut, solar generation facilities in California, Connecticut, Georgia, Indiana, North Carolina, Tennessee, Utah and Virginia, and wind generation facilities in Indiana and West Virginia. Additional solar projects under construction are as set forth below:

- In August 2016, Dominion entered into an agreement to acquire 100% of the equity interests of two solar projects in California from Solar Frontier Americas Holding LLC for \$128 million. The acquisition is expected to close prior to both projects commencing operations, which is expected by the end of 2017. The projects are expected to cost approximately \$130 million once constructed, including the initial acquisition cost, and generate approximately 50 MW combined.
- In September 2016, Dominion entered into an agreement to acquire 100% of the equity interests of a solar project in Virginia from Community Energy Solar, LLC. The acquisition is expected to close during the first quarter of 2017, prior to the project commencing operations by the end of 2017, for an amount to be determined based on the costs incurred through closing. The project is expected to cost approximately \$210 million once constructed, including the initial acquisition cost, and to generate approximately 100 MW.
- In November 2016, Dominion acquired 100% of the equity interest of four solar projects in Virginia and two solar projects in South Carolina for \$21 million. The projects are expected to cost approximately \$287 million once constructed, including the initial acquisition cost. The facilities are expected to begin commercial operations by the end of 2017 and generate approximately 161 MW.
- In January 2017, Dominion entered into an agreement to acquire 100% of the equity interests of a solar project in North Carolina from Cypress Creek Renewables, LLC for \$154 million in cash. The acquisition is expected to close during the second quarter of 2017, prior to the project commencing commercial operations, which is expected by the end of the third quarter of 2017. The project is expected to cost \$160 million once constructed, including the initial acquisition cost, and to generate approximately 79 MW.

SOURCES OF ENERGY SUPPLY

Dominion Generation Operating Segment—Dominion and Virginia Power

Dominion Generation uses a variety of fuels to power its electric generation and purchases power for utility system load requirements and to satisfy physical forward sale requirements, as described below. Some of these agreements have fixed commitments and are included as contractual obligations in *Future Cash Payments for Contractual Obligations and Planned Capital Expenditures* in Item 7. MD&A.

Nuclear Fuel—Dominion Generation primarily utilizes long-term contracts to support its nuclear fuel requirements. Worldwide market conditions are continuously evaluated to ensure a range of supply options at reasonable prices which are dependent on the market environment. Current agreements, inventories and spot market availability are expected to support current and planned fuel supply needs. Additional fuel is purchased as required to ensure optimal cost and inventory levels.

Fossil Fuel—Dominion Generation primarily utilizes natural gas and coal in its fossil fuel plants. All recent fossil fuel plant construction for Dominion Generation, with the exception of the Virginia City Hybrid Energy Center, involves natural gas generation.

Dominion Generation's natural gas and oil supply is obtained from various sources including purchases from major and independent producers in the Mid-Continent and Gulf Coast regions, purchases from local producers in the Appalachian area and Marcellus and Utica regions, purchases from gas marketers and withdrawals from underground storage fields owned by Dominion or third parties. Dominion Generation manages a portfolio of natural gas transportation contracts (capacity) that provides for reliable natural gas deliveries to its gas turbine fleet, while minimizing costs.

Dominion Generation's coal supply is obtained through long-term contracts and short-term spot agreements from domestic suppliers.

Biomass—Dominion Generation's biomass supply is obtained through long-term contracts and short-term spot agreements from local suppliers.

Purchased Power—Dominion Generation purchases electricity from the PJM spot market and through power purchase agreements with other suppliers to provide for utility system load requirements.

Dominion Generation also occasionally purchases electricity from the PJM and ISO-NE spot markets to satisfy physical forward sale requirements as part of its merchant generation operations.

Dominion Generation Operating Segment—Virginia Power

Presented below is a summary of Virginia Power's actual system output by energy source:

2016	2015	2014
31%	30%	33%
31	23	15
24	26	30
8	15	19
6	6	3
100%	100%	100%
	31% 31 24 8 6	31% 30% 31 23 24 26 8 15 6 6

(1) Excludes ODEC's 11.6% ownership interest in North Anna.

(2) Excludes ODEC's 50.0% ownership interest in the Clover power station.
(3) Includes oil, hydro, biomass and solar.

SEASONALITY

Dominion Generation Operating Segment—Dominion and Virginia Power Sales of electricity for Dominion Generation typically vary seasonally as a result of the impact of changes in temperature and the availability of alternative sources for heating on demand by residential and commercial customers. See *DVP-Seasonality* above for additional considerations that also apply to Dominion Generation.

NUCLEAR DECOMMISSIONING

Dominion Generation Operating Segment—Dominion and Virginia Power Virginia Power has a total of four licensed, operating nuclear reactors at Surry and North Anna in Virginia.

Decommissioning involves the decontamination and removal of radioactive contaminants from a nuclear power station once operations have ceased, in accordance with standards established by the NRC. Amounts collected from ratepayers are placed into trusts and are invested to fund the expected future costs of decommissioning the Surry and North Anna units.

Virginia Power believes that the decommissioning funds and their expected earnings for the Surry and North Anna units will be sufficient to cover expected decommissioning costs, particularly when combined with future ratepayer collections and contributions to these decommissioning trusts, if such future collections and contributions are required. This reflects the long-term investment horizon, since the units will not be decommissioned for decades, and a positive long-term outlook for trust fund investment returns. Virginia Power will continue to monitor these trusts to ensure they meet the NRC minimum financial assurance requirements, which may include, if needed, the use of parent company guarantees, surety bonding or other financial instruments recognized by the NRC.

The estimated cost to decommission Virginia Power's four nuclear units is reflected in the table below and is primarily based upon site-specific studies completed in 2014. These cost studies are generally completed every four to five years. The current cost estimates assume decommissioning activities will begin shortly after cessation of operations, which will occur when the operating licenses expire.

Under the current operating licenses, Virginia Power is scheduled to decommission the Surry and North Anna units during the period 2032 to 2078. NRC regulations allow licensees to apply for extension of an operating license in up to 20-year increments. Virginia Power has announced its intention to apply for an operating life extension for Surry, and may for North Anna as well.

Dominion Generation Operating Segment-Dominion

In addition to the four nuclear units discussed above, Dominion has two licensed, operating nuclear reactors at Millstone in Connecticut. A third Millstone unit ceased operations before Dominion acquired the power station. In May 2013, Dominion ceased operations at its single Kewaunee unit in Wisconsin and commenced decommissioning activities using the SAFSTOR methodology. The planned decommissioning completion date is 2073, which is within the NRC allowed 60-year window.

As part of Dominion's acquisition of both Millstone and Kewaunee, it acquired decommissioning funds for the related

units. Any funds remaining in Kewaunee's trust after decommissioning is completed are required to be refunded to Wisconsin ratepayers. Dominion believes that the amounts currently available in the decommissioning trusts and their expected earnings will be sufficient to cover expected decommissioning costs for the Millstone and Kewaunee units. Dominion will continue to monitor these trusts to ensure they meet the NRC minimum financial assurance requirements, which may include, if needed, the use of parent company guarantees, surety bonding or other financial instruments recognized by the NRC. The estimated cost to decommission Dominion's eight units is reflected in the table below and is primarily based upon sitespecific studies completed for Surry, North Anna and Millstone in 2014 and for Kewaunee in 2013.

The estimated decommissioning costs and license expiration dates for the nuclear units owned by Dominion and Virginia Power are shown in the following table:

		Most		
		recent		
	NRC	cost	Funds in	
	license	estimate	trusts at	2016
	expiration	(2016	December 31, 2016	contributions to trusts
	year	dollars)(1)	2016	to trust
(dollars in millions)				
Surry				
Unit 1	2032	\$ 600	\$ 597	\$ 0.6
Unit 2	2033	620	588	0.6
North Anna				
Unit 1(2)	2038	513	475	0.4
Unit 2(2)	2040	525	446	0.3
Total (Virginia Power)		2,258	2,106	1.9
Millstone				
Unit 1(3)	N/A	373	474	_
Unit 2	2035	563	614	_
Unit 3(4)	2045	684	604	_
Kewaunee				
Unit 1(5)	N/A	467	686	_
Total (Dominion)		\$ 4,345	\$ 4,484	\$ 1.9

(1) The cost estimates shown above reflect reductions for the expected future recovery of certain spent fuel costs based on Dominion's and Virginia Power's contracts with the DOE for disposal of spent nuclear fuel consistent with the reductions reflected in Dominion's and Virginia Power's nuclear decommissioning AROs.

(2) North Anna is jointly owned by Virginia Power (88.4%) and ODEC (11.6%). However, Virginia Power is responsible for 89.26% of the decommissioning obligation. Amounts reflect 89.26% of the decommissioning cost for both of North Anna's units.

- (3) Unit 1 permanently ceased operations in 1998, before Dominion's acquisition of Millstone.
- (4) Millstone Unit 3 is jointly owned by Dominion Nuclear Connecticut, Inc., with a 6.53% undivided interest in Unit 3 owned by Massachusetts Municipal and Green Mountain. Decommissioning cost is shown at Dominion's ownership percentage. At December 31, 2016, the minority owners held \$37 million of trust funds related to Millstone Unit 3 that are not reflected in the table above.

(5) Permanently ceased operations in 2013.

Also see Notes 14 and 22 to the Consolidated Financial Statements for further information about AROs and nuclear decommissioning, respectively, and Note 9 for information about nuclear decommissioning trust investments.

Dominion Energy

The Dominion Energy Operating Segment of Dominion Gas includes certain of Dominion's regulated natural gas operations. DTI, the gas transmission pipeline and storage business, serves gas distribution businesses and other customers in the Northeast, mid-Atlantic and Midwest. DGP conducts gas gathering and processing activities, which include the sale of extracted products at market rates, primarily in West Virginia, Ohio and Pennsylvania. East Ohio, the primary gas distribution business of Dominion, serves residential, commercial and industrial gas sales, transportation and gathering service customers primarily in Ohio. Dominion Iroquois holds a 24.07% noncontrolling partnership interest in Iroquois, which provides service to local gas distribution companies, electric utilities and electric power generators, as well as marketers and other end users, through interconnecting pipelines and exchanges primarily in New York.

Earnings for the *Dominion Energy Operating Segment of Dominion Gas* primarily result from rates established by FERC and the Ohio Commission. The profitability of this business is dependent on Dominion Gas' ability, through the rates it is permitted to charge, to recover costs and earn a reasonable return on its capital investments. Variability in earnings results from changes in operating and maintenance expenditures, as well as changes in rates and the demand for services, which are dependent on weather, changes in commodity prices and the economy.

Approximately 96% of the transmission capacity under contract on DTI's pipeline is subscribed with long-term contracts (two years or greater). The remaining 4% is contracted on a year-to-year basis. Less than 1% of firm transportation capacity is currently unsubscribed. Less than 1% of storage services are unsubscribed. All contracted storage is subscribed with long-term contracts.

Revenue from processing and fractionation operations largely results from the sale of commodities at market prices. For DGP's processing plants, Dominion Gas receives the wet gas product from producers and may retain the extracted NGLs as compensation for its services. This exposes Dominion Gas to commodity price risk for the value of the spread between the NGL products and natural gas. In addition, Dominion Gas has volumetric risk as the majority of customers receiving these services are not required to deliver minimum quantities of gas.

East Ohio utilizes a straight-fixed-variable rate design for a majority of its customers. Under this rate design, East Ohio recovers a large portion of its fixed operating costs through a flat monthly charge accompanied by a reduced volumetric base delivery rate. Accordingly, East Ohio's revenue is less impacted by weather-related fluctuations in natural gas consumption than under the traditional rate design.

In addition to the operations of Dominion Gas, the *Dominion Energy Operating Segment of Dominion* also includes LNG operations, Dominion Questar operations, Hope's gas distribution operations in West Virginia, and nonregulated retail natural gas marketing, as well as Dominion's investments in the Blue Racer joint venture, Atlantic Coast Pipeline and Dominion Midstream. See *Properties and Investments* below for additional information regarding the Blue Racer and Atlantic Coast Pipeline investments. Dominion's LNG operations involve the import and storage of LNG at Cove Point and the transportation of regasified LNG to the interstate pipeline grid and mid-Atlantic and Northeast markets. Dominion has received DOE and FERC approval to export LNG from Cove Point and has begun construction on a bi-directional facility, which will be able to import LNG and regasify it as natural gas and liquefy natural gas and export it as LNG. See Note 22 to the Consolidated Financial Statements for more information.

In September 2016, Dominion completed the Dominion Questar Combination and Dominion Questar became a wholly-owned subsidiary of Dominion. Dominion Questar, a Rockies-based integrated natural gas company, included Questar Gas, Wexpro and Questar Pipeline at closing. Questar Gas' regulated gas distribution operations in Utah, southwestern Wyoming and southeastern Idaho includes 29,200 miles of gas distribution pipeline. Wexpro develops and produces natural gas from reserves supplied to Questar Gas under a cost-of-service framework. Questar Pipeline provides FERC-regulated interstate natural gas transportation and storage services in Utah, Wyoming and western Colorado through 2,200 miles of gas transmission pipeline and 56 bcf of working gas storage. See *Acquisitions and Dispositions* above and Note 3 to the Consolidated Financial Statements for a description of the Dominion Questar Combination.

In 2014, Dominion formed Dominion Midstream, an MLP initially consisting of a preferred equity interest in Cove Point. See *General* above for more information. Also see *Acquisitions and Dispositions* above and Note 3 to the Consolidated Financial Statements for a description of Dominion's contribution of Questar Pipeline to Dominion Midstream in December 2016 as well as Dominion's acquisition of DCG, which Dominion contributed to Dominion Midstream in April 2015, and Dominion Midstream's acquisition of a 25.93% noncontrolling partnership interest in Iroquois in September 2015. DCG provides FERC-regulated interstate natural gas transportation services in South Carolina and southeastern Georgia through 1,500 miles of gas transmission pipeline.

Dominion Energy's existing five-year investment plan includes spending approximately \$8.0 billion from 2017 through 2021 to upgrade existing or add new infrastructure to meet growing energy needs within its service territory and maintain reliability. Demand for natural gas is expected to continue to grow as initiatives to transition to gas from more carbonintensive fuels are implemented. This plan includes Dominion's portion of spending for the Atlantic Coast Pipeline Project.

In addition to the earnings drivers noted above for Dominion Gas, earnings for the *Dominion Energy Operating Segment of Dominion* primarily include the results of rates established by FERC and the West Virginia, Utah, Wyoming and Idaho Commissions. Additionally, Dominion Energy receives revenue from firm fee-based contractual arrangements, including negotiated rates, for certain LNG storage and regasification services. Questar Pipeline's and DCG's revenues are primarily derived from reservation charges for firm transportation and storage services as provided for in their FERC-approved tariffs. Revenue provided by Questar Gas' operations is based primarily on rates established by the Utah and Wyoming Commissions. The Idaho Commission has contracted with the Utah Commission for rate oversight of Questar Gas operations in a small area of southeastern Idaho. Hope's gas distribution operations in West Virginia serve residential, commercial, sale for resale and

industrial gas sales, transportation and gathering service customers. Revenue provided by Hope's operations is based primarily on rates established by the West Virginia Commission. The profitability of these businesses is dependent on their ability, through the rates they are permitted to charge, to recover costs and earn a reasonable return on their capital investments. Variability in earnings results from changes in operating and maintenance expenditures, as well as changes in rates and the demand for services, which are dependent on weather, changes in commodity prices and the economy.

Dominion's retail energy marketing operations compete in nonregulated energy markets. In March 2014, Dominion completed the sale of its electric retail energy marketing business; however, it still participates in the retail natural gas and energy-related products and services businesses. The remaining customer base includes approximately 1.4 million customer accounts in 17 states. Dominion has a heavy concentration of natural gas customers in markets where utilities have a long-standing commitment to customer choice, primarily in the states of Ohio and Pennsylvania.

COMPETITION

Dominion Energy Operating Segment—Dominion and Dominion Gas

Dominion Gas' natural gas transmission operations compete with domestic and Canadian pipeline companies. Dominion Gas also competes with gas marketers seeking to provide or arrange transportation, storage and other services. Alternative energy sources, such as oil or coal, provide another level of competition. Although competition is based primarily on price, the array of services that can be provided to customers is also an important factor. The combination of capacity rights held on certain long-line pipelines, a large storage capability and the availability of numerous receipt and delivery points along its own pipeline system enable Dominion to tailor its services to meet the needs of individual customers.

DGP's processing and fractionation operations face competition in obtaining natural gas supplies for its processing and related services. Numerous factors impact any given customer's choice of processing services provider, including the location of the facilities, efficiency and reliability of operations, and the pricing arrangements offered.

In Ohio, there has been no legislation enacted to require supplier choice for natural gas distribution consumers. However, East Ohio has offered an Energy Choice program to residential and commercial customers since October 2000. East Ohio has since taken various steps approved by the Ohio Commission toward exiting the merchant function, including restructuring its commodity service and placing Energy Choice-eligible customers in a direct retail relationship with participating suppliers. Further, in April 2013, East Ohio fully exited the merchant function for its nonresidential customers, which are now required to choose a retail supplier or be assigned to one at a monthly variable rate set by the supplier. At December 31, 2016, approximately 1 million of East Ohio's 1.2 million Ohio customers were participating in the Energy Choice program.

Dominion Energy Operating Segment—Dominion

Questar Gas and Hope do not currently face direct competition from other distributors of natural gas for residential and commer-

cial customers in their service territories as state regulations in Utah, Wyoming and Idaho for Questar Gas, and West Virginia for Hope, do not allow customers to choose their provider at this time. See *State Regulations* in *Regulation* for additional information.

Cove Point's gas transportation, LNG import and storage operations, as well as the Liquefaction Project's capacity are contracted primarily under long-term fixed reservation fee agreements. However, in the future Cove Point may compete with other independent terminal operators as well as major oil and gas companies on the basis of terminal location, services provided and price. Competition from terminal operators primarily comes from refiners and distribution companies with marketing and trading arms.

Questar Pipeline's and DCG's pipeline systems generate a substantial portion of their revenue from long-term firm contracts for transportation services and are therefore insulated from competitive factors during the terms of the contracts. When these long-term contracts expire, Questar Pipeline's pipeline system faces competitive pressures from similar facilities that serve the Rocky Mountain region and DCG's pipeline system faces competitive pressures from similar facilities that serve the South Carolina and southeastern Georgia area in terms of location, rates, terms of service, and flexibility and reliability of service.

Dominion's retail energy marketing operations compete against incumbent utilities and other energy marketers in nonregulated energy markets for natural gas. Customers in these markets have the right to select a retail marketer and typically do so based upon price savings or price stability; however, incumbent utilities have the advantage of long-standing relationships with their customers and greater name recognition in their markets.

REGULATION

Dominion Energy Operating Segment-Dominion and Dominion Gas

Dominion Gas' natural gas transmission and storage operations are regulated primarily by FERC. East Ohio's gas distribution operations, including the rates that it may charge to customers, are regulated by the Ohio Commission. See *State Regulations* and *Federal Regulations* in *Regulation* for more information.

Dominion Energy Operating Segment-Dominion

Cove Point's, Questar Pipeline's, and DCG's operations are regulated primarily by FERC. Questar Gas' distribution operations, including the rates it may charge customers, are regulated by the Utah, Wyoming and Idaho Commissions. Hope's gas distribution operations, including the rates that it may charge customers, are regulated by the West Virginia Commission. See *State Regulations* and *Federal Regulations* in *Regulation* for more information.

PROPERTIES AND INVESTMENTS

For a description of Dominion's and Dominion Gas' existing facilities see Item 2. Properties.

Dominion Energy Operating Segment—Dominion and Dominion Gas Dominion Gas has the following significant projects under construction or development to better serve customers or expand its service offerings within its service territory. In September 2014, DTI announced its intent to construct and operate the Supply Header project which is expected to cost approximately \$500 million and provide 1,500,000 Dths per day of firm transportation service to various customers. In October 2014, DTI requested authorization to use FERC's pre-filing process. The application to request FERC authorization to construct and operate the project facilities was filed in September 2015, with the facilities expected to be in service in late 2019. In December 2014, DTI entered into a precedent agreement with Atlantic Coast Pipeline for the Supply Header project.

In June 2014, DTI executed binding precedent agreements with two power generators for the Leidy South Project. In November 2014, one of the power generators assigned a portion of its capacity to an affiliate, bringing the total number of project customers to three. The project is expected to cost approximately \$210 million. In August 2016, DTI received FERC authorization to construct and operate the Leidy South Project facilities. Service under the 20-year contracts is expected to commence in late 2017.

In September 2013, DTI executed binding precedent agreements with several local distribution company customers for the New Market project. The project is expected to cost approximately \$180 million and provide 112,000 Dths per day of firm transportation service from Leidy, Pennsylvania to interconnects with Iroquois and Niagara Mohawk Power Corporation's distribution system in the Albany, New York market. In April 2016, DTI received FERC authorization to construct, operate and maintain the project facilities, which are expected to be in service in late 2017.

In March 2016, East Ohio executed a binding precedent agreement with a power generator for the Lordstown Project. In January 2017, East Ohio commenced construction of the project, with an in-service date expected in the third quarter of 2017 at a total estimated cost of approximately \$35 million.

In 2008, East Ohio began PIR, aimed at replacing approximately 4,100 miles of its pipeline system at a cost of \$2.7 billion. In 2011, approval was obtained to include an additional 1,450 miles and to increase annual capital investment to meet the program goal. The program will replace approximately 25% of the pipeline system and is anticipated to take place over a total of 25 years. In March 2015, East Ohio filed an application with the Ohio Commission requesting approval to extend the PIR program for an additional five years and to increase the annual capital investment, with corresponding increases in the annual rate-increase caps. In September 2016, the Ohio Commission approved a stipulation filed jointly by East Ohio and the Staff of the Ohio Commission to settle East Ohio's pending application. As requested, the PIR Program and associated cost recovery will continue for another five-year term, calendar years 2017 through 2021, and East Ohio will be permitted to increase its annual capital expenditures to \$200 million by 2018 and 3% per year thereafter subject to the cost recovery rate increase caps proposed by East Ohio. Costs associated with calendar year 2016 investment will be recovered under the existing terms.

Dominion Energy Operating Segment—Dominion

Dominion has the following significant projects under construction or development.

Cove Point—Dominion is pursuing the Liquefaction Project, which would enable Cove Point to liquefy domestically-produced

natural gas for export as LNG. The DOE previously authorized Dominion to export LNG to countries with free trade agreements. In September 2013, the DOE authorized Dominion to export LNG from Cove Point to non-free trade agreement countries.

In May 2014, the FERC staff issued its EA for the Liquefaction Project. In the EA, the FERC staff addressed a variety of topics related to the proposed construction and development of the Liquefaction Project and its potential impact to the environment, and determined that with the implementation of appropriate mitigation measures, the Liquefaction Project can be built and operated safely with no significant impact to the environment. In September 2014, Cove Point received the FERC order authorizing the Liquefaction Project with certain conditions. The conditions regarding the Liquefaction Project set forth in the FERC order largely incorporate the mitigation measures proposed in the EA. In October 2014, Cove Point commenced construction of the Liquefaction Project, with an in-service date anticipated in late 2017 at a total estimated cost of approximately \$4.0 billion, excluding financing costs. The Cove Point facility is authorized to export at a rate of 770 million cubic feet of natural gas per day for a period of 20 years.

In April 2013, Dominion announced it had fully subscribed the capacity of the project with 20-year terminal service agreements. ST Cove Point, LLC, a joint venture of Sumitomo Corporation, a Japanese corporation that is one of the world's leading trading companies, and Tokyo Gas Co., Ltd., a Japanese corporation that is the largest natural gas utility in Japan, and GAIL Global (USA) LNG LLC, a wholly-owned indirect U.S. subsidiary of GAIL (India) Ltd., have each contracted for half of the capacity. Following completion of the front-end engineering and design work, Dominion also announced it had awarded its engineering, procurement and construction contract for new liquefaction facilities to IHI/Kiewit Cove Point, a joint venture between IHI E&C International Corporation and Kiewit Energy Company.

Cove Point has historically operated as an LNG import facility under various long-term import contracts. Since 2010, Dominion has renegotiated certain existing LNG import contracts in a manner that will result in a significant reduction in pipeline and storage capacity utilization and associated anticipated revenues during the period from 2017 through 2028. Such amendments created the opportunity for Dominion to explore the Liquefaction Project, which, assuming it becomes operational, will extend the economic life of Cove Point and contribute to Dominion's overall growth plan. In total, these renegotiations reduced Cove Point's expected annual revenues from the import-related contracts by approximately \$150 million from 2017 through 2028, partially offset by approximately \$50 million of additional revenues in the years 2013 through 2017.

In October 2015, Cove Point received FERC authorization to construct the approximately \$40 million Keys Energy Project. Construction on the project commenced in December 2015, and the project facilities are expected to be placed into service in March 2017.

In November 2016, Cove Point filed an application to request FERC authorization to construct the approximately \$150 million Eastern Market Access Project. Construction on the project is expected to begin in the fourth quarter of 2017, and the project facilities are expected to be placed into service in late 2018.

DCG—In 2014, DCG executed binding precedent agreements with three customers for the Charleston project. The project is expected to cost approximately \$120 million, and provide 80,000 Dths per day of firm transportation service from an existing interconnect with Transcontinental Gas Pipe Line, LLC in Spartanburg County, South Carolina to customers in Dillon, Marlboro, Sumter, Charleston, Lexington and Richland counties, South Carolina. In February 2017, DCG received FERC approval to construct and operate the project facilities, which are expected to be placed into service in the fourth quarter of 2017.

Questar Gas—In 2010, Questar Gas began replacing aging high pressure infrastructure under a cost-tracking mechanism that allows it to place into rate base and earn a return on capital expenditures associated with a multi-year natural gas infrastructure-replacement program upon the completion of each project. At that time, the commission-allowed annual spending in the replacement program was approximately \$55 million.

In its 2014 Utah general rate case Questar Gas received approval to include intermediate high pressure infrastructure in the replacement program and increase the annual spending limit to approximately \$65 million, adjusted annually using a gross domestic product inflation factor. At that time, 420 miles of high pressure pipe and 70 miles of intermediate high pressure pipe were identified to be replaced in the program over a 17-year period. Questar Gas has spent about \$65 million each year through 2016 under this program. The program is evaluated in each Utah general rate case. The next Utah general rate case is anticipated to occur in 2019.

Dominion Energy Equity Method Investments—In September 2015, Dominion, through Dominion Midstream, acquired an additional 25.93% interest in Iroquois. Dominion Gas holds a 24.07% interest with TransCanada holding a 50% interest. Iroquois owns and operates a 416-mile FERC regulated interstate natural gas pipeline providing service to local gas distribution companies, electric utilities and electric power generators, as well as marketers and other end users, through interconnecting pipelines and exchanges. Iroquois' pipeline extends from the U.S.-Canadian border at Waddington, New York through the state of Connecticut to South Commack, Long Island, New York and continuing on from Northport, Long Island, New York through the Long Island Sound to Hunts Point, Bronx, New York. See Note 9 to the Consolidated Financial Statements for further information about Dominion's equity method investment in Iroquois.

In September 2014, Dominion, along with Duke and Southern Company Gas (formerly known as AGL Resources Inc.), announced the formation of Atlantic Coast Pipeline. The Atlantic Coast Pipeline partnership agreement includes provisions to allow Dominion an option to purchase additional ownership interest in Atlantic Coast Pipeline to maintain a leading ownership percentage. In October 2016, Dominion purchased an additional 3% membership interest in Atlantic Coast Pipeline from Duke for \$14 million. The members, which are subsidiaries of the above-referenced parent companies, hold the following membership interests: Dominion, 48%; Duke, 47%; and Southern Company Gas (formerly known as AGL Resources Inc.), 5%. Atlantic Coast Pipeline is focused on constructing an approximately 600-mile natural gas pipeline running from West Virginia through Virginia to North Carolina, which has a total expected cost of \$5.0 billion to \$5.5 billion, excluding financing costs. In October 2014, Atlantic Coast Pipeline requested approval from FERC to utilize the pre-filing process under which environmental review for the natural gas pipeline project will commence. Atlantic Coast Pipeline filed its FERC application in September 2015 and expects to be in service in late 2019. The project is subject to FERC, state and other federal approvals. See Note 9 to the Consolidated Financial Statements for further information about Dominion's equity method investment in Atlantic Coast Pipeline.

In December 2012, Dominion formed Blue Racer with Caiman to provide midstream services to natural gas producers operating in the Utica Shale region in Ohio and portions of Pennsylvania. Blue Racer is an equal partnership between Dominion and Caiman, with Dominion contributing midstream assets and Caiman contributing private equity capital. Midstream services offered by Blue Racer include gathering, processing, fractionation, and natural gas liquids transportation and marketing. Blue Racer is expected to develop additional new capacity designed to meet producer needs as the development of the Utica Shale formation increases. See Note 9 to the Consolidated Financial Statements for further information about Dominion's equity method investment in Blue Racer.

SOURCES OF ENERGY SUPPLY

Dominion's and Dominion Gas' natural gas supply is obtained from various sources including purchases from major and independent producers in the Mid-Continent and Gulf Coast regions, local producers in the Appalachian area, gas marketers and, for Questar Gas specifically, from Wexpro and other producers in the Rocky Mountain region. Wexpro's gas development and production operations serve the majority of Questar Gas' gas supply requirements in accordance with the Wexpro Agreement and the Wexpro II Agreement, comprehensive agreements with the states of Utah and Wyoming. Dominion's and Dominion Gas' large underground natural gas storage network and the location of their pipeline systems are a significant link between the country's major interstate gas pipelines and large markets in the Northeast, mid-Atlantic and Rocky Mountain regions. Dominion's and Dominion Gas' pipelines are part of an interconnected gas transmission system, which provides access to supplies nationwide for local distribution companies, marketers, power generators and industrial and commercial customers.

Dominion's and Dominion Gas' underground storage facilities play an important part in balancing gas supply with consumer demand and are essential to serving the Northeast, mid-Atlantic, Midwest and Rocky Mountain regions. In addition, storage capacity is an important element in the effective management of both gas supply and pipeline transmission capacity.

The supply of gas to serve Dominion's retail energy marketing customers is procured through Dominion's energy marketing group and market wholesalers.

SEASONALITY

Dominion Energy's natural gas distribution business earnings vary seasonally, as a result of the impact of changes in temperature on demand by residential and commercial customers for gas to meet heating needs. Historically, the majority of these earnings have been generated during the heating season, which is generally from November to March; however, implementation of rate mechanisms in Ohio for East Ohio, and Utah, Wyoming and Idaho for Questar Gas, have reduced the earnings impact of weather-related fluctuations. Demand for services at Dominion's gas transmission and storage business can also be weather sensitive. Earnings are also impacted by changes in commodity prices driven by seasonal weather changes, the effects of unusual weather events on operations and the economy.

The earnings of Dominion's retail energy marketing operations also vary seasonally. Generally, the demand for gas peaks during the winter months to meet heating needs.

Corporate and Other

Corporate and Other Segment-Virginia Power and Dominion Gas

Virginia Power's and Dominion Gas' Corporate and Other segments primarily include certain specific items attributable to their operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

Corporate and Other Segment-Dominion

Dominion's Corporate and Other segment includes its corporate, service company and other functions (including unallocated debt). In addition, Corporate and Other includes specific items attributable to Dominion's operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

REGULATION

The Companies are subject to regulation by various federal, state and local authorities, including the state commissions of Virginia, North Carolina, Ohio, West Virginia, Utah, Wyoming and Idaho, SEC, FERC, EPA, DOE, NRC, Army Corps of Engineers, and the Department of Transportation.

State Regulations

ELECTRIC

Virginia Power's electric utility retail service is subject to regulation by the Virginia Commission and the North Carolina Commission.

Virginia Power holds CPCNs which authorize it to maintain and operate its electric facilities now in operation and to sell electricity to customers. However, Virginia Power may not construct generating facilities or large capacity transmission lines without the prior approval of various state and federal government agencies. In addition, the Virginia Commission and the North Carolina Commission regulate Virginia Power's transactions with affiliates and transfers of certain facilities. The Virginia Commission also regulates the issuance of certain securities.

Electric Regulation in Virginia

The Regulation Act instituted a cost-of-service rate model, ending Virginia's planned transition to retail competition for electric supply service to most classes of customers.

The Regulation Act authorizes stand-alone rate adjustment clauses for recovery of costs for new generation projects, FERC-approved transmission costs, underground distribution lines, environmental compliance, conservation and energy efficiency programs and renewable energy programs, and also contains statutory provisions directing Virginia Power to file annual fuel cost recovery cases with the Virginia Commission. As amended, it provides for enhanced returns on capital expenditures on specific newly-proposed generation projects.

In February 2015, the Virginia Governor signed legislation into law which will keep Virginia Power's base rates unchanged until at least December 1, 2022. In addition, no biennial reviews will be conducted by the Virginia Commission for the five successive 12-month test periods beginning January 1, 2015, and ending December 31, 2019. The legislation states that Virginia Power's 2015 biennial review, filed in March 2015, would proceed for the sole purpose of reviewing and determining whether any refunds are due to customers based on earnings performance for generation and distribution services during the 2013 and 2014 test periods. In addition the legislation requires the Virginia Commission to conduct proceedings in 2017 and 2019 to determine the utility's ROE for use in connection with rate adjustment clauses and requires utilities to file integrated resource plans annually rather than biennially.

If the Virginia Commission's future rate decisions, including actions relating to Virginia Power's rate adjustment clause filings, differ materially from Virginia Power's expectations, it may adversely affect its results of operations, financial condition and cash flows.

See Note 13 to the Consolidated Financial Statements for additional information, which is incorporated herein by reference.

Electric Regulation in North Carolina

Virginia Power's retail electric base rates in North Carolina are regulated on a cost-of-service/rate-of-return basis subject to North Carolina statutes and the rules and procedures of the North Carolina Commission. North Carolina base rates are set by a process that allows Virginia Power to recover its operating costs and an ROIC. If retail electric earnings exceed the authorized ROE established by the North Carolina Commission, retail electric rates may be subject to review and possible reduction by the North Carolina Commission, which may decrease Virginia Power's future earnings. Additionally, if the North Carolina Commission does not allow recovery of costs incurred in providing service on a timely basis, Virginia Power's future earnings could be negatively impacted. Fuel rates are subject to revision under annual fuel cost adjustment proceedings.

Virginia Power's transmission service rates in North Carolina are regulated by the North Carolina Commission as part of Virginia Power's bundled retail service to North Carolina customers.

See Note 13 to the Consolidated Financial Statements for additional information, which is incorporated herein by reference.

GAS

Dominion Questar's natural gas development, production, transportation, and distribution services, including the rates it may charge its customers, are regulated by the state commissions of Utah, Wyoming and Idaho. East Ohio's natural gas distribution services, including the rates it may charge its customers, are regulated by the Ohio Commission. Hope's natural gas distribution services are regulated by the West Virginia Commission.

Gas Regulation in Utah, Wyoming and Idaho

Questar Gas is subject to regulation of rates and other aspects of its business by the Utah, Wyoming and Idaho Commissions. The Idaho Commission has contracted with the Utah Commission for rate oversight of Questar Gas' operations in a small area of southeastern Idaho. When necessary, Questar Gas seeks general base rate increases to recover increased operating costs and a fair return on rate base investments. Base rates are set based on the cost-of-service by rate class. Base rates for Questar Gas are designed primarily based on rate design methodology in which the majority of operating costs are recovered through volumetric charges.

In addition to general rate increases, Questar Gas makes routine separate filings with the Utah and Wyoming Commissions to reflect changes in the costs of purchased gas. The majority of these purchased gas costs are subject to rate recovery through the Wexpro Agreement and Wexpro II Agreement. Costs that are expected to be recovered in future rates are deferred as regulatory assets. The purchased gas recovery filings generally cover a prospective twelve-month period. Approved increases or decreases in gas cost recovery rates result in increases or decreases in revenues with corresponding increases or decreases in net purchased gas cost expenses.

Questar Gas withdrew its general rate case filed in July 2016 with the Utah Commission and agreed not to file a general rate case with the Utah Commission to adjust its base distribution non-gas rates prior to July 2019, unless otherwise ordered by the Utah Commission. In addition Questar Gas agreed not to file a general rate case with the Wyoming Commission with a requested rate effective date earlier than January 2020. This does not impact Questar Gas' ability to adjust rates through various riders. See Note 3 to the Consolidated Financial Statements for additional information.

Gas Regulation in Ohio

East Ohio is subject to regulation of rates and other aspects of its business by the Ohio Commission. When necessary, East Ohio seeks general base rate increases to recover increased operating costs and a fair return on rate base investments. Base rates are set based on the cost-of-service by rate class. A straight-fixed-variable rate design, in which the majority of operating costs are recovered through a monthly charge rather than a volumetric charge, is utilized to establish rates for a majority of East Ohio's customers pursuant to a 2008 rate case settlement.

In addition to general base rate increases, East Ohio makes routine filings with the Ohio Commission to reflect changes in the costs of gas purchased for operational balancing on its system. These purchased gas costs are subject to rate recovery through a mechanism that ensures dollar for dollar recovery of prudently incurred costs. Costs that are expected to be recovered in future rates are deferred as regulatory assets. The rider filings cover unrecovered gas costs plus prospective annual demand costs. Increases or decreases in gas cost rider rates result in increases or decreases in revenues with corresponding increases or decreases in net purchased gas cost expenses.

The Ohio Commission has also approved several stand-alone cost recovery mechanisms to recover specified costs and a return for infrastructure projects and certain other costs that vary widely over time; such costs are excluded from general base rates. See Note 13 to the Consolidated Financial Statements for additional information.

Gas Regulation in West Virginia

Hope is subject to regulation of rates and other aspects of its business by the West Virginia Commission. When necessary, Hope seeks general base rate increases to recover increased operating costs and a fair return on rate base investments. Base rates are set based on the cost-of-service by rate class. Base rates for Hope are designed primarily based on rate design methodology in which the majority of operating costs are recovered through volumetric charges.

In addition to general rate increases, Hope makes routine separate filings with the West Virginia Commission to reflect changes in the costs of purchased gas. The majority of these purchased gas costs are subject to rate recovery through a mechanism that ensures dollar for dollar recovery of prudently incurred costs. Costs that are expected to be recovered in future rates are deferred as regulatory assets. The purchased gas cost recovery filings generally cover a prospective twelve-month period. Approved increases or decreases in gas cost recovery rates result in increases or decreases in revenues with corresponding increases or decreases in net purchased gas cost expenses.

Legislation was passed in West Virginia authorizing a stand-alone cost recovery mechanism to recover specified costs and a return for infrastructure upgrades, replacements and expansions between general base rate cases.

Status of Competitive Retail Gas Services

The states of Ohio and West Virginia, in which Dominion and Dominion Gas have gas distribution operations, have considered legislation regarding a competitive deregulation of natural gas sales at the retail level.

Ohio—Since October 2000, East Ohio has offered the Energy Choice program, under which residential and commercial customers are encouraged to purchase gas directly from retail suppliers or through a community aggregation program. In October 2006, East Ohio restructured its commodity service by entering into gas purchase contracts with selected suppliers at a fixed price above the New York Mercantile Exchange month-end settlement and passing that gas cost to customers under the Standard Service Offer program. Starting in April 2009, East Ohio buys natural gas under the Standard Service Offer program only for customers not eligible to participate in the Energy Choice program and places Energy Choice-eligible customers in a direct retail relationship with selected suppliers, which is designated on the customers' bills.

In January 2013, the Ohio Commission granted East Ohio's motion to fully exit the merchant function for its nonresidential customers, beginning in April 2013, which requires those customers to choose a retail supplier or be assigned to one at a monthly variable rate set by the supplier. At December 31, 2016, approximately 1.0 million of Dominion Gas' 1.2 million Ohio customers were participating in the Energy Choice program. Subject to the Ohio Commission's approval, East Ohio may eventually exit the gas merchant function in Ohio entirely and have all customers select an alternate gas supplier. East Ohio continues to be the provider of last resort in the event of default by a supplier. Large industrial customers in Ohio also source their own natural gas supplies.

West Virginia—At this time, West Virginia has not enacted legislation allowing customers to choose providers in the retail

natural gas markets served by Hope. However, the West Virginia Commission has issued regulations to govern pooling services, one of the tools that natural gas suppliers may utilize to provide retail customers a choice in the future and has issued rules requiring competitive gas service providers to be licensed in West Virginia.

Federal Regulations

FEDERAL ENERGY REGULATORY COMMISSION

Electric

Under the Federal Power Act, FERC regulates wholesale sales and transmission of electricity in interstate commerce by public utilities. Virginia Power purchases and sells electricity in the PJM wholesale market and Dominion's merchant generators sell electricity in the PJM, MISO, CAISO and ISO-NE wholesale markets, and to wholesale purchasers in the states of Virginia, North Carolina, Indiana, Connecticut, Tennessee, Georgia, California and Utah, under Dominion's market-based sales tariffs authorized by FERC or pursuant to FERC authority to sell as a qualified facility. In addition, Virginia Power has FERC approval of a tariff to sell wholesale power at capped rates based on its embedded cost of generation. This cost-based sales tariff could be used to sell to loads within or outside Virginia Power's service territory. Any such sales would be voluntary.

Dominion and Virginia Power are subject to FERC's Standards of Conduct that govern conduct between transmission function employees of interstate gas and electricity transmission providers and the marketing function employees of their affiliates. The rule defines the scope of transmission and marketing-related functions that are covered by the standards and is designed to prevent transmission providers from giving their affiliates undue preferences.

Dominion and Virginia Power are also subject to FERC's affiliate restrictions that (1) prohibit power sales between Virginia Power and Dominion's merchant plants without first receiving FERC authorization, (2) require the merchant plants and Virginia Power to conduct their wholesale power sales operations separately, and (3) prohibit Virginia Power from sharing market information with merchant plant operating personnel. The rules are designed to prohibit Virginia Power from giving the merchant plants a competitive advantage.

EPACT included provisions to create an ERO. The ERO is required to promulgate mandatory reliability standards governing the operation of the bulk power system in the U.S. FERC has certified NERC as the ERO and also issued an initial order approving many reliability standards that went into effect in 2007. Entities that violate standards will be subject to fines of up to \$1 million per day, per violation and can also be assessed non-monetary penalties, depending upon the nature and severity of the violation.

Dominion and Virginia Power plan and operate their facilities in compliance with approved NERC reliability requirements. Dominion and Virginia Power employees participate on various NERC committees, track the development and implementation of standards, and maintain proper compliance registration with NERC's regional organizations. Dominion and Virginia Power anticipate incurring additional compliance expenditures over the next several years as a result of the implementation of new cybersecurity programs. In addition, NERC has redefined critical assets which expanded the number of assets subject to NERC reliability standards, including cybersecurity assets. NERC continues to develop additional requirements specifically regarding supply chain standards and control centers that impact the bulk electric system. While Dominion and Virginia Power expect to incur additional compliance costs in connection with NERC requirements and initiatives, such expenses are not expected to significantly affect results of operations.

In April 2008, FERC granted an application for Virginia Power's electric transmission operations to establish a forward-looking formula rate mechanism that updates transmission rates on an annual basis and approved an ROE of 11.4%, effective as of January 1, 2008. The formula rate is designed to recover the expected revenue requirement for each calendar year and is updated based on actual costs. The FERC-approved formula method, which is based on projected costs, allows Virginia Power to earn a current return on its growing investment in electric transmission infrastructure.

Gas

FERC regulates the transportation and sale for resale of natural gas in interstate commerce under the Natural Gas Act of 1938 and the Natural Gas Policy Act of 1978, as amended. Under the Natural Gas Act, FERC has authority over rates, terms and conditions of services performed by Questar Pipeline, DTI, DCG, Iroquois and certain services performed by Cove Point. Pursuant to FERC's February 2014 approval of DTI's uncontested settlement offer, DTI's base rates for storage and transportation services are subject to a moratorium through the end of 2016. The design, construction and operation of Cove Point's LNG facility, including associated natural gas pipelines, the Liquefaction Project and the import and export of LNG are also regulated by FERC.

Dominion's and Dominion Gas' interstate gas transmission and storage activities are conducted on an open access basis, in accordance with certificates, tariffs and service agreements on file with FERC and FERC regulations.

Dominion and Dominion Gas operate in compliance with FERC standards of conduct, which prohibit the sharing of certain non-public transmission information or customer specific data by its interstate gas transmission and storage companies with non-transmission function employees. Pursuant to these standards of conduct, Dominion and Dominion Gas also make certain informational postings available on Dominion's website.

See Note 13 to the Consolidated Financial Statements for additional information.

Safety Regulations

Dominion and Dominion Gas are also subject to the Pipeline Safety Improvement Act of 2002 and the Pipeline Safety, Regulatory Certainty and Job Creation Act of 2011, which mandate inspections of interstate and intrastate natural gas transmission and storage pipelines, particularly those located in areas of high-density population. Dominion and Dominion Gas have evaluated their natural gas transmission and storage properties, as required by the Department of Transportation regulations under these Acts, and has implemented a program of identification, testing and potential remediation activities. These activities are ongoing. The Companies are subject to a number of federal and state laws and regulations, including Occupational Safety and Health Administration, and comparable state statutes, whose purpose is to protect the health and safety of workers. The Companies have an internal safety, health and security program designed to monitor and enforce compliance with worker safety requirements, which is routinely reviewed and considered for improvement. The Companies believe that they are in material compliance with all applicable laws and regulations related to worker health and safety. Notwithstanding these preventive measures, incidents may occur that are outside of the Companies' control.

Environmental Regulations

Each of the Companies' operating segments faces substantial laws, regulations and compliance costs with respect to environmental matters. In addition to imposing continuing compliance obligations, these laws and regulations authorize the imposition of substantial penalties for noncompliance, including fines, injunctive relief and other sanctions. The cost of complying with applicable environmental laws, regulations and rules is expected to be material to the Companies. If compliance expenditures and associated operating costs are not recoverable from customers through regulated rates (in regulated businesses) or market prices (in unregulated businesses), those costs could adversely affect future results of operations and cash flows. The Companies have applied for or obtained the necessary environmental permits for the operation of their facilities. Many of these permits are subject to reissuance and continuing review. For a discussion of significant aspects of these matters, including current and planned capital expenditures relating to environmental compliance required to be discussed in this Item, see Environmental Matters in Future Issues and Other Matters in Item 7. MD&A, which information is incorporated herein by reference. Additional information can also be found in Item 3. Legal Proceedings and Note 22 to the Consolidated Financial Statements, which information is incorporated herein by reference.

AIR

The CAA is a comprehensive program utilizing a broad range of regulatory tools to protect and preserve the nation's air quality. Regulated emissions include, but are not limited to, carbon, methane, VOC, other GHG, mercury, other toxic metals, hydrogen chloride, NOx, SO2, and particulate matter. At a minimum, delegated states are required to establish regulatory programs to address all requirements of the CAA. However, states may choose to develop regulatory programs that are more restrictive. Many of the Companies' facilities are subject to the CAA's permitting and other requirements.

GLOBAL CLIMATE CHANGE

The national and international attention in recent years on GHG emissions and their relationship to climate change has resulted in federal, regional and state legislative and regulatory action in this area. See, for example, the discussion of the Clean Power Plan and the United Nation's Paris Agreement in *Environmental Matters* in *Future Issues and Other* Matters in Item 7. MD&A.

The Companies support national climate change legislation that would provide a consistent, economy-wide approach to addressing this issue and are currently taking action to protect the environment and address climate change while meeting the growing needs of their service territory. Dominion's CEO and operating segment CEOs are responsible for compliance with the laws and regulations governing environmental matters, including climate change, and Dominion's Board of Directors receives periodic updates on these matters. See *Environmental Strategy* below, *Environmental Matters* in *Future Issues and Other Matters* in Item 7. MD&A and Note 22 to the Consolidated Financial Statements for information on climate change legislation and regulation, which information is incorporated herein by reference.

WATER

The CWA is a comprehensive program requiring a broad range of regulatory tools including a permit program to authorize and regulate discharges to surface waters with strong enforcement mechanisms. The CWA and analogous state laws impose restrictions and strict controls regarding the discharge of effluent into surface waters and require permits to be obtained from the EPA or the analogous state agency to discharge into state waters or waters of the U.S. Containment berms and similar structures may be required to help prevent accidental releases. Dominion must comply with applicable aspects of the CWA programs at its current and former operating facilities. From time to time, Dominion's projects and operations may impact tidal and non-tidal wetlands. In these instances, Dominion must obtain authorization from the appropriate federal, state and local agencies prior to impacting a subject wetland. The authorizing agency may impose significant direct or indirect mitigation costs to compensate for such impacts to wetlands.

GAS AND OIL WELLS

All wells drilled in tight-gas-sand and shale reservoirs require hydraulicfracture stimulation to achieve economic production rates and recoverable reserves. The majority of Wexpro's current and future production and reserve potential is derived from reservoirs that require hydraulic-fracture stimulation to be commercially viable. Currently, all well construction activities, including hydraulic-fracture stimulation and management and disposal of hydraulic fracturing fluids, are regulated by federal and state agencies that review and approve all aspects of gas- and oil-well design and operation. New environmental initiatives, proposed federal and state legislation, and rule-making pertaining to hydraulic fracture stimulation could increase Wexpro's costs, restrict its access to natural gas reserves and impose additional permitting and reporting requirements. These potential restrictions on the use of hydraulic-fracture stimulation could materially affect Dominion's ability to develop gas and oil reserves.

OTHER REGULATIONS

Other significant environmental regulations to which the Companies are subject include the CERCLA (providing for immediate response and removal actions, and contamination clean up, in the event of releases of hazardous substances into the environment), the Endangered Species Act (prohibiting activities that can result in harm to specific species of plants and animals), and federal and state laws protecting graves, sacred sites and cultural resources, including those of Native American populations. These regulations can result in compliance costs and potential adverse effects on project plans and schedules such that the Companies' businesses may be materially affected.

Nuclear Regulatory Commission

All aspects of the operation and maintenance of Dominion's and Virginia Power's nuclear power stations are regulated by the NRC. Operating licenses issued by the NRC are subject to revocation, suspension or modification, and the operation of a nuclear unit may be suspended if the NRC determines that the public interest, health or safety so requires.

From time to time, the NRC adopts new requirements for the operation and maintenance of nuclear facilities. In many cases, these new regulations require changes in the design, operation and maintenance of existing nuclear facilities. If the NRC adopts such requirements in the future, it could result in substantial increases in the cost of operating and maintaining Dominion's and Virginia Power's nuclear generating units. See Note 22 to the Consolidated Financial Statements for further information.

The NRC also requires Dominion and Virginia Power to decontaminate their nuclear facilities once operations cease. This process is referred to as decommissioning, and Dominion and Virginia Power are required by the NRC to be financially prepared. For information on decommissioning trusts, see *Dominion Generation-Nuclear Decommissioning* above and Note 9 to the Consolidated Financial Statements. See Note 22 to the Consolidated Financial Statements for information on spent nuclear fuel.

ENVIRONMENTAL STRATEGY

Environmental stewardship is embedded in the Companies' culture and core values and is the responsibility of all employees. They are committed to working with their stakeholders and the communities in which the Companies operate to find sustainable solutions to the energy and environmental challenges that confront the Companies and the U.S. The Companies are committed to delivering reliable, clean and affordable energy while protecting the environment and strengthening the communities they serve. The Companies are dedicated to meeting their customers' growing energy needs with innovative, sustainable solutions. It is the Companies' belief that sustainable solutions must balance the interdependent goals of environmental stewardship and economic prosperity. Their integrated strategy to meet this objective consists of four major elements:

- · Compliance with applicable environmental laws, regulations and rules;
- Conservation and load management;
- Renewable generation development; and
- Improvements in other energy infrastructure, including natural gas operations.

This strategy incorporates the Companies' efforts to voluntarily reduce GHG emissions, which are described below. See *Dominion Generation-Properties* and *Dominion Energy-Properties* for more information on certain of the projects described below.

Conservation and Load Management

Conservation and load management play a significant role in meeting the growing demand for electricity. The Regulation Act

provides incentives for energy conservation through the implementation of conservation programs. Additional legislation in 2009 added definitions of peak-shaving and energy efficiency programs, and allowed for a margin on operating expenses and recovery of revenue reductions related to energy efficiency programs.

Virginia Power's DSM programs, implemented with Virginia Commission and North Carolina Commission approval, provide important incremental steps in assisting customers to reduce energy consumption through programs that include energy audits and incentives for customers to upgrade or install certain energy efficient measures and/or systems. The DSM programs began in Virginia in 2010 and in North Carolina in 2011. Currently, there are residential and non-residential DSM programs active in the two states. Virginia Power continues to evaluate opportunities to redesign current DSM programs and develop new DSM initiatives in Virginia and North Carolina.

In Ohio, East Ohio offers three DSM programs, approved by the Ohio Commission, designed to help customers reduce their energy consumption.

Questar Gas offers an energy-efficiency program, approved by the Utah and Wyoming Commissions, designed to help customers reduce their energy consumption.

Virginia Power continues to upgrade meters throughout Virginia to AMI, also referred to as smart meters. The AMI meter upgrades are part of an ongoing demonstration effort to help Virginia Power further evaluate the effectiveness of AMI meters in monitoring voltage stability, remotely turn off and on electric service, increase detection and reporting capabilities with respect to power outages and restorations, obtain remote daily meter readings and offer dynamic rates.

Renewable Generation

Renewable energy is also an important component of a diverse and reliable energy mix. Both Virginia and North Carolina have passed legislation setting targets for renewable power. Dominion is committed to meeting Virginia's goals of 12% of base year electric energy sales from renewable power sources by 2022, and 15% by 2025, and North Carolina's Renewable Portfolio Standard of 12.5% by 2021 and continues to add utility-scale solar capacity in Virginia.

See *Operating Segments* and Item 2. Properties for additional information, including Dominion's merchant solar properties.

Improvements in Other Energy Infrastructure

Dominion's existing five-year investment plan includes significant capital expenditures to upgrade or add new electric transmission and distribution lines, substations and other facilities to meet growing electricity demand within its service territory, maintain reliability and address environmental requirements. These enhancements are primarily aimed at meeting Dominion's continued goal of providing reliable service, and are intended to address both continued population growth and increases in electricity consumption by the typical consumer. An additional benefit will be added capacity to efficiently deliver electricity from the renewable projects now being developed or to be developed in the future. See *Properties* in Item 1. Business, *Operating Segments, DVP* for additional information.

Dominion and Dominion Gas, in connection with their existing five-year investment plans, are also pursuing the construction

or upgrade of regulated infrastructure in their natural gas businesses. See *Properties and Investments* in Item 1. Business, *Operating Segments, Dominion Energy* for additional information, including natural gas infrastructure projects.

The Companies' GHG Management Strategy

The Companies have not established a standalone GHG emissions reduction target or timetable, but they are actively engaged in GHG emission reduction efforts. The Companies have an integrated strategy for reducing GHG emission intensity with diversification and lower carbon intensity as its cornerstone. The principal components of the strategy include initiatives that address electric energy management, electric energy production, electric energy delivery and natural gas storage, transmission and delivery, as follows:

- Enhance conservation and energy efficiency programs to help customers use energy wisely and reduce environmental impacts;
- Expand the Companies' renewable energy portfolio, principally solar, wind power, fuel cells and biomass, to help diversify the Companies' fleet, meet state renewable energy targets and lower the carbon footprint;
- Evaluate other new generating capacity, including low emissions natural-gas fired and emissions-free nuclear units to meet customers' future electricity needs;
- Construct new electric transmission infrastructure to modernize the grid, promote economic security and help deliver more green energy to population centers where it is needed most;
- Construct new natural gas infrastructure to expand availability of this cleaner fuel, to reduce emissions, and to promote energy and economic security both in the U.S. and abroad;
- Implement and enhance voluntary methane mitigation measures through the EPA's Natural Gas Star and Methane Challenge programs; and
- As part of their commitment to compliance with such environmental laws, Dominion and Virginia Power have sold or closed a number of coal-fired generation units over the past several years, and may close additional units in the future.

Since 2000, Dominion and Virginia Power have tracked the emissions of their electric generation fleet, which employs a mix of fuel and renewable energy sources. Comparing annual year 2015 to annual year 2000, the entire electric generating fleet (based on ownership percentage) reduced its average CO2 emissions rate per MWh of energy produced from electric generation by approximately 43%. Comparing annual year 2015 to annual year 2000, the regulated electric generating fleet (based on ownership percentage) reduced its average CO2 emissions rate per MWh of energy produced from electric generation by approximately 23%. Dominion and Virginia Power do not yet have final 2016 emissions data.

Dominion also develops a comprehensive GHG inventory annually. For Dominion Generation, Dominion's and Virginia Power's direct CO2 equivalent emissions, based on ownership percentage, were 34.3 million metric tons and 30.9 million metric tons, respectively, in 2015, compared to 33.6 million metric tons and 30.1 million metric tons, respectively, in 2014. For the DVP operating segment's electric transmission and distribution operations, direct CO2 equivalent emissions for 2015 were 53,819 metric tons, compared to 75,671 metric tons in 2014. For 2015, DTI's and Cove Point's direct CO2 equivalent emissions together were 1.0 million metric tons, decreasing from 1.3 million metric tons in 2014, and Hope's and East Ohio's direct CO2 equivalent emissions together remained unchanged since 2014 at 0.9 million metric tons. The Companies' GHG inventory follows all methodologies specified in the EPA Mandatory Greenhouse Gas Reporting Rule, 40 Code of Federal Regulations Part 98 for calculating emissions.

CYBERSECURITY

In an effort to reduce the likelihood and severity of cyber intrusions, the Companies have a comprehensive cybersecurity program designed to protect and preserve the confidentiality, integrity and availability of data and systems. In addition, the Companies are subject to mandatory cybersecurity regulatory requirements, interface regularly with a wide range of external organizations, and participate in classified briefings to maintain an awareness of current cybersecurity threats and vulnerabilities. The Companies' current security posture and regulatory compliance efforts are intended to address the evolving and changing cyber threats. See Item 1A. Risk Factors for additional information.

Item 1A. Risk Factors

The Companies' businesses are influenced by many factors that are difficult to predict, involve uncertainties that may materially affect actual results and are often beyond their control. A number of these factors have been identified below. For other factors that may cause actual results to differ materially from those indicated in any forward-looking statement or projection contained in this report, see *Forward-Looking Statements* in Item 7. MD&A.

The Companies' results of operations can be affected by changes in the weather. Fluctuations in weather can affect demand for the Companies' services. For example, milder than normal weather can reduce demand for electricity and gas transmission and distribution services. In addition, severe weather, including hurricanes, winter storms, earthquakes, floods and other natural disasters can disrupt operation of the Companies' facilities and cause service outages, production delays and property damage that require incurring additional expenses. Changes in weather conditions can result in reduced water levels or changes in water temperatures that could adversely affect operations at some of the Companies' power stations. Furthermore, the Companies' operations could be adversely affected and their physical plant placed at greater risk of damage should changes in global climate produce, among other possible conditions, unusual variations in temperature and weather patterns, resulting in more intense, frequent and extreme weather events, abnormal levels of precipitation and, for operations located on or near coastlines, a change in sea level or sea temperatures.

The rates of Dominion's and Dominion Gas' gas transmission and distribution operations and Virginia Power's electric transmission, distribution and generation operations are subject to regulatory review. Revenue provided by Virginia Power's electric transmission, distribution and generation operations and Dominion's and Dominion Gas' gas transmission and

Jun 22 2018

distribution operations is based primarily on rates approved by state and federal regulatory agencies. The profitability of these businesses is dependent on their ability, through the rates that they are permitted to charge, to recover costs and earn a reasonable rate of return on their capital investment.

Virginia Power's wholesale rates for electric transmission service are updated on an annual basis through operation of a FERC-approved formula rate mechanism. Through this mechanism, Virginia Power's wholesale rates for electric transmission reflect the estimated cost-of-service for each calendar year. The difference in the estimated cost-of-service and actual cost-of-service for each calendar year is included as an adjustment to the wholesale rates for electric transmission service in a subsequent calendar year. These wholesale rates are subject to FERC review and prospective adjustment in the event that customers and/or interested state commissions file a complaint with FERC and are able to demonstrate that Virginia Power's wholesale revenue requirement is no longer just and reasonable. They are also subject to retroactive corrections to the extent that the formula rate was not properly populated with the actual costs.

Similarly, various rates and charges assessed by Dominion's and Dominion Gas' gas transmission businesses are subject to review by FERC. In addition, the rates of Dominion's and Dominion Gas' gas distribution businesses are subject to state regulatory review in the jurisdictions in which they operate. A failure by us to support these rates could result in rate decreases from current rate levels, which could adversely affect our results of operations, cash flows and financial condition.

Virginia Power's base rates, terms and conditions for generation and distribution services to customers in Virginia are reviewed by the Virginia Commission on a biennial basis in a proceeding that involves the determination of Virginia Power's actual earned ROE during a combined two-year historic test period, and the determination of Virginia Power's authorized ROE prospectively. Under certain circumstances described in the Regulation Act, Virginia Power may be required to share a portion of its earnings with customers through a refund process.

Legislation signed by the Virginia Governor in February 2015 suspends biennial reviews for the five successive 12-month test periods beginning January 1, 2015 and ending December 31, 2019, and no changes will be made to Virginia Power's existing base rates until at least December 1, 2022. During this period, Virginia Power bears the risk of any severe weather events and natural disasters, the risk of asset impairments related to the early retirement of any generation facilities due to the implementation of the Clean Power Plan regulations, as well as an increase in general operating and financing costs, and Virginia Power may not recover its associated costs through increases to base rates. If Virginia Power incurs any such significant additional expenses during this period, Virginia Power may not be able to recover its costs and/or earn a reasonable return on capital investment, which could negatively affect Virginia Power's future earnings.

Virginia Power's retail electric base rates for bundled generation, transmission, and distribution services to customers in North Carolina are regulated on a cost-of-service/rate-of-return basis subject to North Carolina statutes, and the rules and procedures of the North Carolina Commission. If retail electric earnings exceed the returns established by the North Carolina Commission, retail electric rates may be subject to review and possible reduction by the North Carolina Commission, which may decrease Virginia Power's future earnings. Additionally, if the North Carolina Commission does not allow recovery through base rates, on a timely basis, of costs incurred in providing service, Virginia Power's future earnings could be negatively impacted.

Governmental officials, stakeholders and advocacy groups may challenge these regulatory reviews. Such challenges may lengthen the time, complexity and costs associated with such regulatory reviews.

The Companies are subject to complex governmental regulation, including tax regulation, that could adversely affect their results of operations and subject the Companies to monetary penalties. The Companies' operations are subject to extensive federal, state and local regulation and require numerous permits, approvals and certificates from various governmental agencies. Such laws and regulations govern the terms and conditions of the services we offer, our relationships with affiliates, protection of our critical electric infrastructure assets and pipeline safety, among other matters. These operations are also subject to legislation governing taxation at the federal, state and local level. They must also comply with environmental legislation and associated regulations. Management believes that the necessary approvals have been obtained for existing operations and that the business is conducted in accordance with applicable laws. The Companies' businesses are subject to regulatory regimes which could result in substantial monetary penalties if any of the Companies is found not to be in compliance, including mandatory reliability standards and interaction in the wholesale markets. New laws or regulations, the revision or reinterpretation of existing laws or regulations, changes in enforcement practices of regulators, or penalties imposed for non-compliance with existing laws or regulations may result in substantial additional expense.

Dominion's and Virginia Power's generation business may be negatively affected by possible FERC actions that could change market design in the wholesale markets or affect pricing rules or revenue calculations in the RTO markets. Dominion's and Virginia Power's generation stations operating in RTO markets sell capacity, energy and ancillary services into wholesale electricity markets regulated by FERC. The wholesale markets allow these generation stations to take advantage of market price opportunities, but also expose them to market risk. Properly functioning competitive wholesale markets depend upon FERC's continuation of clearly identified market rules. From time to time FERC may investigate and authorize RTOs to make changes in market design. FERC also periodically reviews Dominion's authority to sell at marketbased rates. Material changes by FERC to the design of the wholesale markets or its interpretation of market rules, Dominion's or Virginia Power's authority to sell power at market-based rates, or changes to pricing rules or rules involving revenue calculations, could adversely impact the future results of Dominion's or Virginia Power's generation business. For example, in July 2015, FERC approved changes to PJM's Reliability Pricing Model capacity market establishing a new Capacity Performance Resource product. This product offers the potential for higher capacity prices but can also impose significant economic penalties on generator owners such as Virginia Power for failure to perform during periods when electricity is in high demand. In addition, there have been changes to the interpretation and application of FERC's market manipulation rules. A failure to comply with these rules could lead to civil and criminal penalties.

The Companies' infrastructure build and expansion plans often require regulatory approval before construction can commence. The Companies may not complete facility construction, pipeline, conversion or other infrastructure projects that they commence, or they may complete projects on materially different terms or timing than initially anticipated, and they may not be able to achieve the intended benefits of any such project, if completed. Several facility construction, pipeline, electric transmission line, expansion, conversion and other infrastructure projects have been announced and additional projects may be considered in the future. The Companies compete for projects with companies of varying size and financial capabilities, including some that may have competitive advantages. Commencing construction on announced and future projects may require approvals from applicable state and federal agencies, and such approvals could include mitigation costs which may be material to the Companies. Projects may not be able to be completed on time as a result of weather conditions, delays in obtaining or failure to obtain regulatory approvals, delays in obtaining key materials, labor difficulties, difficulties with partners or potential partners, a decline in the credit strength of counterparties or vendors, or other factors beyond the Companies' control. Even if facility construction, pipeline, expansion, electric transmission line, conversion and other infrastructure projects are completed, the total costs of the projects may be higher than anticipated and the performance of the business of the Companies following completion of the projects may not meet expectations. Start-up and operational issues can arise in connection with the commencement of commercial operations at our facilities, including but not limited to commencement of commercial operations at our power generation facilities following expansions and fuel type conversions to natural gas and biomass. Such issues may include failure to meet specific operating parameters, which may require adjustments to meet or amend these operating parameters. Additionally, the Companies may not be able to timely and effectively integrate the projects into their operations and such integration may result in unforeseen operating difficulties or unanticipated costs. Further, regulators may disallow recovery of some of the costs of a project if they are deemed not to be prudently incurred. Any of these or other factors could adversely affect the Companies' ability to realize the anticipated benefits from the facility construction, pipeline, electric transmission line, expansion, conversion and other infrastructure projects.

The development and construction of several large-scale infrastructure projects simultaneously involves significant execution risk. The Companies are currently simultaneously developing or constructing several major projects, including the Liquefaction Project, the Atlantic Coast Pipeline Project, the Supply Header project, Greensville County and multiple DTI projects, which together help contribute to the over \$24 billion in capital expenditures planned by the Companies through 2021. Several of the Companies' key projects are increasingly large-scale, complex and being constructed in constrained geographic areas (for example, the Liquefaction Project) or in difficult terrain (for example, the Atlantic Coast Pipeline Project). The advancement of the Companies' ventures is also affected by the interventions, litigation or other activities of stakeholder and advocacy groups, some of which oppose natural gas-related and energy infrastructure projects. For example, certain landowners and stakeholder groups oppose the Atlantic Coast Pipeline Project, which could impede the acquisition of rights-of-way and other land rights on a timely basis or on acceptable terms. Given that these projects provide the foundation for the Companies' strategic growth plan, if the Companies are unable to obtain or maintain the required approvals, develop the necessary technical expertise, allocate and coordinate sufficient resources, adhere to budgets and timelines, effectively handle public outreach efforts, or otherwise fail to successfully execute the projects, there could be an adverse impact to the Companies' financial position, results of operations and cash flows. For example, while Dominion has received the required approvals to commence construction of the Liquefaction Project from the DOE, all DOE export licenses are subject to review and possible withdrawal should the DOE conclude that such export authorization is no longer in the public interest. Failure to comply with regulatory approval conditions or an adverse ruling in any future litigation could adversely affect the Companies' ability to execute their business plan.

The Companies are dependent on their contractors for the successful and timely completion of large-scale infrastructure projects. The construction of such projects is expected to take several years, is typically confined within a limited geographic area or difficult terrain and could be subject to delays, cost overruns, labor disputes and other factors that could cause the total cost of the project to exceed the anticipated amount and adversely affect the Companies' financial performance and/or impair the Companies' ability to execute the business plan for the project as scheduled.

Further, an inability to obtain financing or otherwise provide liquidity for the projects on acceptable terms could negatively affect the Companies' financial condition, cash flows, the projects' anticipated financial results and/or impair the Companies' ability to execute the business plan for the projects as scheduled.

Any additional federal and/or state requirements imposed on energy companies mandating limitations on GHG emissions or requiring efficiency improvements may result in compliance costs that alone or in combination could make some of the Companies' electric generation units or natural gas facilities uneconomical to maintain or operate. The Clean Power Plan is targeted at reducing CO2 emissions from existing fossil fuel-fired power generation facilities.

Compliance with the Clean Power Plan may require increasing the energy efficiency of equipment at facilities, committing significant capital toward carbon reduction programs, purchase of allowances and/or emission rate credits, fuel switching, and/or retirement of high-emitting generation facilities and potential replacement with lower emitting generation facilities. The Clean Power Plan uses a set of measures for reducing emissions from existing sources that includes efficiency improvements at coal plants, displacing coal-fired generation with increased utilization of natural gas combined cycle units, and expanding renewable resources. Compliance with the Clean Power Plan's anticipated implementing regulations may require Virginia Power to prematurely retire certain generating facilities, with the potential lack or delay of cost recovery and higher electric rates, which could affect consumer demand. The cost of compliance with the Clean Power Plan is subject to significant uncertainties due to the outcome of several interrelated assumptions and variables, including timing of the implementation of rules, required levels of reductions, allocation requirements of the new rules, the maturation and commercialization of carbon controls and/or reduction programs, and the selected compliance alternatives. Dominion and Virginia Power cannot estimate the aggregate effect of such requirements on their results of operations, financial condition or their customers. However, such expenditures, if material, could make Dominion's and Virginia Power's generation facilities uneconomical to operate, result in the impairment of assets, or otherwise adversely affect Dominion's or Virginia Power's results of operations, financial performance or liquidity.

There are also potential impacts on Dominion's and Dominion Gas' natural gas businesses as federal or state GHG regulations may require GHG emission reductions from the natural gas sector which, in addition to resulting in increased costs, could affect demand for natural gas. Additionally, GHG requirements could result in increased demand for energy conservation and renewable products, which could impact the natural gas businesses.

The Companies' operations are subject to a number of environmental laws and regulations which impose significant compliance costs to the Companies. The Companies' operations are subject to extensive federal, state and local environmental statutes, rules and regulations relating to air quality, water quality, waste management, natural resources, and health and safety. Compliance with these legal requirements requires the Companies to commit significant capital toward permitting, emission fees, environmental monitoring, installation and operation of environmental control equipment and purchase of allowances and/or offsets. Additionally, the Companies could be responsible for expenses relating to remediation and containment obligations, including at sites where they have been identified by a regulatory agency as a potentially responsible party. Expenditures relating to environmental compliance have been significant in the past, and the Companies expect that they will remain significant in the future. Certain facilities have become uneconomical to operate and have been shut down, converted to new fuel types or sold. These types of events could occur again in the future.

We expect that existing environmental laws and regulations may be revised and/or new laws may be adopted or become applicable, including regulation of GHG emissions which could have an impact on the Companies' business. Risks relating to expected regulation of GHG emissions from existing fossil fuel-fired electric generating units are discussed above. In addition, further regulation of air quality and GHG emissions under the CAA will be imposed on the natural gas sector, including rules to limit methane leakage. The Companies are also subject to recently finalized federal water and waste regulations, including regulations concerning cooling water intake structures, coal combustion by-product handling and disposal practices, wastewater discharges from steam electric generating stations, management and disposal of hydraulic fracturing fluids and the potential further regulation of polychlorinated biphenyls.

Compliance costs cannot be estimated with certainty due to the inability to predict the requirements and timing of implementation of any new environmental rules or regulations. Other factors which affect the ability to predict future environmental expenditures with certainty include the difficulty in estimating clean-up costs and quantifying liabilities under environmental laws that impose joint and several liability on all responsible parties. However, such expenditures, if material, could make the Companies' facilities uneconomical to operate, result in the impairment of assets, or otherwise adversely affect the Companies' results of operations, financial performance or liquidity.

Virginia Power is subject to risks associated with the disposal and storage of coal ash. Virginia Power historically produced and continues to produce coal ash, or CCRs, as a by-product of its coal-fired generation operations. The ash is stored and managed in impoundments (ash ponds) and landfills located at eight different facilities.

Virginia Power may face litigation regarding alleged CWA violations at Possum Point power station, and is facing litigation regarding alleged CWA violations at Chesapeake power station and could incur settlement expenses and other costs, depending on the outcome of any such litigation, including costs associated with closing, corrective action and ongoing monitoring of certain ash ponds. In addition, the EPA and Virginia recently issued regulations concerning the management and storage of CCRs and West Virginia may impose additional regulations that would apply to the facilities noted above. These regulations would require Virginia Power to make additional capital expenditures and increase its operating and maintenance expenses.

Further, while Virginia Power operates its ash ponds and landfills in compliance with applicable state safety regulations, a release of coal ash with a significant environmental impact, such as the Dan River ash basin release by a neighboring utility, could result in remediation costs, civil and/or criminal penalties, claims, litigation, increased regulation and compliance costs, and reputational damage, and could impact the financial condition of Virginia Power.

The Companies' operations are subject to operational hazards, equipment failures, supply chain disruptions and personnel issues which could negatively affect the Companies. Operation of the Companies' facilities involves risk, including the risk of potential breakdown or failure of equipment or processes due to aging infrastructure, fuel supply, pipeline integrity or transportation disruptions, accidents, labor disputes or work stoppages by employees, acts of terrorism or sabotage, construction delays or cost overruns, shortages of or delays in obtaining equipment, material and labor, operational restrictions resulting from environmental limitations and governmental interventions, and performance below expected levels. The Companies' businesses are dependent upon sophisticated information technology systems and network infrastructure, the failure of which could prevent them from accomplishing critical business functions. Because the Companies' transmission facilities, pipelines and other facilities are interconnected with those of third parties, the operation of their facilities and pipelines could be adversely affected by unexpected or uncontrollable events occurring on the systems of such third parties.

Operation of the Companies' facilities below expected capacity levels could result in lost revenues and increased expenses, including higher maintenance costs. Unplanned outages of the Companies' facilities and extensions of scheduled outages due to mechanical failures or other problems occur from time to time and are an inherent risk of the Companies' business. Unplanned outages typically increase the Companies' operation and maintenance expenses and may reduce their revenues as a result of selling less output or may require the Companies to incur significant costs as a result of operating higher cost units or obtaining replacement output from third parties in the open market to satisfy forward energy and capacity or other contractual obligations. Moreover, if the Companies are unable to perform their contractual obligations, penalties or liability for damages could result.

In addition, there are many risks associated with the Companies' operations and the transportation, storage and processing of natural gas and NGLs, including nuclear accidents, fires, explosions, uncontrolled release of natural gas and other environmental hazards, pole strikes, electric contact cases, the collision of third party equipment with pipelines and avian and other wildlife impacts. Such incidents could result in loss of human life or injuries among employees, customers or the public in general, environmental pollution, damage or destruction of facilities or business interruptions and associated public or employee safety impacts, loss of revenues, increased liabilities, heightened regulatory scrutiny and reputational risk. Further, the location of pipelines and storage facilities, or generation, transmission, substations and distribution facilities near populated areas, including residential areas, commercial business centers and industrial sites, could increase the level of damages resulting from these risks.

Dominion and Virginia Power have substantial ownership interests in and operate nuclear generating units; as a result, each may incur substantial costs and liabilities. Dominion's and Virginia Power's nuclear facilities are subject to operational, environmental, health and financial risks such as the on-site storage of spent nuclear fuel, the ability to dispose of such spent nuclear fuel, the ability to maintain adequate reserves for decommissioning, limitations on the amounts and types of insurance available, potential operational liabilities and extended outages, the costs of replacement power, the costs of maintenance and the costs of securing the facilities against possible terrorist attacks. Dominion and Virginia Power maintain decommissioning trusts and external insurance coverage to minimize the financial exposure to these risks; however, it is possible that future decommissioning costs could exceed amounts in the decommissioning trusts and/or damages could exceed the amount of insurance coverage. If Dominion's and Virginia Power's decommissioning trust funds are insufficient, and they are not allowed to recover the additional costs incurred through insurance, or in the case of Virginia Power through regulatory mechanisms, their results of operations could be negatively impacted.

Dominion's and Virginia Power's nuclear facilities are also subject to complex government regulation which could negatively impact their results of operations. The NRC has broad authority under federal law to impose licensing and safety-related requirements for the operation of nuclear generating facilities. In the event of noncompliance, the NRC has the authority to impose fines, set license conditions, shut down a nuclear unit, or take some combination of these actions, depending on its assessment of the severity of the situation, until compliance is achieved. Revised safety requirements promulgated by the NRC could require Dominion and Virginia Power to make substantial expenditures at their nuclear plants. In addition, although the Companies have no reason to anticipate a serious nuclear incident at their plants, if an incident did occur, it could materially and adversely affect their results of operations and/or financial condition. A major incident at a nuclear facility anywhere in the world, such as the nuclear events in Japan in 2011, could cause the NRC to adopt increased safety regulations or otherwise limit or restrict the operation or licensing of domestic nuclear units.

Sustained declines in natural gas and NGL prices have resulted in, and could result in further, curtailments of third-party producers' drilling programs, delaying the production of volumes of natural gas and NGLs that Dominion and Dominion Gas gather, process, and transport and reducing the value of NGLs retained by Dominion Gas, which may adversely affect Dominion and Dominion Gas' revenues and earnings. Dominion and Dominion Gas obtain their supply of natural gas and NGLs from numerous third-party producers. Most producers are under no obligation to deliver a specific quantity of natural gas or NGLs to Dominion's and Dominion Gas' facilities. A number of other factors could reduce the volumes of natural gas and NGLs available to Dominion's and Dominion Gas' pipelines and other assets. Increased regulation of energy extraction activities could result in reductions in drilling for new natural gas wells, which could decrease the volumes of natural gas supplied to Dominion and Dominion Gas. Producers with direct commodity price exposure face liquidity constraints, which could present a credit risk to Dominion and Dominion Gas. Producers could shift their production activities to regions outside Dominion's and Dominion Gas' footprint. In addition, the extent of natural gas reserves and the rate of production from such reserves may be less than anticipated. If producers were to decrease the supply of natural gas or NGLs to Dominion's and Dominion Gas' systems and facilities for any reason, Dominion and Dominion Gas could experience lower revenues to the extent they are unable to replace the lost volumes on similar terms. In addition, Dominion Gas' revenue from processing and fractionation operations largely results from the sale of commodities at market prices. Dominion Gas receives the wet gas product from producers and may retain the extracted NGLs as compensation for its services. This exposes Dominion Gas to commodity price risk for the value of the spread between the NGL products and natural gas, and relative changes in these prices could adversely impact Dominion Gas' results.

Dominion's merchant power business operates in a challenging market, which could adversely affect its results of operations and future growth. The success of Dominion's merchant power business depends upon favorable market conditions including the ability to sell power at prices sufficient to cover its operating costs. Dominion operates in active wholesale markets that expose it to price volatility for electricity and fuel as well as the credit risk of counterparties. Dominion attempts to manage its price risk by entering into hedging transactions, including short-term and long-term fixed price sales and purchase contracts.

In these wholesale markets, the spot market price of electricity for each hour is generally determined by the cost of supplying the next unit of electricity to the market during that hour. In many cases, the next unit of electricity supplied would be provided by generating stations that consume fossil fuels, primarily natural gas. Consequently, the open market wholesale price for electricity generally reflects the cost of natural gas plus the cost to convert the fuel to electricity. Therefore, changes in the price of natural gas generally affect the open market wholesale price of electricity. To the extent Dominion does not enter into long-term power purchase agreements or otherwise effectively hedge its output, these changes in market prices could adversely affect its financial results.

Jun 22 2018

Dominion purchases fuel under a variety of terms, including long-term and short-term contracts and spot market purchases. Dominion is exposed to fuel cost volatility for the portion of its fuel obtained through short-term contracts or on the spot market, including as a result of market supply shortages. Fuel prices can be volatile and the price that can be obtained for power produced from such fuel may not change at the same rate as fuel costs, thus adversely impacting Dominion's financial results.

In addition, in the event that any of the merchant generation facilities experience a forced outage, Dominion may not receive the level of revenue it anticipated.

The Companies' financial results can be adversely affected by various factors driving demand for electricity and gas and related services. Technological advances required by federal laws mandate new levels of energy efficiency in end-use devices, including lighting, furnaces and electric heat pumps and could lead to declines in per capita energy consumption. Additionally, certain regulatory and legislative bodies have introduced or are considering requirements and/or incentives to reduce energy consumption by a fixed date. Further, Virginia Power's business model is premised upon the cost efficiency of the production, transmission and distribution of large-scale centralized utility generation. However, advances in distributed generation technologies, such as solar cells, gas microturbines and fuel cells, may make these alternative generation methods competitive with large-scale utility generation, and change how customers acquire or use our services.

Reduced energy demand or significantly slowed growth in demand due to customer adoption of energy efficient technology, conservation, distributed generation, regional economic conditions, or the impact of additional compliance obligations, unless substantially offset through regulatory cost allocations, could adversely impact the value of the Companies' business activities.

Dominion Gas has experienced a decline in demand for certain of its processing services due to competing facilities operating in nearby areas.

Dominion and Dominion Gas may not be able to maintain, renew or replace their existing portfolio of customer contracts successfully, or on favorable terms. Upon contract expiration, customers may not elect to re-contract with Dominion and Dominion Gas as a result of a variety of factors, including the amount of competition in the industry, changes in the price of natural gas, their level of satisfaction with Dominion's and Dominion Gas' services, the extent to which Dominion and Dominion Gas are able to successfully execute their business plans and the effect of the regulatory framework on customer demand. The failure to replace any such customer contracts on similar terms could result in a loss of revenue for Dominion and Dominion Gas and related decreases in their earnings and cash flows.

Certain of Dominion and Dominion Gas' gas pipeline services are subject to long-term, fixed-price "negotiated rate" contracts that are not subject to adjustment, even if the cost to perform such services exceeds the revenues received from such contracts. Under FERC policy, a regulated service provider and a customer may mutually agree to sign a contract for service at a "negotiated rate" which may be above or below the FERC regulated, cost-based recourse rate for that service. These "negotiated rate" contracts are not generally subject to adjustment for increased costs which could be produced by inflation or other factors relating to the specific facilities being used to perform the services. Any shortfall of revenue as result of these "negotiated rate" contracts could decrease Dominion and Dominion Gas' earnings and cash flows.

Exposure to counterparty performance may adversely affect the Companies' financial results of operations. The Companies are exposed to credit risks of their counterparties and the risk that one or more counterparties may fail or delay the performance of their contractual obligations, including but not limited to payment for services. Some of Dominion's operations are conducted through less than wholly-owned subsidiaries. In such arrangements, Dominion is dependent on third parties to fund their required share of capital expenditures. Counterparties could fail or delay the performance of their contractual obligations for a number of reasons, including the effect of regulations on their operations. Defaults or failure to perform by customers, suppliers, joint venture partners, financial institutions or other third parties may adversely affect the Companies' financial results.

Dominion will also be exposed to counterparty credit risk relating to the terminal services agreements for the Liquefaction Project. While the counterparties' obligations are supported by parental guarantees and letters of credit, there is no assurance that such credit support would be sufficient to satisfy the obligations in the event of a counterparty default. In addition, if a controversy arises under either agreement resulting in a judgment in Dominion's favor, Dominion may need to seek to enforce a final U.S. court judgment in a foreign tribunal, which could involve a lengthy process.

Market performance and other changes may decrease the value of Dominion's decommissioning trust funds and Dominion's and Dominion Gas' benefit plan assets or increase Dominion's and Dominion Gas' liabilities, which could then require significant additional funding. The performance of the capital markets affects the value of the assets that are held in trusts to satisfy future obligations to decommission Dominion's nuclear plants and under Dominion's and Dominion Gas' pension and other postretirement benefit plans. Dominion and Dominion Gas have significant obligations in these areas and holds significant assets in these trusts. These assets are subject to market fluctuation and will yield uncertain returns, which may fall below expected return rates.

With respect to decommissioning trust funds, a decline in the market value of these assets may increase the funding requirements of the obligations to decommission Dominion's nuclear plants or require additional NRC-approved funding assurance.

A decline in the market value of the assets held in trusts to satisfy future obligations under Dominion's and Dominion Gas' pension and other postretirement benefit plans may increase the funding requirements under such plans. Additionally, changes in interest rates will affect the liabilities under Dominion's and Dominion Gas' pension and other postretirement benefit plans; as interest rates decrease, the liabilities increase, potentially requiring additional funding. Further, changes in mortality assumptions, may also increase the funding requirements of the obligations related to the pension and other postretirement benefit plans.

If the decommissioning trust funds and benefit plan assets are negatively impacted by market fluctuations or other factors,

Jun 22 2018

Table of Contents

Dominion's and Dominion Gas' results of operations, financial condition and/or cash flows could be negatively affected.

The use of derivative instruments could result in financial losses and liquidity constraints. The Companies use derivative instruments, including futures, swaps, forwards, options and FTRs, to manage commodity, currency and financial market risks. In addition, Dominion and Dominion Gas purchase and sell commodity-based contracts for hedging purposes.

The Dodd-Frank Act was enacted into law in July 2010 in an effort to improve regulation of financial markets. The Dodd-Frank Act includes provisions that will require certain over-the-counter derivatives, or swaps, to be centrally cleared and executed through an exchange or other approved trading platform. Non-financial entities that use swaps to hedge or mitigate commercial risk, often referred to as end users, can choose to exempt their hedging transactions from these clearing and exchange trading requirements. Final rules for the over-the-counter derivative-related provisions of the Dodd-Frank Act will continue to be established through the ongoing rulemaking process of the applicable regulators, including rules regarding margin requirements for non-cleared swaps. If, as a result of the rulemaking process, the Companies' derivative activities are not exempted from the clearing, exchange trading or margin requirements, the Companies could be subject to higher costs, including from higher margin requirements, for their derivative activities. In addition, the implementation of, and compliance with, Title VII of the Dodd-Frank Act by the Companies' counterparties could result in increased costs related to the Companies' derivative activities.

Changing rating agency requirements could negatively affect the Companies' growth and business strategy. In order to maintain appropriate credit ratings to obtain needed credit at a reasonable cost in light of existing or future rating agency requirements, the Companies may find it necessary to take steps or change their business plans in ways that may adversely affect their growth and earnings. A reduction in the Companies' credit ratings could result in an increase in borrowing costs, loss of access to certain markets, or both, thus adversely affecting operating results and could require the Companies to post additional collateral in connection with some of its price risk management activities.

An inability to access financial markets could adversely affect the execution of the Companies' business plans. The Companies rely on access to short-term money markets and longer-term capital markets as significant sources of funding and liquidity for business plans with increasing capital expenditure needs, normal working capital and collateral requirements related to hedges of future sales and purchases of energyrelated commodities. Deterioration in the Companies' creditworthiness, as evaluated by credit rating agencies or otherwise, or declines in market reputation either for the Companies or their industry in general, or general financial market disruptions outside of the Companies' control could increase their cost of borrowing or restrict their ability to access one or more financial markets. Further market disruptions could stem from delays in the current economic recovery, the bankruptcy of an unrelated company, general market disruption due to general credit market or political events, or the failure of financial institutions on which the Companies rely. Increased costs and restrictions on the Companies' ability to

access financial markets may be severe enough to affect their ability to execute their business plans as scheduled.

Potential changes in accounting practices may adversely affect the Companies' financial results. The Companies cannot predict the impact that future changes in accounting standards or practices may have on public companies in general, the energy industry or their operations specifically. New accounting standards could be issued that could change the way they record revenues, expenses, assets and liabilities. These changes in accounting standards could adversely affect earnings or could increase liabilities.

War, acts and threats of terrorism, intentional acts and other significant events could adversely affect the Companies' operations. The Companies cannot predict the impact that any future terrorist attacks may have on the energy industry in general, or on the Companies' business in particular. Any retaliatory military strikes or sustained military campaign may affect the Companies' operations in unpredictable ways, such as changes in insurance markets and disruptions of fuel supplies and markets. In addition, the Companies' infrastructure facilities, including projects under construction, could be direct targets of, or indirect casualties of, an act of terror. For example, a physical attack on a critical substation in California resulted in serious impacts to the power grid. Furthermore, the physical compromise of the Companies' facilities could adversely affect the Companies' ability to manage these facilities effectively. Instability in financial markets as a result of terrorism, war, intentional acts, pandemic, credit crises, recession or other factors could result in a significant decline in the U.S. economy and increase the cost of insurance coverage. This could negatively impact the Companies' results of operations and financial condition.

Hostile cyber intrusions could severely impair the Companies' operations, lead to the disclosure of confidential information, damage the reputation of the Companies and otherwise have an adverse effect on the Companies' business. The Companies own assets deemed as critical infrastructure, the operation of which is dependent on information technology systems. Further, the computer systems that run the Companies' facilities are not completely isolated from external networks. There appears to be an increasing level of activity, sophistication and maturity of threat actors, in particular nation state actors, that wish to disrupt the U.S. bulk power system and the U.S. gas transmission or distribution system. Such parties could view the Companies' computer systems, software or networks as attractive targets for cyber attack. For example, malware has been designed to target software that runs the nation's critical infrastructure such as power transmission grids and gas pipelines. In addition, the Companies' businesses require that they and their vendors collect and maintain sensitive customer data, as well as confidential employee and shareholder information, which is subject to electronic theft or loss.

A successful cyber attack on the systems that control the Companies' electric generation, electric or gas transmission or distribution assets could severely disrupt business operations, preventing the Companies from serving customers or collecting revenues. The breach of certain business systems could affect the Companies' ability to correctly record, process and report financial information. A major cyber incident could result in significant expenses to investigate and repair security breaches or system damage and could lead to litigation, fines, other remedial action, heightened regulatory scrutiny and damage to the Companies' reputation. In addition, the misappropriation,

OFFICIAL COP

corruption or loss of personally identifiable information and other confidential data could lead to significant breach notification expenses and mitigation expenses such as credit monitoring. The Companies maintain property and casualty insurance that may cover certain damage caused by potential cyber incidents; however, other damage and claims arising from such incidents may not be covered or may exceed the amount of any insurance available. For these reasons, a significant cyber incident could materially and adversely affect the Companies' business, financial condition and results of operations.

Failure to attract and retain key executive officers and an appropriately qualified workforce could have an adverse effect on the Companies' operations. The Companies' business strategy is dependent on their ability to recruit, retain and motivate employees. The Companies' key executive officers are the CEO, CFO and presidents and those responsible for financial, operational, legal, regulatory and accounting functions. Competition for skilled management employees in these areas of the Companies' business operations is high. Certain events, such as an aging workforce, mismatch of skill set or complement to future needs, or unavailability of contract resources may lead to operating challenges and increased costs. The challenges include lack of resources, loss of knowledge base and the length of time required for skill development. In this case, costs, including costs for contractors to replace employees, productivity costs and safety costs, may rise. Failure to hire and adequately train replacement employees, including the transfer of significant internal historical knowledge and expertise to new employees, or future availability and cost of contract labor may adversely affect the ability to manage and operate the Companies' business. In addition, certain specialized knowledge is required of the Companies' technical employees for transmission, generation and distribution operations. The Companies' inability to attract and retain these employees could adversely affect their business and future operating results.

The Questar Combination may not achieve its intended results. The Questar Combination is expected to result in various benefits, including, among other things, being accretive to earnings. Achieving the anticipated benefits of the transaction is subject to a number of uncertainties, including whether the business of Dominion Questar is integrated in an efficient and effective manner. Failure to achieve these anticipated benefits could result in increased costs, decreases in the amount of expected revenues generated by the combined company and diversion of management's time and energy, all of which could have an adverse effect on the combined company's financial position, results of operations or cash flows.

Item 1B. Unresolved Staff Comments None.

Item 2. Properties

As of December 31, 2016, Dominion owned its principal executive office and three other corporate offices, all located in Richmond, Virginia. Dominion also leases corporate offices in other cities in which its subsidiaries operate. Virginia Power and Dominion Gas share Dominion's principal office in Richmond, Virginia, which is owned by Dominion. In addition, Virginia Power's DVP and Generation segments share certain leased buildings and equipment. See Item 1. Business for additional information about each segment's principal properties, which information is incorporated herein by reference.

Dominion's assets consist primarily of its investments in its subsidiaries, the principal properties of which are described here and in Item 1. Business.

Certain of Virginia Power's property is subject to the lien of the Indenture of Mortgage securing its First and Refunding Mortgage Bonds. There were no bonds outstanding as of December 31, 2016; however, by leaving the indenture open, Virginia Power expects to retain the flexibility to issue mortgage bonds in the future. Certain of Dominion's merchant generation facilities are also subject to liens.

DOMINION ENERGY

Dominion and Dominion Gas

East Ohio's gas distribution network is located in Ohio. This network involves approximately 18,900 miles of pipe, exclusive of service lines. The right-of-way grants for many natural gas pipelines have been obtained from the actual owners of real estate, as underlying titles have been examined. Where rights-of-way have not been obtained, they could be acquired from private owners by condemnation, if necessary. Many natural gas pipelines are on publicly-owned property, where company rights and actions are determined on a case-by-case basis, with results that range from reimbursed relocation to revocation of permission to operate.

Dominion Gas has approximately 10,400 miles, excluding interests held by others, of gas transmission, gathering and storage pipelines located in the states of Maryland, New York, Ohio, Pennsylvania, Virginia and West Virginia. Dominion Gas also owns NGL processing plants capable of processing over 270,000 mcf per day of natural gas. Hastings is the largest plant and is capable of processing over 180,000 mcf per day of natural gas. Hastings can also fractionate over 580,000 Gals per day of NGLs into marketable products, including propane, isobutane, butane and natural gasoline. NGL operations have storage capacity of 1,226,500 Gals of propane, 109,000 Gals of isobutane, 442,000 Gals of butane, 2,000,000 Gals of natural gasoline and 1,012,500 Gals of mixed NGLs. Dominion Gas also operates 20 underground gas storage fields located in New York, Ohio, Pennsylvania and West Virginia, with approximately 2,000 storage wells and approximately 399,000 acres of operated leaseholds.

The total designed capacity of the underground storage fields operated by Dominion Gas is approximately 929 bcf. Certain storage fields are jointly-owned and operated by Dominion Gas. The capacity of those fields owned by Dominion Gas' partners totals approximately 220 bcf.

Dominion

Cove Point's LNG facility has an operational peak regasification daily send-out capacity of approximately 1.8 million Dths and an aggregate LNG storage capacity of approximately 14.6 bcfe. In addition, Cove Point has a liquefier that has the potential to create approximately 15,000 Dths/day.

The Cove Point pipeline is a 36-inch diameter underground, interstate natural gas pipeline that extends approximately 88 miles from Cove Point to interconnections with Transcontinental Gas Pipe Line Company, LLC in Fairfax County, Virginia, and with

Jun 22 2018

Columbia Gas Transmission, LLC and DTI in Loudoun County, Virginia. In 2009, the original pipeline was expanded to include a 36-inch diameter expansion that extends approximately 48 miles, roughly 75% of which is parallel to the original pipeline.

Questar Gas distributes gas to customers in Utah, Wyoming and Idaho. Questar Gas owns and operates distribution systems and has a total of 29,200 miles of street mains, service lines and interconnecting pipelines. Questar Gas has a major operations center in Salt Lake City, and has operations centers, field offices and service-center facilities in other parts of its service area.

Questar Pipeline operates 2,200 miles of natural gas transportation pipelines that interconnect with other pipelines in Utah, Wyoming and western Colorado. Questar Pipeline's system ranges in diameter from lines that are less than four inches to 36-inches. Questar Pipeline owns the Clay Basin storage facility in northeastern Utah, which has a certificated capacity of 120 bcf, including 54 bcf of working gas.

DCG's interstate natural gas pipeline system in South Carolina and southeastern Georgia is comprised of nearly 1,500 miles of transmission pipeline.

In total, Dominion has 170 compressor stations with approximately 1,175,000 installed compressor horsepower.

DVP

See Item 1. Business, *General* for details regarding DVP's principal properties, which primarily include transmission and distribution lines.

DOMINION GENERATION

Dominion and Virginia Power generate electricity for sale on a wholesale and a retail level. Dominion and Virginia Power supply electricity demand either from their generation facilities or through purchased power contracts. As of December 31, 2016, Dominion Generation's total utility and merchant generating capacity was approximately 26,400 MW. The following tables list Dominion Generation's utility and merchant generating units and capability, as of December 31, 2016:

VIRGINIA POWER UTILITY GENERATION(1)

(6) Excludes 50% membership interest owned by BP.
(7) Excludes 50% membership interest owned by BP.

(7) Excludes 50% membership interest owned by Shell.

Item 3. Legal Proceedings

From time to time, the Companies are alleged to be in violation or in default under orders, statutes, rules or regulations relating to the environment, compliance plans imposed upon or agreed to by the Companies, or permits issued by various local, state and/or federal agencies for the construction or operation of facilities. Administrative proceedings may also be pending on these matters. In addition, in the ordinary course of business, the Companies and their subsidiaries are involved in various legal proceedings.

In January 2016, Virginia Power self-reported a release of mineral oil from the Crystal City substation and began extensive cleanup. In February 2016, Virginia Power received a notice of violation from the VDEQ relating to this matter. Virginia Power has assumed the role of responsible party and is continuing to cooperate with ongoing requirements for investigative and corrective action. In September 2016, Virginia Power received a proposed consent order from the VDEQ related to this matter. The order was signed by Virginia Power in October 2016 and approved by the Virginia State Water Control Board in December 2016. The order included a penalty of \$260,000, which is inclusive of both the Crystal City substation oil release and an oil release from another Virginia Power facility in 2016. The portion of the penalty attributable to the other facility represents less than \$100,000 of the total proposed penalty.

In December 2016, Wexpro received a notice of violation from the Wyoming Division of Air Quality in connection with an alleged non-compliance with an air quality permit and certain air quality regulations relating to Wexpro's Church Buttes #63 well. The notice did not include a proposed penalty. Dominion is unable to evaluate the final outcome of this matter but it could result in a penalty in excess of \$100,000.

See Notes 13 and 22 to the Consolidated Financial Statements and *Future Issues and Other Matters* in Item 7. MD&A, which information is incorporated herein by reference, for discussion of various environmental and other regulatory proceedings to which the Companies are a party.

Item 4. Mine Safety Disclosures

Not applicable.

36

Executive Officers of Dominion

Information concerning the executive officers of Dominion, each of whom is elected annually, is as follows:

Name and Age	Business Experience Past Five Years(1)
Thomas F. Farrell II (62)	Chairman of the Board of Directors, President and CEO of Dominion from April 2007 to date; Chairman and CEO of Dominion Midstream GP, LLC (the general partner of Dominion Midstream) from March 2014 to date and President from February 2015 to date; CEO of Dominion Gas from September 2013 to date and Chairman from March 2014 to date; Chairman and CEO of Virginia Power from February 2006 to date and Questar Gas from September 2016 to date.
Mark F. McGettrick (59)	Executive Vice President and CFO of Dominion from June 2009 to date, Dominion Midstream GP, LLC from March 2014 to date, Virginia Power from June 2009 to date, Dominion Gas from September 2013 to date, and Questar Gas from September 2016 to date.
Paul D. Koonce (57)	Executive Vice President and President & CEO—Dominion Generation Group of Dominion from January 2017 to date; Executive Vice President and CEO—Dominion Generation Group of Dominion from January 2016 to December 2016; Executive Vice President and CEO—Energy Infrastructure Group of Dominion from February 2013 to December 2015; Executive Vice President of Dominion from April 2006 to February 2013; Executive Vice President of Dominion from March 2014 to December 2015; President and COO of Virginia Power from June 2009 to date; President of Dominion Gas from September 2013 to December 2015.
Robert M. Blue (49)	Senior Vice President and President & CEO—Dominion Virginia Power of Dominion from January 2017 to date; President and COO of Virginia Power from January 2017 to date; Senior Vice President—Law, Regulation & Policy of Dominion, Dominion Gas and Dominion Midstream GP, LLC from February 2016 to December 2016 and Questar Gas from September 2016 to December 2016; President of Virginia Power from January 2016 to December 2016 to December 2016; Senior Vice President—Regulation, Law, Energy Solutions and Policy of Dominion Gas from May 2015 to January 2016 and Dominion Midstream GP, LLC from July 2015 to January 2016; Senior Vice President—Regulation, Law, Energy Solutions and Policy of Dominion and Dominion Gas from May 2015 to January 2016 and Dominion Midstream GP, LLC from July 2015 to January 2016; Senior Vice President—Regulation, Law, Energy Solutions and Policy of Virginia Power from May 2015 to December 2015; President of Virginia Power from January 2014 to May 2015; Senior Vice President-Law, Public Policy and Environment of Dominion from January 2011 to December 2013.
Diane Leopold (50)	Senior Vice President and President & CEO—Dominion Energy of Dominion and Dominion Midstream GP, LLC from January 2017 to date; President of Dominion Gas from January 2017 to date; President of DTI, East Ohio and Dominion Cove Point, Inc. from January 2014 to date; Senior Vice President of DTI from April 2012 to December 2013; Senior Vice President—Business Development & Generation Construction of Virginia Power from April 2009 to March 2012.
Mark O. Webb (52)	Senior Vice President—Corporate Affairs and Chief Legal Officer of Dominion, Virginia Power, Dominion Gas, Dominion Midstream GP, LLC, and Questar Gas from January 2017 to date; Senior Vice President, General Counsel and Chief Risk Officer of Dominion, Virginia Power and Dominion Gas from May 2016 to December 2016; Senior Vice President and General Counsel of Dominion Midstream GP, LLC from May 2016 to December 2016 and Questar Gas from September 2016 to December 2016; Vice President, General Counsel and Chief Risk Officer of Dominion, Virginia Power and Dominion Gas from January 2014 to May 2016 to December 2016 Risk Officer of Dominion, Virginia Power and Dominion Gas from January 2014 to May 2016; Vice President and General Counsel of Dominion Midstream GP, LLC from March 2014 to May 2016; Vice President and General Counsel of Dominion and Virginia Power from January 2013 to December 2013, and Dominion Gas from September 2013 to December 2013; Deputy General Counsel of DRS from July 2011 to December 2012.
Michele L. Cardiff (49)	Vice President, Controller and CAO of Dominion and Virginia Power from April 2014 to date, Dominion Gas and Dominion Midstream GP, LLC from March 2014 to date and Questar Gas from September 2016 to date; Vice President—Accounting of DRS from January 2014 to March 2014; Vice President and General Auditor of DRS from September 2012 to December 2013; Controller of Virginia Power from June 2009 to August 2012.
David A. Heacock (59)	President of Virginia Power from June 2009 to date and CNO from June 2009 to September 2016. Mr. Heacock will retire effective March 1, 2017.

(1) Any service listed for Virginia Power, Dominion Midstream GP, LLC, Dominion Gas, DTI, East Ohio, Dominion Cove Point, Inc., Questar Gas and DRS reflects service at a subsidiary of Dominion.

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Dominion

Dominion's common stock is listed on the NYSE. At January 31, 2017, there were approximately 126,500 record holders of Dominion's common stock. The number of record holders is comprised of individual shareholder accounts maintained on Dominion's transfer agent records and includes accounts with shares held in (1) certificate form, (2) book-entry in the Direct Registration System and (3) book-entry under Dominion Direct® Discussions of expected dividend payments and restrictions on Dominion's payment of dividends required by this Item are contained in Liquidity and Capital Resources in Item 7. MD&A and Notes 17 and 20 to the Consolidated Financial Statements. Cash dividends were paid quarterly in 2016 and 2015. Quarterly information concerning stock prices and dividends is disclosed in Note 26 to the Consolidated Financial Statements, which information is incorporated herein by reference.

The following table presents certain information with respect to Dominion's common stock repurchases during the fourth quarter of 2016:

DOMINION PURCHASES OF EQUITY S	Securities			
			Total Number	Maximum Number (or
	Total	Average	of Shares	Approximate Dollar Value)
	Number	Price	Purchased as Part	of Shares that May
	of Shares	Paid per	of Publicly Announced	Yet Be Purchased under the
Period	Purchased(1)	Share(2)	Plans or Programs	Plans or Programs(3)
10/1/2016-10/31/16	233	\$74.27	N/A	19,629,059 shares/\$1.18 billion
11/1/2016-11/30/16	—	_	N/A	19,629,059 shares/\$1.18 billion
12/1/2016-12/31/16	2,728	73.31	N/A	19,629,059 shares/\$1.18 billion
Total	2,961	\$73.38	N/A	19,629,059 shares/\$1.18 billion

(1) 233 and 2,728 shares were tendered by employees to satisfy tax withholding obligations on vested restricted stock in October and December 2016, respectively. (2) Represents the weighted-average price paid per share.

(3) The remaining repurchase authorization is pursuant to repurchase authority granted by the Dominion Board of Directors in February 2005, as modified in June 2007. The aggregate authorization granted by the Dominion Board of Directors was 86 million shares (as adjusted to reflect a two-for-one stock split distributed in November 2007) not to exceed \$4 billion.

Virginia Power

There is no established public trading market for Virginia Power's common stock, all of which is owned by Dominion. Potential restrictions on Virginia Power's payment of dividends are discussed in Note 20 to the Consolidated Financial Statements. In the first through fourth quarters of 2015, Virginia Power declared and paid quarterly cash dividends of \$149 million, \$121 million, \$146 million and \$75 million. In 2016, no dividends were declared or paid given the sufficiency of operating and other cash flows at Dominion. Virginia Power intends to pay quarterly cash dividends in 2017 but is neither required to nor restricted from making such payments.

Dominion Gas

All of Dominion Gas' membership interests are owned by Dominion. Potential restrictions on Dominion Gas' payment of distributions are discussed in Note 20 to the Consolidated Financial Statements. In the first through fourth quarters of 2015, Dominion Gas declared and paid quarterly cash distributions of \$96 million, \$68 million, \$80 million and \$448 million. Dominion Gas declared and paid cash distributions of \$150 million in the second quarter of 2016.

Dividends declared per common share	2.80	2.59	2.40	2.25	2.11
Total assets(6)	71,610	58,648	54,186	49,963	46,711
Long-term debt(6)	30,231	23,468	21,665	19,199	16,736

(1) Includes a \$122 million after-tax charge related to future ash pond and landfill closure costs at certain utility generation facilities.

(2) Includes \$248 million of after-tax charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities, a \$193 million after-tax charge related to Dominion's restructuring of its producer services business and a \$174 million after-tax charge associated with the Liability Management Exercise.

(3) Includes a \$109 million after-tax charge related to Dominion's restructuring of its producer services business (\$76 million) and an impairment of certain natural gas infrastructure assets (\$33 million). Also in 2013, Dominion recorded a \$92 million after-tax net loss from the discontinued operations of Brayton Point and Kincaid.

(4) Includes a \$1.1 billion after-tax loss from discontinued operations, including impairment charges, of Brayton Point and Kincaid and a \$303 million after-tax charge primarily resulting from management's decision to cease operations and begin decommissioning Kewaunee in 2013.

(5) Amounts attributable to Dominion's common shareholders.

(6) As discussed in Note 2 to the Consolidated Financial Statements, prior period amounts have been reclassified to conform to the 2016 presentation.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

MD&A discusses Dominion's results of operations and general financial condition and Virginia Power's and Dominion Gas' results of operations. MD&A should be read in conjunction with Item 1. Business and the Consolidated Financial Statements in Item 8. Financial Statements and Supplementary Data. Virginia Power and Dominion Gas meet the conditions to file under the reduced disclosure format, and therefore have omitted certain sections of MD&A.

CONTENTS OF MD&A

MD&A consists of the following information:

- Forward-Looking Statements
- Accounting Matters—Dominion
- Dominion
 - Results of Operations
- Segment Results of Operations
- Virginia Power
- Results of Operations
- Dominion Gas
- Results of Operations
- Liquidity and Capital Resources—Dominion
- Future Issues and Other Matters—Dominion

FORWARD-LOOKING STATEMENTS

This report contains statements concerning the Companies' expectations, plans, objectives, future financial performance and other statements that are not historical facts. These statements are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. In most cases, the reader can identify these forward-looking statements by such words as "anticipate," "estimate," "forecast," "expect," "believe," "should," "could," "plan," "may," "continue," "target" or other similar words.

The Companies make forward-looking statements with full knowledge that risks and uncertainties exist that may cause actual results to differ materially from predicted results. Factors that may cause actual results to differ are often presented with the forward-looking statements themselves. Additionally, other factors may cause actual results to differ materially from those indicated in any forward-looking statement. These factors include but are not limited to:

- Unusual weather conditions and their effect on energy sales to customers and energy commodity prices;
- Extreme weather events and other natural disasters, including hurricanes, high winds, severe storms, earthquakes, flooding and changes in water temperatures and availability that can cause outages and property damage to facilities;
- Federal, state and local legislative and regulatory developments, including changes in federal and state tax laws and regulations;
- Changes to federal, state and local environmental laws and regulations, including those related to climate change, the tightening of emission or discharge limits for GHGs and other emissions, more extensive permitting requirements and the regulation of additional substances;

- Cost of environmental compliance, including those costs related to climate change;
- Changes in implementation and enforcement practices of regulators relating to environmental standards and litigation exposure for remedial activities;
- Difficulty in anticipating mitigation requirements associated with environmental and other regulatory approvals;
- Risks associated with the operation of nuclear facilities, including costs associated with the disposal of spent nuclear fuel, decommissioning, plant maintenance and changes in existing regulations governing such facilities;
- Unplanned outages at facilities in which the Companies have an ownership interest;
- Fluctuations in energy-related commodity prices and the effect these could have on Dominion's and Dominion Gas' earnings and the Companies' liquidity position and the underlying value of their assets;
- Counterparty credit and performance risk;
- Global capital market conditions, including the availability of credit and the ability to obtain financing on reasonable terms;
- Risks associated with Virginia Power's membership and participation in PJM, including risks related to obligations created by the default of other participants;
- Fluctuations in the value of investments held in nuclear decommissioning trusts by Dominion and Virginia Power and in benefit plan trusts by Dominion and Dominion Gas;
- Fluctuations in interest rates or foreign currency exchange rates;
- Changes in rating agency requirements or credit ratings and their effect on availability and cost of capital;
- Changes in financial or regulatory accounting principles or policies imposed by governing bodies;
- Employee workforce factors including collective bargaining agreements and labor negotiations with union employees;
- Risks of operating businesses in regulated industries that are subject to changing regulatory structures;
- Impacts of acquisitions, including the recently completed Dominion Questar Combination, divestitures, transfers of assets to joint ventures or Dominion Midstream, including the recently completed contribution of Questar Pipeline to Dominion Midstream, and retirements of assets based on asset portfolio reviews;
- Receipt of approvals for, and timing of, closing dates for acquisitions and divestitures;
- The timing and execution of Dominion Midstream's growth strategy;
- Changes in rules for RTOs and ISOs in which Dominion and Virginia Power participate, including changes in rate designs, changes in FERC's interpretation of market rules and new and evolving capacity models;
- Political and economic conditions, including inflation and deflation;
- Domestic terrorism and other threats to the Companies' physical and intangible assets, as well as threats to cybersecurity;
- Changes in demand for the Companies' services, including industrial, commercial and residential growth or decline in the Companies' service areas, changes in supplies of natural gas delivered to Dominion and Dominion Gas' pipeline and processing systems, failure to maintain or replace customer

OFFICIAL COPY

contracts on favorable terms, changes in customer growth or usage patterns, including as a result of energy conservation programs, the availability of energy efficient devices and the use of distributed generation methods;

- Additional competition in industries in which the Companies operate, including in electric markets in which Dominion's merchant generation facilities operate and potential competition from the development and deployment of alternative energy sources, such as self-generation and distributed generation technologies, and availability of market alternatives to large commercial and industrial customers;
- Competition in the development, construction and ownership of certain electric transmission facilities in Virginia Power's service territory in connection with FERC Order 1000;
- Changes in technology, particularly with respect to new, developing or alternative sources of generation and smart grid technologies;
- Changes to regulated electric rates collected by Virginia Power and regulated gas distribution, transportation and storage rates, including LNG storage, collected by Dominion and Dominion Gas;
- · Changes in operating, maintenance and construction costs;
- Timing and receipt of regulatory approvals necessary for planned construction or expansion projects and compliance with conditions associated with such regulatory approvals;
- The inability to complete planned construction, conversion or expansion projects at all, or with the outcomes or within the terms and time frames initially anticipated;
- Adverse outcomes in litigation matters or regulatory proceedings; and
 The impact of operational hazards, including adverse developments
- with respect to pipeline and plant safety or integrity, equipment loss, malfunction or failure, operator error, and other catastrophic events.

Additionally, other risks that could cause actual results to differ from predicted results are set forth in Item 1A. Risk Factors.

The Companies' forward-looking statements are based on beliefs and assumptions using information available at the time the statements are made. The Companies caution the reader not to place undue reliance on their forward-looking statements because the assumptions, beliefs, expectations and projections about future events may, and often do, differ materially from actual results. The Companies undertake no obligation to update any forward-looking statement to reflect developments occurring after the statement is made.

ACCOUNTING MATTERS

Critical Accounting Policies and Estimates

Dominion has identified the following accounting policies, including certain inherent estimates, that as a result of the judgments, uncertainties, uniqueness and complexities of the underlying accounting standards and operations involved, could result in material changes to its financial condition or results of operations under different conditions or using different assumptions. Dominion has discussed the development, selection and disclosure of each of these policies with the Audit Committee of its Board of Directors.

ACCOUNTING FOR REGULATED OPERATIONS

The accounting for Dominion's regulated electric and gas operations differs from the accounting for nonregulated operations in that Dominion is required to reflect the effect of rate regulation in its Consolidated Financial Statements. For regulated businesses subject to federal or state cost-of-service rate regulation, regulatory practices that assign costs to accounting periods may differ from accounting methods generally applied by nonregulated companies. When it is probable that regulators will permit the recovery of current costs through future rates charged to customers, these costs that otherwise would be expensed by nonregulated companies are deferred as regulatory assets. Likewise, regulatory liabilities are recognized when it is probable that regulators will require customer refunds through future rates or when revenue is collected from customers for expenditures that have yet to be incurred. Generally, regulatory assets and liabilities are amortized into income over the period authorized by the regulator.

Dominion evaluates whether or not recovery of its regulatory assets through future rates is probable and makes various assumptions in its analysis. The expectations of future recovery are generally based on orders issued by regulatory commissions, legislation or historical experience, as well as discussions with applicable regulatory authorities and legal counsel. If recovery of a regulatory asset is determined to be less than probable, it will be written off in the period such assessment is made. See Notes 12 and 13 to the Consolidated Financial Statements for additional information.

ASSET RETIREMENT OBLIGATIONS

Dominion recognizes liabilities for the expected cost of retiring tangible long-lived assets for which a legal obligation exists and the ARO can be reasonably estimated. These AROs are recognized at fair value as incurred and are capitalized as part of the cost of the related long-lived assets. In the absence of quoted market prices, Dominion estimates the fair value of its AROs using present value techniques, in which it makes various assumptions including estimates of the amounts and timing of future cash flows associated with retirement activities, credit-adjusted risk free rates and cost escalation rates. The impact on measurements of new AROs or remeasurements of existing AROs, using different cost escalation rates in the future, may be significant. When Dominion revises any assumptions used to calculate the fair value of existing AROs, it adjusts the carrying amount of both the ARO liability and the related long-lived asset for assets that are in service; for assets that have ceased operations, Dominion adjusts the carrying amount of the ARO liability with such changes recognized in income. Dominion accretes the ARO liability to reflect the passage of time. In 2016, Dominion recorded an increase in AROs of \$449 million primarily related to future ash pond and landfill closure costs at certain utility generation facilities and the Dominion Questar Combination. See Note 22 to the Consolidated Financial Statements for additional information.

In 2016, 2015 and 2014, Dominion recognized \$104 million, \$93 million and \$81 million, respectively, of accretion, and expects to recognize \$117 million in 2017. Dominion records accretion and depreciation associated with utility nuclear decommissioning AROs and regulated pipeline replacement Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

AROs as an adjustment to the regulatory liabilities related to these items.

A significant portion of Dominion's AROs relates to the future decommissioning of its merchant and utility nuclear facilities. These nuclear decommissioning AROs are reported in the Dominion Generation segment. At December 31, 2016, Dominion's nuclear decommissioning AROs totaled \$1.5 billion, representing approximately 60% of its total AROs. Based on their significance, the following discussion of critical assumptions inherent in determining the fair value of AROs relates to those associated with Dominion's nuclear decommissioning obligations.

Dominion obtains from third-party specialists periodic site-specific base year cost studies in order to estimate the nature, cost and timing of planned decommissioning activities for its nuclear plants. These cost studies are based on relevant information available at the time they are performed; however, estimates of future cash flows for extended periods of time are by nature highly uncertain and may vary significantly from actual results. In addition, Dominion's cost estimates include cost escalation rates that are applied to the base year costs. Dominion determines cost escalation rates, which represent projected cost increases over time due to both general inflation and increases in the cost of specific decommissioning activities, for each nuclear facility. The selection of these cost escalation rates is dependent on subjective factors which are considered to be critical assumptions.

INCOME TAXES

Judgment and the use of estimates are required in developing the provision for income taxes and reporting of tax-related assets and liabilities. The interpretation of tax laws involves uncertainty, since tax authorities may interpret the laws differently. Ultimate resolution of income tax matters may result in favorable or unfavorable impacts to net income and cash flows, and adjustments to tax-related assets and liabilities could be material.

Given the uncertainty and judgment involved in the determination and filing of income taxes, there are standards for recognition and measurement in financial statements of positions taken or expected to be taken by an entity in its income tax returns. Positions taken by an entity in its income tax returns that are recognized in the financial statements must satisfy a more-likely-than-not recognition threshold, assuming that the position will be examined by tax authorities with full knowledge of all relevant information. At December 31, 2016, Dominion had \$64 million of unrecognized tax benefits. Changes in these unrecognized tax benefits may result from remeasurement of amounts expected to be realized, settlements with tax authorities and expiration of statutes of limitations.

Deferred income tax assets and liabilities are recorded representing future effects on income taxes for temporary differences between the bases of assets and liabilities for financial reporting and tax purposes. Dominion evaluates quarterly the probability of realizing deferred tax assets by considering current and historical financial results, expectations for future taxable income and the availability of tax planning strategies that can be implemented, if necessary, to realize deferred tax assets. Failure to achieve forecasted taxable income or successfully implement tax planning strategies may affect the realization of deferred tax assets. Dominion establishes a valuation allowance when it is more-likely-than-not that all or a portion of a deferred tax asset will not be realized. At December 31, 2016, Dominion had established \$135 million of valuation allowances.

ACCOUNTING FOR DERIVATIVE CONTRACTS AND OTHER INSTRUMENTS AT FAIR VALUE

Dominion uses derivative contracts such as physical and financial forwards, futures, swaps, options and FTRs to manage commodity, interest rate and foreign currency exchange rate risks of its business operations. Derivative contracts, with certain exceptions, are reported in the Consolidated Balance Sheets at fair value. Accounting requirements for derivatives and related hedging activities are complex and may be subject to further clarification by standard-setting bodies. The majority of investments held in Dominion's nuclear decommissioning and rabbi trusts and pension and other postretirement funds are also subject to fair value accounting. See Notes 6 and 21 to the Consolidated Financial Statements for further information on these fair value measurements.

Fair value is based on actively-quoted market prices, if available. In the absence of actively-quoted market prices, management seeks indicative price information from external sources, including broker quotes and industry publications. When evaluating pricing information provided by brokers and other pricing services, Dominion considers whether the broker is willing and able to trade at the quoted price, if the broker quotes are based on an active market or an inactive market and the extent to which brokers are utilizing a particular model if pricing is not readily available. If pricing information from external sources is not available, or if Dominion believes that observable pricing information is not indicative of fair value, judgment is required to develop the estimates of fair value. In those cases, Dominion must estimate prices based on available historical and near-term future price information and use of statistical methods, including regression analysis, that reflect its market assumptions.

Dominion maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value.

USE OF ESTIMATES IN GOODWILL IMPAIRMENT TESTING

As of December 31, 2016, Dominion reported \$6.4 billion of goodwill in its Consolidated Balance Sheet. A significant portion resulted from the acquisition of the former CNG in 2000 and the Dominion Questar Combination in 2016.

In April of each year, Dominion tests its goodwill for potential impairment, and performs additional tests more frequently if an event occurs or circumstances change in the interim that would more-likely-than-not reduce the fair value of a reporting unit below its carrying amount. The 2016, 2015 and 2014 annual tests and any interim tests did not result in the recognition of any goodwill impairment.

In general, Dominion estimates the fair value of its reporting units by using a combination of discounted cash flows and other valuation techniques that use multiples of earnings for peer group companies and analyses of recent business combinations involving peer group companies. Fair value estimates are dependent on subjective factors such as Dominion's estimate of future cash flows, the selection of appropriate discount and growth rates, and the selection of peer group companies and recent transactions. These underlying assumptions and estimates are made as of a point in time; subsequent modifications, particularly changes in OFFICIAL COP

Jun 22 2018

discount rates or growth rates inherent in Dominion's estimates of future cash flows, could result in a future impairment of goodwill. Although Dominion has consistently applied the same methods in developing the assumptions and estimates that underlie the fair value calculations, such as estimates of future cash flows, and based those estimates on relevant information available at the time, such cash flow estimates are highly uncertain by nature and may vary significantly from actual results. If the estimates of future cash flows used in the most recent tests had been 10% lower, the resulting fair values would have still been greater than the carrying values of each of those reporting units tested, indicating that no impairment was present.

See Note 11 to the Consolidated Financial Statements for additional information.

USE OF ESTIMATES IN LONG-LIVED ASSET IMPAIRMENT TESTING

Impairment testing for an individual or group of long-lived assets or for intangible assets with definite lives is required when circumstances indicate those assets may be impaired. When an asset's carrying amount exceeds the undiscounted estimated future cash flows associated with the asset, the asset is considered impaired to the extent that the asset's fair value is less than its carrying amount. Performing an impairment test on long-lived assets involves judgment in areas such as identifying if circumstances indicate an impairment may exist, identifying and grouping affected assets, and developing the undiscounted and discounted estimated future cash flows (used to estimate fair value in the absence of market-based value) associated with the asset, including probability weighting such cash flows to reflect expectations about possible variations in their amounts or timing, expectations about operating the long-lived assets and the selection of an appropriate discount rate. When determining whether an asset or asset group has been impaired, management groups assets at the lowest level that has identifiable cash flows. Although cash flow estimates are based on relevant information available at the time the estimates are made, estimates of future cash flows are, by nature, highly uncertain and may vary significantly from actual results. For example, estimates of future cash flows would contemplate factors which may change over time, such as the expected use of the asset, including future production and sales levels, expected fluctuations of prices of commodities sold and consumed and expected proceeds from dispositions. See Note 6 to the Consolidated Financial Statements for a discussion of impairments related to certain long-lived assets.

EMPLOYEE BENEFIT PLANS

Dominion sponsors noncontributory defined benefit pension plans and other postretirement benefit plans for eligible active employees, retirees and qualifying dependents. The projected costs of providing benefits under these plans are dependent, in part, on historical information such as employee demographics, the level of contributions made to the plans and earnings on plan assets. Assumptions about the future, including the expected long-term rate of return on plan assets, discount rates applied to benefit obligations, mortality rates and the anticipated rate of increase in healthcare costs and participant compensation, also have a significant impact on employee benefit costs. The impact of changes in these factors, as well as differences between Dominion's assumptions and actual experience, is generally recognized in the Consolidated Statements of Income over the remaining average service period of plan participants, rather than immediately.

The expected long-term rates of return on plan assets, discount rates, healthcare cost trend rates and mortality rates are critical assumptions. Dominion determines the expected long-term rates of return on plan assets for pension plans and other postretirement benefit plans by using a combination of:

- Expected inflation and risk-free interest rate assumptions;
- Historical return analysis to determine long term historic returns as well as historic risk premiums for various asset classes;
- Expected future risk premiums, asset volatilities and correlations;
- Forecasts of an independent investment advisor;
- Forward-looking return expectations derived from the yield on longterm bonds and the expected long-term returns of major stock market indices; and
- Investment allocation of plan assets. The strategic target asset allocation for Dominion's pension funds is 28% U.S. equity, 18% non-U.S. equity, 35% fixed income, 3% real estate and 16% other alternative investments, such as private equity investments.

Strategic investment policies are established for Dominion's prefunded benefit plans based upon periodic asset/liability studies. Factors considered in setting the investment policy include those mentioned above such as employee demographics, liability growth rates, future discount rates, the funded status of the plans and the expected long-term rate of return on plan assets. Deviations from the plans' strategic allocation are a function of Dominion's assessments regarding short-term risk and reward opportunities in the capital markets and/or short-term market movements which result in the plans' actual asset allocations varying from the strategic target asset allocations. Through periodic rebalancing, actual allocations are brought back in line with the target. Future asset/liability studies will focus on strategies to further reduce pension and other postretirement plan risk, while still achieving attractive levels of returns.

Dominion develops assumptions, which are then compared to the forecasts of an independent investment advisor to ensure reasonableness. An internal committee selects the final assumptions. Dominion calculated its pension cost using an expected long-term rate of return on plan assets assumption of 8.75% for 2016, 2015 and 2014. For 2017, the expected long-term rate of return for pension cost assumption is 8.75%. Dominion calculated its other postretirement benefit cost using an expected long-term rate of return on plan assets assumption of 8.50% for 2016, 2015 and 2014. For 2017, the expected long-term rate of return on plan assets assumption of 8.50% for 2016, 2015 and 2014. For 2017, the expected long-term rate of return for other postretirement benefit cost assumption is 8.50%. The rate used in calculating other postretirement benefit cost is lower than the rate used in calculating pension cost because of differences in the relative amounts of various types of investments held as plan assets.

Dominion determines discount rates from analyses of AA/Aa rated bonds with cash flows matching the expected payments to be made under its plans. The discount rates used to calculate pension cost and other postretirement benefit cost ranged from 2.87% to 4.99% for pension plans and 3.56% to 4.94% for other postretirement benefit plans in 2016, were 4.40% in 2015,

Jun 22 2018

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

ranged from 5.20% to 5.30% for pension plans and 4.20% to 5.10% for other postretirement benefit plans in 2014. Dominion selected a discount rate ranging from 3.31% to 4.50% for pension plans and ranging from 3.92% to 4.47% for other postretirement benefit plans for determining its December 31, 2016 projected benefit obligations.

Dominion establishes the healthcare cost trend rate assumption based on analyses of various factors including the specific provisions of its medical plans, actual cost trends experienced and projected, and demographics of plan participants. Dominion's healthcare cost trend rate assumption as of December 31, 2016 was 7.00% and is expected to gradually decrease to 5.00% by 2021 and continue at that rate for years thereafter.

Mortality rates are developed from actual and projected plan experience for postretirement benefit plans. Dominion's actuary conducts an experience study periodically as part of the process to select its best estimate of mortality. Dominion considers both standard mortality tables and improvement factors as well as the plans' actual experience when selecting a best estimate. During 2016, Dominion conducted a new experience study as scheduled and, as a result, updated its mortality assumptions.

The following table illustrates the effect on cost of changing the critical actuarial assumptions previously discussed, while holding all other assumptions constant:

		Incre	ase in Net Per	iodic Cost
	Change in			Other
	Actuarial	Pension	Post	retirement
	Assumption	Benefits		Benefits
(millions, except percentages)				
Discount rate	(0.25)%	\$ 18	\$	2
Long-term rate of return on				
plan assets	(0.25)%	18		4
Healthcare cost trend rate	1 %	N/A		23

In addition to the effects on cost, at December 31, 2016, a 0.25% decrease in the discount rate would increase Dominion's projected pension benefit obligation by \$287 million and its accumulated postretirement benefit obligation by \$43 million, while a 1.00% increase in the healthcare cost trend rate would increase its accumulated postretirement benefit obligation by \$152 million.

See Note 21 to the Consolidated Financial Statements for additional information on Dominion's employee benefit plans.

New Accounting Standards

See Note 2 to the Consolidated Financial Statements for a discussion of new accounting standards.

Dominion

RESULTS OF OPERATIONS

Presented below is a summary of Dominion's consolidated results:

Year Ended					
December 31,	2016	\$ Change	2015	\$ Change	2014
(millions, except EPS)					
Net Income attributable to Dominion	\$2,123	\$ 224	\$1,899	\$ 589	\$1,310
Diluted EPS	3.44	0.24	3.20	0.96	2.24

Overview

2016 vs. 2015

Net income attributable to Dominion increased 12%, primarily due to higher renewable energy investment tax credits and the new PJM capacity performance market effective June 2016. These increases were partially offset by a decrease in gains from agreements to convey shale development rights underneath several natural gas storage fields and charges related to future ash pond and landfill closure costs at certain utility generation facilities.

2015 vs. 2014

Net income attributable to Dominion increased 45%, primarily due to the absence of charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities, the absence of losses related to the repositioning of Dominion's producer services business in the first quarter of 2014, and the absence of charges related to Dominion's Liability Management Exercise. See Note 13 to the Consolidated Financial Statements for more information on legislation related to North Anna and offshore wind facilities. See *Liquidity and Capital Resources* for more information on the Liability Management Exercise.

Analysis of Consolidated Operations

Presented below are selected amounts related to Dominion's results of operations:

Year Ended December 31,	2016	\$ Change	2015	\$ Change	2014
(millions)					
Operating Revenue	\$11,737	\$54	\$11,683	\$ (753)	\$12,436
Electric fuel and other energy-related					
purchases	2,333	(392)	2,725	(675)	3,400
Purchased electric					
capacity	99	(231)	330	(31)	361
Purchased gas	459	(92)	551	(804)	1,355
Net Revenue	8,846	769	8,077	757	7,320
Other operations and					
maintenance	3,064	469	2,595	(170)	2,765
Depreciation, depletion					
and amortization	1,559	164	1,395	103	1,292
Other taxes	596	45	551	9	542
Other income	250	54	196	(54)	250
Interest and related				. ,	
charges	1,010	106	904	(289)	1,193
Income tax expense	655	(250)	905	453	452

An analysis of Dominion's results of operations follows:

2016 vs. 2015

Net revenue increased 10%, primarily reflecting:

- A \$544 million increase from electric utility operations, primarily reflecting:
 - A \$225 million electric capacity benefit, primarily due to the new PJM capacity performance market effective June 2016 (\$155 million) and the expiration of non-utility generator contracts in 2015 (\$58 million);
 - An increase from rate adjustment clauses (\$183 million); and
 - The absence of an \$85 million write-off of deferred fuel costs
- associated with Virginia legislation enacted in February 2015; and • A \$305 million increase due to the Dominion Questar Combination.

These increases were partially offset by:

- A \$47 million decrease from merchant generation operations, primarily due to lower realized prices at certain merchant generation facilities (\$64 million) and an increase in planned and unplanned outage days in 2016 (\$26 million), partially offset by additional solar generating facilities placed into service (\$37 million);
- A \$19 million decrease from regulated natural gas transmission operations, primarily due to:
 - A \$14 million decrease in gas transportation and storage activities, primarily due to decreased demand charges (\$28 million), increased fuel costs (\$13 million), contract rate changes (\$11 million) and decreased revenue from gathering and extraction services (\$8 million), partially offset by expansion projects placed in service (\$18 million) and increased regulated gas sales (\$20 million); and
 - A \$17 million decrease in NGL activities, due to decreased prices (\$15 million) and volumes (\$2 million); partially offset by
 - A \$12 million increase in other revenues, primarily due to an increase in services performed for Atlantic Coast Pipeline (\$21 million), partially offset by decreased amortization of deferred revenue associated with conveyed shale development rights (\$4 million); and
- A \$12 million decrease from regulated natural gas distribution operations, primarily due to a decrease in rate adjustment clause revenue related to low income assistance programs (\$26 million) and a decrease in sales to customers due to a reduction in heating degree days (\$6 million), partially offset by an increase in AMR and PIR program revenues (\$18 million).

Other operations and maintenance increased 18%, primarily reflecting: A \$148 million increase due to the Dominion Questar Combination,

- A \$98 million increase in charges related to future ash pond and
- A \$90 minion increase in charges related to future ash pond and landfill closure costs at certain utility generation facilities;
 A \$78 million decrease in gain from from the comments to a set t
- A \$78 million decrease in gains from agreements to convey shale development rights underneath several natural gas storage fields;

- Organizational design initiative costs (\$64 million);
- A \$50 million increase in storm damage and service restoration costs, including \$23 million for Hurricane Matthew;
- A \$20 million increase in services performed for Atlantic Coast Pipeline. These expenses are billed to Atlantic Coast Pipeline and do not significantly impact net income; and
- A \$16 million increase due to labor contract renegotiations as well as costs resulting from a union workforce temporary work stoppage; partially offset by
- A \$26 million decrease in bad debt expense at regulated natural gas distribution operations primarily related to low income assistance programs. These bad debt expenses are recovered through rates and do not impact net income.

Depreciation, depletion and amortization increased 12%, primarily due to various expansion projects being placed into service.

Other income increased 28%, primarily due to an increase in earnings from equity method investments (\$55 million) and an increase in AFUDC associated with rate-regulated projects (\$12 million), partially offset by lower realized gains (net of investment income) on nuclear decommissioning trust funds (\$19 million).

Interest and related charges increased 12%, primarily due to higher longterm debt interest expense resulting from debt issuances in 2016 (\$134 million), partially offset by an increase in capitalized interest associated with the Cove Point Liquefaction Project (\$45 million).

Income tax expense decreased 28%, primarily due to higher renewable energy investment tax credits (\$189 million) and the impact of a state legislative change (\$14 million), partially offset by higher pre-tax income (\$15 million).

2015 vs. 2014

Net revenue increased 10%, primarily reflecting:

- The absence of losses related to the repositioning of Dominion's producer services business in the first quarter of 2014, reflecting the termination of natural gas trading and certain energy marketing activities (\$313 million);
- A \$159 million increase from electric utility operations, primarily reflecting:
- An increase from rate adjustment clauses (\$225 million);
- An increase in sales to retail customers, primarily due to a net increase in cooling degree days (\$38 million); and
- A decrease in capacity related expenses (\$33 million); partially offset by
- An \$85 million write-off of deferred fuel costs associated with Virginia legislation enacted in February 2015;
- A decrease in sales to customers due to the effect of changes in customer usage and other factors (\$24 million); and
- A decrease due to a charge based on the 2015 Biennial Review Order to refund revenues to customers (\$20 million).
- The absence of losses related to the retail electric energy marketing business which was sold in the first quarter of 2014 (\$129 million);
- A \$77 million increase from merchant generation operations, primarily due to increased generation output reflecting the absence of planned outages at certain merchant generation facilities (\$83 million) and additional solar generating facili-

Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

ties placed into service (\$53 million), partially offset by lower realized prices (\$58 million);

- A \$38 million increase from regulated natural gas distribution operations, primarily due to an increase in rate adjustment clause revenue related to low income assistance programs (\$12 million), an increase in AMR and PIR program revenues (\$24 million) and various expansion projects placed into service (\$22 million); partially offset by a decrease in gathering revenues (\$9 million); and
- A \$30 million increase from regulated natural gas transmission operations, primarily reflecting:
 - A \$61 million increase in gas transportation and storage activities, primarily due to the addition of DCG (\$62 million), decreased fuel costs (\$24 million) and various expansion projects placed into service (\$24 million), partially offset by decreased regulated gas sales (\$46 million); and
 - A \$46 million net increase primarily due to services performed for Atlantic Coast Pipeline and Blue Racer; partially offset by
 - A \$61 million decrease from NGL activities, primarily due to decreased prices.

Other operations and maintenance decreased 6%, primarily reflecting:

- The absence of charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities (\$370 million);
- An increase in gains from agreements to convey shale development rights underneath several natural gas storage fields (\$63 million);
- A \$97 million decrease in planned outage costs primarily due to a decrease in scheduled outage days at certain merchant generation facilities (\$59 million) and non-nuclear utility generation facilities (\$38 million); and
- A \$22 million decrease in charges related to future ash pond and landfill closure costs at certain utility generation facilities.

These decreases were partially offset by:

- The absence of a gain on the sale of Dominion's electric retail energy marketing business in March 2014 (\$100 million), net of a \$31 million write-off of goodwill;
- An \$80 million increase in certain electric transmission-related expenditures. These expenses are primarily recovered through state and FERC rates and do not impact net income;
- The absence of gains on the sale of assets to Blue Racer (\$59 million);
- A \$53 million increase in utility nuclear refueling outage costs primarily due to the amortization of outage costs that were previously deferred pursuant to Virginia legislation enacted in April 2014;
- A \$46 million net increase due to services performed for Atlantic Coast Pipeline and Blue Racer. These expenses are billed to these entities and do not significantly impact net income; and
- A \$22 million increase due to the acquisition of DCG.

Other income decreased 22%, primarily reflecting lower tax recoveries associated with contributions in aid of construction

(\$17 million), a decrease in interest income related to income taxes (\$12 million), and lower net realized gains on nuclear decommissioning trust funds (\$11 million).

Interest and related charges decreased 24%, primarily as a result of the absence of charges associated with Dominion's Liability Management Exercise in 2014.

Income tax expense increased 100%, primarily reflecting higher pre-tax income.

Outlook

Dominion's strategy is to continue focusing on its regulated businesses while maintaining upside potential in well-positioned nonregulated businesses. The goals of this strategy are to provide EPS growth, a growing dividend and to maintain a stable credit profile. Dominion expects 80% to 90% of earnings from its primary operating segments to come from regulated and long-term contracted businesses.

Dominion's 2017 net income is expected to remain substantially consistent on a per share basis as compared to 2016.

Dominion's 2017 results are expected to be positively impacted by the following:

- Decreased charges related to future ash pond and landfill closure costs at certain utility generation facilities;
- The inclusion of operations acquired from Dominion Questar for the entire year;
- Decreased transaction and transition costs associated with the Dominion Questar Combination;
- Growth in weather-normalized electric utility sales of approximately 1%;
- Construction and operation of growth projects in electric utility operations and associated rate adjustment clause revenue; and
- Construction and operation of growth projects in gas transmission and distribution.

Dominion's 2017 results are expected to be negatively impacted by the following:

- Lower power prices and an additional planned refueling outage at Millstone;
- Decreased Cove Point import contract revenues;
- An increase in depreciation, depletion, and amortization;
- A higher effective tax rate, driven primarily by a decrease in investment tax credits; and
- Share dilution.

Additionally, in 2017, Dominion expects to focus on meeting new and developing environmental requirements, including making investments in utility-scale solar generation, particularly in Virginia. In 2018, Dominion is expected to experience an increase in net income on a per share basis as compared to 2017 primarily due to the Liquefaction Project being in service for the full year.

OFFICIAL COP

SEGMENT RESULTS OF OPERATIONS

Segment results include the impact of intersegment revenues and expenses, which may result in intersegment profit or loss. Presented below is a summary of contributions by Dominion's operating segments to net income attributable to Dominion:

Year Ended December 31,				2016			2015			2014
		Net				Net			Net	
		Income				Income			Income	
	attr	ibutable	Di	luted	attr	ributable	Diluted	att	ributable	Diluted

Year Ended December 31,	2016	2015	2014
(millions, except EPS amounts)			
Specific items attributable to operating			
segments	\$ (180)	\$ (136)	\$ (544)
Specific items attributable to Corporate and			
Other segment	(44)	(5)	(149)
Total specific items	(224)	(141)	(693)
Other corporate operations	(260)	(250)	(277)
Total net expense	\$ (484)	\$ (391)	\$ (970)
EPS impact	\$(0.78)	\$(0.66)	\$(1.66)

TOTAL SPECIFIC ITEMS

Corporate and Other includes specific items attributable to Dominion's primary operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources. See Note 25 to the Consolidated Financial Statements for discussion of these items in more detail. Corporate and other also includes specific items attributable to the Corporate and Other segment. In 2016, this primarily included \$53 million of after-tax transaction and transition costs associated with the Dominion Questar Combination. In 2014, this primarily included \$174 million of after-tax charges associated with Dominion's Liability Management Exercise.

VIRGINIA POWER

RESULTS OF OPERATIONS

Presented below is a summary of Virginia Power's consolidated results:

2016	\$ Change	2015	\$ Change	2014
\$1,218	\$ 131	\$1,087	\$ 229	\$858

Overview

2016 vs. 2015

Net income increased 12%, primarily due to the new PJM capacity performance market effective June 2016, an increase in rate adjustment clause revenue and the absence of a write-off of deferred fuel costs associated with the Virginia legislation enacted in February 2015. These increases were partially offset by charges related to future ash pond and landfill closure costs at certain utility generation facilities.

2015 vs. 2014

Net income increased 27%, primarily due to the absence of charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities.

Analysis of Consolidated Operations

Presented below are selected amounts related to Virginia Power's results of operations:

Year Ended December 31,	2016	\$0	Change	2015	\$ C	Change	2014
(millions)							
Operating Revenue	\$7,588	\$	(34)	\$7,622	\$	43	\$7,579
Electric fuel and other energy-							
related purchases	1,973		(347)	2,320		(86)	2,406
Purchased electric capacity	99		(231)	330		(30)	360
Net Revenue	5,516		544	4,972		159	4,813
Other operations and							
maintenance	1,857		223	1,634		(282)	1,916
Depreciation and amortization	1,025		72	953		38	915
Other taxes	284		20	264		6	258
Other income	56		(12)	68		(25)	93
Interest and related charges	461		18	443		32	411
Income tax expense	727		68	659		111	548

An analysis of Virginia Power's results of operations follows:

2016 vs. 2015

Net revenue increased 11%, primarily reflecting:

- A \$225 million electric capacity benefit, primarily due to the new PJM capacity performance market effective June 2016 (\$155 million) and the expiration of non-utility generator contracts in 2015 (\$58 million);
- An increase from rate adjustment clauses (\$183 million); and
 The absence of an \$85 million write-off of deferred fuel costs associated with Virginia legislation enacted in February 2015.

Other operations and maintenance increased 14%, primarily reflecting:

- A \$98 million increase in charges related to future ash pond and landfill closure costs at certain utility generation facilities;
- A \$50 million increase in storm damage and service restoration costs, including \$23 million for Hurricane Matthew;
- A \$37 million increase in salaries, wages and benefits and general administrative expenses; and
- Organizational design initiative costs (\$32 million).

Income tax expense increased 10%, primarily reflecting higher pre-tax income.

2015 vs. 2014

Net revenue increased 3%, primarily reflecting:

- An increase from rate adjustment clauses (\$225 million);
- An increase in sales to retail customers, primarily due to a net increase in cooling degree days (\$38 million); and
- A decrease in capacity related expenses (\$33 million); partially offset by
- An \$85 million write-off of deferred fuel costs associated with Virginia legislation enacted in February 2015;

- A decrease in sales to customers due to the effect of changes in customer usage and other factors (\$24 million); and
- A decrease due to a charge based on the 2015 Biennial Review Order to refund revenues to customers (\$20 million).
- Other operations and maintenance decreased 15%, primarily reflecting:
- The absence of \$370 million in charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities; and
- A \$38 million decrease in planned outage costs primarily due to a decrease in scheduled outage days at certain non-nuclear utility generation facilities.

These decreases were partially offset by:

- An \$80 million increase in certain electric transmission-related expenditures. These expenses are primarily recovered through state and FERC rates and do not impact net income; and
- A \$53 million increase in utility nuclear refueling outage costs primarily due to the amortization of outage costs that were previously deferred pursuant to Virginia legislation enacted in April 2014.

Other income decreased 27%, primarily reflecting lower tax recoveries associated with contributions in aid of construction.

Income tax expense increased 20%, primarily reflecting higher pre-tax income.

DOMINION GAS

RESULTS OF OPERATIONS

Presented below is a summary of Dominion Gas' consolidated results:

Year Ended December 31,	2016	\$Cł	nange	2015	\$C	hange	2014
(millions)							
Net Income	\$392	\$	(65)	\$457	\$	(55)	\$512

Overview

2016 vs. 2015

Net income decreased 14%, primarily due a decrease in gains from agreements to convey shale development rights underneath several natural gas storage fields.

2015 vs. 2014

Net income decreased 11%, primarily due to the absence of gains on the indirect sale of assets to Blue Racer, a decrease in income from NGL activities and higher interest expense, partially offset by increased gains from agreements to convey shale development rights underneath several natural gas storage fields.

Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

Analysis of Consolidated Operations

Presented below are selected amounts related to Dominion Gas' results of operations:

Year Ended December 31,	2016	\$ Change	2015	\$ Change	2014
(millions)					
Operating Revenue	\$1,638	\$ (78)	\$1,716	\$ (182)	\$1,898
Purchased gas	109	(24)	133	(182)	315
Other energy-related

Interest and related					
charges	94	21	73	46	27
Income tax expense	215	(68)	283	(51)	334

An analysis of Dominion Gas' results of operations follows:

2016 vs. 2015

- **Net revenue** decreased 3%, primarily reflecting:
- A \$34 million decrease from regulated natural gas transmission
 - operations, primarily reflecting:
 - A \$36 million decrease in gas transportation and storage activities, primarily due to decreased demand charges (\$28 million), increased fuel costs (\$13 million), contract rate changes (\$11 million) and decreased revenue from gathering and extraction services (\$8 million), partially offset by increased regulated gas sales (\$16 million) and expansion projects placed in service (\$9 million); and
 - An \$18 million decrease from NGL activities, due to decreased prices (\$16 million) and volumes (\$2 million); partially offset by
 A \$21 million increase in services performed for Atlantic Coast Pipeline; and
- A \$12 million decrease from regulated natural gas distribution operations, primarily reflecting:
 - A decrease in rate adjustment clause revenue related to low income assistance programs (\$26 million); and
 - A \$9 million decrease in other revenue primarily due to a decrease in pooling and metering activities (\$3 million), a decrease in Blue Racer management fees (\$3 million) and a decrease in gathering activities (\$2 million); partially offset by
 - An \$18 million increase in AMR and PIR program revenues; and
 - An \$8 million increase in off-system sales.

Other operations and maintenance increased 22%, primarily reflecting:

A \$78 million decrease in gains from agreements to convey shale development rights underneath several natural gas storage fields; and

- A \$20 million increase in services performed for Atlantic Coast Pipeline. These expenses are billed to Atlantic Coast Pipeline and do not significantly impact net income; partially offset by
- A \$26 million decrease in bad debt expense at regulated natural gas distribution operations primarily related to low income assistance programs. These bad debt expenses are recovered through rates and do not impact net income.

Other income increased \$10 million, primarily due to a gain on the sale of 0.65% of the noncontrolling partnership interest in Iroquois (\$5 million) and an increase in AFUDC associated with rate-regulated projects (\$5 million).

Interest and related charges increased 29%, primarily due to higher interest expense resulting from the issuances of senior notes in November 2015 and the second quarter of 2016 (\$28 million), partially offset by an increase in deferred rate adjustment clause interest expense (\$7 million).

Income tax expense decreased 24% primarily reflecting lower pre-tax income.

2015 vs. 2014

Net revenue increased 1%, primarily reflecting:

- A \$43 million increase from regulated natural gas distribution operations, primarily due to an increase in AMR and PIR program revenues (\$24 million) and various expansion projects placed into service (\$22 million); partially offset by
- A \$27 million decrease from regulated natural gas transmission operations, primarily reflecting:
 - A \$62 million decrease from NGL activities, primarily due to decreased prices; partially offset by
 - A \$2 million increase in gas transportation and storage activities, primarily due to decreased fuel costs (\$24 million) and various expansion projects placed into service (\$24 million), partially offset by decreased regulated gas sales (\$46 million); and
 - A \$33 million net increase in other revenue primarily due to services performed for Atlantic Coast Pipeline and Blue Racer (\$47 million), partially offset by a decrease in non-regulated gas sales (\$8 million) and decreased farm-out revenues (\$6 million).

Other operations and maintenance increased 15%, primarily reflecting:

- A \$47 million net increase due to services performed for Atlantic Coast Pipeline and Blue Racer. These expenses are billed to these entities and do not significantly impact net income; and
- The absence of gains on the sale of assets to Blue Racer (\$59 million); partially offset by
- An increase in gains from agreements to convey shale development rights underneath several natural gas storage fields (\$63 million).

Depreciation and amortization increased 10% primarily due to various expansion projects placed into service.

Interest and related charges increased \$46 million, primarily due to higher long-term debt interest expense resulting from debt issuances in December 2014.

Income tax expense decreased 15% primarily reflecting lower pre-tax income.

LIQUIDITY AND CAPITAL RESOURCES

Dominion depends on both internal and external sources of liquidity to provide working capital and as a bridge to long-term debt financings. Short-term cash requirements not met by cash provided by operations are generally satisfied with proceeds from short-term borrowings. Long-term cash needs are met through issuances of debt and/or equity securities.

At December 31, 2016, Dominion had \$2.3 billion of unused capacity under its credit facilities. See additional discussion below under *Credit Facilities and Short-Term Debt.*

A summary of Dominion's cash flows is presented below:

Year Ended December 31,		2016	2015	2	014
(millions)					
Cash and cash equivalents at beginning of year	\$	607	\$ 318	\$ 3	16
Cash flows provided by (used in):					
Operating activities		4,127	4,475	3,4	39
Investing activities	(1	0,703)	(6,503)	(5,1	81)
Financing activities		6,230	2,317	1,7	44
Net increase (decrease) in cash and cash					
equivalents		(346)	289		2
Cash and cash equivalents at end of year	\$	261	\$ 607	\$ 3	18

Operating Cash Flows

Net cash provided by Dominion's operating activities decreased \$348 million, primarily due to higher operations and maintenance expenses, derivative activities, and increased payments for income taxes and interest. The decrease was partially offset with the benefit from the new PJM capacity performance market and higher deferred fuel cost recoveries and revenues from rate adjustment clauses in its Virginia jurisdiction.

Dominion believes that its operations provide a stable source of cash flow to contribute to planned levels of capital expenditures and maintain or grow the dividend on common shares. In December 2016, Dominion's Board of Directors established an annual dividend rate for 2017 of \$3.02 per share of common stock, a 7.9% increase over the 2016 rate. Dividends are subject to declaration by the Board of Directors. In January 2017, Dominion's Board of Directors declared dividends payable in March 2017 of 75.5 cents per share of common stock.

Dominion's operations are subject to risks and uncertainties that may negatively impact the timing or amounts of operating cash flows, and which are discussed in Item 1A. Risk Factors.

CREDIT RISK

Dominion's exposure to potential concentrations of credit risk results primarily from its energy marketing and price risk management activities. Presented below is a summary of Dominion's credit exposure as of December 31, 2016 for these activities. Gross credit exposure for each counterparty is calculated as outstanding receivables plus any unrealized on- or off-balance sheet exposure, taking into account contractual netting rights.

		Gross				Net
		Credit	(Credit		Credit
	Exp	osure	Coll	ateral	Exp	osure
(millions)						
Investment grade(1)	\$	36	\$	—	\$	36
Non-investment grade(2)		9		_		9
No external ratings:						
Internally rated-investment grade(3)		16		_		16
Internally rated-non-investment grade(4)		37		—		37
Total	\$	98	\$	_	\$	98

(1) Designations as investment grade are based upon minimum credit ratings assigned by Moody's and Standard & Poor's. The five largest counterparty exposures, combined, for this category represented approximately 27% of the total net credit exposure.

(2) The five largest counterparty exposures, combined, for this category represented approximately 10% of the total net credit exposure.

(3) The five largest counterparty exposures, combined, for this category represented approximately 15% of the total net credit exposure.

(4) The five largest counterparty exposures, combined, for this category represented approximately 16% of the total net credit exposure.

Investing Cash Flows

Net cash used in Dominion's investing activities increased \$4.2 billion, primarily due to the Dominion Questar Combination and higher capital expenditures, partially offset by the absence of Dominion's acquisition of DCG in 2015 and the acquisition of fewer solar development projects in 2016.

Financing Cash Flows and Liquidity

Dominion relies on capital markets as significant sources of funding for capital requirements not satisfied by cash provided by its operations. As discussed in *Credit Ratings*, Dominion's ability to borrow funds or issue securities and the return demanded by investors are affected by credit ratings. In addition, the raising of external capital is subject to certain regulatory requirements, including registration with the SEC for certain issuances.

Dominion currently meets the definition of a well-known seasoned issuer under SEC rules governing the registration, communications and offering processes under the Securities Act of 1933. The rules provide for a streamlined shelf registration process to provide registrants with timely access to capital. This allows Dominion to use automatic shelf registration statements to register any offering of securities, other than those for exchange offers or business combination transactions.

Net cash provided by Dominion's financing activities increased \$3.9 billion, primarily reflecting higher net debt issuances and higher issuances of common stock and Dominion Midstream common and convertible preferred units in connection with the Dominion Questar Combination.

OFFICIAL COP

Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

LIABILITY MANAGEMENT

During 2014, Dominion elected to redeem certain debt and preferred securities prior to their stated maturities. Proceeds from the issuance of lower-cost senior and enhanced junior subordinated notes were used to fund the redemption payments. See Note 17 to the Consolidated Financial Statements for descriptions of these redemptions.

From time to time, Dominion may reduce its outstanding debt and level of interest expense through redemption of debt securities prior to maturity and repurchases in the open market, in privately negotiated transactions, through tender offers or otherwise.

CREDIT FACILITIES AND SHORT-TERM DEBT

Dominion uses short-term debt to fund working capital requirements and as a bridge to long-term debt financings. The levels of borrowing may vary significantly during the course of the year, depending upon the timing and amount of cash requirements not satisfied by cash from operations. In January 2016, Dominion expanded its short-term funding resources through a \$1.0 billion increase to one of its joint revolving credit facility limits. In addition, Dominion utilizes cash and letters of credit to fund collateral requirements. Collateral requirements are impacted by commodity prices, hedging levels, Dominion's credit ratings and the credit quality of its counterparties.

In connection with commodity hedging activities, Dominion is required to provide collateral to counterparties under some circumstances. Under certain collateral arrangements, Dominion may satisfy these requirements by electing to either deposit cash, post letters of credit or, in some cases, utilize other forms of security. From time to time, Dominion may vary the form of collateral provided to counterparties after weighing the costs and benefits of various factors associated with the different forms of collateral. These factors include short-term borrowing and short-term investment rates, the spread over these short-term rates at which Dominion can issue commercial paper, balance sheet impacts, the costs and fees of alternative collateral postings with these and other counterparties and overall liquidity management objectives.

Dominion's commercial paper and letters of credit outstanding, as well as capacity available under credit facilities, were as follows:

December 31, 2016	Facility Limit	Outstanding Commercial Paper	Outstanding Letters of Credit	Facility Capacity Available
(millions)				
Joint revolving credit				
facility(1)(2)	\$5,000	\$ 3,155	\$ —	\$1,845
Joint revolving credit				
facility(1)	500	_	85	415
Total	\$5,500	\$ 3,155(3)	\$85	\$2,260

(1) In May 2016, the maturity dates for these facilities were extended from April 2019 to April 2020. These credit facilities can be used to support bank borrowings and the issuance of commercial paper, as well as to support up to a combined \$2.0 billion of letters of credit.

(2) In January 2016, this facility limit was increased from \$4.0 billion to \$5.0 billion.

(3) The weighted-average interest rate of the outstanding commercial paper supported by Dominion's credit facilities was 1.05% at December 31, 2016. Dominion Questar's revolving multi-year and 364-day credit facilities with limits of \$500 million and \$250 million, respectively, were terminated in October 2016.

SHORT-TERM NOTES

In November 2015, Dominion issued \$400 million of private placement short-term notes that matured in May 2016 and bore interest at a variable rate. In December 2015, Dominion issued an additional \$200 million of the variable rate short-term notes that matured in May 2016. The proceeds were used for general corporate purposes.

In February 2016, Dominion purchased and cancelled \$100 million of the variable rate short-term notes that would have otherwise matured in May 2016 using the proceeds from the February 2016 issuance of senior notes that mature in 2018.

In September 2016, Dominion borrowed \$1.2 billion under a term loan agreement that bore interest at a variable rate. The net proceeds were used to finance the Dominion Questar Combination. In December 2016, the loan was repaid with cash received from Dominion Midstream in connection with the contribution of Questar Pipeline. The loan would have otherwise matured in September 2017. See Note 3 to the Consolidated Financial Statements for more information.

LONG-TERM DEBT

During 2016, Dominion issued the following long-term public debt:

Туре	Principal	Rate	Maturity
	(millions)		
Senior notes	\$ 500	1.60%	2019
Senior notes	400	2.00%	2021
Remarketable subordinated notes	700	2.00%	2021
Remarketable subordinated notes	700	2.00%	2024
Senior notes	400	2.85%	2026
Senior notes	400	2.95%	2026
Senior notes	750	3.15%	2026
Senior notes	500	4.00%	2046
Enhanced junior subordinated notes	800	5.25%	2076
Total notes issued	\$5,150		

During 2016, Dominion also issued the following long-term private debt: In February 2016, Dominion issued \$500 million of 2.125% senior notes in a private placement. The notes mature in 2018. The proceeds were used to repay or repurchase short-term debt, including commercial paper and short-term notes, and for general corporate purposes.

In May 2016, Dominion Gas issued \$150 million of private placement 3.8% senior notes that mature in 2031. The proceeds were used for general corporate purposes. In June 2016, Dominion Gas issued \$250 million of private placement 2.875% senior notes that mature in 2023. The proceeds were used for general corporate purposes and to repay short-term debt, including commercial paper. Also in June 2016, Dominion Gas issued € 250 million of private placement 1.45% senior notes that mature in 2026. The notes were recorded at \$280 million at issuance and included in long-term debt in the Consolidated Balance Sheets at \$263 million at December 31,

OFFICIAL COPY

2016. The proceeds were used for general corporate purposes and to repay short-term debt, including commercial paper.

- In September 2016, Dominion issued \$300 million of private placement 1.50% senior notes that mature in 2018. The proceeds were used for general corporate purposes and to repay short-term debt, including commercial paper.
- In December 2016, Questar Gas issued \$50 million of 3.62% private placement senior notes, and \$50 million of 3.67% private placement senior notes, that mature in 2046 and 2051, respectively. The proceeds were used for general corporate purposes.
- In December 2016, Dominion issued \$250 million of private placement 1.875% senior notes that mature in 2018. The proceeds were used for general corporate purposes and to repay short-term debt, including commercial paper.

During 2016, Dominion also remarketed the following long-term debt:

- In March 2016 and May 2016, Dominion successfully remarketed the \$550 million 2013 Series A 1.07% RSNs due 2021 and the \$550 million 2013 Series B 1.18% RSNs due 2019, respectively, pursuant to the terms of the related 2013 Equity Units. In connection with the remarketings, the interest rates on the Series A and Series B junior subordinated notes were reset to 4.104% and 2.962%, respectively. Dominion did not receive any proceeds from the remarketings. See Note 17 to the Consolidated Financial Statements for more information.
- In December 2016, Virginia Power remarketed the \$37 million Industrial Development Authority of the Town of Louisa, Virginia Pollution Control Refunding Revenue Bonds, Series 2008 C, which mature in 2035 and bear interest at a coupon rate of 1.85% until May 2019 after which they will bear interest at a market rate to be determined at that time. Previously, the bonds bore interest at a coupon rate of .70%. This remarketing was accounted for as a debt extinguishment with the previous investors.

During 2016, Dominion also borrowed the following under term loan agreements:

- In December 2016, Dominion Midstream borrowed \$300 million under a term loan agreement that matures in December 2019 and bears interest at a variable rate. The net proceeds were used to finance a portion of the acquisition of Questar Pipeline from Dominion. See Note 3 to the Consolidated Financial Statements for more information.
- In December 2016, SBL Holdco borrowed \$405 million under a term loan agreement that bears interest at a variable rate. The term loan amortizes over an 18-year period and matures in December 2023. The debt is nonrecourse to Dominion and is secured by SBL Holdco's interest in certain merchant solar facilities. See Note 15 to the Consolidated Financial Statements for more information. The proceeds were used for general corporate purposes.

During 2016, Dominion repaid \$1.8 billion of short-term notes and repaid and repurchased \$1.6 billion of long-term debt.

In January 2017, Dominion issued \$400 million of 1.875% senior notes and \$400 million of 2.75% senior notes that mature in 2019 and 2022, respectively.

ISSUANCE OF COMMON STOCK AND OTHER EQUITY SECURITIES

Dominion maintains Dominion $\mathsf{Direct}^{\textcircled{R}}$ and a number of employee savings plans through which contributions may be

invested in Dominion's common stock. These shares may either be newly issued or purchased on the open market with proceeds contributed to these plans. In January 2014, Dominion began purchasing its common stock on the open market for these plans. In April 2014, Dominion began issuing new common shares for these direct stock purchase plans.

During 2016, Dominion issued 4.2 million shares of common stock totaling \$314 million through employee savings plans, direct stock purchase and dividend reinvestment plans and other employee and director benefit plans. Dominion received cash proceeds of \$295 million from the issuance of 4.0 million of such shares through Dominion Direct[®] and employee savings plans.

In both April 2016 and July 2016, Dominion issued 8.5 million shares under the related stock purchase contract entered into as part of Dominion's 2013 Equity Units and received \$1.1 billion of total proceeds. Additionally, Dominion completed a market issuance of equity in April 2016 of 10.2 million shares and received proceeds of \$756 million through a registered underwritten public offering. A portion of the net proceeds was used to finance the Dominion Questar Combination. See Note 3 to the Consolidated Financial Statements for more information.

During 2017, Dominion plans to issue shares for employee savings plans, direct stock purchase and dividend reinvestment plans and stock purchase contracts. See Note 17 to the Consolidated Financial Statements for a description of common stock to be issued by Dominion for stock purchase contracts.

During the fourth quarter of 2016, Dominion Midstream received \$482 million of proceeds from the issuance of common units and \$490 million of proceeds from the issuance of convertible preferred units. The net proceeds were primarily used to finance a portion of the acquisition of Questar Pipeline from Dominion. See Note 3 to the Consolidated Financial Statements for more information.

REPURCHASE OF COMMON STOCK

Dominion did not repurchase any shares in 2016 and does not plan to repurchase shares during 2017, except for shares tendered by employees to satisfy tax withholding obligations on vested restricted stock, which does not count against its stock repurchase authorization.

PURCHASE OF DOMINION MIDSTREAM UNITS

In September 2015, Dominion initiated a program to purchase from the market up to \$50 million of common units representing limited partner interests in Dominion Midstream, which expired in September 2016. Dominion purchased approximately 658,000 common units for \$17 million and 887,000 common units for \$25 million for the years ended December 31, 2016 and 2015, respectively.

ACQUISITION OF DOMINION QUESTAR

In accordance with the terms of the Dominion Questar Combination, at closing, each share of issued and outstanding Dominion Questar common stock was converted into the right to receive \$25.00 per share in cash. The total consideration was \$4.4 billion based on 175.5 million shares of Dominion Questar outstanding at closing. Dominion also acquired Dominion Questar's outstanding debt of approximately \$1.5 billion. Dominion financed the Dominion Questar Combination through the: (1) August 2016 issuance of \$1.4 billion of 2016 Equity Units, (2) August Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

2016 issuance of \$1.3 billion of senior notes, (3) September 2016 borrowing of \$1.2 billion under a term loan agreement, which was repaid with cash received from Dominion Midstream in connection with the contribution of Questar Pipeline and (4) \$500 million of the proceeds from the April 2016 issuance of common stock.

Credit Ratings

Credit ratings are intended to provide banks and capital market participants with a framework for comparing the credit quality of securities and are not a recommendation to buy, sell or hold securities. Dominion believes that its current credit ratings provide sufficient access to the capital markets. However, disruptions in the banking and capital markets not specifically related to Dominion may affect its ability to access these funding sources or cause an increase in the return required by investors. Dominion's credit ratings affect its liquidity, cost of borrowing under credit facilities and collateral posting requirements under commodity contracts, as well as the rates at which it is able to offer its debt securities.

Both quantitative (financial strength) and qualitative (business or operating characteristics) factors are considered by the credit rating agencies in establishing an individual company's credit rating. Credit ratings should be evaluated independently and are subject to revision or withdrawal at any time by the assigning rating organization. The credit ratings for Dominion are affected by its financial profile, mix of regulated and nonregulated businesses and respective cash flows, changes in methodologies used by the rating agencies and event risk, if applicable, such as major acquisitions or dispositions.

In February 2016, Standard & Poor's lowered the following ratings for Dominion: issuer to BBB+ from A-, senior unsecured debt securities to BBB from BBB+ and junior/remarketable subordinated debt securities to BBB- from BBB. In addition, Standard & Poor's affirmed Dominion's commercial paper rating of A-2 and revised its outlook to stable from negative.

In March 2016, Fitch and Standard & Poor's changed the rating for Dominion's junior subordinated debt securities to account for its inability to defer interest payments on the remarketed 2013 Series A RSNs. Subsequently, junior subordinated debt securities without an interest deferral feature are rated one notch higher by Fitch and Standard & Poor's (BBB) than junior subordinated debt securities with an interest deferral feature (BBB-). See Note 17 to the Consolidated Financial Statements for a description of the remarketed notes.

Credit ratings as of February 23, 2017 follow:

	Fitch	Moody's	Standard & Poor's
Dominion			
Issuer	BBB+	Baa2	BBB+
Senior unsecured debt securities	BBB+	Baa2	BBB
Junior subordinated notes(1)	BBB	Baa3	BBB
Enhanced junior subordinated			
notes(2)	BBB-	Baa3	BBB-
Junior/ remarketable subordinated			
notes(2)	BBB-	Baa3	BBB-
Commercial paper	F2	P-2	A-2

(1) Securities do not have an interest deferral feature.

(2) Securities have an interest deferral feature.

As of February 23, 2017, Fitch, Moody's, and Standard & Poor's maintained a stable outlook for their respective ratings of Dominion. A downgrade in an individual company's credit rating does not necessarily restrict its ability to raise short-term and long-term financing as long as its credit rating remains investment grade, but it could result in an increase in the cost of borrowing. Dominion works closely with Fitch, Moody's and Standard & Poor's with the objective of achieving its targeted credit ratings. Dominion may find it necessary to modify its business plan to maintain or achieve appropriate credit ratings and such changes may adversely affect growth and EPS.

Debt Covenants

As part of borrowing funds and issuing debt (both short-term and longterm) or preferred securities, Dominion must enter into enabling agreements. These agreements contain covenants that, in the event of default, could result in the acceleration of principal and interest payments; restrictions on distributions related to capital stock, including dividends, redemptions, repurchases, liquidation payments or guarantee payments; and in some cases, the termination of credit commitments unless a waiver of such requirements is agreed to by the lenders/security holders. These provisions are customary, with each agreement specifying which covenants apply. These provisions are not necessarily unique to Dominion. Some of the typical covenants include:

- The timely payment of principal and interest;
- Information requirements, including submitting financial reports filed with the SEC and information about changes in Dominion's credit ratings to lenders;
- Performance obligations, audits/inspections, continuation of the basic nature of business, restrictions on certain matters related to merger or consolidation and restrictions on disposition of all or substantially all assets:
- Compliance with collateral minimums or requirements related to mortgage bonds; and
- Limitations on liens.

Dominion is required to pay annual commitment fees to maintain its credit facilities. In addition, Dominion's credit agreements contain various terms and conditions that could affect its ability to borrow under these facilities. They include maximum debt to total capital ratios and crossdefault provisions.

As of December 31, 2016, the calculated total debt to total capital ratio, pursuant to the terms of the agreements, was as follows:

Company	Maximum Allowed Ratio(1)	Actual Ratio(2)
Dominion	70%	61%

(1) Pursuant to a waiver received in April 2016 and in connection with the closing of the Dominion Questar Combination, the 65% maximum debt to total capital ratio in Dominion's credit agreements has, with respect to Dominion only, been temporarily increased to 70% until the end of the fiscal quarter ending June 30, 2017. (2) Indebtedness as defined by the bank agreements excludes certain junior

subordinated and remarketable subordinated notes reflected as long-term debt as well as AOCI reflected as equity in the Consolidated Balance Sheets.

Jun 22 2018

At December 31, 2016, the termination dates and covered debt under the RCCs associated with Dominion's hybrids were as follows:

RCC	
Termination	Designated Covered Debt
Date	Under RCC
6/30/2036	September 2006 hybrids
9/30/2036	June 2006 hybrids
	Termination Date 6/30/2036

Dominion monitors these debt covenants on a regular basis in order to ensure that events of default will not occur. As of December 31, 2016, there have been no events of default under Dominion's debt covenants.

Dividend Restrictions

Certain agreements associated with Dominion's credit facilities contain restrictions on the ratio of debt to total capitalization. These limitations did not restrict Dominion's ability to pay dividends or receive dividends from its subsidiaries at December 31, 2016.

See Note 17 to the Consolidated Financial Statements for a description of potential restrictions on dividend payments by Dominion in connection with the deferral of interest payments and contract adjustment payments on certain junior subordinated notes and equity units, initially in the form of corporate units, which information is incorporated herein by reference.

Future Cash Payments for Contractual Obligations and Planned Capital Expenditures

CONTRACTUAL OBLIGATIONS

Dominion is party to numerous contracts and arrangements obligating it to make cash payments in future years. These contracts include financing arrangements such as debt agreements and leases, as well as contracts for the purchase of goods and services and financial derivatives. Presented below is a table summarizing cash payments that may result from contracts to which Dominion is a party as of December 31, 2016. For purchase obligations and other liabilities, amounts are based upon contract terms, including fixed and minimum quantities to be purchased at fixed or market-based prices. Actual cash payments will be based upon actual quantities purchased and prices paid and will likely differ from amounts presented below. The table excludes all amounts classified as current liabilities in the Consolidated Balance Sheets, other than current maturities of long-term debt, interest payable and certain derivative instruments. The majority of Dominion's current liabilities will be paid in cash in 2017.

		2018-	2020-	2022 and	
	2017	2019	2021	thereafter	Total
(millions)					
Long-term debt(1)	\$1,711	\$ 6,666	\$3,888	\$19,927	\$32,192
Interest payments(2)	1,339	2,349	1,902	14,596	20,186
Leases(3)	72	127	71	238	508
Purchase obligations(4):					
Purchased electric capacity					
for utility operations	149	153	98	_	400
Fuel commitments for utility					
operations	1.300	1,163	386	1,487	4,336
Fuel commitments for	,	,		, -	,
nonregulated operations	122	114	124	131	491
Pipeline transportation and					
storage	305	495	380	1.253	2,433
Other(5)	648	179	43	14	884
Other long-term liabilities(6):					
Other contractual					
obligations(7)	77	188	28	24	317
Total cash payments	\$5,723	\$11,434	\$6,920	\$37,670	\$61,747

(1) Based on stated maturity dates rather than the earlier redemption dates that could be elected by instrument holders.

(2) Includes interest payments over the terms of the debt and payments on related stock purchase contracts. Interest is calculated using the applicable interest rate or forward interest rate curve at December 31, 2016 and outstanding principal for each instrument with the terms ending at each instrument's stated maturity. See Note 17 to the Consolidated Financial Statements. Does not reflect Dominion's ability to defer interest and stock purchase contract payments on certain junior subordinated notes or RSNs and equity units, initially in the form of Corporate Units.

(3) Primarily consists of operating leases.

- (4) Amounts exclude open purchase orders for services that are provided on demand, the timing of which cannot be determined.
- (5) Includes capital, operations, and maintenance commitments.
- (6) Excludes regulatory liabilities, AROs and employee benefit plan obligations, which are not contractually fixed as to timing and amount. See Notes 12, 14 and 21 to the Consolidated Financial Statements. Due to uncertainty about the timing and amounts that will ultimately be paid, \$48 million of income taxes payable associated with unrecognized tax benefits are excluded. Deferred income taxes are also excluded since cash payments are based primarily on taxable income for each discrete fiscal year. See Note 5 to the Consolidated Financial Statements.
 (7) Includes interest rate and foreign currency swap agreements.

PLANNED CAPITAL EXPENDITURES

Dominion's planned capital expenditures are expected to total approximately \$5.8 billion, \$5.0 billion and \$5.2 billion in 2017, 2018 and 2019, respectively. Dominion's planned expenditures are expected to include construction and expansion of electric generation and natural gas transmission and storage facilities, construction improvements and expansion of electric transmission and distribution assets, purchases of nuclear fuel, maintenance and the construction of the Liquefaction Project and Dominion's portion of the Atlantic Coast Pipeline. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

Dominion expects to fund its capital expenditures with cash from operations and a combination of securities issuances and short-term borrowings. Planned capital expenditures include capital projects that are subject to approval by regulators and the Board of Directors.

See *DVP*, *Dominion Generation* and *Dominion Energy-Properties* in Item 1. Business for a discussion of Dominion's expansion plans.

These estimates are based on a capital expenditures plan reviewed and endorsed by Dominion's Board of Directors in late 2016 and are subject to continuing review and adjustment and actual capital expenditures may vary from these estimates. Dominion may also choose to postpone or cancel certain planned capital expenditures in order to mitigate the need for future debt financings and equity issuances.

Use of Off-Balance Sheet Arrangements

LEASING ARRANGEMENT

In July 2016, Dominion signed an agreement with a lessor to construct and lease a new corporate office property in Richmond, Virginia. The lessor is providing equity and has obtained financing commitments from debt investors, totaling \$365 million, to fund the estimated project costs. The project is expected to be completed by mid-2019. Dominion has been appointed to act as the construction agent for the lessor, during which time Dominion will request cash draws from the lessor and debt investors to fund all project costs, which totaled \$46 million as of December 31, 2016. If the project is terminated under certain events of default, Dominion could be required to pay up to 89.9% of the then funded amount. For specific full recourse events, Dominion could be required to pay up to 100% of the then funded amount.

The five-year lease term will commence once construction is substantially complete and the facility is able to be occupied. At the end of the initial lease term, Dominion can (i) extend the term of the lease for an additional five years, subject to the approval of the participants, at current market terms, (ii) purchase the property for an amount equal to the project costs or, (iii) subject to certain terms and conditions, sell the property to a third party using commercially reasonable efforts to obtain the highest cash purchase price for the property. If the project is sold and the proceeds from the sale are insufficient to repay the investors for the project costs, Dominion may be required to make a payment to the lessor, up to 87% of project costs, for the difference between the project costs and sale proceeds.

The respective transactions have been structured so that Dominion is not considered the owner during construction for financial accounting purposes and, therefore, will not reflect the construction activity in its consolidated financial statements. The financial accounting treatment of the lease agreement will be impacted by the new accounting standard issued in February 2016. See Note 2 to the Consolidated Financial Statements for additional information. Dominion will be considered the owner of the leased property for tax purposes, and as a result, will be entitled to tax deductions for depreciation and interest expense.

GUARANTEES

Dominion primarily enters into guarantee arrangements on behalf of its consolidated subsidiaries. These arrangements are not sub-

ject to the provisions of FASB guidance that dictate a guarantor's accounting and disclosure requirements for guarantees, including indirect guarantees of indebtedness of others. See Note 22 to the Consolidated Financial Statements for additional information, which information is incorporated herein by reference.

FUTURE ISSUES AND OTHER MATTERS

See Item 1. Business and Notes 13 and 22 to the Consolidated Financial Statements for additional information on various environmental, regulatory, legal and other matters that may impact future results of operations, financial condition and/or cash flows.

Environmental Matters

Dominion is subject to costs resulting from a number of federal, state and local laws and regulations designed to protect human health and the environment. These laws and regulations affect future planning and existing operations. They can result in increased capital, operating and other costs as a result of compliance, remediation, containment and monitoring obligations.

ENVIRONMENTAL PROTECTION AND MONITORING EXPENDITURES

Dominion incurred \$394 million, \$298 million and \$313 million of expenses (including accretion and depreciation) during 2016, 2015, and 2014 respectively, in connection with environmental protection and monitoring activities, including charges related to future ash pond and landfill closure costs, and expects these expenses to be approximately \$190 million and \$185 million in 2017 and 2018, respectively. In addition, capital expenditures related to environmental controls were \$191 million, \$94 million, and \$101 million for 2016, 2015 and 2014, respectively. These expenditures are expected to be approximately \$185 million and \$115 million for 2017 and 2018, respectively.

FUTURE ENVIRONMENTAL REGULATIONS

Air

The CAA is a comprehensive program utilizing a broad range of regulatory tools to protect and preserve the nation's air quality. At a minimum, delegated states are required to establish regulatory programs to address all requirements of the CAA. However, states may choose to develop regulatory programs that are more restrictive. Many of the Companies' facilities are subject to the CAA's permitting and other requirements.

In August 2015, the EPA issued final carbon standards for existing fossil fuel power plants. Known as the Clean Power Plan, the rule uses a set of measures for reducing emissions from existing sources that includes efficiency improvements at coal plants, displacing coal-fired generation with increased utilization of natural gas combined cycle units and expanding renewable resources. The new rule requires states to impose standards of performance limits for existing fossil fuel-fired electric generating units or equivalent statewide intensity-based or mass-based CO2 binding goals or limits. States are required to submit final plans identifying how they will comply with the rule by September 2018. The EPA also issued a proposed federal plan and model trading rule that states can adopt or that would be put in place if, in response to the final guidelines, a state either does not submit a state plan or its plan is not approved by the EPA. Virginia Power's most recent integrated resources plan filed in April 2016 includes four

Jun 22 2018

Table of Contents

alternative plans that represent plausible compliance strategies with the rule as proposed, and which include additional coal unit retirements and additional low or zero-carbon resources. The final rule has been challenged in the U.S. Court of Appeals for the D.C. Circuit. In February 2016, the U.S. Supreme Court issued a stay of the Clean Power Plan until the disposition of the petitions challenging the rule now before the Court of Appeals, and, if such petitions are filed in the future, before the U.S. Supreme Court. Dominion does not know whether these legal challenges will impact the submittal deadlines for the state implementation plans. In June 2016, the Governor of Virginia signed an executive order directing the Virginia Natural Resources Secretary to convene a workgroup charged with recommending concrete steps to reduce carbon pollution which include the Clean Power Plan as an option. Unless the rule survives the court challenges and until the state plans are developed and the EPA approves the plans, Dominion cannot predict the potential financial statement impacts but believes the potential expenditures to comply could be material.

In December 2012, the EPA issued a final rule that set a more stringent annual air quality standard for fine particulate matter. The EPA issued final attainment/nonattainment designations in January 2015. Until states develop their implementation plans, Dominion cannot determine whether or how facilities located in areas designated nonattainment for the standard will be impacted, but does not expect such impacts to be material.

The EPA has finalized rules establishing a new 1-hour NAAQS for NO2 and a new 1-hour NAAQS for SO2, which could require additional NOX and SO2 controls in certain areas where Dominion operates. Until the states have developed implementation plans for these standards, the impact on Dominion's facilities that emit NOX and SO2 is uncertain. Additionally, the impact of permit limits for implementing NAAQS on Dominion's facilities is uncertain at this time.

Climate Change

In December 2015, the Paris Agreement was formally adopted under the United Nations Framework Convention on Climate Change. The accord establishes a universal framework for addressing GHG emissions involving actions by all nations through the concept of nationally determined contributions in which each nation defines the GHG commitment it can make and sets in place a process for increasing those commitments every five years. It also contains a global goal of holding the increase in the global average temperature to well below 2 degrees Celsius above pre-industrial levels and to pursue efforts to limit the temperature increase to 1.5 degrees Celsius above pre-industrial levels and to aim to reach global peaking of GHG emissions as soon as possible.

A key element of the initial U.S. nationally determined contributions of achieving a 26% to 28% reduction below 2005 levels by 2025 is the implementation of the Clean Power Plan, which establishes interim emission reduction targets for fossil fuel-fired electric generating units over the period 2022 through 2029 with final targets to be achieved by 2030. The EPA estimates that the Clean Power Plan will result in a nationwide reduction in CO2 emissions from fossil fuel-fired electric generating units of 32% from 2005 levels by 2030.

In March 2016, as part of its Climate Action Plan, the EPA began development of regulations for reducing methane emissions

from existing sources in the oil and natural gas sectors. In November 2016, the EPA issued an Information Collection Request to collect information on existing sources upstream of local distribution companies in this sector. Depending on the results of this Information Collection Request, the EPA may propose new regulations on existing sources. Dominion cannot currently estimate the potential impacts on results of operations, financial condition and/or cash flows related to this matter.

PHMSA Regulation

The most recent reauthorization of PHMSA included new provisions on historical records research, maximum-allowed operating pressure validation, use of automated or remote-controlled valves on new or replaced lines, increased civil penalties and evaluation of expanding integrity management beyond high-consequence areas. PHMSA has not yet issued new rulemaking on most of these items.

Legal Matters

Collective Bargaining Agreement

In April 2016, the labor contract between Dominion and Local 69 expired. In August 2016, the parties reached a tentative agreement for a new labor contract, however, the agreement was not submitted to members of Local 69 for approval. In September 2016, following a temporary lock out of union members, Local 69 agreed to not strike at DTI and Hope at least through April 1, 2017. In exchange, DTI and Hope agreed to recall the union members to work and not lock them out during that period. Contract negotiations resumed in October 2016 and are continuing. Local 69 represents approximately 760 DTI employees in West Virginia, New York, Pennsylvania, Ohio and Virginia and approximately 150 Hope employees in West Virginia.

Dodd-Frank Act

The Dodd-Frank Act was enacted into law in July 2010 in an effort to improve regulation of financial markets. The CEA, as amended by Title VII of the Dodd-Frank Act, requires certain over-the counter derivatives, or swaps, to be cleared through a derivatives clearing organization and, if the swap is subject to a clearing requirement, to be executed on a designated contract market or swap execution facility. Non-financial entities that use swaps to hedge or mitigate commercial risk, often referred to as end users, may elect the end-user exception to the CEA's clearing requirements. Dominion has elected to exempt its swaps from the CEA's clearing requirements. The CFTC may continue to adopt final rules and implement provisions of the Dodd-Frank Act through its ongoing rulemaking process, including rules regarding margin requirements for non-cleared swaps. If, as a result of the rulemaking process, Dominion's derivative activities are not exempted from clearing, exchange trading or margin requirements, it could be subject to higher costs due to decreased market liquidity or increased margin payments. In addition, Dominion's swap dealer counterparties may attempt to pass-through additional trading costs in connection with the implementation of, and compliance with, Title VII of the Dodd-Frank Act. Due to the evolving rulemaking process, Dominion is currently unable to assess the potential impact of the Dodd-Frank Act's derivative-related provisions on its financial condition, results of operations or cash flows.

Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The matters discussed in this Item may contain "forward-looking statements" as described in the introductory paragraphs of Item 7. MD&A. The reader's attention is directed to those paragraphs and Item 1A. Risk Factors for discussion of various risks and uncertainties that may impact the Companies.

MARKET RISK SENSITIVE INSTRUMENTS AND RISK MANAGEMENT

The Companies' financial instruments, commodity contracts and related financial derivative instruments are exposed to potential losses due to adverse changes in commodity prices, interest rates and equity security prices as described below. Commodity price risk is present in Dominion's and Virginia Power's electric operations and Dominion's and Dominion Gas' natural gas procurement and marketing operations due to the exposure to market shifts in prices received and paid for electricity, natural gas and other commodities. The Companies use commodity derivative contracts to manage price risk exposures for these operations. Interest rate risk is generally related to their outstanding debt and future issuances of debt. In addition, the Companies are exposed to investment price risk through various portfolios of equity and debt securities.

The following sensitivity analysis estimates the potential loss of future earnings or fair value from market risk sensitive instruments over a selected time period due to a 10% change in commodity prices or interest rates.

Commodity Price Risk

To manage price risk, Dominion and Virginia Power hold commoditybased derivative instruments held for non-trading purposes associated with purchases and sales of electricity, natural gas and other energy-related products and Dominion Gas primarily holds commodity-based financial derivative instruments held for non-trading purposes associated with purchases and sales of natural gas and other energy-related products.

The derivatives used to manage commodity price risk are executed within established policies and procedures and may include instruments such as futures, forwards, swaps, options and FTRs that are sensitive to changes in the related commodity prices. For sensitivity analysis purposes, the hypothetical change in market prices of commodity-based financial derivative instruments is determined based on models that consider the market prices of commodities in future periods, the volatility of the market prices in each period, as well as the time value factors of the derivative instruments. Prices and volatility are principally determined based on observable market prices.

A hypothetical 10% decrease in commodity prices would have resulted in a decrease in fair value of \$27 million and \$24 million of Dominion's commodity-based derivative instruments as of December 31, 2016 and December 31, 2015, respectively.

A hypothetical 10% decrease in commodity prices would have resulted in a decrease in the fair value of \$62 million and \$42 million of Virginia Power's commodity-based derivative instruments as of December 31, 2016 and December 31, 2015, respectively. The increase in sensitivity is largely due to an increase in commodity derivative activity and higher commodity prices. A hypothetical 10% increase in commodity prices of Dominion Gas' commodity-based financial derivative instruments would have resulted in a decrease in fair value of \$4 million and \$5 million as of December 31, 2016 and 2015, respectively.

The impact of a change in energy commodity prices on the Companies' commodity-based financial derivative instruments at a point in time is not necessarily representative of the results that will be realized when the contracts are ultimately settled. Net losses from commodity derivative instruments used for hedging purposes, to the extent realized, will generally be offset by recognition of the hedged transaction, such as revenue from physical sales of the commodity.

Interest Rate Risk

The Companies manage their interest rate risk exposure predominantly by maintaining a balance of fixed and variable rate debt. They also enter into interest rate sensitive derivatives, including interest rate swaps and interest rate lock agreements. For variable rate debt and interest rate swaps designated under fair value hedging and outstanding for the Companies, a hypothetical 10% increase in market interest rates would not have resulted in a material change in annual earnings at December 31, 2016 or 2015.

The Companies may also use forward-starting interest rate swaps and interest rate lock agreements as anticipatory hedges. As of December 31, 2016, Dominion and Virginia Power had \$2.9 billion and \$1.7 billion, respectively, in aggregate notional amounts of these interest rate derivatives outstanding. A hypothetical 10% decrease in market interest rates would have resulted in a decrease of \$58 million and \$45 million, respectively, in the fair value of Dominion's and Virginia Power's interest rate derivatives at December 31, 2016. As of December 31, 2015, Dominion, Virginia Power and Dominion Gas had \$4.6 billion, \$2.0 billion and \$250 million, respectively, in aggregate notional amounts of these interest rate derivatives outstanding. A hypothetical 10% decrease in market interest rates would have resulted in a decrease of \$71 million, \$52 million and \$2 million, respectively, in the fair value of Dominion's, Virginia Power's and Dominion Gas' interest rate derivatives at December 31, 2015.

In June 2016, Dominion Gas entered into foreign currency swaps with the purpose of hedging the foreign currency exchange risk associated with Euro denominated debt. As of December 31, 2016, Dominion and Dominion Gas had \$280 million (\notin 250 million) in aggregate notional amounts of these foreign currency swaps outstanding. A hypothetical 10% increase in market interest rates would have resulted in a \$5 million decrease in the fair value of Dominion's and Dominion Gas' foreign currency swaps at December 31, 2016.

The impact of a change in interest rates on the Companies' interest ratebased financial derivative instruments at a point in time is not necessarily representative of the results that will be realized when the contracts are ultimately settled. Net gains and/or losses from interest rate derivative instruments used for hedging purposes, to the extent realized, will generally be offset by recognition of the hedged transaction.

Investment Price Risk

Dominion and Virginia Power are subject to investment price risk due to securities held as investments in nuclear decommissioning and rabbi trust funds that are managed by third-party investment

OFFICIAL COPY

managers. These trust funds primarily hold marketable securities that are reported in the Consolidated Balance Sheets at fair value.

Dominion recognized net realized gains (including investment income) on nuclear decommissioning and rabbi trust investments of \$144 million and \$184 million in 2016 and 2015, respectively. Net realized gains and losses include gains and losses from the sale of investments as well as any other-than-temporary declines in fair value. Dominion recorded, in AOCI and regulatory liabilities, a net increase in unrealized gains of \$183 million in 2016, and a net decrease in unrealized gains of \$157 million in 2015.

Virginia Power recognized net realized gains (including investment income) on nuclear decommissioning trust investments of \$67 million and \$88 million in 2016 and 2015, respectively. Net realized gains and losses include gains and losses from the sale of investments as well as any otherthan-temporary declines in fair value. Virginia Power recorded, in AOCI and regulatory liabilities, a net increase in unrealized gains of \$93 million in 2016, and a net decrease in unrealized gains of \$76 million in 2015.

Dominion sponsors pension and other postretirement employee benefit plans that hold investments in trusts to fund employee benefit payments. Virginia Power and Dominion Gas employees participate in these plans. Dominion's pension and other postretirement plan assets experienced aggregate actual returns of \$534 million in 2016 and aggregate actual losses of \$72 million in 2015, versus expected returns of \$691 million and \$648 million, respectively. Dominion Gas' pension and other postretirement plan assets for employees represented by collective bargaining units experienced aggregate actual returns of \$130 million in 2016 and aggregate actual losses of \$13 million in 2015, versus expected returns of \$157 million and \$150 million, respectively. Differences between actual and expected returns on plan assets are accumulated and amortized during future periods. As such, any investment-related declines in these trusts will result in future increases in the net periodic cost recognized for such employee benefit plans and will be included in the determination of the amount of cash to be contributed to the employee benefit plans. A hypothetical 0.25% decrease in the assumed long-term rates of return on Dominion's plan assets would result in an increase in net periodic cost of \$18 million and \$16 million as of December 31, 2016 and 2015, respectively, for pension benefits and \$4 million and \$3 million as of December 31, 2016 and 2015, respectively, for other postretirement benefits. A hypothetical 0.25% decrease in the assumed long-term rates of return on Dominion Gas' plan assets, for employees represented by collective bargaining units, would result in an increase in net periodic cost of \$4 million as of both December 31, 2016 and 2015, for pension benefits and \$1 million as of both December 31, 2016 and 2015, for other postretirement benefits.

Risk Management Policies

The Companies have established operating procedures with corporate management to ensure that proper internal controls are maintained. In addition, Dominion has established an independent function at the corporate level to monitor compliance with the credit and commodity risk management policies of all subsidiaries, including Virginia Power and Dominion Gas. Dominion maintains credit policies that include the evaluation of a prospective counterparty's financial condition, collateral requirements where deemed necessary and the use of standardized agreements that facilitate the netting of cash flows associated with a single counterparty. In addition, Dominion also monitors the financial condition of existing counterparties on an ongoing basis. Based on these credit policies and the Companies' December 31, 2016 provision for credit losses, management believes that it is unlikely that a material adverse effect on the Companies' financial position, results of operations or cash flows would occur as a result of counterparty nonperformance.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Dominion Resources, Inc. Richmond, Virginia

We have audited the accompanying consolidated balance sheets of Dominion Resources, Inc. and subsidiaries ("Dominion") as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2016. These financial statements are the responsibility of Dominion's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Dominion Resources, Inc. and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Dominion's internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 28, 2017 expressed an unqualified opinion on Dominion's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholder of Virginia Electric and Power Company Richmond, Virginia

We have audited the accompanying consolidated balance sheets of Virginia Electric and Power Company (a wholly-owned subsidiary of Dominion Resources, Inc.) and subsidiaries ("Virginia Power") as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, common shareholder's equity, and cash flows for each of the three years in the period ended December 31, 2016. These financial statements are the responsibility of Virginia Power's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. Virginia Power is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting. Our audits included consideration of internal control over financial reporting. Our audits included consideration of internal control over financial reporting. Our audits included consideration of internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Virginia Electric and Power Company and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors of Dominion Gas Holdings, LLC Richmond, Virginia

We have audited the accompanying consolidated balance sheets of Dominion Gas Holdings, LLC (a wholly-owned subsidiary of Dominion Resources, Inc.) and subsidiaries ("Dominion Gas") as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, equity, and cash flows for each of the three years in the period ended December 31, 2016. These financial statements are the responsibility of Dominion Gas' management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. Dominion Gas is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Dominion Gas' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Dominion Gas Holdings, LLC and subsidiaries as of December 31, 2016 and 2015, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

Combined Notes to Consolidated Financial Statements

NOTE 1. NATURE OF OPERATIONS

Dominion, headquartered in Richmond, Virginia, is one of the nation's largest producers and transporters of energy. Dominion's operations are conducted through various subsidiaries, including Virginia Power and Dominion Gas. Virginia Power is a regulated public utility that generates, transmits and distributes electricity for sale in Virginia and northeastern North Carolina. Virginia Power is a member of PJM, an RTO, and its electric transmission facilities are integrated into the PJM wholesale electricity markets. All of Virginia Power's stock is owned by Dominion. Dominion Gas is a holding company that conducts business activities through a regulated interstate natural gas transmission pipeline and underground storage system in the Northeast, mid-Atlantic and Midwest states, regulated gas transportation and distribution operations in Ohio, and gas gathering and processing activities primarily in West Virginia, Ohio and Pennsylvania. All of Dominion Gas' membership interests are held by Dominion. The Dominion Questar Combination was completed in September 2016. See Note 3 for a description of operations acquired in the Dominion Questar Combination.

Dominion's operations also include the Cove Point LNG import, transport and storage facility in Maryland, an equity investment in Atlantic Coast Pipeline and regulated gas transportation and distribution operations in West Virginia. Dominion's nonregulated operations include merchant generation, energy marketing and price risk management activities, retail energy marketing operations and an equity investment in Blue Racer.

In October 2014, Dominion Midstream launched its initial public offering of 20,125,000 common units representing limited partner interests at a price of \$21 per unit. Dominion received \$392 million in net proceeds from the sale of the units, after deducting underwriting discounts, structuring fees and estimated offering expenses. At December 31, 2016, Dominion owns the general partner, 50.9% of the common and subordinated units and 37.5% of the convertible preferred interests in Dominion Midstream, which owns a preferred equity interest and the general partner interest in Cove Point, DCG, Questar Pipeline and a 25.93% noncontrolling partnership interest in Iroquois. The public's ownership interest in Dominion Midstream is reflected as noncontrolling interest in Dominion's Consolidated Financial Statements.

Dominion manages its daily operations through three primary operating segments: DVP, Dominion Generation and Dominion Energy. Dominion also reports a Corporate and Other segment, which includes its corporate, service company and other functions (including unallocated debt). In addition, Corporate and Other includes specific items attributable to Dominion's operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

Virginia Power manages its daily operations through two primary operating segments: DVP and Dominion Generation. It also reports a Corporate and Other segment that primarily includes specific items attributable to its operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources. Dominion Gas manages its daily operations through one primary operating segment: Dominion Energy. It also reports a Corporate and Other segment that primarily includes specific items attributable to its operating segment that are not included in profit measures evaluated by executive management in assessing the segment's performance or in allocating resources and the effect of certain items recorded at Dominion Gas as a result of Dominion's basis in the net assets contributed.

See Note 25 for further discussion of the Companies' operating segments.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

General

The Companies make certain estimates and assumptions in preparing their Consolidated Financial Statements in accordance with GAAP. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues, expenses and cash flows for the periods presented. Actual results may differ from those estimates.

The Companies' Consolidated Financial Statements include, after eliminating intercompany transactions and balances, the accounts of their respective majority-owned subsidiaries and non-wholly-owned entities in which they have a controlling financial interest. For certain partnership structures, income is allocated based on the liquidation value of the underlying contractual arrangements. NRG's ownership interest in Four Brothers and Three Cedars, as well as Terra Nova Renewable Partners' 33% interest in certain of Dominion's merchant solar projects, is reflected as noncontrolling interest in Dominion's Consolidated Financial Statements. See Note 3 for further information on these transactions.

The Companies report certain contracts, instruments and investments at fair value. See Note 6 for further information on fair value measurements.

Dominion maintains pension and other postretirement benefit plans. Virginia Power and Dominion Gas participate in certain of these plans. See Note 21 for further information on these plans.

Certain amounts in the 2015 and 2014 Consolidated Financial Statements and footnotes have been reclassified to conform to the 2016 presentation for comparative purposes. The reclassifications did not affect the Companies' net income, total assets, liabilities, equity or cash flows, except for the reclassification of debt issuance costs.

Amounts disclosed for Dominion are inclusive of Virginia Power and/or Dominion Gas, where applicable.

Operating Revenue

Operating revenue is recorded on the basis of services rendered, commodities delivered or contracts settled and includes amounts yet to be billed to customers. Dominion and Virginia Power collect sales, consumption and consumer utility taxes and Dominion Gas collects sales taxes; however, these amounts are excluded from revenue. Dominion's customer receivables at December 31, 2016 and 2015 included \$631 million and \$462 million, respectively, of accrued unbilled revenue based on estimated amounts of electricity and natural gas delivered but not yet billed to its utility

Combined Notes to Consolidated Financial Statements, Continued

customers. Virginia Power's customer receivables at December 31, 2016 and 2015 included \$349 million and \$333 million, respectively, of accrued unbilled revenue based on estimated amounts of electricity delivered but not yet billed to its customers. Dominion Gas' customer receivables at December 31, 2016 and 2015 included \$134 million and \$98 million, respectively, of accrued unbilled revenue based on estimated amounts of natural gas delivered but not yet billed to its customers.

The primary types of sales and service activities reported as operating revenue for Dominion are as follows:

- **Regulated electric sales** consist primarily of state-regulated retail electric sales, and federally-regulated wholesale electric sales and electric transmission services;
- Nonregulated electric sales consist primarily of sales of electricity at market-based rates and contracted fixed rates, and associated derivative activity;
- Regulated gas sales consist primarily of state- and FERC-regulated natural gas sales and related distribution services and associated derivative activity;
- Nonregulated gas sales consist primarily of sales of natural gas production at market-based rates and contracted fixed prices, sales of gas purchased from third parties, gas trading and marketing revenue and associated derivative activity;
- Gas transportation and storage consists primarily of FERC-regulated sales of transmission and storage services. Also included are state-regulated gas distribution charges to retail distribution service customers opting for alternate suppliers and sales of gathering services; and
- Other revenue consists primarily of sales of NGL production and condensate, extracted products and associated derivative activity. Other revenue also includes miscellaneous service revenue from electric and gas distribution operations, sales of energy-related products and services from Dominion's retail energy marketing operations and gas processing and handling revenue.

The primary types of sales and service activities reported as operating revenue for Virginia Power are as follows:

- **Regulated electric sales** consist primarily of state-regulated retail electric sales and federally-regulated wholesale electric sales and electric transmission services; and
- Other revenue consists primarily of miscellaneous service revenue from electric distribution operations and miscellaneous revenue from generation operations, including sales of capacity and other commodities.

The primary types of sales and service activities reported as operating revenue for Dominion Gas are as follows:

- **Regulated gas sales** consist primarily of state- and FERC-regulated natural gas sales and related distribution services;
- Nonregulated gas sales consist primarily of sales of natural gas production at market-based rates and contracted fixed prices and sales of gas purchased from third parties. Revenue from sales of gas production is recognized based on actual volumes of gas sold to purchasers and is reported net of royalties;
- Gas transportation and storage consists primarily of FERC- regulated sales of transmission and storage services. Also included are state-regulated gas distribution charges to retail

distribution service customers opting for alternate suppliers and sales of gathering services;

- **NGL revenue** consists primarily of sales of NGL production and condensate, extracted products and associated derivative activity; and
- Other revenue consists primarily of miscellaneous service revenue, gas processing and handling revenue.

Electric Fuel, Purchased Energy and Purchased Gas-Deferred Costs

Where permitted by regulatory authorities, the differences between Dominion's and Virginia Power's actual electric fuel and purchased energy expenses and Dominion's and Dominion Gas' purchased gas expenses and the related levels of recovery for these expenses in current rates are deferred and matched against recoveries in future periods. The deferral of costs in excess of current period fuel rate recovery is recognized as a regulatory asset, while rate recovery in excess of current period fuel expenses is recognized as a regulatory liability.

Of the cost of fuel used in electric generation and energy purchases to serve utility customers, approximately 84% is currently subject to deferred fuel accounting, while substantially all of the remaining amount is subject to recovery through similar mechanisms.

Virtually all of Dominion Gas', Cove Point's, Questar Gas' and Hope's natural gas purchases are either subject to deferral accounting or are recovered from the customer in the same accounting period as the sale.

Income Taxes

A consolidated federal income tax return is filed for Dominion and its subsidiaries, including Virginia Power and Dominion Gas' subsidiaries. In addition, where applicable, combined income tax returns for Dominion and its subsidiaries are filed in various states; otherwise, separate state income tax returns are filed.

Although Dominion Gas is disregarded for income tax purposes, a provision for income taxes is recognized to reflect the inclusion of its business activities in the tax returns of its parent, Dominion. Virginia Power and Dominion Gas participate in intercompany tax sharing agreements with Dominion and its subsidiaries. Current income taxes are based on taxable income or loss and credits determined on a separate company basis.

Under the agreements, if a subsidiary incurs a tax loss or earns a credit, recognition of current income tax benefits is limited to refunds of prior year taxes obtained by the carryback of the net operating loss or credit or to the extent the tax loss or credit is absorbed by the taxable income of other Dominion consolidated group members. Otherwise, the net operating loss or credit is carried forward and is recognized as a deferred tax asset until realized.

Effective January 2016, deferred tax liabilities and assets are classified as noncurrent in the Consolidated Balance Sheets. For prior years, the Companies presented deferred taxes in either the current or noncurrent sections of the Consolidated Balance Sheets based on the classification of the related financial accounting assets or liabilities, or, for items such as operating loss carryforwards, the period in which the deferred taxes were expected to reverse.

Accounting for income taxes involves an asset and liability approach. Deferred income tax assets and liabilities are provided,

representing future effects on income taxes for temporary differences between the bases of assets and liabilities for financial reporting and tax purposes. Accordingly, deferred taxes are recognized for the future consequences of different treatments used for the reporting of transactions in financial accounting and income tax returns. The Companies establish a valuation allowance when it is more-likely-than-not that all, or a portion, of a deferred tax asset will not be realized. Where the treatment of temporary differences is different for rate-regulated operations, a regulatory asset is recognized if it is probable that future revenues will be provided for the payment of deferred tax liabilities.

The Companies recognize positions taken, or expected to be taken, in income tax returns that are more-likely-than-not to be realized, assuming that the position will be examined by tax authorities with full knowledge of all relevant information.

If it is not more-likely-than-not that a tax position, or some portion thereof, will be sustained, the related tax benefits are not recognized in the financial statements. Unrecognized tax benefits may result in an increase in income taxes payable, a reduction of income tax refunds receivable or changes in deferred taxes. Also, when uncertainty about the deductibility of an amount is limited to the timing of such deductibility, the increase in income taxes payable (or reduction in tax refunds receivable) is accompanied by a decrease in deferred tax liabilities. Except when such amounts are presented net with amounts receivable from or amounts prepaid to tax authorities, noncurrent income taxes payable related to unrecognized tax benefits are classified in other deferred credits and other liabilities on the Consolidated Balance Sheets and current payables are included in accrued interest, payroll and taxes on the Consolidated Balance Sheets.

The Companies recognize interest on underpayments and overpayments of income taxes in interest expense and other income, respectively. Penalties are also recognized in other income.

Dominion's, Virginia Power's and Dominion Gas' interest and penalties were immaterial in 2016, 2015 and 2014.

At December 31, 2016, Virginia Power had an income tax-related affiliated receivable of \$112 million, comprised of \$122 million of federal income taxes due from Dominion net of \$10 million for state income taxes due to Dominion. Dominion Gas also had an affiliated receivable of \$11 million due from Dominion, representing \$10 million of federal income taxes and \$1 million of state income taxes. The net affiliated receivables are expected to be refunded by Dominion.

In addition, Virginia Power's Consolidated Balance Sheet at December 31, 2016 included \$2 million of noncurrent federal income taxes payable, \$6 million of state income taxes receivable and \$13 million of noncurrent state income taxes receivable. Dominion Gas' Consolidated Balance Sheet at December 31, 2016 included \$1 million of noncurrent federal income taxes payable, \$1 million of state income taxes receivable and \$7 million of noncurrent state income taxes payable.

At December 31, 2015, Virginia Power's Consolidated Balance Sheet included a \$296 million affiliated receivable, representing excess federal income tax payments expected to be refunded, \$9 million of federal income taxes payable for prior years, less than \$1 million of state income taxes payable, \$10 million of state income taxes receivable, \$14 million of noncurrent state income taxes receivable and \$2 million of noncurrent state income taxes payable. In March 2016, Virginia Power received a \$300 million refund of its 2015 income tax payments.

At December 31, 2015, Dominion Gas' Consolidated Balance Sheet included \$91 million of affiliated receivables, representing excess federal income tax payments expected to be refunded and the benefit of utilizing a subsidiary's tax loss to offset taxable income in Dominion's consolidated tax return, less than \$1 million of state income taxes payable, \$4 million of state income taxes receivable and \$22 million of noncurrent state income taxes payable. In March 2016, Dominion Gas received a \$92 million refund for its 2015 income tax payments and benefit of a subsidiary's tax loss.

Investment tax credits are recognized by nonregulated operations in the year qualifying property is placed in service. For regulated operations, investment tax credits are deferred and amortized over the service lives of the properties giving rise to the credits. Production tax credits are recognized as energy is generated and sold.

Cash and Cash Equivalents

Current banking arrangements generally do not require checks to be funded until they are presented for payment. The following table illustrates the checks outstanding but not yet presented for payment and recorded in accounts payable for the Companies:

Year Ended December 31,	2016	2015
(millions)		
Dominion	\$24	\$27
Virginia Power	11	11
Dominion Gas	9	7

For purposes of the Consolidated Statements of Cash Flows, cash and cash equivalents include cash on hand, cash in banks and temporary investments purchased with an original maturity of three months or less.

Derivative Instruments

Dominion uses derivative instruments such as physical and financial forwards, futures, swaps, options and FTRs to manage the commodity, interest rate and foreign currency exchange rate risks of its business operations. Virginia Power uses derivative instruments such as physical and financial forwards, futures, swaps, options and FTRs to manage commodity and interest rate risks. Dominion Gas uses derivative instruments such as physical and financial forwards, futures and swaps to manage commodity, interest rate and foreign currency exchange rate risks.

All derivatives, except those for which an exception applies, are required to be reported in the Consolidated Balance Sheets at fair value. Derivative contracts representing unrealized gain positions and purchased options are reported as derivative assets. Derivative contracts representing unrealized losses and options sold are reported as derivative liabilities. One of the exceptions to fair value accounting, normal purchases and normal sales, may be elected when the contract satisfies certain criteria, including a requirement that physical delivery of the underlying commodity is probable. Expenses and revenues resulting from deliveries under normal purchase contracts and normal sales contracts, respectively, are included in earnings at the time of contract performance.

Combined Notes to Consolidated Financial Statements, Continued

The Companies do not offset amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral against amounts recognized for derivative instruments executed with the same counterparty under the same master netting arrangement. Dominion had margin assets of \$82 million and \$16 million associated with cash collateral at December 31, 2016 and 2015, respectively. Dominion's margin liabilities associated with cash collateral at December 31, 2016 or 2015 were immaterial. Virginia Power's and Dominion Gas' margin assets and liabilities associated with cash collateral were immaterial at December 31, 2016 and 2015. See Note 7 for further information about derivatives.

To manage price risk, the Companies hold certain derivative instruments that are not designated as hedges for accounting purposes. However, to the extent the Companies do not hold

offsetting positions for such derivatives, they believe these instruments represent economic hedges that mitigate their exposure to fluctuations in commodity prices. As part of Dominion's strategy to market energy and manage related risks, it formerly managed a portfolio of commodity-based financial derivative instruments held for trading purposes. Dominion used established policies and procedures to manage the risks associated with price fluctuations in these energy commodities and used various derivative instruments to reduce risk by creating offsetting market positions. In the second quarter of 2013, Dominion commenced a repositioning of its producer services business. The repositioning was completed in the first quarter of 2014 and resulted in the termination of natural gas trading and certain energy marketing activities.

Statement of Income Presentation:

- Derivatives Held for Trading Purposes: All income statement activity, including amounts realized upon settlement, is presented in operating revenue on a net basis.
- Derivatives Not Held for Trading Purposes: All income statement activity, including amounts realized upon settlement, is presented in operating revenue, operating expenses, interest and related charges or other income based on the nature of the underlying risk.

Changes in the fair value of derivative instruments result in the recognition of regulatory assets or regulatory liabilities for jurisdictions subject to cost-based rate regulation. Realized gains or losses on the derivative instruments are generally recognized when the related transactions impact earnings.

DERIVATIVE INSTRUMENTS DESIGNATED AS HEDGING INSTRUMENTS

The Companies designate a portion of their derivative instruments as either cash flow or fair value hedges for accounting purposes. For all derivatives designated as hedges, the Companies formally document the relationship between the hedging instrument and the hedged item, as well as the risk management objective and the strategy for using the hedging instrument. The Companies assess whether the hedging relationship between the derivative and the hedged item is highly effective at offsetting changes in cash flows or fair values both at the inception of the hedging relationship and on an ongoing basis. Any change in the fair value of the derivative that is not effective at offsetting changes in the cash flows or fair values of the hedged item is recognized currently in earnings. Also, the Companies may elect to exclude certain gains or losses on hedging instruments from the assessment of hedge effectiveness, such as gains or losses attributable to changes in the time value of options or changes in the difference between spot prices and forward prices, thus requiring that such changes be recorded currently in earnings. Hedge accounting is discontinued prospectively for derivatives that cease to be highly effective hedges. For derivative instruments that are accounted for as fair value hedges or cash flow hedges, the cash flows from the derivatives and from the related hedged items are classified in operating cash flows.

Cash Flow Hedges-A majority of the Companies' hedge strategies represents cash flow hedges of the variable price risk associated with the purchase and sale of electricity, natural gas, NGLs and other energy-related products. The Companies also use interest rate swaps to hedge their exposure to variable interest rates on long-term debt as well as foreign currency swaps to hedge their exposure to interest payments denominated in Euros. For transactions in which the Companies are hedging the variability of cash flows, changes in the fair value of the derivatives are reported in AOCI, to the extent they are effective at offsetting changes in the hedged item. Any derivative gains or losses reported in AOCI are reclassified to earnings when the forecasted item is included in earnings, or earlier, if it becomes probable that the forecasted transaction will not occur. For cash flow hedge transactions, hedge accounting is discontinued if the occurrence of the forecasted transaction is no longer probable.

Dominion entered into interest rate derivative instruments to hedge its forecasted interest payments related to planned debt issuances in 2014. These interest rate derivatives were designated by Dominion as cash flow hedges prior to the formation of Dominion Gas. For the purposes of the Dominion Gas financial statements, the derivative balances, AOCI balance, and any income statement impact related to these interest rate derivative instruments entered into by Dominion have been, and will continue to be, included in the Dominion Gas' Consolidated Financial Statements as the forecasted interest payments related to the debt issuances now occur at Dominion Gas.

Fair Value Hedges-Dominion also uses fair value hedges to mitigate the fixed price exposure inherent in certain firm commodity commitments and commodity inventory. In addition, Dominion has designated interest rate swaps as fair value hedges on certain fixed rate long-term debt to manage interest rate exposure. For fair value hedge transactions, changes in the fair value of the derivative are generally offset currently in earnings by the recognition of changes in the hedged item's fair value. Hedge accounting is discontinued if the hedged item no longer qualifies for hedge accounting. See Note 6 for further information about fair value measurements and associated valuation methods for derivatives. See Note 7 for further information on derivatives.

Property, Plant and Equipment

Property, plant and equipment is recorded at lower of original cost or fair value, if impaired. Capitalized costs include labor, materials and other direct and indirect costs such as asset retirement costs, capitalized interest and, for certain operations subject to cost-of-service rate regulation, AFUDC and overhead costs. The cost of repairs and maintenance, including minor additions and replacements, is generally charged to expense as it is incurred.

In 2016, 2015 and 2014, Dominion capitalized interest costs and AFUDC to property, plant and equipment of \$159 million, \$100 million and \$80 million, respectively. In 2016, 2015 and

2014, Virginia Power capitalized AFUDC to property, plant and equipment of \$21 million, \$30 million and \$39 million, respectively. In 2016, 2015 and 2014, Dominion Gas capitalized AFUDC to property, plant and equipment of \$8 million, \$1 million and \$1 million, respectively.

Under Virginia law, certain Virginia jurisdictional projects qualify for current recovery of AFUDC through rate adjustment clauses. AFUDC on these projects is calculated and recorded as a regulatory asset and is not capitalized to property, plant and equipment. In 2016, 2015 and 2014, Virginia Power recorded \$31 million, \$19 million and \$8 million of AFUDC related to these projects, respectively.

For property subject to cost-of-service rate regulation, including Virginia Power electric distribution, electric transmission, and generation property, Dominion Gas natural gas distribution and transmission property, and for certain Dominion natural gas property, the undepreciated cost of such property, less salvage value, is generally charged to accumulated depreciation at retirement. Cost of removal collections from utility customers not representing AROs are recorded as regulatory liabilities. For property subject to cost-of-service rate regulation that will be abandoned significantly before the end of its useful life, the net carrying value is reclassified from plant-in-service when it becomes probable it will be abandoned.

For property that is not subject to cost-of-service rate regulation, including nonutility property, cost of removal not associated with AROs is charged to expense as incurred. The Companies also record gains and losses upon retirement based upon the difference between the proceeds received, if any, and the property's net book value at the retirement date.

Depreciation of property, plant and equipment is computed on the straight-line method based on projected service lives. The Companies' average composite depreciation rates on utility property, plant and equipment are as follows:

Year Ended December 31,	2016	2015	2014
(percent)			
Dominion			
Generation	2.83	2.78	2.66
Transmission	2.47	2.42	2.38
Distribution	3.02	3.11	3.12
Storage	2.29	2.42	2.39
Gas gathering and processing	2.66	3.19	2.81
General and other	4.12	3.67	3.62
Virginia Power			
Generation	2.83	2.78	2.66
Transmission	2.36	2.33	2.34
Distribution	3.32	3.33	3.34
General and other	3.49	3.40	3.29
Dominion Gas			
Transmission	2.43	2.46	2.40
Distribution	2.55	2.45	2.47
Storage	2.19	2.44	2.40
Gas gathering and processing	2.58	3.20	2.82
General and other	4.54	4.72	5.77

In 2014, Virginia Power made a one-time adjustment to depreciation expense as ordered by the Virginia Commission. This adjustment resulted in an increase of \$38 million (\$23 million after-tax) in depreciation and amortization expense in Virginia Power's Consolidated Statements of Income. Capitalized costs of development wells and leaseholds are amortized on a field-by-field basis using the unit-of-production method and the estimated proved developed or total proved gas and oil reserves, at a rate of \$2.08 per mcfe in 2016.

Dominion's nonutility property, plant and equipment is depreciated using the straight-line method over the following estimated useful lives:

Asset	Estimated Useful Lives
Merchant generation-nuclear	44 years
Merchant generation-other	15-36 years
Nonutility gas gathering and processing	3-50 years
General and other	5-59 years

Depreciation and amortization related to Virginia Power's and Dominion Gas' nonutility property, plant and equipment and exploration and production properties was immaterial for the years ended December 31, 2016, 2015 and 2014, except for Dominion Gas' nonutility gas gathering and processing properties which are depreciated using the straight-line method over estimated useful lives between 10 and 50 years.

Nuclear fuel used in electric generation is amortized over its estimated service life on a units-of-production basis. Dominion and Virginia Power report the amortization of nuclear fuel in electric fuel and other energyrelated purchases expense in their Consolidated Statements of Income and in depreciation and amortization in their Consolidated Statements of Cash Flows.

Long-Lived and Intangible Assets

The Companies perform an evaluation for impairment whenever events or changes in circumstances indicate that the carrying amount of long-lived assets or intangible assets with finite lives may not be recoverable. A longlived or intangible asset is written down to fair value if the sum of its expected future undiscounted cash flows is less than its carrying amount. Intangible assets with finite lives are amortized over their estimated useful lives. See Note 6 for a discussion of impairments related to certain longlived assets.

Regulatory Assets and Liabilities

The accounting for Dominion's and Dominion Gas' regulated gas and Virginia Power's regulated electric operations differs from the accounting for nonregulated operations in that they are required to reflect the effect of rate regulation in their Consolidated Financial Statements. For regulated businesses subject to federal or state cost-of-service rate regulation, regulatory practices that assign costs to accounting periods may differ from accounting methods generally applied by nonregulated companies. When it is probable that regulators will permit the recovery of current costs through future rates charged to customers, these costs that otherwise would be expensed by nonregulated companies are deferred as regulatory assets. Likewise, regulatory liabilities are recognized when it is probable that regulators will require customers for expenditures that have yet to be incurred. Generally, regulatory assets and liabilities are amortized into income over the period authorized by the regulator.

The Companies evaluate whether or not recovery of their regulatory assets through future rates is probable and make various assumptions in their analyses. The expectations of future recovery are generally based on orders issued by regulatory commissions, legislation or historical experience, as well as discussions Combined Notes to Consolidated Financial Statements, Continued

with applicable regulatory authorities and legal counsel. If recovery of a regulatory asset is determined to be less than probable, it will be written off in the period such assessment is made.

Asset Retirement Obligations

The Companies recognize AROs at fair value as incurred or when sufficient information becomes available to determine a reasonable estimate of the fair value of future retirement activities to be performed, for which a legal obligation exists. These amounts are generally capitalized as costs of the related tangible long-lived assets. Since relevant market information is not available, fair value is estimated using discounted cash flow analyses. Periodically, the Companies evaluate the key assumptions underlying their AROs including estimates of the amounts and timing of future cash flows associated with retirement activities. AROs are adjusted when significant changes in these assumptions are identified. Dominion and Dominion Gas report accretion of AROs and depreciation on asset retirement costs associated with their natural gas pipeline and storage well assets as an adjustment to the related regulatory liabilities when revenue is recoverable from customers for AROs. Virginia Power reports accretion of AROs and depreciation on asset retirement costs associated with decommissioning its nuclear power stations as an adjustment to the regulatory liability for certain jurisdictions. Additionally, Virginia Power reports accretion of AROs and depreciation on asset retirement costs associated with certain prospective rider projects as an adjustment to the regulatory asset for certain jurisdictions. Accretion of all other AROs and depreciation of all other asset retirement costs are reported in other operations and maintenance expense and depreciation expense, respectively, in the Consolidated Statements of Income.

Debt Issuance Costs

The Companies defer and amortize debt issuance costs and debt premiums or discounts over the expected lives of the respective debt issues, considering maturity dates and, if applicable, redemption rights held by others. Effective January 2016, deferred debt issuance costs were recorded as a reduction in long-term debt in the Consolidated Balance Sheets. Such costs had previously been recorded as an asset in other current assets and other deferred charges and other assets in the Consolidated Balance Sheets. Amortization of the issuance costs is reported as interest expense. Unamortized costs associated with redemptions of debt securities prior to stated maturity dates are generally recognized and recorded in interest expense immediately. As permitted by regulatory authorities, gains or losses resulting from the refinancing of debt allocable to utility operations subject to cost-based rate regulation are deferred and amortized over the lives of the new issuances.

Investments

MARKETABLE EQUITY AND DEBT SECURITIES

Dominion accounts for and classifies investments in marketable equity and debt securities as trading or available-for-sale securities. Virginia Power classifies investments in marketable equity and debt securities as available-for-sale securities.

• *Trading securities* include marketable equity and debt securities held by Dominion in rabbi trusts associated with certain deferred compensation plans. These securities are reported in

other investments in the Consolidated Balance Sheets at fair value with net realized and unrealized gains and losses included in other income in the Consolidated Statements of Income.

 Available-for-sale securities include all other marketable equity and debt securities, primarily comprised of securities held in the nuclear decommissioning trusts. These investments are reported at fair value in nuclear decommissioning trust funds in the Consolidated Balance Sheets. Net realized and unrealized gains and losses (including any other-than-temporary impairments) on investments held in Virginia Power's nuclear decommissioning trusts are recorded to a regulatory liability for certain jurisdictions subject to cost-based regulation. For all other available-for-sale securities, including those held in Dominion's merchant generation nuclear decommissioning trusts, net realized gains and losses (including any other-than-temporary impairments) are included in other income and unrealized gains and losses are reported as a component of AOCI, after-tax.

In determining realized gains and losses for marketable equity and debt securities, the cost basis of the security is based on the specific identification method.

NON-MARKETABLE INVESTMENTS

The Companies account for illiquid and privately held securities for which market prices or quotations are not readily available under either the equity or cost method. Non-marketable investments include:

- Equity method investments when the Companies have the ability to exercise significant influence, but not control, over the investee. Dominion's investments are included in investments in equity method affiliates and Virginia Power's investments are included in other investments in their Consolidated Balance Sheets. The Companies record equity method adjustments in other income in the Consolidated Statements of Income including: their proportionate share of investee income or loss, gains or losses resulting from investee capital transactions, amortization of certain differences between the carrying value and the equity in the net assets of the investee at the date of investment and other adjustments required by the equity method.
- Cost method investments when Dominion and Virginia Power do not have the ability to exercise significant influence over the investee. Dominion's and Virginia Power's investments are included in other investments and nuclear decommissioning trust funds.

OTHER-THAN-TEMPORARY IMPAIRMENT

Dominion and Virginia Power periodically review their investments to determine whether a decline in fair value should be considered other-than-temporary. If a decline in fair value of any security is determined to be other-than-temporary, the security is written down to its fair value at the end of the reporting period.

Decommissioning Trust Investments—Special Considerations

 The recognition provisions of the FASB's other-than-temporary impairment guidance apply only to debt securities classified as available-for-sale or held-to-maturity, while the presentation and disclosure requirements apply to both debt and equity securities. OFFICIAL COP

OFFICIAL COP

Table of Contents

- Debt Securities—Using information obtained from their nuclear decommissioning trust fixed-income investment managers, Dominion and Virginia Power record in earnings any unrealized loss for a debt security when the manager intends to sell the debt security or it is more-likely-than-not that the manager will have to sell the debt security before recovery of its fair value up to its cost basis. If that is not the case, but the debt security is deemed to have experienced a credit loss, Dominion and Virginia Power record the credit loss in earnings and any remaining portion of the unrealized loss in AOCI. Credit losses are evaluated primarily by considering the credit ratings of the issuer, prior instances of non-performance by the issuer and other factors.
- Equity securities and other investments—Dominion's and Virginia Power's method of assessing other-than-temporary declines requires demonstrating the ability to hold individual securities for a period of time sufficient to allow for the anticipated recovery in their market value prior to the consideration of the other criteria mentioned above. Since Dominion and Virginia Power have limited ability to oversee the day-to-day management of nuclear decommissioning trust fund investments, they do not have the ability to ensure investments are held through an anticipated recovery period. Accordingly, they consider all equity and other securities as well as non-marketable investments held in nuclear decommissioning trusts with market values below their cost bases to be other-than-temporarily impaired.

Inventories

Materials and supplies and fossil fuel inventories are valued primarily using the weighted-average cost method. Stored gas inventory is valued using the weighted-average cost method, except for East Ohio gas distribution operations, which are valued using the LIFO method. Under the LIFO method, current stored gas inventory was valued at \$13 million and \$24 million at December 31, 2016 and December 31, 2015, respectively. Based on the average price of gas purchased during 2016 and 2015, the cost of replacing the current portion of stored gas inventory exceeded the amount stated on a LIFO basis by \$55 million and \$109 million, respectively.

Gas Imbalances

Natural gas imbalances occur when the physical amount of natural gas delivered from, or received by, a pipeline system or storage facility differs from the contractual amount of natural gas delivered or received. Dominion and Dominion Gas value these imbalances due to, or from, shippers and operators at an appropriate index price at period end, subject to the terms of its tariff for regulated entities. Imbalances are primarily settled in-kind. Imbalances due to Dominion from other parties are reported in other current assets and imbalances that Dominion and Dominion Gas owe to other parties are reported in other current liabilities in the Consolidated Balance Sheets.

Goodwill

Dominion and Dominion Gas evaluate goodwill for impairment annually as of April 1 and whenever an event occurs or circumstances change in the interim that would more-likely-than-not reduce the fair value of a reporting unit below its carrying amount.

New Accounting Standards REVENUE RECOGNITION

In May 2014, the FASB issued revised accounting guidance for revenue recognition from contracts with customers. The core principle of this revised accounting guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The amendments in this update also require disclosure of the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. For the Companies, the revised accounting guidance is effective for interim and annual periods beginning January 1, 2018. The Companies have completed their preliminary evaluations of the impact of this guidance and, pending evaluation of the items discussed below, expect no significant impact on their results of operations. Now that their preliminary evaluations are complete, the Companies will expand the scope of their assessment to include all contracts with customers. In addition, the Companies are considering certain issues that could potentially change the accounting for certain transactions. Among the issues being considered are accounting for contributions in aid of construction, recognition of revenue when collectability is in question, recognition of revenue in contracts with variable consideration, accounting for alternative revenue programs, and the capitalization of costs to acquire new contracts. The Companies plan on applying the standard using the modified retrospective method as opposed to the full retrospective method.

FINANCIAL INSTRUMENTS

In January 2016, the FASB issued revised accounting guidance for the recognition, measurement, presentation and disclosure of financial instruments. Most notably the update revises the accounting for equity securities, except for those accounted for under the equity method of accounting or resulting in consolidation, by requiring equity securities to be measured at fair value with the changes in fair value recognized in net income. However, an entity may measure equity investments that do not have a readily determinable fair value at cost minus impairment, if any, plus changes from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. The guidance also simplifies the impairment assessment of equity investments without readily determinable fair values, revises the presentation of financial assets and liabilities and amends certain disclosure requirements associated with the fair value of financial instruments. The guidance is effective for the Companies' interim and annual reporting periods beginning January 1, 2018, with a cumulative-effect adjustment to the balance sheet. Amendments related to equity securities without readily determinable fair values are to be applied prospectively to such investments that exist as of the date of adoption.

Net realized and unrealized gains and losses (including any other-thantemporary impairments) on equity securities subject to cost-based regulation will not be impacted by the adoption of this standard. For all other available for sale equity securities, unrealized gains and losses currently recorded through other comprehensive income will be recognized in net income upon the adoption of this standard.

Table of Contents

LEASES

In February 2016, the FASB issued revised accounting guidance for the recognition, measurement, presentation and disclosure of leasing arrangements. The update requires that a liability and corresponding right-of-use asset are recorded on the balance sheet for all leases, including those leases currently classified as operating leases, while also refining the definition of a lease. In addition lessees will be required to disclose key information about the amount, timing, and uncertainty of cash flows arising from leasing arrangements. Lessor accounting remains largely unchanged.

The guidance is effective for the Companies' interim and annual reporting periods beginning January 1, 2019, although it can be early adopted, with a modified retrospective approach, which requires lessees and lessors to recognize and measure leases at the beginning of the earliest period presented for leases that commenced prior to the date of adoption. The Companies are currently in the preliminary stages of evaluating the impact of this guidance on their financial position and plan to complete their initial assessment in 2017. The Companies expect to elect the practical expedients, which would require no reassessment of whether existing contracts are or contain leases as well as no reassessment of lease classification for existing leases. While the Companies believe the adoption could have a material impact to the Companies' financial position.

DERECOGNITION AND PARTIAL SALES OF NONFINANCIAL ASSETS

In February 2017, the FASB issued revised accounting guidance clarifying the scope of asset derecognition guidance and accounting for partial sales of nonfinancial assets. The guidance is effective for Dominion's interim and annual reporting periods beginning January 1, 2018, and Dominion may elect to apply the update under the full retrospective method or the modified retrospective method. Dominion is currently evaluating the impacts of the revised accounting guidance on its consolidated financial statements and disclosures.

NOTE 3. ACQUISITIONS AND DISPOSITIONS

DOMINION

ACQUISITION OF DOMINION QUESTAR

In September 2016, Dominion completed the Dominion Questar Combination and Dominion Questar became a wholly-owned subsidiary of Dominion. Dominion Questar, a Rockies-based integrated natural gas company, included Questar Gas, Wexpro and Questar Pipeline at closing. Questar Gas has regulated gas distribution operations in Utah, southwestern Wyoming and southeastern Idaho. Wexpro develops and produces natural gas from reserves supplied to Questar Gas under a cost-ofservice framework. Questar Pipeline provides FERC-regulated interstate natural gas transportation and storage services in Utah, Wyoming and western Colorado. The Dominion Questar Combination provides Dominion with pipeline infrastructure that provides a principal source of gas supply to Western states. Dominion Questar's regulated businesses also provide further balance between Dominion's electric and gas operations. Jun 22 2018

In accordance with the terms of the Dominion Questar Combination, at closing, each share of issued and outstanding Dominion Questar common stock was converted into the right to receive \$25.00 per share in cash. The total consideration was \$4.4 billion based on 175.5 million shares of Dominion Questar outstanding at closing.

Dominion financed the Dominion Questar Combination through the: (1) August 2016 issuance of \$1.4 billion of 2016 Equity Units, (2) August 2016 issuance of \$1.3 billion of senior notes, (3) September 2016 borrowing of \$1.2 billion under a term loan agreement and (4) \$500 million of the proceeds from the April 2016 issuance of common stock. See Notes 17 and 19 for more information.

Purchase Price Allocation

Dominion Questar's assets acquired and liabilities assumed were measured at estimated fair value at the closing date and are included in the Dominion Energy operating segment. The majority of operations acquired are subject to the rate-setting authority of FERC, as well as the Utah Commission and/or the Wyoming Commission and therefore are accounted for pursuant to ASC 980, *Regulated Operations*. The fair values of Dominion Questar's assets and liabilities subject to rate-setting and cost recovery provisions provide revenues derived from costs, including a return on investment of assets and liabilities included in rate base. As such, the fair values of these assets and liabilities equal their carrying values. Accordingly, neither the assets and liabilities related to these amounts.

The fair value of Dominion Questar's assets acquired and liabilities assumed that are not subject to the rate-setting provisions discussed above was determined using the income approach. In addition, the fair value of Dominion Questar's 50% interest in White River Hub, accounted for under the equity method, was determined using the market approach and income approach. The valuations are considered Level 3 fair value measurements due to the use of significant judgmental and unobservable inputs, including projected timing and amount of future cash flows and discount rates reflecting risk inherent in the future cash flows and future market prices.

The excess of the purchase price over the estimated fair values of the assets acquired and liabilities assumed was recognized as goodwill at the closing date. The goodwill reflects the value associated with enhancing Dominion's regulated portfolio of businesses, including the expected increase in demand for low-carbon, natural gas-fired generation in the Western states and the expected continued growth of rate-regulated businesses located in a defined service area with a stable regulatory environment. The goodwill recognized is not deductible for income tax purposes, and as such, no deferred taxes have been recorded related to goodwill.

The table below shows the preliminary allocation of the purchase price to the assets acquired and liabilities assumed at closing. The allocation is subject to change during the remainder of the measurement period, which ends one year from the closing date, as additional information is obtained about the facts and circumstances that existed at the closing date. Any material adjustments to provisional amounts identified during the measurement period will be recognized and disclosed in the reporting period in which the adjustment amounts are determined. During the fourth quarter, certain modifications were made to preliminary valuation amounts for acquired property, plant and equipment, current liabilities, and deferred income taxes, resulting in a \$6 million net decrease to goodwill, which relate primarily to the sale of Questar Fueling Company in December 2016 as further described in the *Sale of Questar Fueling Company*.

	Amount
(millions)	
Total current assets	\$ 224
Investments(1)	58
Property, plant and equipment(2)	4,131
Goodwill	3,105
Total deferred charges and other assets, excluding goodwill	75
Total Assets	7,593
Total current liabilities(3)	793
Long-term debt(4)	963
Deferred income taxes	801
Regulatory liabilities	259
Asset retirement obligations	160
Other deferred credits and other liabilities	220
Total Liabilities	3,196
Total estimated purchase price	\$4,397

(1) Includes \$40 million for an equity method investment in White River Hub. The fair value adjustment on the equity method investment in White River Hub is considered to be equity method goodwill and is not amortized.

(2) Nonregulated property, plant and equipment, excluding land, will be depreciated over remaining useful lives primarily ranging from 9 to 18 years.

(3) Includes \$301 million of short-term debt, of which no amounts remain outstanding at December 31, 2016, as well as a \$250 million term loan which matures in August 2017 and bears interest at a variable rate.

(4) Unsecured senior and medium-term notes have maturities which range from 2017 to 2048 and bear interest at rates from 2.98% to 7.20%.

Regulatory Matters

The transaction required approval of Dominion Questar's shareholders, clearance from the Federal Trade Commission under the Hart-Scott-Rodino Act and approval from both the Utah Commission and the Wyoming Commission. In February 2016, the Federal Trade Commission granted antitrust approval of the Dominion Questar Combination under the Hart-Scott-Rodino Act. In May 2016, Dominion Questar's shareholders voted to approve the Dominion Questar Combination. In August 2016 and September 2016, approvals were granted by the Utah Commission and the Wyoming Commission, respectively. Information regarding the transaction was also provided to the Idaho Public Utilities Commission, who acknowledged the Dominion Questar Combination in October 2016, and directed Dominion Questar to notify the Idaho Public Utilities Commission when it makes filings with the Utah Commission.

With the approval of the Dominion Questar Combination in Utah and Wyoming, Dominion agreed to the following:

- Contribution of \$75 million to Dominion Questar's qualified and non-qualified defined-benefit pension plans and its other post-employment benefit plans within six months of the closing date. This contribution was made in January 2017.
- Increasing Dominion Questar's historical level of corporate contributions to charities by \$1 million per year for at least five years.
- Withdrawal of Questar Gas' general rate case filed in July 2016 with the Utah Commission and agreement to not file a general rate case with the Utah Commission to adjust its base distribution non-gas rates prior to July 2019, unless otherwise ordered by the Utah Commission. In addition, Questar Gas agreed not to file a general rate case with the Wyoming Commission with a requested rate effective date earlier than January 2020. Questar Gas' ability to adjust rates through various riders is not affected.

Results of Operations and Pro Forma Information

The impact of the Dominion Questar Combination on Dominion's operating revenue and net income attributable to Dominion in the Consolidated Statements of Income for the twelve months ended December 31, 2016 was an increase of \$379 million and \$73 million, respectively.

Dominion incurred transaction and transition costs, of which \$58 million was recorded in other operations and maintenance expense for the twelve months ended December 31, 2016, and \$16 million was recorded in interest and related charges for the twelve months ended December 31, 2016, in Dominion's Consolidated Statements of Income. These costs consist of the amortization of financing costs, the charitable contribution commitment described above, employee-related expenses, professional fees, and other miscellaneous costs.

The following unaudited pro forma financial information reflects the consolidated results of operations of Dominion assuming the Dominion Questar Combination had taken place on January 1, 2015. The unaudited pro forma financial information has been presented for illustrative purposes only and is not necessarily indicative of the consolidated results of operations that would have been achieved or the future consolidated results of operations of the combined company.

	Twelve Months Ended December 31,					
		2016(1)		2015		
(millions, except EPS)						
Operating Revenue	\$	12,497	\$	12,818		
Net Income		2,300		2,108		
Earnings Per Common Share – Basic	\$	3.73	\$	3.56		
Earnings Per Common Share – Diluted	\$	3.73	\$	3.55		

(1) Amounts include adjustments for non-recurring costs directly related to the Dominion Questar Combination.

Contribution of Questar Pipeline to Dominion Midstream In October 2016, Dominion entered into the Contribution Agreement under which Dominion contributed Questar Pipeline to Dominion Midstream. Upon closing of the agreement on December 1, 2016, Dominion Midstream became the owner of

Table of Contents

Combined Notes to Consolidated Financial Statements, Continued

all of the issued and outstanding membership interests of Questar Pipeline in exchange for consideration consisting of Dominion Midstream common and convertible preferred units with a combined value of \$467 million and cash payment of \$823 million, \$300 million of which is considered a debtfinanced distribution, for a total of \$1.3 billion. In addition, under the terms of the Contribution Agreement, Dominion Midstream repurchased 6,656,839 common units from Dominion, and repaid its \$301 million promissory note to Dominion in December 2016. The cash proceeds from these transactions were utilized in December 2016 to repay the \$1.2 billion term loan agreement borrowed in September 2016. Since Dominion consolidates Dominion Midstream for financial reporting purposes, the transactions associated with the Contribution Agreement were eliminated upon consolidation. See Note 5 for the tax impacts of the transactions.

Sale of Questar Fueling Company

In December 2016, Dominion completed the sale of Questar Fueling Company. The proceeds from the sale were \$28 million, net of transaction costs. No gain or loss was recorded in Dominion's Consolidated Statements of Income, as the sale resulted in measurement period adjustments to the net assets acquired of Dominion Questar. See the *Purchase Price Allocation* section above for additional details on the measurement period adjustments recorded.

WHOLLY-OWNED MERCHANT SOLAR PROJECTS

Acquisitions

The following table presents significant completed acquisitions of wholly-owned merchant solar projects by Dominion. Long-term power purchase, interconnection and operation and maintenance agreements have been executed for all of the projects. Dominion has claimed federal investment tax credits on the projects. These projects are included in the Dominion Generation operating segment.

Completed Acquisition Date	Seller	Number of Projects	Project Location	Project Name(s)	Initial Acquisition Cost (millions)(1)	Project Cost (millions)(2)	Date of Commercial Operations	MW Capacity
March 2014	Recurrent Energy Development Holdings, LLC	6	California	Camelot, Kansas, Kent South, Old River One, Adams East, Columbia 2	\$ 50	\$ 428	Fourth quarter 2014	139
November 2014	CSI Project Holdco, LLC	1	California	West Antelope	79	79	November 2014	20
December 2014	EDF Renewable Development, Inc.	1	California	CID	71	71	January 2015	20
April 2015	EC&R NA Solar PV, LLC	1	California	Alamo	66	66	May 2015	20
April 2015	EDF Renewable Development, Inc.	3	California	Cottonwood(3)	106	106	May 2015	24
June 2015	EDF Renewable Development, Inc.	1	California	Catalina 2	68	68	July 2015	18
July 2015	SunPeak Solar, LLC	1	California	Imperial Valley 2	42	71	August 2015	20
November 2015	EC&R NA Solar PV, LLC	1	California	Maricopa West	65	65	December 2015	20
November 2015	Community Energy, Inc.	1	Virginia	Amazon Solar Farm U.S. East	34	212	October 2016	80

(1) The purchase price was primarily allocated to Property, Plant and Equipment.

(2) Includes acquisition cost.

(3) One of the projects, Marin Carport, began commercial operations in 2016.

In addition during 2016, Dominion acquired 100% of the equity interests of seven solar projects in Virginia, North Carolina and South Carolina for an aggregate purchase price of \$32 million, all of which was allocated to property, plant and equipment. The projects are expected to cost approximately \$425 million in total once constructed, including initial acquisition costs, and to generate approximately 221 MW combined. One of the projects commenced commercial operations in 2016 and the remaining projects are expected to begin commercial operations in 2017.

In August 2016, Dominion entered into an agreement to acquire 100% of the equity interests of two solar projects in California from Solar Frontier Americas Holding LLC for approximately \$128 million in cash. The acquisition is expected to close prior to both projects commencing operations, which is expected by the end of 2017. The projects are expected to cost approximately \$130 million once constructed, including the initial acquisition cost, and to generate approximately 50 MW combined.

In September 2016, Dominion entered into an agreement to acquire 100% of the equity interests of a solar project in Virginia from Community Energy Solar, LLC. The acquisition is expected to close during the first quarter of 2017, prior to the project commencing operations by the end of 2017, for an amount to be determined based on the costs incurred through closing. The project is expected to cost approximately \$210 million once constructed, including the initial acquisition cost, and to generate approximately 100 MW.

In January 2017, Dominion entered into an agreement to acquire 100% of the equity interests of a solar project in North Carolina from Cypress Creek Renewables, LLC for \$154 million in cash. The acquisition is expected to close during the second quarter of 2017, prior to the project commencing commercial operations, which is expected by the end of the third quarter of 2017. The project is expected to cost \$160 million once constructed, including the initial acquisition cost, and to generate approximately 79 MW.

Sale of Interest in Merchant Solar Projects

In September 2015, Dominion signed an agreement to sell a noncontrolling interest (consisting of 33% of the equity interests) in all of its then currently wholly-owned merchant solar projects, 24 solar projects totaling 425 MW, to SunEdison, including projects discussed in the table above. In December 2015, the sale of interest in 15 of the solar projects closed for \$184 million with the sale of interest in the remaining projects completed in January 2016 for \$117 million. Upon closing, SunEdison sold its interest in these projects to Terra Nova Renewable Partners. Terra Nova Renewable Partners has a future option to buy all or a portion of Dominion's remaining 67% ownership in the projects upon the occurrence of certain events, none of which are expected to occur in 2017.

NON-WHOLLY-OWNED MERCHANT SOLAR PROJECTS

Acquisitions of Four Brothers and Three Cedars

In June 2015, Dominion acquired 50% of the units in Four Brothers from SunEdison for \$64 million of consideration, consisting of \$2 million in cash and a \$62 million payable. Dominion has no remaining obligation related to this payable as of December 31, 2016. Four Brothers operates four solar projects located in Utah, which produce and sell electricity and renewable energy credits. The facilities began commercial operations during the third quarter of 2016, generating 320 MW, at a cost of approximately \$670 million.

In September 2015, Dominion acquired 50% of the units in Three Cedars from SunEdison for \$43 million of consideration, consisting of \$6 million in cash and a \$37 million payable. As of

December 31, 2016, a \$2 million payable is included in other current liabilities in Dominion's Consolidated Balance Sheets. Three Cedars operates three solar projects located in Utah, which produce and sell electricity and renewable energy credits. The facilities began commercial operations during the third quarter of 2016, generating 210 MW, at a cost of approximately \$450 million.

The Four Brothers and Three Cedars facilities operate under long-term power purchase, interconnection and operation and maintenance agreements. Dominion will claim 99% of the federal investment tax credits on the projects.

Dominion owns 50% of the voting interests in Four Brothers and Three Cedars and has a controlling financial interest over the entities through its rights to control operations. The allocation of the \$64 million purchase price for Four Brothers resulted in \$89 million of property, plant and equipment and \$25 million of noncontrolling interest. The allocation of the \$43 million purchase price for Three Cedars resulted in \$65 million of property, plant and equipment and \$22 million of noncontrolling interest. The noncontrolling interest for each entity was measured at fair value using the discounted cash flow method, with the primary components of the valuation being future cash flows (both incoming and outgoing) and the discount rate. Dominion determined its discount rate based on the cost of capital a utility-scale investor would expect, as well as the cost of capital an individual project developer could achieve via a combination of nonrecourse project financing and outside equity partners. The acquired assets of Four Brothers and Three Cedars are included in the Dominion Generation operating segment.

Dominion has assumed the majority of the agreements to provide administrative and support services in connection with operations and maintenance of the facilities and technical management services of the solar facilities. Costs related to services to be provided under these agreements were immaterial for the years ended December 31, 2016 and 2015. Subsequent to Dominion's acquisition of Four Brothers and Three Cedars, SunEdison made contributions to Four Brothers and Three Cedars of \$292 million in aggregate through December 31, 2016, which are reflected as noncontrolling interests in the Consolidated Balance Sheets.

In November 2016, NRG acquired the 50% of units in Four Brothers and Three Cedars previously held by SunEdison.

DOMINION MIDSTREAM ACQUISITION OF INTEREST IN IROQUOIS In September 2015, Dominion Midstream acquired from NG and NJNR a 25.93% noncontrolling partnership interest in Iroquois, which owns and operates a 416-mile, FERC-regulated natural gas transmission pipeline in New York and Connecticut. In exchange for this partnership interest, Dominion Midstream issued 8.6 million common units representing limited partnership interests in Dominion Midstream (6.8 million common units to NG for its 20.4% interest and 1.8 million common units to NJNR for its 5.53% interest). The investment was recorded at \$216 million based on the value of Dominion Midstream's common units at closing. These common units are reflected as noncontrolling interest in Dominion's Consolidated Financial Statements. Dominion Midstream's noncontrolling partnership interest is reflected in the Dominion Energy operating segment. In addition to this acquisition, Dominion Gas currently holds a 24.07% noncontrolling partnership interest in Iroquois. Dominion Midstream and Dominion Gas each account for their interest in Iroquois as an equity method investment. See Notes 9 and 15 for more information regarding Iroquois.

ACQUISITION OF DCG

In January 2015, Dominion completed the acquisition of 100% of the equity interests of DCG from SCANA Corporation for \$497 million in cash, as adjusted for working capital. DCG owns and operates nearly 1,500 miles of FERC-regulated interstate natural gas pipeline in South Carolina and southeastem Georgia. This acquisition supports Dominion's natural gas expansion into the southeastem U.S. The allocation of the purchase price resulted in \$277 million of net property, plant and equipment, \$250 million of goodwill, of which approximately \$225 million is expected to be deductible for income tax purposes, and \$38 million of regulatory liabilities. The goodwill reflects the value associated with enhancing Dominion's regulated gas position, economic value attributable to future expansion projects as well as increased opportunities for synergies. The acquired assets of DCG are included in the Dominion Energy operating segment.

On March 24, 2015, DCG converted to a limited liability company under the laws of South Carolina and changed its name from Carolina Gas Transmission Corporation to DCG. On April 1, 2015, Dominion contributed 100% of the issued and

Combined Notes to Consolidated Financial Statements, Continued

outstanding membership interests of DCG to Dominion Midstream in exchange for total consideration of \$501 million, as adjusted for working capital. Total consideration to Dominion consisted of the issuance of a two-year, \$301 million senior unsecured promissory note payable by Dominion Midstream at an annual interest rate of 0.6%, and 5,112,139 common units, valued at \$200 million, representing limited partner interests in Dominion Midstream. The number of units was based on the volume weighted average trading price of Dominion Midstream's common units for the ten trading days prior to April 1, 2015, or \$39.12 per unit. Since Dominion consolidates Dominion Midstream for financial reporting purposes, this transaction was eliminated upon consolidation and did not impact Dominion's financial position or cash flows.

SALE OF ELECTRIC RETAIL ENERGY MARKETING BUSINESS

In March 2014, Dominion completed the sale of its electric retail energy marketing business. The proceeds were \$187 million, net of transaction costs. The sale resulted in a gain, subject to post-closing adjustments, of \$100 million (\$57 million after-tax) net of a \$31 million write-off of goodwill, and is included in other operations and maintenance expense in Dominion's Consolidated Statements of Income. The sale of the electric retail energy marketing business did not qualify for discontinued operations classification.

Virginia Power

ACQUISITION OF SOLAR PROJECT

In December 2015, Virginia Power completed the acquisition of 100% of a solar development project in North Carolina from Morgans Corner for \$47 million, all of which was allocated to property, plant and equipment. The project was placed into service in December 2015 with a total cost of \$49 million, including the initial acquisition cost. The project generates 20 MW. The output generated by the project is used to meet a ten year non-jurisdictional supply agreement with the U.S. Navy, which has the unilateral option to extend for an additional ten years. In October 2015, the North Carolina Commission granted the transfer of the existing CPCN from Morgans Corner to Virginia Power. The acquired asset is included in the Virginia Power Generation operating segment.

ASSIGNMENTS OF SHALE DEVELOPMENT RIGHTS

See Note 10 for a discussion of assignments of shale development rights.

NOTE 4. OPERATING REVENUE

The Companies' operating revenue consists of the following:

Year Ended December 31,	2016	2015	2014
(millions)			
Dominion			
Electric sales:			
Regulated	\$ 7,348	\$ 7,482	\$ 7,460
Nonregulated	1,519	1,488	1,839
Gas sales:			
Regulated	500	218	334
Nonregulated	354	471	751
Gas transportation and storage	1,636	1,616	1,543
Other	380	408	509
Total operating revenue	\$11,737	\$11,683	\$12,436
Virginia Power			
Regulated electric sales	\$ 7,348	\$ 7,482	\$ 7,460
Other	240	140	119
Total operating revenue	\$ 7,588	\$ 7,622	\$ 7,579
Dominion Gas			
Gas sales:			
Regulated	\$ 119	\$ 122	\$ 209
Nonregulated	13	10	26
Gas transportation and storage	1,307	1,366	1,353
NGL revenue	62	93	212
Other	137	125	98
Total operating revenue	\$ 1,638	\$ 1,716	\$ 1,898

NOTE 5. INCOME TAXES

Judgment and the use of estimates are required in developing the provision for income taxes and reporting of tax-related assets and liabilities. The interpretation of tax laws involves uncertainty, since tax authorities may interpret the laws differently. The Companies are routinely audited by federal and state tax authorities. Ultimate resolution of income tax matters may result in favorable or unfavorable impacts to net income and cash flows, and adjustments to tax-related assets and liabilities could be material.

In December 2015, U.S. federal legislation was enacted, providing an extension of the 50% bonus depreciation allowance for qualifying expenditures incurred in 2015, 2016 and 2017, and a phasing down of the allowance to 40% in 2018 and 30% in 2019 and expiration thereafter. In addition, the legislation extends the 30% investment tax credit for qualifying expenditures incurred through 2019 and provides a phase down of the credit to 26% in 2020, 22% in 2021 and 10% in 2022 and thereafter.

Continuing Operations

Details of income tax expense for continuing operations including noncontrolling interests were as follows:

In 2016, Dominion realized a taxable gain resulting from the contribution of Questar Pipeline to Dominion Midstream. The contribution and related transactions resulted in increases in the tax basis of Questar Pipeline's assets and the number of Dominion Midstream's common and convertible preferred units held by noncontrolling interests. The direct tax effects of the transactions included a provision for current income taxes (\$212 million) and an offsetting benefit for deferred income taxes (\$96 million) and were charged to common shareholders' equity. The federal tax liability was reduced by \$129 million of tax credits generated in 2016 that otherwise would have resulted in additional credit carryforwards and a \$17 million benefit provided by the domestic production activities deduction. These benefits, as indirect effects of the contribution transaction, are reflected in Dominion's current federal income tax expense.

In 2015, Dominion's current federal income tax benefit includes the recognition of a \$20 million benefit related to a carryback to be filed for nuclear decommissioning expenditures included in its 2014 net operating loss.

For continuing operations including noncontrolling interests, the statutory U.S. federal income tax rate reconciles to the Companies' effective income tax rate as follows:

		Dominion		V	irginia Power		Do	ominion Gas	5
Year Ended December 31,	2016	2015	2014	2016	2015	2014	2016	2015	2014
U.S. statutory rate	35.0%	35.0%	35.0%	35.0%	35.0%	35.0%	35.0%	35.0%	35.0%
Increases (reductions) resulting from:

Balance at December 31	\$ 64	\$103	\$145	\$13	\$ 12	\$ 36	\$7	\$29	\$29	

Certain unrecognized tax benefits, or portions thereof, if recognized, would affect the effective tax rate. Changes in these unrecognized tax benefits may result from remeasurement of amounts expected to be realized, settlements with tax authorities and expiration of statutes of limitations. For Dominion and its subsidiaries, these unrecognized tax benefits were \$45 million, \$69 million and \$77 million at December 31, 2016, 2015 and 2014, respectively. For Dominion, the change in these unrecognized tax benefits decreased income tax expense by \$18 million, \$6 million and \$47 million in 2016, 2015 and 2014, respectively. For Virginia Power, these unrecognized tax benefits were \$9 million at December 31, 2016 and \$8 million at December 31, 2015 and 2014. For Virginia Power, the change in these unrecognized tax benefits increased income tax expense by \$1 million in 2016 and affected income tax expense by less than \$1 million in 2015 and 2014. For Dominion Gas, these unrecognized tax benefits were \$5 million at December 31, 2016 and \$19 million at December 31, 2015 and 2014. For Dominion Gas, the change in these unrecognized tax benefits decreased income tax expense by \$11 million in 2016 and affected income tax expense by less than \$1 million in 2015 and 2014.

Effective for its 2014 tax year, Dominion was accepted into the CAP. Through the CAP, Dominion has the opportunity to resolve complex tax matters with the IRS before filing its federal income tax returns, thus achieving certainty for such tax return filing positions agreed to by the IRS. The IRS has completed its audit of tax years 2013, 2014 and 2015, for which the statute of limitations has not yet expired. Although Dominion has not received a final letter indicating no changes to its taxable income for tax year 2015, no adjustments are expected. The IRS examination of tax year 2016 is ongoing.

It is reasonably possible that settlement negotiations and expiration of statutes of limitations could result in a decrease in unrecognized tax benefits in 2017 by up to \$25 million for Dominion, \$3 million for Virginia Power and \$7 million for Dominion Gas. If such changes were to occur, other than revisions of the accrual for interest on tax underpayments and overpayments, earnings could increase by up to \$20 million for Dominion, \$3 million for Virginia Power and \$5 million for Dominion Gas.

Otherwise, with regard to 2016 and prior years, Dominion, Virginia Power and Dominion Gas cannot estimate the range of reasonably possible changes to unrecognized tax benefits that may occur in 2017.

For each of the major states in which Dominion operates, the earliest tax year remaining open for examination is as follows:

	Earliest
	Open Tax
State	Year
Pennsylvania(1)	2012
Connecticut	2013
Virginia(2)	2013
West Virginia(1)	2013
New York(1)	2007

(1) Considered a major state for Dominion Gas' operations.

(2) Considered a major state for Virginia Power's operations.

The Companies are also obligated to report adjustments resulting from IRS settlements to state tax authorities. In addition, if Dominion utilizes operating losses or tax credits generated in years for which the statute of limitations has expired, such amounts are generally subject to examination.

NOTE 6. FAIR VALUE MEASUREMENTS

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. However, the use of a mid-market pricing convention (the mid-point between bid and ask prices) is permitted. Fair values are based on assumptions that market participants would use when pricing an asset or liability, including assumptions about risk and the risks inherent in valuation techniques and the inputs to valuations. This includes not only the credit standing of counterparties involved and the impact of credit enhancements but also the impact of the Companies' own nonperformance risk on their liabilities. Fair value measurements assume that the transaction occurs in the principal market for the asset or liability from the perspective of the reporting entity), or in the absence of a principal market, the most advantageous market for the asset or liability (the market in which the reporting entity would be able to maximize the amount received or minimize the amount paid). Dominion applies fair value measurements to certain assets and liabilities including commodity, interest rate, and foreign currency derivative instruments, and other investments including those held in nuclear decommissioning, Dominion's rabbi, pension and other postretirement benefit plan trusts, in accordance with the requirements discussed above. Virginia Power applies fair value measurements to certain assets and liabilities including commodity and interest rate derivative instruments and other investments including those held in the nuclear decommissioning trust, in accordance with the requirements discussed above. Dominion Gas applies fair value measurements to certain assets and liabilities including commodity, interest rate, and foreign currency derivative instruments and investments held in pension and other postretirement benefit plan trusts, in accordance with the requirements described above. The Companies apply credit adjustments to their derivative fair values in accordance with the requirements described above.

Inputs and Assumptions

The Companies maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair value is based on actively-quoted market prices, if available. In the absence of activelyquoted market prices, price information is sought from external sources, including broker quotes and industry publications. When evaluating pricing information provided by brokers and other pricing services, the Companies consider whether the broker is willing and able to trade at the quoted price, if the broker quotes are based on an active market or an inactive market and the extent to which brokers are utilizing a particular model if pricing is not readily available. If pricing information from external sources is not available, or if the Companies believe that observable pricing is not indicative of fair value, judgment is required to develop the estimates of fair value. In those cases the Companies must estimate prices based on available historical and near-term future price information and certain statistical methods, including regression analysis, that reflect their market assumptions.

The Companies' commodity derivative valuations are prepared by Dominion's ERM department. The ERM department creates daily mark-to-market valuations for the Companies' derivative transactions using computer-based statistical models. The inputs that go into the market valuations are transactional information stored in the systems of record and market pricing information that resides in data warehouse databases. The majority of forward prices are automatically uploaded into the data warehouse databases from various third-party sources. Inputs obtained from third-party sources are evaluated for reliability considering the reputation, independence, market presence, and methodology used by the third-party. If forward prices are not available from third-party sources, then the ERM department models the forward prices based on other available market data. A team consisting of risk management and risk quantitative analysts meets each business day to assess the validity of market prices and mark-to-market valuations. During this meeting, the changes in mark-to-market valuations from period to period are examined and qualified against historical expectations. If any discrepancies are identified during this process, the mark-to-market valuations or the market pricing information is evaluated further and adjusted, if necessary.

Table of Contents

Combined Notes to Consolidated Financial Statements, Continued

For options and contracts with option-like characteristics where observable pricing information is not available from external sources, Dominion and Virginia Power generally use a modified Black-Scholes Model that considers time value, the volatility of the underlying commodities and other relevant assumptions when estimating fair value. Dominion and Virginia Power use other option models under special circumstances, including a Spread Approximation Model when contracts include different commodities or commodity locations and a Swing Option Model when contracts allow either the buyer or seller the ability to exercise within a range of quantities. For contracts with unique characteristics, the Companies may estimate fair value using a discounted cash flow approach deemed appropriate in the circumstances and applied consistently from period to period. For individual contracts, the use of different valuation models or assumptions could have a significant effect on the contract's estimated fair value.

The inputs and assumptions used in measuring fair value include the following:

For commodity derivative contracts:

- · Forward commodity prices
- Transaction prices
- Price volatility
- Price correlation
- Volumes
- · Commodity location
- Interest rates
- Credit quality of counterparties and the Companies
- Credit enhancements
- Time value

For interest rate derivative contracts:

- Interest rate curves
- Credit quality of counterparties and the Companies
- Notional value
- · Credit enhancements
- Time value

For foreign currency derivative contracts:

- Foreign currency forward exchange rates
- Interest rates
- · Credit quality of counterparties and the Companies
- Notional value
- Credit enhancements

Time value

For investments:

- · Quoted securities prices and indices
- Securities trading information including volume and restrictions
- Maturity
- Interest rates
- Credit quality

The Companies regularly evaluate and validate the inputs used to estimate fair value by a number of methods, including review and verification of models, as well as various market price verification procedures such as the use of pricing services and multiple broker quotes to support the market price of the various commodities and investments in which the Companies transact.

Levels

The Companies also utilize the following fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- Level 1—Quoted prices (unadjusted) in active markets for identical assets and liabilities that they have the ability to access at the measurement date. Instruments categorized in Level 1 primarily consist of financial instruments such as certain exchange-traded derivatives, and exchange-listed equities, U.S. and international equity securities, mutual funds and certain Treasury securities held in nuclear decommissioning trust funds for Dominion and Virginia Power, benefit plan trust funds for Dominion and Dominion Gas, and rabbi trust funds for Dominion.
- Level 2—Inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for the asset or liability, including quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in inactive markets, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived from observable market data by correlation or other means. Instruments categorized in Level 2 primarily include commodity forwards and swaps, interest rate swaps, foreign currency swaps and cash and cash equivalents, corporate debt instruments, government securities and other fixed income investments held in nuclear decommissioning trust funds for Dominion and Virginia Power, benefit plan trust funds for Dominion and Dominion Gas and rabbi trust funds for Dominion.
- Level 3—Unobservable inputs for the asset or liability, including situations where there is little, if any, market activity for the asset or liability. Instruments categorized in Level 3 for the Companies consist of long-dated commodity derivatives, FTRs, certain natural gas and power options and other modeled commodity derivatives.

The fair value hierarchy gives the highest priority to quoted prices in active markets (Level 1) and the lowest priority to unobservable data (Level 3). In some cases, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. In these cases, the lowest level input that is significant to a fair value measurement in its entirety determines the applicable level in the fair value hierarchy. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability. Alternative investments, consisting of investments in partnerships, joint ventures and other alternative investments held in nuclear decommissioning and benefit plan trust funds, are generally valued using NAV based on the proportionate share of the fair value as determined by reference to the most recent audited fair value financial statements or fair value statements provided by the investment manager adjusted for any significant events occurring between the investment manager's and the Companies' measurement date. Alternative investments recorded at NAV are not classified in the fair value hierarchy.

For derivative contracts, the Companies recognize transfers among Level 1, Level 2 and Level 3 based on fair values as of the first day of the month in which the transfer occurs. Transfers out of Level 3 represent assets and liabilities that were previously classified as Level 3 for which the inputs became observable for classification in either Level 1 or Level 2. Because the activity and liquidity of commodity markets vary substantially between regions and time periods, the availability of observable inputs for substantially the full term and value of the Companies' over-the-counter derivative contracts is subject to change.

Level 3 Valuations

Fair value measurements are categorized as Level 3 when price or other inputs that are considered to be unobservable are significant to their valuations. Long-dated commodity derivatives are generally based on unobservable inputs due to the length of time to settlement and the absence of market activity and are therefore categorized as Level 3. FTRs are categorized as Level 3 fair value measurements because the only relevant pricing available comes from ISO auctions, which are generally not considered to be liquid markets. Other modeled commodity derivatives have unobservable inputs in their valuation, mostly due to non-transparent and illiquid markets.

The Companies enter into certain physical and financial forwards, futures, options and swaps, which are considered Level 3 as they have one or more inputs that are not observable and are significant to the valuation. The discounted cash flow method is used to value Level 3 physical and financial forwards and futures contracts. An option model is used to value Level 3 physical and financial options. The discounted cash flow model for forwards and futures calculates mark-to-market valuations based on forward market prices, original transaction prices, volumes, risk-free rate of return, and credit spreads. The option model calculates mark-to-market valuations using variations of the Black-Scholes option model. The inputs into the models are the forward market prices, implied price volatilities, risk-free rate of return, the option expiration dates, the option strike prices, the original sales prices, and volumes. For Level 3 fair value measurements, forward market prices, credit spreads and implied price volatilities are considered unobservable. The unobservable inputs are developed and substantiated using historical information, available market data, thirdparty data, and statistical analysis. Periodically, inputs to valuation models are reviewed and revised as needed, based on historical information, updated market data, market liquidity and relationships, and changes in third-party pricing sources.

The following table presents Dominion's quantitative information about Level 3 fair value measurements at December 31, 2016. The range and weighted average are presented in dollars for market price inputs and percentages for price volatility and credit spreads.

	Fair Valu	ue (millions)	Valuation Techniques	Unobservable Input	Range	Weighted Average(1)
Assets:						
Physical and Financial Forwards and Futures:						
Natural Gas(2)	\$	70	Discounted Cash Flow	Market Price (per Dth)(4)	(2) - 12	_
				Credit Spreads(5)	1% - 4%	2%
FTRs		7	Discounted Cash Flow	Market Price (per MWh)(4)	(9) - 7	1
Physical and Financial Options:						
Natural Gas		3	Option Model	Market Price (per Dth)(4)	2 - 7	3
				Price Volatility(6)	18% - 50%	24%
Electricity		67	Option Model	Market Price (per MWh)(4)	21 - 55	34
				Price Volatility(6)	14% - 104%	31%
Total assets	\$	147				
Liabilities:						
Physical and Financial Forwards and Futures:						
Natural Gas(2)	\$	2	Discounted Cash Flow	Market Price (per Dth)(4)	(2) - 4	4
Liquids(3)		3	Discounted Cash Flow	Market Price (per Gal)(4)	0 - 2	1
FTRs		3	Discounted Cash Flow	Market Price (per MWh)(4)	(9) - 3	_
Total liabilities	\$	8				

(1) Averages weighted by volume.

(2) Includes basis.

(3) Includes NGLs and oil.

(4) Represents market prices beyond defined terms for Levels 1 and 2.

(5) Represents credit spreads unrepresented in published markets.

(6) Represents volatilities unrepresented in published markets.

Sensitivity of the fair value measurements to changes in the significant unobservable inputs is as follows:

Significant Unobservable			Impact on Fair Value
Inputs	Position	Change to Input	Measurement
Market Price	Buy	Increase (decrease)	Gain (loss)
Market Price	Sell	Increase (decrease)	Loss (gain)
Price Volatility	Buy	Increase (decrease)	Gain (loss)
Price Volatility	Sell	Increase (decrease)	Loss (gain)
Credit Spread	Asset	Increase (decrease)	Loss (gain)

Nonrecurring Fair Value Measurements

DOMINION GAS

Natural Gas Assets

In the fourth quarter of 2014, Dominion Gas recorded an impairment charge of \$9 million (\$6 million after-tax) in other operations and maintenance expense in its Consolidated Statements of Income, to write off previously capitalized costs following the cancellation of a development project.

(1) Includes investments held in the nuclear decommissioning trust. Excludes \$26 million and \$34 million of assets at December 31, 2016 and 2015, respectively, measured at fair value using NAV (or its equivalent) as a practical expedient which are not required to be categorized in the fair value hierarchy. The following table presents the net change in Virginia Power's assets and liabilities measured at fair value on a recurring basis and included in the Level 3 fair value category:

	2016	2015	2014
(millions)			
Balance at January 1,	\$ 93	\$102	\$ (7)
Total realized and unrealized gains (losses):			
Included in earnings	(35)	(13)	96
Included in regulatory assets/liabilities	(37)	(5)	109
Settlements	35	13	(96)
Purchases	87	_	_
Transfers out of Level 3	—	(4)	_
Balance at December 31,	\$143	\$93	\$102

The gains and losses included in earnings in the Level 3 fair value category were classified in electric fuel and other energy-related purchases expense in Virginia Power's Consolidated Statements of Income for the years ended December 31, 2016, 2015 and 2014. There were no unrealized gains and losses included in earnings in the Level 3 fair value category relating to assets/liabilities still held at the reporting date for the years ended December 31, 2016, 2015 and 2014.

DOMINION GAS

The following table presents Dominion Gas' quantitative information about Level 3 fair value measurements at December 31, 2016. The range and weighted average are presented in dollars for market price inputs.

	 Value ions)	Valuation Techniques	Unobservable Input	Range	Weighted Average(1)
Liabilities:					
Physical and Financial Forwards and Futures:					
NGLs	\$ 2	Discounted Cash Flow	Market Price (per Gal)(2)	0 - 2	1
Total liabilities	\$ 2				

(1) Averages weighted by volume.

(2) Represents market prices beyond defined terms for Levels 1 and 2.

Sensitivity of the fair value measurements to changes in the significant unobservable inputs is as follows:

			Impact on
Significant Unobservable Inputs	Position	Change to Input	Fair Value Measurement
Market Price	Buy	Increase (decrease)	Gain (loss)
Market Price	Sell	Increase (decrease)	Loss (gain)

The following table presents Dominion Gas' assets and liabilities for commodity, interest rate, and foreign currency derivatives that are measured at fair value on a recurring basis for each hierarchy level, including both current and noncurrent portions:

	Level 1	Level 2	Level 3	Total
(millions)				
At December 31, 2016				
Liabilities:				
Commodity	\$ —	\$3	\$2	5
Foreign currency	_	6	_	6

Total assets	\$ —	\$5	\$6	\$11
Liabilities:				
Interest rate	\$ —	\$ 14	\$ —	14
Total liabilities	\$ —	\$ 14	\$ —	\$14

The following table presents the net change in Dominion Gas' derivative assets and liabilities measured at fair value on a recurring basis and included in the Level 3 fair value category:

	2016	2015	2014
(millions)			
Balance at January 1,	\$6	\$ 2	\$ (6)
Total realized and unrealized gains (losses):			
Included in earnings	_	1	2
Included in other comprehensive income (loss)	_	(5)	10
Settlements	_	(1)	(4)
Transfers out of Level 3	(8)	9	_
Balance at December 31,	\$(2)	\$6	\$ 2

The gains and losses included in earnings in the Level 3 fair value category were classified in operating revenue in Dominion Gas' Consolidated Statements of Income for the years ended December 31, 2016, 2015 and 2014. There were no unrealized gains and losses included in earnings in the Level 3 fair value category relating to assets/liabilities still held at the reporting date for the years ended December 31, 2016, 2015 and 2014.

Fair Value of Financial Instruments

Substantially all of the Companies' financial instruments are recorded at fair value, with the exception of the instruments described below, which are reported at historical cost. Estimated fair values have been determined using available market information and valuation methodologies considered appropriate by management. The carrying amount of cash and cash equivalents, restricted cash (which is recorded in other current assets), customer and other receivables, affiliated receivables, short-term debt, affiliated current borrowings, payables to affiliates and accounts payable are representative of fair value because of the short-term nature of these instruments. For the Companies' financial instruments that are not recorded at fair value, the carrying amounts and estimated fair values are as follows:

At December 31,		2016		2015
	Carrying Amount	Estimated Fair Value(1)	Carrying Amount	Estimated Fair Value(1)
(millions)				
Dominion				
Long-term debt, including securities due within one year(2)	\$26,587	\$ 28,273	\$21,873	\$ 23,210
Junior subordinated notes(3)	2,980	2,893	1,340	1,192
Remarketable subordinated notes(3)	2,373	2,418	2,080	2,129
Virginia Power				
Long-term debt, including securities due				
within one year(3)	\$10,530	\$ 11,584	\$ 9,368	\$ 10,400
Dominion Gas				
Long-term debt, including securities due within one year(4)	\$ 3,528	\$ 3,603	\$ 3,269	\$ 3,299

⁽¹⁾ Fair value is estimated using market prices, where available, and interest rates currently available for issuance of debt with similar terms and remaining maturities. All fair value measurements are classified as Level 2. The carrying amount of debt issues with short-term maturities and variable rates refinanced at current market rates is a reasonable estimate of their fair value.

(3) Carrying amount includes amounts which represent the unamortized debt issuance costs, discount or premium.

(4) Carrying amount includes amounts which represent the unamortized debt issuance costs, discount or premium, and foreign currency remeasurement adjustments.

105

Jun 22 2018

⁽²⁾ Carrying amount includes amounts which represent the unamortized debt issuance costs, discount or premium, and foreign currency remeasurement adjustments. At December 31, 2016, and 2015, includes the valuation of certain fair value hedges associated with Dominion's fixed rate debt of \$(1) million and \$7 million, respectively.

Combined Notes to Consolidated Financial Statements, Continued

NOTE 7. DERIVATIVES AND HEDGE ACCOUNTING ACTIVITIES

The Companies are exposed to the impact of market fluctuations in the price of electricity, natural gas and other energy-related products they market and purchase, as well as interest rate and foreign currency exchange rate risks of their business operations. The Companies use derivative instruments to manage exposure to these risks, and designate certain derivative instruments as fair value or cash flow hedges for accounting purposes. As discussed in Note 2, for jurisdictions subject to cost-based rate regulation, changes in the fair value of derivatives are deferred as regulatory assets or regulatory liabilities until the related transactions impact earnings. See Note 6 for further information about fair value measurements and associated valuation methods for derivatives.

Derivative assets and liabilities are presented gross on the Companies' Consolidated Balance Sheets. Dominion's derivative contracts include both over-the-counter transactions and those that are executed on an exchange or other trading platform (exchange contracts) and centrally cleared. Virginia Power's and Dominion Gas' derivative contracts include over-the-counter

106

transactions. Over-the-counter contracts are bilateral contracts that are transacted directly with a third party. Exchange contracts utilize a financial intermediary, exchange, or clearinghouse to enter, execute, or clear the transactions. Certain over-the-counter and exchange contracts contain contractual rights of setoff through master netting arrangements, derivative clearing agreements, and contract default provisions. In addition, the contracts are subject to conditional rights of setoff through counterparty nonperformance, insolvency, or other conditions.

In general, most over-the-counter transactions and all exchange contracts are subject to collateral requirements. Types of collateral for over-the-counter and exchange contracts include cash, letters of credit, and, in some cases, other forms of security, none of which are subject to restrictions. Cash collateral is used in the table below to offset derivative assets and liabilities. Certain accounts receivable and accounts payable recognized on the Companies' Consolidated Balance Sheets, as well as letters of credit and other forms of security, all of which are not included in the tables below, are subject to offset under master netting or similar arrangements and would reduce the net exposure.

DOMINION

Balance Sheet Presentation

Volumes

The following table presents the volume of Dominion's derivative activity as of December 31, 2016. These volumes are based on open derivative positions and represent the combined absolute value of their long and short positions, except in the case of offsetting transactions, for which they represent the absolute value of the net volume of their long and short positions.

	Current	Noncurrent
Natural Gas (bcf):		
Fixed price(1)	91	18
Basis	223	593
Electricity (MWh):		
Fixed price(1)	11,880,630	1,963,426
FTRs	46,269,912	_
Liquids (Gal)(2)	46,311,225	12,741,120
Interest rate(3)	\$1,800,000,000	\$2,903,640,679
Foreign currency(3)(4)	\$ —	\$ 280,000,000

(1) Includes options.

(2) Includes NGLs and oil.

(3) Maturity is determined based on final settlement period.

(4) Euro equivalent volumes are $\in 250,000,000$.

Ineffectiveness and AOCI

For the years ended December 31, 2016, 2015 and 2014, gains or losses on hedging instruments determined to be ineffective and amounts excluded from the assessment of effectiveness were not material. Amounts excluded from the assessment of effectiveness include gains or losses attributable to changes in the time value of options and changes in the differences between spot prices and forward prices.

The following table presents selected information related to gains (losses) on cash flow hedges included in AOCI in Dominion's Consolidated Balance Sheet at December 31, 2016:

	AOCI After-Tax	to be F to Earn	ts Expected Reclassified ings during the next 12 s After-Tax	Maximum Term
(millions)	Alter-Tax	WORL	S Alter-Tax	Term
Commodities:				
Gas	\$ 10	\$	10	36 months
Electricity	(20)		(20)	12 months
Other	(3)		(3)	15 months
Interest rate	(274)		(5)	375 months
Foreign currency	7		(1)	114 months
Total	\$ (280)	\$	(19)	

The amounts that will be reclassified from AOCI to earnings will generally be offset by the recognition of the hedged transactions (e.g., anticipated sales) in earnings, thereby achieving the realization of prices contemplated by the underlying risk management strategies and will vary from the expected amounts presented above as a result of changes in market prices, interest rates and foreign currency exchange rates.

Fair Value and Gains and Losses on Derivative Instruments

Volumes

The following table presents the volume of Virginia Power's derivative activity at December 31, 2016. These volumes are based on open derivative positions and represent the combined absolute value of their long and short positions, except in the case of offsetting transactions, for which they represent the absolute value of the net volume of their long and short positions.

	Current	Noncurrent
Natural Gas (bcf):		
Fixed price(1)	27	14
Basis	101	539
Electricity (MWh):		
Fixed price(1)	1,343,310	1,963,426
FTRs	43,853,950	_
Interest rate	\$800,000,000	\$850,000,000

(1) Includes options.

Ineffectiveness and AOCI

For the years ended December 31, 2016, 2015 and 2014, gains or losses on hedging instruments determined to be ineffective were not material.

The following table presents selected information related to gains (losses) on cash flow hedges included in AOCI in Virginia Power's Consolidated Balance Sheet at December 31, 2016:

		to	nounts Expected be Reclassified Earnings during				
		AOCI the next 12 After-Tax Months After-Tax					
(millions)							
Interest rate	\$ (8	\$ (8) \$ (1)					
Total	\$ (8	B) \$	(1)				

The amounts that will be reclassified from AOCI to earnings will generally be offset by the recognition of the hedged transactions (e.g., interest payments) in earnings, thereby achieving the realization of interest rates contemplated by the underlying risk management strategies and will vary from the expected amounts presented above as a result of changes in interest rates.

Table of Contents

Combined Notes to Consolidated Financial Statements, Continued

Volumes

The following table presents the volume of Dominion Gas' derivative activity at December 31, 2016. These volumes are based on open derivative positions and represent the combined absolute value of their long and short positions, except in the case of offsetting transactions, for which they represent the absolute value of the net volume of their long and short positions.

	Current	Noncurrent
NGLs (Gal)	39,549,225	7,953,120
Foreign currency(1)	\$ —	\$280,000,000

(1) Maturity is determined based on final settlement period. Euro equivalent volumes are $\epsilon_{250,000,000}$.

Ineffectiveness and AOCI

For the years ended December 31, 2016, 2015 and 2014, gains or losses on hedging instruments determined to be ineffective were not material.

The following table presents selected information related to gains (losses) on cash flow hedges included in AOCI in Dominion Gas' Consolidated Balance Sheet at December 31, 2016:

	AOCI After-Tax	to be Re to Earni t	Expected eclassified ngs during he next 12 After-Tax	Maximum Term
(millions)				
Commodities:				
NGLs	\$ (3)	\$	(3)	15 months
Interest rate	(28)		(3)	336 months
Foreign currency	7		(1)	114 months
Total	\$ (24)	\$	(7)	

The amounts that will be reclassified from AOCI to earnings will generally be offset by the recognition of the hedged transactions (e.g., anticipated sales) in earnings, thereby achieving the realization of prices contemplated by the underlying risk management strategies and will vary from the expected amounts presented above as a result of changes in market prices, interest rates, and foreign currency exchange rates.

Fair Value and Gains and Losses on Derivative Instruments

NOTE 8. EARNINGS PER SHARE

The following table presents the calculation of Dominion's basic and diluted EPS:

	2016	2015	2014
(millions, except EPS)			
Net income attributable to Dominion	\$2,123	\$1,899	\$1,310
Average shares of common stock			
outstanding-Basic	616.4	592.4	582.7
Net effect of dilutive securities(1)	0.7	1.3	1.8
Average shares of common stock			
outstanding-Diluted	617.1	593.7	584.5
Earnings Per Common Share-Basic	\$ 3.44	\$ 3.21	\$ 2.25
Earnings Per Common Share-Diluted	\$ 3.44	\$ 3.20	\$ 2.24

(1) Dilutive securities consist primarily of the 2013 Equity Units for 2016 and 2015 and the 2013 Equity Units and contingently convertible senior notes for 2014. Dominion redeemed all of its contingently convertible senior notes in 2014. See Note 17 for more information.

The 2014 Equity Units were excluded from the calculation of diluted EPS for the years ended December 31, 2016, 2015 and 2014, as the dilutive stock price threshold was not met. The 2016 Equity Units were excluded from the calculation of diluted EPS for the year ended December 31, 2016, as the dilutive stock price threshold was not met. See Note 17 for more information. The Dominion Midstream convertible preferred units are potentially dilutive securities but had no effect on the calculation of diluted EPS for the year ended December 31, 2016. See Note 19 for more information.

NOTE 9. INVESTMENTS

DOMINION

Equity and Debt Securities

RABBI TRUST SECURITIES

Marketable equity and debt securities and cash equivalents held in Dominion's rabbi trusts and classified as trading totaled \$104 million and \$100 million at December 31, 2016 and 2015, respectively.

DECOMMISSIONING TRUST SECURITIES

Dominion holds marketable equity and debt securities (classified as available-for-sale), cash equivalents and cost method investments in nuclear decommissioning trust funds to fund future decommissioning costs for its nuclear plants. Dominion's decommissioning trust funds are summarized below:

		Total	Total	
	Amortized	Unrealized	Unrealized	Fair
	Cost	Gains(1)	Losses(1)	Value
(millions) At December 31, 2016				
Marketable equity securities:				
U.S.	\$ 1,449	\$ 1,408	\$ —	\$2,857
Fixed income:				
Corporate debt instruments	478	13	(4)	487
Government securities	978	22	(8)	992
Common/collective trust funds	67	_	_	67
Cost method investments	69	_	_	69
Cash equivalents and other(2)	12	_	_	12
Total	\$ 3,053	\$ 1,443	\$ (12)(3)	\$4,484
At December 31, 2015				
Marketable equity securities:				
U.S.	\$ 1,354	\$ 1,217	\$ —	\$2,571
Fixed income:				
Corporate debt instruments	436	11	(7)	440
Government securities	962	30	(4)	988
Common/collective trust funds	100	_	_	100
Cost method investments	70	_	_	70
Cash equivalents and other(2)	14	_	_	14
Total	\$ 2,936	\$ 1,258	\$ (11)(3)	\$4,183

(1) Included in AOCI and the nuclear decommissioning trust regulatory liability as discussed in Note 2.

(2) Includes pending sales of securities of \$9 million and \$12 million at December 31, 2016 and 2015, respectively.

(3) The fair value of securities in an unrealized loss position was \$576 million and \$592 million at December 31, 2016 and 2015, respectively.

The fair value of Dominion's marketable debt securities held in nuclear decommissioning trust funds at December 31, 2016 by contractual maturity is as follows:

	Amount
(millions)	
Due in one year or less	\$ 192
Due after one year through five years	418
Due after five years through ten years	368
Due after ten years	568
Total	\$1.546

Presented below is selected information regarding Dominion's marketable equity and debt securities held in nuclear decommissioning trust funds:

Year Ended December 31,	2016	2015	2014
(millions)			
Proceeds from sales	\$1,422	\$1,340	\$1,235
Realized gains(1)	128	219	171
Realized losses(1)	55	84	30

(1) Includes realized gains and losses recorded to the nuclear decommissioning trust regulatory liability as discussed in Note 2. Dominion recorded other-than-temporary impairment losses on investments held in nuclear decommissioning trust funds as follows:

Year Ended December 31,	2016	2015	2014
(millions)			
Total other-than-temporary impairment losses(1)	\$ 51	\$ 66	\$21
Losses recorded to nuclear decommissioning trust			
regulatory liability	(16)	(26)	(5)
Losses recognized in other comprehensive income			
(before taxes)	(12)	(9)	(3)
Net impairment losses recognized in earnings	\$ 23	\$ 31	\$13

(1) Amounts include other-than-temporary impairment losses for debt securities of \$13 million, \$9 million and \$3 million at December 31, 2016, 2015 and 2014, respectively.

VIRGINIA POWER

Virginia Power holds marketable equity and debt securities (classified as available-for-sale), cash equivalents and cost method investments in nuclear decommissioning trust funds to fund future decommissioning costs for its nuclear plants. Virginia Power's decommissioning trust funds are summarized below:

	Am	ortized Cost	 Total ealized Gains(1)	 Total ealized sses(1)	Fair Value
(millions)					
At December 31, 2016					
Marketable equity securities:

Cash equivalents and other(2)		8	—	_	8
Total	\$ 1	,404	\$ 548	\$ (7)(3)	\$1,945

(1) Included in AOCI and the nuclear decommissioning trust regulatory liability as discussed in Note 2.

(2) Includes pending sales of securities of \$7 million and \$8 million at December 31, 2016 and 2015, respectively.

(3) The fair value of securities in an unrealized loss position was \$287 million and \$281 million at December 31, 2016 and 2015, respectively.

The fair value of Virginia Power's marketable debt securities at December 31, 2016, by contractual maturity is as follows:

	Ar	nount
(millions)		
Due in one year or less	\$	55
Due after one year through five years		181
Due after five years through ten years		208
Due after ten years		285
Total	\$	729

Presented below is selected information regarding Virginia Power's marketable equity and debt securities held in nuclear decommissioning trust funds.

Year Ended December 31,	2016	2015	2014
(millions)			
Proceeds from sales	\$733	\$639	\$549
Realized gains(1)	63	110	73
Realized losses(1)	27	43	12

(1) Includes realized gains and losses recorded to the nuclear decommissioning trust regulatory liability as discussed in Note 2.

Virginia Power recorded other-than-temporary impairment losses on investments held in nuclear decommissioning trust funds as follows:

Year Ended December 31,	2016	2015	2014
(millions)			
Total other-than-temporary impairment losses(1)	\$ 26	\$ 36	\$8
Losses recorded to nuclear decommissioning trust			
regulatory liability	(16)	(26)	(4)
Losses recorded in other comprehensive income			
(before taxes)	(7)	(6)	(2)
Net impairment losses recognized in earnings	\$3	\$4	\$ 2

(1) Amounts include other-than-temporary impairment losses for debt securities of \$8 million, \$6 million and \$2 million at December 31, 2016, 2015 and 2014, respectively.

EQUITY METHOD INVESTMENTS

Dominion and Dominion Gas

Investments that Dominion and Dominion Gas account for under the equity method of accounting are as follows:

			Investment			
Company	Ownership% Balance		Balance	Description		
As of December 31,			2016		2015	
(millions)						
Dominion						
Blue Racer	50%	\$ (677	\$	661	Midstream gas and related services
Iroquois	50%(1)	:	316		324	Gas transmission system
Atlantic Coast Pipeline	48%	:	256		59	Gas transmission system
Fowler Ridge	50%		116		125	Wind-powered merchant generation facility
NedPower	50%		112		119	Wind-powered merchant generation facility
Other	various		84		32	
Total		\$1,	561	\$1	,320	
Dominion Gas						
Iroquois	24.07%	\$	98	\$	102	Gas transmission system
Total		\$	98	\$	102	

(1) Comprised of Dominion Midstream's interest of 25.93% and Dominion Gas' interest of 24.07%. See Note 15 for more information.

OFFICIAL COP

Table of Contents

Combined Notes to Consolidated Financial Statements, Continued

Dominion's equity earnings on its investments totaled \$111 million, \$56 million and \$46 million in 2016, 2015 and 2014, respectively. Dominion received distributions from these investments of \$104 million, \$83 million and \$60 million in 2016, 2015, and 2014, respectively. As of December 31, 2016 and 2015, the carrying amount of Dominion's investments exceeded its share of underlying equity in net assets by \$260 million and \$234 million, respectively. These differences are comprised at December 31, 2016 and 2015, of \$84 million and \$72 million, respectively, related to basis differences from Dominion's investments in Blue Racer and wind projects, which are being amortized over the useful lives of the underlying assets, and \$176 million and \$162 million, respectively, reflecting equity method goodwill that is not being amortized.

Dominion Gas' equity earnings on its investment totaled \$21 million, \$23 million and \$21 million in 2016, 2015 and 2014, respectively. Dominion Gas received distributions from its investment of \$22 million, \$28 million and \$20 million in 2016, 2015, and 2014, respectively. As of December 31, 2016 and 2015, the carrying amount of Dominion Gas' investment exceeded its share of underlying equity in net assets by \$8 million. The difference reflects equity method goodwill and is not being amortized. In May 2016, Dominion Gas sold 0.65% of the noncontrolling partnership interest in Iroquois to TransCanada for approximately \$7 million, which resulted in a \$5 million (\$3 million after-tax) gain, included in other income in Dominion Gas' Consolidated Statements of Income.

Equity earnings are recorded in other income in Dominion's and Dominion Gas' Consolidated Statements of Income.

BLUE RACER

In December 2012, Dominion formed a joint venture with Caiman to provide midstream services to natural gas producers operating in the Utica Shale region in Ohio and portions of Pennsylvania. Blue Racer is an equal partnership between Dominion and Caiman, with Dominion contributing midstream assets and Caiman contributing private equity capital.

In March 2014, Dominion Gas sold the Northern System to an affiliate, that subsequently sold the Northern System to Blue Racer for consideration of \$84 million. Dominion Gas' consideration consisted of \$17 million in cash proceeds and the extinguishment of affiliated current borrowings of \$67 million and Dominion's consideration consisted of cash proceeds of \$84 million. The sale resulted in a gain of \$59 million (\$35 million after-tax for Dominion Gas and \$34 million after-tax for Dominion) net of a \$3 million write-off of goodwill, and is included in other operations and maintenance expense in both Dominion Gas' and Dominion's Consolidated Statements of Income.

In December 2016, Dominion Gas repurchased a portion of the Western System from Blue Racer for \$10 million, which is included in property, plant and equipment in Dominion Gas' Consolidated Balance Sheets.

Dominion

ATLANTIC COAST PIPELINE

In September 2014, Dominion, along with Duke and Southern Company Gas (formerly known as AGL Resources Inc.), announced the formation of Atlantic Coast Pipeline. The Atlantic Coast Pipeline partnership agreement includes provisions to allow Dominion an option to purchase additional ownership interest in Atlantic Coast Pipeline to maintain a leading ownership percentage. In October 2016, Dominion purchased an additional 3% membership interest in Atlantic Coast Pipeline from Duke for \$14 million. The members, which are subsidiaries of the above-referenced parent companies, hold the following membership interests: Dominion, 48%; Duke, 47%; and Southern Company Gas (formerly known as AGL Resources Inc.), 5%.

Atlantic Coast Pipeline is focused on constructing an approximately 600-mile natural gas pipeline running from West Virginia through Virginia to North Carolina. Subsidiaries and affiliates of all three members plan to be customers of the pipeline under 20-year contracts. Public Service Company of North Carolina, Inc. also plans to be a customer of the pipeline under a 20-year contract. Atlantic Coast Pipeline is considered an equity method investment as Dominion has the ability to exercise significant influence, but not control, over the investee. See Note 15 for more information.

NOTE 10. PROPERTY, PLANT AND EQUIPMENT

Major classes of property, plant and equipment and their respective balances for the Companies are as follows:

(millions) Dominion Utility: Generation \$17,147 \$15,656 Transmission 14,315 11,460 Distribution 16,381 13,122 Storage 2,814 2,460 Nuclear fuel 1,537 1,460 Gas gathering and processing 216 799 Oil and gas 1,652 - General and other 1,450 927 Plant under construction 6,254 5,556 Total utility 61,766 51,443 Nonutility: Merchant generation-nuclear 1,419 1,333 Merchant generation-other 4,149 2,683 Nuclear fuel 897 934 Gas gathering and processing 619 -

(1) Units jointly owned by Virginia Power.

(2) Unit jointly owned by Dominion.

The co-owners are obligated to pay their share of all future construction expenditures and operating costs of the jointly-owned facilities in the same proportion as their respective ownership interest. Dominion and Virginia Power report their share of operating costs in the appropriate operating expense (electric fuel and other energy-related purchases, other operations and maintenance, depreciation, depletion and amortization and other taxes, etc.) in the Consolidated Statements of Income.

Assignments of Shale Development Rights

In December 2013, Dominion Gas closed on agreements with two natural gas producers to convey over time approximately 100,000 acres of Marcellus Shale development rights underneath several of its natural gas storage fields. The agreements provide for payments to Dominion Gas, subject to customary adjustments, of approximately \$200 million over a period of nine years, and an overriding royalty interest in gas produced from the acreage. In 2013, Dominion Gas received approximately \$100 million in cash proceeds, resulting in a \$20 million (\$12 million after-tax) gain, recorded to operations and maintenance expense in Dominion Gas' Consolidated Statements of Income. In 2014, Dominion Gas received \$16 million in additional cash proceeds resulting from postclosing adjustments. In March 2015, Dominion Gas and one of the natural gas producers closed on an amendment to the agreement, which included the immediate conveyance of approximately 9,000 acres of Marcellus Shale development rights and a two-year extension of the term of the original agreement. The conveyance of development rights resulted in the recognition of \$43 million (\$27 million after-tax) of previously deferred revenue to operations and maintenance expense in Dominion Gas' Consolidated Statements of Income. In April 2016, Dominion Gas and the natural gas producer closed on an amendment to the agreement, which included the immediate conveyance of a 32% partial interest in the remaining approximately 70,000 acres. This conveyance resulted in the recognition of the remaining \$35 million (\$21 million after-tax) of previously deferred revenue to operations and maintenance expense in Dominion Gas' Consolidated Statements of Income.

In November 2014, Dominion Gas closed an agreement with a natural gas producer to convey over time approximately 24,000 acres of Marcellus Shale development rights underneath one of its natural gas storage fields. The agreement provides for payments to

Combined Notes to Consolidated Financial Statements, Continued

Dominion Gas, subject to customary adjustments, of approximately \$120 million over a period of four years, and an overriding royalty interest in gas produced from the acreage. In November 2014, Dominion Gas closed on the agreement and received proceeds of \$60 million associated with an initial conveyance of approximately 12,000 acres, resulting in a \$60 million (\$36 million after-tax) gain, recorded to operations and maintenance expense in Dominion Gas' Consolidated Statements of Income. In connection with that agreement, in 2016, Dominion Gas conveyed approximately 4,000 acres of Marcellus Shale development rights and received proceeds of \$10 million and an overriding royalty interest in gas produced from the acreage. These transactions resulted in a \$10 million (\$6 million after-tax) gain. The gains are included in other operations and maintenance expense in Dominion Gas' Consolidated Statements of Income.

In March 2015, Dominion Gas conveyed to a natural gas producer approximately 11,000 acres of Marcellus Shale development rights underneath one of its natural gas storage fields and received proceeds of \$27 million and an overriding royalty interest in gas produced from the acreage. This transaction resulted in a \$27 million (\$16 million after-tax) gain, included in other operations and maintenance expense in Dominion Gas' Consolidated Statements of Income.

In September 2015, Dominion Gas closed on an agreement with a natural gas producer to convey approximately 16,000 acres of Utica and Point Pleasant Shale development rights underneath one of its natural gas storage fields. The agreement provided for a payment to Dominion Gas, subject to customary adjustments, of \$52 million and an overriding royalty interest in gas produced from the acreage. In September 2015, Dominion Gas received proceeds of \$52 million associated with the conveyance of the acreage, resulting in a \$52 million (\$29 million after-tax) gain, included in other operations and maintenance expense in Dominion Gas' Consolidated Statements of Income.

NOTE 11. GOODWILL AND INTANGIBLE ASSETS

Goodwill

The changes in Dominion's and Dominion Gas' carrying amount and segment allocation of goodwill are presented below:

(1) Goodwill recorded at the Corporate and Other segment is allocated to the primary operating segments for goodwill impairment testing purposes.

(2) Goodwill amounts do not contain any accumulated impairment losses.

(3) Recast to reflect nonregulated retail energy marketing operations in the Dominion Energy segment.

(4) See Note 3 for discussion of Dominion's acquisitions.

Other Intangible Assets

The Companies' other intangible assets are subject to amortization over their estimated useful lives. Dominion's amortization expense for intangible assets was \$73 million, \$78 million and \$71 million for 2016, 2015 and 2014, respectively. In 2016, Dominion acquired \$124 million of intangible assets, primarily representing software, with an estimated weighted-average amortization period of approximately 15 years. Amortization expense for Virginia Power's intangible assets was \$29 million, \$25 million and \$24 million for 2016, 2015 and 2014, respectively. In 2016, Virginia Power acquired \$40 million of intangible assets, primarily representing software, with an estimated weighted-average amortization period of 12 years. Dominion Gas' amortization expense for intangible assets was \$6 million, \$18 million and \$17 million for 2016, 2015 and 2014, respectively. In 2016, Dominion Gas acquired \$20 million of intangible assets, primarily representing software, with an estimated weighted-average amortization period of approximately 12 years. The components of intangible assets are as follows:

At December 31,			2016			2015
	Gross			Gross		
	Carrying		mulated	Carrying		
	Amount	Amo	rtization	Amount	Amo	ortization

(1) Legislation enacted in Virginia in April 2014 requires Virginia Power to defer operation and maintenance costs incurred in connection with the refueling of any nuclear-powered generating plant. These deferred costs will be amortized over the refueling cycle, not to exceed 18 months.

- (2) Primarily reflects deferrals under the electric transmission FERC formula rate and the deferral of costs associated with certain current and prospective rider projects for Virginia Power and deferrals of costs associated with certain current and prospective rider projects for Dominion Gas. See Note 13 for more information.
- (3) Reflects unrecovered gas costs at regulated gas operations, which are recovered through filings with the applicable regulatory authority.
- (4) Reflects deferred fuel expenses for the Virginia and North Carolina jurisdictions of Dominion's and Virginia Power's generation operations. See Note 13 for more information.
- (5) Represents unrecognized pension and other postretirement employee benefit costs expected to be recovered through future rates generally over the expected remaining service period of plan participants by certain of Dominion's and Dominion Gas' rate-regulated subsidiaries.
- (6) Reflects amount related to the PJM transmission cost allocation matter. See Note 13 for more information.
- (7) As discussed under Derivative Instruments in Note 2, for jurisdictions subject to cost-based rate regulation, changes in the fair value of derivative instruments result in the recognition of regulatory assets or regulatory liabilities as they are expected to be recovered from or refunded to customers.
- (8) Amounts to be recovered through future rates to pay income taxes that become payable when rate revenue is provided to recover AFUDC-equity and depreciation of property, plant and equipment for which deferred income taxes were not recognized for ratemaking purposes, including amounts attributable to tax rate changes.
- (9) Ohio legislation under House Bill 95, which became effective in September 2011. This law updates natural gas legislation by enabling gas companies to include more up-to-date cost levels when filing rate cases. It also allows gas companies to seek approval of capital expenditure plans under which gas companies can recognize carrying costs on associated capital investments placed in service and can defer the carrying costs plus depreciation and property tax expenses for recovery from ratepayers in the future.
- (10) Under PIPP, eligible customers can make reduced payments based on their ability to pay. The difference between the customer's total bill and the PIPP plan amount is deferred and collected or returned annually under the PIPP rate adjustment clause according to East Ohio tariff provisions. See Note 13 for more information.

- (11) Rates charged to customers by the Companies' regulated businesses include a provision for the cost of future activities to remove assets that are expected to be incurred at the time of retirement.
- (12) Primarily reflects a regulatory liability representing amounts collected from Virginia jurisdictional customers and placed in external trusts (including income, losses and changes in fair value thereon) for the future decommissioning of Virginia Power's utility nuclear generation stations, in excess of the related AROs.

At December 31, 2016, \$303 million of Dominion's, \$230 million of Virginia Power's and \$31 million of Dominion Gas' regulatory assets represented past expenditures on which they do not currently earn a return. With the exception of the \$192 million PJM transmission cost allocation matter, the majority of these expenditures are expected to be recovered within the next two years.

NOTE 13. REGULATORY MATTERS

Regulatory Matters Involving Potential Loss Contingencies

As a result of issues generated in the ordinary course of business, the Companies are involved in various regulatory matters. Certain regulatory matters may ultimately result in a loss; however, as such matters are in an initial procedural phase, involve uncertainty as to the outcome of pending reviews or orders, and/or involve significant factual issues that need to be resolved, it is not possible for the Companies to estimate a range of possible loss. For matters for which the Companies cannot estimate a range of possible loss, a statement to this effect is made in the description of the matter. Other matters may have progressed sufficiently through the regulatory process such that the Companies are able to estimate a range of possible loss. For regulatory matters for which the Companies are able to reasonably estimate a range of possible losses, an estimated range of possible loss is provided, in excess of the accrued liability (if any) for such matters. Any estimated range is based on currently available information, involves elements of judgment and significant uncertainties and may not represent the Companies' maximum possible loss exposure. The circumstances of such regulatory matters will change from time to time and actual results may vary significantly from the current estimate. For current matters not specifically reported below, management does not anticipate that the outcome from such matters would have a material effect on the Companies' financial position, liquidity or results of operations.

FERC-ELECTRIC

Under the Federal Power Act, FERC regulates wholesale sales and transmission of electricity in interstate commerce by public utilities. Dominion's merchant generators sell electricity in the PJM, MISO, CAISO and ISO-NE wholesale markets, and to wholesale purchasers in the states of Virginia, North Carolina, Indiana, Connecticut, Tennessee, Georgia, California and Utah, under Dominion's market-based sales tariffs authorized by FERC or pursuant to FERC authority to sell as a qualified facility. Virginia Power purchases and, under its FERC market-based rate authority, sells electricity in the wholesale market. In addition, Virginia Power has FERC approval of a tariff to sell wholesale power at capped rates based on its embedded cost of generation. This cost-based sales tariff could be used to sell to loads within or outside Virginia Power's service territory. Any such sales would be voluntary.

Rates

In April 2008, FERC granted an application for Virginia Power's electric transmission operations to establish a forward-looking formula rate mechanism that updates transmission rates on an annual basis and approved an ROE of 11.4%, effective as of January 1, 2008. The formula rate is designed to recover the expected revenue requirement for each calendar year and is updated based on actual costs. The FERC-approved formula method, which is based on projected costs, allows Virginia Power to earn a current return on its growing investment in electric transmission infrastructure.

In March 2010, ODEC and North Carolina Electric Membership Corporation filed a complaint with FERC against Virginia Power claiming that \$223 million in transmission costs related to specific projects were unjust, unreasonable and unduly discriminatory or preferential and should be excluded from Virginia Power's transmission formula rate. In October 2010, FERC issued an order dismissing the complaint in part and established hearings and settlement procedures on the remaining part of the complaint. In February 2012, Virginia Power submitted to FERC a settlement agreement to resolve all issues set for hearing. The settlement was accepted by FERC in May 2012 and provides for payment by Virginia Power to the transmission customer parties collectively of \$250,000 per year for ten years and resolves all matters other than allocation of the incremental cost of certain underground transmission facilities.

In March 2014, FERC issued an order excluding from Virginia Power's transmission rates for wholesale transmission customers located outside Virginia the incremental costs of undergrounding certain transmission line projects. FERC found it is not just and reasonable for non-Virginia wholesale transmission customers to be allocated the incremental costs of undergrounding the facilities because the projects are a direct result of Virginia legislation and Virginia Commission pilot programs intended to benefit the citizens of Virginia. The order is retroactively effective as of March 2010 and will cause the reallocation of the costs charged to wholesale transmission customers with loads outside Virginia to wholesale transmission customers with loads in Virginia. FERC determined that there was not sufficient evidence on the record to determine the magnitude of the underground increment and held a hearing to determine the appropriate amount of undergrounding cost to be allocated to each wholesale transmission customer in Virginia. While Virginia Power cannot predict the outcome of the hearing, it is not expected to have a material effect on results of operations.

PJM Transmission Rates

In April 2007, FERC issued an order regarding its transmission rate design for the allocation of costs among PJM transmission customers, including Virginia Power, for transmission service provided by PJM. For new PJMplanned transmission facilities that operate at or above 500 kV, FERC established a PJM regional rate design where customers pay according to each customer's share of the region's load. For recovery of costs of existing facilities, FERC approved the existing methodology whereby a customer pays the cost of facilities located in the same zone as the customer. A number of parties appealed the order to the U.S. Court of Appeals for the Seventh Circuit. In August 2009, the court issued its decision affirming the FERC order with regard to the existing facilities, but remanded to FERC the issue of the cost allocation associated with the new facilities 500 kV and above for further consideration by FERC. On remand, FERC reaffirmed its earlier decision to allocate the costs of new facilities 500 kV and above according to the customer's share of the region's load. A number of parties filed appeals of the order to the U.S. Court of Appeals for the Seventh Circuit. In June 2014, the court again remanded the cost allocation issue to FERC. In December 2014, FERC issued an order setting an evidentiary hearing and settlement proceeding regarding the cost allocation issue. The hearing only concerns the costs of new facilities approved by PJM prior to February 1, 2013. Transmission facilities approved after February 1, 2013 are allocated on a hybrid cost allocation method approved by FERC and not subject to any court review.

In June 2016, PJM, the PJM transmission owners and state commissions representing substantially all of the load in the PJM market submitted a settlement to FERC to resolve the outstanding issues regarding this matter. Under the terms of the settlement, Virginia Power would be required to pay approximately \$200 million to PJM over the next 10 years. Although the settlement agreement has not been accepted by FERC, and the settlement is opposed by a small group of parties to the proceeding, Virginia Power believes it is probable it will be required to make payment as an outcome of the settlement. Accordingly, as of December 31, 2016, Virginia Power has a contingent liability of \$200 million in other deferred credits and other liabilities, which is offset by a \$192 million regulatory asset for the amount that will be recovered through retail rates in Virginia. The remaining \$8 million was recorded in other operations and maintenance expense, during 2015, in the Consolidated Statements of Income.

Other Regulatory Matters

ELECTRIC REGULATION IN VIRGINIA

The Regulation Act enacted in 2007 instituted a cost-of-service rate model, ending Virginia's planned transition to retail competition for electric supply service to most classes of customers.

The Regulation Act authorizes stand-alone rate adjustment clauses for recovery of costs for new generation projects, FERC-approved transmission costs, underground distribution lines, environmental compliance, conservation and energy efficiency programs and renewable energy programs, and also contains statutory provisions directing Virginia Power to file annual fuel cost recovery cases with the Virginia Commission. As amended, it provides for enhanced returns on capital expenditures on specific newly-proposed generation projects.

If the Virginia Commission's future rate decisions, including actions relating to Virginia Power's rate adjustment clause filings, differ materially from Virginia Power's expectations, it may adversely affect its results of operations, financial condition and cash flows.

Regulation Act Legislation

In February 2015, the Virginia Governor signed legislation into law which will keep Virginia Power's base rates unchanged until at least December 1, 2022. In addition, no biennial reviews will be conducted by the Virginia Commission for the five successive

OFFICIAL COPY

12-month test periods beginning January 1, 2015, and ending December 31, 2019. The legislation states that Virginia Power's 2015 biennial review, filed in March 2015, would proceed for the sole purpose of reviewing and determining whether any refunds are due to customers based on earnings performance for generation and distribution services during the 2013 and 2014 test periods. In addition the legislation requires the Virginia Commission to conduct proceedings in 2017 and 2019 to determine the utility's ROE for use in connection with rate adjustment clauses and requires utilities to file integrated resource plans annually rather than biennially. In November 2015, the Virginia Commission ordered testimony, briefs and a separate bifurcated hearing in Virginia Power's then-pending Rider B, R, S, and W cases on whether the Virginia Commission can adjust the ROE applicable to these rate adjustment clauses prior to 2017. In February 2016, the Virginia Commission issued final orders in these cases, stating that it could adjust the ROE and setting a base ROE of 9.6% for the projects. After separate, additional bifurcated hearings, the Virginia Commission issued final orders setting base ROEs of 9.6% in March 2016 for Rider GV, in April 2016 for Riders C1A and C2A, in June 2016 for Riders BW and US-2, and in August 2016 for Rider U. In February 2017, the Virginia Commission issued final orders setting base ROEs of 9.4% for Riders B, R, S, W, and GV effective April 1, 2017.

In February 2016, certain industrial customers of APCo petitioned the Virginia Commission to issue a declaratory judgment that Virginia legislation enacted in 2015 keeping APCo's base rates unchanged until at least 2020 (and Virginia Power's base rates unchanged until at least 2022) is unconstitutional, and to require APCo to make biennial review filings in 2016 and 2018. Virginia Power intervened to support the constitutionality of this legislation. In July 2016, the Virginia Commission held in a divided opinion that this legislation is constitutional, and the industrial customers appealed this order to the Supreme Court of Virginia. In November 2016, the Supreme Court of Virginia s a matter of right and consolidated it for oral argument with other similar appeals from the Virginia Commission's order. These appeals are pending.

2015 Biennial Review

Pursuant to the Regulation Act, in March 2015, Virginia Power filed its base rate case and schedules for the Virginia Commission's 2015 biennial review of Virginia Power's rates, terms and conditions. Per legislation enacted in February 2015, this biennial review was limited to reviewing Virginia Power's earnings on rates for generation and distribution services for the combined 2013 and 2014 test period, and determining whether credits are due to customers in the event Virginia Power's earnings exceeded the earnings band determined in the 2013 Biennial Review Order. In November 2015, the Virginia Commission issued the 2015 Biennial Review Order.

After deciding several contested regulatory earnings adjustments, the Virginia Commission ruled that Virginia Power earned on average an ROE of approximately 10.89% on its generation and distribution services for the combined 2013 and 2014 test periods. Because this ROE was more than 70 basis points above Virginia Power's authorized ROE of 10.0%, the Virginia Commission ordered that approximately \$20 million in excess earnings be credited to customer bills based on usage in 2013 and

2014 over a six-month period beginning within 60 days of the 2015 Biennial Review Order. Based upon 2015 legislation keeping Virginia Power's base rates unchanged until at least December 1, 2022, the Virginia Commission did not order certain existing rate adjustment clauses to be combined with Virginia Power's base rates. The Virginia Commission did not determine whether Virginia Power had a revenue deficiency or sufficiency when projecting the annual revenues generated by base rates to the revenues required to recover costs of service and earn a fair return. In December 2015, a group of large industrial customers filed notices of appeal with the Supreme Court of Virginia from both the 2015 Biennial Review Order and the Virginia Commission's order denying their petition for rehearing or reconsideration. In April 2016, the Supreme Court of Virginia granted these appeals as a matter of right. Also in April 2016, the Attorney General filed an unopposed motion to suspend appellate briefing pending the outcome of a separate case at the Virginia Commission raising the same issues. In May 2016, the Supreme Court of Virginia denied the Attorney General's unopposed motion to suspend briefing in the previously granted appeals from the Virginia Commission's orders. The Supreme Court of Virginia later granted leave for the industrial customer appellants to withdraw their appeals, thus concluding this matter.

Virginia Fuel Expenses

In May 2016, Virginia Power submitted its annual fuel factor to the Virginia Commission to recover an estimated \$1.4 billion in Virginia jurisdictional projected fuel expenses for the rate year beginning July 1, 2016. Virginia Power's proposed fuel rate represented a fuel revenue decrease of \$286 million when applied to projected kilowatt-hour sales for the period July 1, 2016 to June 30, 2017. In October 2016, the Virginia Commission approved Virginia Power's proposed fuel rate.

Solar Facility Projects

In February 2017, Virginia Power received approval from the Virginia Commission for a CPCN to construct and operate the Remington solar facility and related distribution interconnection facilities. The total estimated cost of the Remington solar facility is approximately \$47 million, excluding financing costs. The facility is now the subject of a public-private partnership whereby the Commonwealth of Virginia, a non-jurisdictional customer, will compensate Virginia Power for the facility's net electrical energy output, and Microsoft Corporation will purchase all environmental attributes (including renewable energy certificates) generated by the facility. There is no rate adjustment clause associated with this CPCN, nor will any costs of the project be recovered from jurisdictional customers.

In October 2015, Virginia Power filed an application with the Virginia Commission for CPCNs to construct and operate the Scott Solar, Whitehouse, and Woodland solar facilities and related distribution-level interconnection facilities. Virginia Power also applied for approval of Rider US-2 to recover the costs of these projects. In June 2016, the Virginia Commission granted the requested CPCNs and approved a \$4 million revenue requirement, subject to true-up on a cost-of-service basis using a 9.6% ROE for Rider US-2 for the rate year beginning September 1, 2016. These projects were placed into service in

Jun 22 2018

December 2016, and increased Dominion's renewable generation by a combined 56 MW at a total cost of approximately \$130 million, excluding financing costs. See below for further information on Rider US-2.

In August 2016, Virginia Power filed an application with the Virginia Commission for a CPCN to construct and operate the Oceana solar facility and related distribution interconnection facilities on land owned by the U.S. Navy. The facility would begin commercial operations in late 2017 and increase Dominion's renewable generation by approximately 18 MW at an estimated cost of approximately \$40 million, excluding financing costs. The facility is the subject of a public-private partnership whereby the Commonwealth of Virginia, a non-jurisdictional customer, will compensate Virginia Power for the facility's net electrical energy output. Virginia Power will retire renewable energy certificates on the Commonwealth's behalf in an amount equal to those generated by the facility. There is no rate adjustment clause associated with this CPCN filing, nor will any costs of the project be recovered from jurisdictional customers. This case is pending.

Rate Adjustment Clauses

Below is a discussion of significant riders associated with various Virginia Power projects:

- The Virginia Commission previously approved Rider T1 concerning transmission rates. In May 2016, Virginia Power proposed a \$639 million total revenue requirement for the rate year beginning September 1, 2016, which represents a \$1 million increase over the revenues projected to be produced during the rate year under current rates. In July 2016, the Virginia Commission approved Virginia Power's proposed total revenue requirement.
- The Virginia Commission previously approved Rider S in conjunction with the Virginia City Hybrid Energy Center. In February 2016, the Virginia Commission approved a \$251 million revenue requirement, subject to true-up, for the rate year beginning April 1, 2016. It also established a 10.6% ROE for Rider S effective April 1, 2016. In June 2016, Virginia Power proposed a \$254 million revenue requirement for the rate year beginning April 1, 2017, which represents a \$3 million increase over the previous year. In February 2017, the Virginia Commission established a 10.4% ROE for Rider S effective April 1, 2017. This case is pending.
- The Virginia Commission previously approved Rider W in conjunction with Warren County. In February 2016, the Virginia Commission approved a \$118 million revenue requirement, subject to true-up, for the rate year beginning April 1, 2016. It also established a 10.6% ROE for Rider W effective April 1, 2016. In June 2016, Virginia Power proposed a \$126 million revenue requirement for the rate year beginning April 1, 2017, which represents an \$8 million increase over the previous year. In February 2017, the Virginia Commission established a 10.4% ROE for Rider W effective April 1, 2017. This case is pending.
- The Virginia Commission previously approved Rider R in conjunction with Bear Garden. In February 2016, the Virginia Commission approved a \$74 million revenue requirement, subject to true-up, for the rate year beginning

April 1, 2016. It also established a 10.6% ROE for Rider R effective April 1, 2016. In June 2016, Virginia Power proposed a \$75 million revenue requirement for the rate year beginning April 1, 2017, which represents a \$1 million increase over the previous year. In February 2017, the Virginia Commission established a 10.4% ROE for Rider R effective April 1, 2017. This case is pending.

- The Virginia Commission previously approved Rider B in conjunction with the conversion of three power stations to biomass. In February 2016, the Virginia Commission approved a \$30 million revenue requirement for the rate year beginning April 1, 2016. It also established an 11.6% ROE for Rider B effective April 1, 2016. In June 2016, Virginia Power proposed a \$28 million revenue requirement for the rate year beginning April 1, 2017, which represents a \$2 million decrease versus the previous year. In February 2017, the Virginia Commission established an 11.4% ROE for Rider B effective April 1, 2017. This case is pending.
- The Virginia Commission previously approved Rider U in conjunction with cost recovery to move certain electric distribution facilities underground as authorized by prior Virginia legislation. In August 2016, the Virginia Commission approved a net \$20 million revenue requirement and a 9.6% ROE for the rate year beginning September 1, 2016, and an additional \$2 million in credits to offset approved revenue requirements for Phase One for each of the 2017-2018 and 2018-2019 rate years. The order limited the total investment in Phase One of Virginia Power's proposed program to \$140 million, with \$123 million recoverable through Rider U. In December 2016, Virginia Power proposed a total \$31 million revenue requirement for Phase One and Phase Two costs for the rate year beginning September 1, 2017. Virginia Power's estimated total investment in Phase Two is \$110 million. This case is pending.
- The Virginia Commission previously approved Riders C1A and C2A in connection with cost recovery for DSM programs. In April 2016, the Virginia Commission approved a \$46 million revenue requirement, subject to true-up, for the rate year beginning May 1, 2016. It also established a 9.6% ROE for Riders C1A and C2A effective May 1, 2016. The Virginia Commission approved one new energy efficiency program at a reduced cost cap, denied a second energy efficiency program, and approved the extension of an existing peak shaving program recovered in base rates at no additional incremental cost. In October 2016, Virginia Power proposed a total revenue requirement of \$45 million for the rate year beginning July 1, 2017. Virginia Power also proposed two new energy efficiency programs for Virginia Commission approval with a requested five-year cost cap of \$178 million. Virginia Power further proposed to extend an existing energy efficiency program for an additional two years under current funding, and an existing peak shaving program for an additional five years with an additional \$5 million cost cap. This case is pending.
- The Virginia Commission previously approved Rider BW in conjunction with Brunswick County. In June 2016, the Virginia Commission approved a \$119 million revenue requirement for the rate year beginning September 1, 2016. It also established a 10.6% ROE for Rider BW effective September 1, 2016. In October 2016, Virginia Power proposed a

\$134 million revenue requirement for the rate year beginning September 1, 2017, which represents a \$15 million increase over the previous year. This case is pending.

- The Virginia Commission previously approved Rider US-2 in conjunction with the Scott Solar, Whitehouse, and Woodland solar facilities. In June 2016, the Virginia Commission approved a \$4 million revenue requirement for the rate year beginning September 1, 2016. It also established a 9.6% ROE for Rider US-2 effective September 1, 2016. In October 2016, Virginia Power proposed a \$10 million revenue requirement for the rate year beginning September 1, 2017, which represents a \$6 million increase over the previous year. This case is pending.
- In July 2015, Virginia Power filed an application with the Virginia Commission for a CPCN to construct and operate Greensville County and related transmission interconnection facilities. Virginia Power also applied for approval of Rider GV to recover the costs of Greensville County. In March 2016, the Virginia Commission granted the requested CPCN and approved a \$40 million revenue requirement for the rate year beginning April 1, 2016. It also established a 9.6% ROE for Rider GV effective April 1, 2016. In June 2016, Virginia Power proposed an \$89 million revenue requirement for the rate year beginning April 1, 2017, which represents a \$49 million increase over the previous year. In February 2017, the Virginia Commission established a 9.4% ROE for Rider GV effective April 1, 2017. This matter is pending.

Electric Transmission Projects

In November 2013, the Virginia Commission issued an order granting Virginia Power a CPCN to construct approximately 7 miles of new overhead 500 kV transmission line from the existing Surry switching station in Surry County to a new Skiffes Creek switching station in James City County, and approximately 20 miles of new 230 kV transmission line in James City County, York County, and the City of Newport News from the proposed new Skiffes Creek switching station to Virginia Power's existing Whealton substation in the City of Hampton. In February 2014, the Virginia Commission granted reconsideration requested by Virginia Power and issued an Order Amending Certificate. Several appeals were filed with the Supreme Court of Virginia. In April 2015, the Supreme Court of Virginia issued its opinion in the consolidated appeals of the Virginia Commission's order granting a CPCN for the Skiffes Creek transmission line and related facilities. The Supreme Court of Virginia unanimously affirmed all but one of the alleged grounds for appeal. The court approved the proposed project including the proposed route for a 500 kV overhead transmission line from Surry to the Skiffes Creek switching station site. The court reversed and remanded the Virginia Commission's determination in one set of appeals that the Skiffes Creek switching station was a transmission line for purposes of statutory exemption from local zoning ordinances. In May 2015, the Supreme Court of Virginia denied separate petitions filed by Virginia Power and the Virginia Commission to rehear its ruling regarding the Skiffes Creek switching station. Pending receipt of remaining required permits and approvals, Virginia Power expects to construct the project.

Virginia Power previously filed an application with the Virginia Commission for a CPCN to construct and operate in Loudoun County, Virginia, a new approximately 230 kV Poland Road substation, and a new approximately four mile overhead 230 kV double circuit transmission line between the existing 230 kV Loudoun-Brambleton line and the Poland Road substation. In August 2016, the Virginia Commission granted a CPCN to construct and operate the project along a revised route. The total estimated cost of the project is approximately \$55 million.

In November 2015, Virginia Power filed an application with the Virginia Commission for a CPCN to convert an existing transmission line to 230 kV in Prince William County, Virginia, and Loudoun County, Virginia, and to construct and operate a new approximately five mile overhead 230 kV double circuit transmission line between a tap point near the Gainesville substation and a new to-be-constructed Haymarket substation. The total estimated cost of the project is approximately \$55 million. This case is pending.

In November 2015, Virginia Power filed an application with the Virginia Commission for a CPCN to construct and operate in multiple Virginia counties an approximately 38 mile overhead 230 kV transmission line between the Remington and Gordonsville substations, along with associated facilities. The total estimated cost of the project is approximately \$105 million. This case is pending.

In February 2016, the Virginia Commission issued an order granting Virginia Power a CPCN to construct and operate the Remington CT-Warrenton 230 kV double circuit transmission line, the Vint Hill-Wheeler and Wheeler-Gainesville 230 kV lines and the 230 kV Vint Hill and Wheeler switching stations along Virginia Power's proposed route. The total estimated cost of the project is approximately \$110 million.

In March 2016, Virginia Power filed an application with the Virginia Commission for a CPCN to rebuild and operate in multiple Virginia counties approximately 33 miles of the existing 500 kV transmission line between the Cunningham switching station and the Dooms substation, along with associated station work. The total estimated cost of the project is approximately \$60 million. This case is pending.

In August 2016, Virginia Power filed an application with the Virginia Commission for a CPCN to rebuild and operate in multiple Virginia counties approximately 28 miles of the existing 500 kV transmission line between the Carson switching station and a terminus located near the Rogers Road switching station under construction in Greensville County, Virginia, along with associated work at the Carson switching station. The total estimated cost of the project is approximately \$55 million. This case is pending.

In January 2017, Virginia Power filed an application with the Virginia Commission for a CPCN to rebuild and rearrange its Idylwood substation in Fairfax County, Virginia. The total estimated cost of the project is approximately \$110 million. This case is pending.

North Anna

Virginia Power is considering the construction of a third nuclear unit at a site located at North Anna nuclear power station. If Virginia Power decides to build a new unit, it must first receive a COL from the NRC, approval of the Virginia Commission and certain environmental permits and other approvals. The COL is

expected in 2017. Virginia Power has not yet committed to building a new nuclear unit at North Anna nuclear power station.

Requests by BREDL for a contested NRC hearing on Virginia Power's COL application have been dismissed, and in September 2016, the U.S. Court of Appeals for the D.C. Circuit dismissed with prejudice petitions for judicial review that BREDL and other organizations had filed challenging the NRC's reliance on a rule generically assessing the environmental impacts of continued onsite storage of spent nuclear fuel in various licensing proceedings, including Virginia Power's COL proceeding. This dismissal followed the Court's June 2016 decision in New York v. NRC, upholding the NRC's continued storage rule and August 2016 denial of requests for rehearing en banc. Therefore, the contested portion of the COL proceedings. This mandatory NRC hearing is anticipated to occur in the first half of 2017 and will be uncontested.

In August 2016, Virginia Power received a 60-day notice of intent to sue from the Sierra Club alleging Endangered Species Act violations. The notice alleges that the U.S. Army Corps of Engineers failed to conduct adequate environmental and consultation reviews, related to a potential third nuclear unit located at North Anna, prior to issuing a CWA section 404 permit to Virginia Power in September 2011. No lawsuit has been filed and in November 2016, the Army Corps of Engineers suspended the section 404 permit while it gathers additional information. This permitting issue is not expected to affect the NRC's issuance of the COL. Virginia Power is currently unable to make an estimate of the potential impacts to its consolidated financial statements related to this matter.

NORTH CAROLINA REGULATION

In March 2016, Virginia Power filed its base rate case and schedules with the North Carolina Commission. Virginia Power proposed a non-fuel, base rate increase of \$51 million effective November 1, 2016 with an ROE of 10.5%. In October 2016, Virginia Power entered into a stipulation and settlement agreement for a non-fuel, base rate increase of \$35 million with an ROE of 9.9% effective November 1, 2016, on a temporary basis subject to refund, with any permanent rates ordered by the North Carolina Commission effective January 1, 2017. In December 2016, the North Carolina Commission approved the stipulation and settlement agreement.

In August 2016, Virginia Power submitted its annual filing to the North Carolina Commission to adjust the fuel component of its electric rates. Virginia Power proposed a total \$36 million decrease to the fuel component of its electric rates for the rate year beginning January 1, 2017. In December 2016, the North Carolina Commission approved the requested decrease and an additional \$1 million reduction to Virginia Power's fuel rates.

OHIO REGULATION

PIR Program

In 2008, East Ohio began PIR, aimed at replacing approximately 25% of its pipeline system. In March 2015, East Ohio filed an application with the Ohio Commission requesting approval to extend the PIR program for an additional five years and to increase the annual capital investment, with corresponding increases in the annual rate-increase caps. In September 2016, the Ohio Commission approved a stipulation filed jointly by East Ohio and the Staff

of the Ohio Commission to settle East Ohio's pending application. As requested, the PIR Program and associated cost recovery will continue for another five-year term, calendar years 2017 through 2021, and East Ohio will be permitted to increase its annual capital expenditures to \$200 million by 2018 and 3% per year thereafter subject to the cost recovery rate increase caps proposed by East Ohio. Costs associated with calendar year 2016 investment will be recovered under the existing terms.

In February 2016, East Ohio filed an application to adjust the PIR cost recovery for 2015 costs. The filing reflects gross plant investment for 2015 of \$171 million, cumulative gross plant investment of \$1 billion and a revenue requirement of \$131 million. This application was approved by the Ohio Commission in April 2016.

AMR Program

In 2007, East Ohio began installing automated meter reading technology for its 1.2 million customers in Ohio. The AMR program approved by the Ohio Commission was completed in 2012. Although no further capital investment will be added, East Ohio is approved to recover depreciation, property taxes, carrying charges and a return until East Ohio has another rate case.

In February 2016, East Ohio filed an application to adjust the AMR cost recovery for costs incurred during the calendar year 2015. The filing reflects a revenue requirement of approximately \$7 million. This application was approved by the Ohio Commission in April 2016.

PIPP Plus Program

Under the Ohio PIPP Plus Program, eligible customers can make reduced payments based on their ability to pay their bill. The difference between the customer's total bill and the PIPP amount is deferred and collected under the PIPP Rider in accordance with the rules of the Ohio Commission. In July 2016, East Ohio's annual update of the PIPP Rider was automatically approved by the Ohio Commission after a 45-day waiting period from the date of the filing. The revised rider rate reflects the recovery over the twelve-month period from July 2016 through June 2017 of projected deferred program costs of approximately \$32 million from April 2016 through June 2017, net of a refund for over-recovery of accumulated arrearages of approximately \$28 million as of March 31, 2016.

UEX Rider

East Ohio has approval for a UEX Rider through which it recovers the bad debt expense of most customers not participating in the PIPP Plus Program. The UEX Rider is adjusted annually to achieve dollar for dollar recovery of East Ohio's actual write-offs of uncollectible amounts. In August 2016, the Ohio Commission approved an increase to East Ohio's UEX Rider, which reflects a refund of over-recovered accumulated bad debt expense of approximately \$8 million as of March 31, 2016, and recovery of prospective net bad debt expense projected to total approximately \$19 million for the twelve-month period from April 2016 to March 2017.

PSMP

In November 2016, the Ohio Commission approved East Ohio's request to defer the operation and maintenance costs associated with implementing PSMP of up to \$15 million per year.

Combined Notes to Consolidated Financial Statements, Continued

WEST VIRGINIA REGULATION

In May 2016, Hope filed a PREP application with the West Virginia Commission requesting approval of a projected capital investment for 2017 of \$27 million as part of a total five-year projected capital investment of \$152 million. In September 2016, Hope reached a settlement with all parties to the case agreeing to new PREP customer rates, for the year beginning November 1, 2016, that provide for annual projected revenue of \$2 million related to capital investments of \$20 million and \$27 million for 2016 and 2017, respectively. In October 2016, the West Virginia Commission approved the settlement.

FERC-GAS

Cove Point

In November 2016, pursuant to the terms of a previous settlement, Cove Point filed a general rate case for its FERC-jurisdictional services, with 23 proposed rates to be effective January 1, 2017. Cove Point proposed an annual cost-of-service of approximately \$140 million. In December 2016, FERC accepted a January 1, 2017 effective date for all proposed rates but five which were suspended to be effective June 1, 2017.

NOTE 14. ASSET RETIREMENT OBLIGATIONS

AROs represent obligations that result from laws, statutes, contracts and regulations related to the eventual retirement of certain of the Companies' long-lived assets. Dominion's and Virginia Power's AROs are primarily associated with the decommissioning of their nuclear generation facilities and ash pond and landfill closures. Dominion Gas' AROs primarily include plugging and abandonment of gas and oil wells and the interim retirement of natural gas gathering, transmission, distribution and storage pipeline components.

The Companies have also identified, but not recognized, AROs related to the retirement of Dominion's LNG facility, Dominion's and Dominion Gas' storage wells in their underground natural gas storage network, certain Virginia Power electric transmission and distribution assets located on property with easements, rights of way, franchises and lease agreements, Virginia Power's hydroelectric generation facilities and the abatement of certain asbestos not expected to be disturbed in Dominion's and Virginia Power's generation facilities. The Companies currently do not have sufficient information to estimate a reasonable range of expected retirement dates for any of these assets since the economic lives of these assets can be extended indefinitely through regular repair and maintenance and they currently have no plans to retire or dispose of any of these assets. As a result, a settlement date is not determinable for these assets and AROs for these assets will not be reflected in the Consolidated Financial Statements until sufficient information becomes available to determine a reasonable estimate of the fair value of the activities to be performed. The Companies continue to monitor operational and strategic developments to identify if sufficient information exists to reasonably estimate a retirement date for these assets. The changes to AROs during 2015 and 2016 were as follows:

	AITIOUIIL

AROs at December 31, 2016(4)	\$ 156

(1) Primarily reflects future ash pond and landfill closure costs at certain utility generation facilities. See Note 22 for further information.

(2) Includes \$216 million and \$249 million reported in other current liabilities at December 31, 2015, and 2016, respectively.

(3) Primarily reflects AROs assumed in the Dominion Questar Combination. See Note 3 for further information.

(4) Includes \$137 million and \$147 million reported in other deferred credits and other liabilities, with the remainder recorded in other current liabilities, at December 31, 2015 and 2016, respectively.

Dominion and Virginia Power have established trusts dedicated to funding the future decommissioning of their nuclear plants. At December 31, 2016 and 2015, the aggregate fair value of Dominion's trusts, consisting primarily of equity and debt securities, totaled \$4.5 billion and \$4.2 billion, respectively. At December 31, 2016 and 2015, the aggregate fair value of Virginia Power's trusts, consisting primarily of debt and equity securities, totaled \$2.1 billion and 1.9 billion, respectively.

NOTE 15. VARIABLE INTEREST ENTITIES

The primary beneficiary of a VIE is required to consolidate the VIE and to disclose certain information about its significant variable interests in the VIE. The primary beneficiary of a VIE is the entity that has both 1) the power to direct the activities that most significantly impact the entity's economic performance and 2) the obligation to absorb losses or receive benefits from the entity that could potentially be significant to the VIE.

Dominion

At December 31, 2016, Dominion owns the general partner, 50.9% of the common and subordinated units and 37.5% of the convertible preferred interests in Dominion Midstream, which owns a preferred equity interest and the general partner interest in Cove Point. Additionally, Dominion owns the manager and 67% of the membership interest in certain merchant solar facilities, as discussed in Note 2. Dominion has concluded that these entities are VIEs due to the limited partners or members lacking the characteristics of a controlling financial interest. In addition, in 2016 Dominion created a wholly owned subsidiary, SBL Holdco, as a holding company of its interest in the VIE merchant solar facilities and accordingly SBL Holdco is a VIE. Dominion is the primary beneficiary of Dominion Midstream, SBL Holdco and the merchant solar facilities, and Dominion Midstream is the primary beneficiary of Cove Point, as they have the power to direct the activities that most significantly impact their economic performance as well as the obligation to absorb losses and benefits which could be significant to them. Dominion's securities due within one year and long-term debt include \$17 million and \$377 million, respectively, of debt issued in 2016 by SBL Holdco net of issuance costs that is nonrecourse to Dominion and is secured by SBL Holdco's interest in the merchant solar facilities.

Dominion owns a 48% membership interest in Atlantic Coast Pipeline. See Note 9 for more details regarding the nature of this entity. Dominion concluded that Atlantic Coast Pipeline is a VIE because it has insufficient equity to finance its activities without additional subordinated financial support. Dominion has concluded that it is not the primary beneficiary of Atlantic Coast Pipeline as it does not have the power to direct the activities of Atlantic Coast Pipeline that most significantly impact its economic performance, as the power to direct is shared among multiple unrelated parties. Dominion is obligated to provide capital contributions based on its ownership percentage. Dominion's maximum exposure to loss is limited to its current and future investment.

Dominion and Virginia Power

Dominion's and Virginia Power's nuclear decommissioning trust funds and Dominion's rabbi trusts hold investments in limited partnerships or similar type entities (see Note 9 for further details). Dominion and Virginia Power concluded that these partnership investments are VIEs due to the limited partners lacking the characteristics of a controlling financial interest. Dominion and Virginia Power have concluded neither is the primary beneficiary as they do not have the power to direct the activities that most significantly impact these VIEs' economic performance. Dominion and Virginia Power are obligated to provide capital contributions to the partnerships as required by each partnership agreement based on their ownership percentages. Dominion and Virginia Power's maximum exposure to loss is limited to their current and future investments.

Dominion and Dominion Gas

Dominion previously concluded that Iroquois was a VIE because a non-affiliated Iroquois equity holder had the ability during a limited period of time to transfer its ownership interests to another Iroquois equity holder or its affiliate. At the end of the first quarter of 2016, such right no longer existed and, as a result, Dominion concluded that Iroquois is no longer a VIE.

Virginia Power

Virginia Power had long-term power and capacity contracts with five non-utility generators, which contain certain variable pricing mechanisms in the form of partial fuel reimbursement that Virginia Power considers to be variable interests. Contracts with two of these non-utility generators expired during 2015 leaving a remaining aggregate summer generation capacity of approximately 418 MW. After an evaluation of the information provided by these entities, Virginia Power was unable to determine whether they were VIEs. However, the information they provided, as well as Virginia Power's knowledge of generation facilities in Virginia, enabled Virginia Power to conclude that, if they were VIEs, it would not be the primary beneficiary. This conclusion reflects Virginia Power's determination that its variable interests do not convey the power to direct the most significant activities that impact the economic performance of the entities during the remaining terms of Virginia Power's contracts and for the years the entities are expected to operate after its contractual relationships expire. The remaining contracts expire at various

dates ranging from 2017 to 2021. Virginia Power is not subject to any risk of loss from these potential VIEs other than its remaining purchase commitments which totaled \$287 million as of December 31, 2016. Virginia Power paid \$144 million, \$200 million, and \$223 million for electric capacity and \$31 million, \$83 million, and \$138 million for electric energy to these entities for the years ended December 31, 2016, 2015 and 2014, respectively.

Dominion Gas

DTI has been engaged to oversee the construction of, and to subsequently operate and maintain, the projects undertaken by Atlantic Coast Pipeline based on the overall direction and oversight of Atlantic Coast Pipeline's members. An affiliate of DTI holds a membership interest in Atlantic Coast Pipeline, therefore DTI is considered to have a variable interest in Atlantic Coast Pipeline. The members of Atlantic Coast Pipeline hold the power to direct the construction, operations and maintenance activities of the entity. DTI has concluded it is not the primary beneficiary of Atlantic Coast Pipeline as it does not have the power to direct the activities of Atlantic Coast Pipeline that most significantly impact its economic performance. DTI has no obligation to absorb any losses of the VIE. See Note 24 for information about associated related party receivable balances.

Virginia Power and Dominion Gas

Virginia Power and Dominion Gas purchased shared services from DRS, an affiliated VIE, of \$346 million and \$123 million, \$318 million and \$115 million, and \$335 million and \$106 million for the years ended December 31, 2016, 2015 and 2014, respectively. Virginia Power and Dominion Gas determined that neither is the primary beneficiary of DRS as neither has both the power to direct the activities that most significantly impact its economic performance as well as the obligation to absorb losses and benefits which could be significant to it. DRS provides accounting, legal, finance and certain administrative and technical services to all Dominion Gas. Virginia Power and Dominion Gas have no obligation to absorb more than their allocated shares of DRS costs.

NOTE 16. SHORT-TERM DEBT AND CREDIT AGREEMENTS

The Companies use short-term debt to fund working capital requirements and as a bridge to long-term debt financings. The levels of borrowing may vary significantly during the course of the year, depending upon the timing and amount of cash requirements not satisfied by cash from operations. In January 2016, Dominion expanded its short-term funding resources through a \$1.0 billion increase to one of its joint revolving credit facility limits. In addition, Dominion utilizes cash and letters of credit to fund collateral requirements. Collateral requirements are impacted by commodity prices, hedging levels, Dominion's credit ratings and the credit quality of its counterparties.

Dominion

Commercial paper and letters of credit outstanding, as well as capacity available under credit facilities, were as follows:

		Outstanding Commercial		Outstanding Letters of		1	acility
	Facility					С	apacity
	Limit		Paper		Credit	A۱	ailable
(millions)							
At December 31, 2016							
Joint revolving credit facility(1)(2)	\$5,000	\$	3,155	\$	_	\$1	,845
Joint revolving credit facility(1)	500		—		85		415
Total	\$5,500	\$	3,155(3)	\$	85	\$2	2,260
At December 31, 2015							
Joint revolving credit facility(1)	\$4,000	\$	3,353	\$	_	\$	647
Joint revolving credit facility(1)	500		156		59		285
Total	\$4,500	\$	3,509(3)	\$	59	\$	932

(1) In May 2016, the maturity dates for these facilities were extended from April 2019 to April 2020. These credit facilities can be used to support bank borrowings and the issuance of commercial paper, as well as to support up to a combined \$2.0 billion of letters of credit.

(2) In January 2016, this facility limit was increased from \$4.0 billion to \$5.0 billion.
(3) The weighted-average interest rates of the outstanding commercial paper supported by Dominion's credit facilities were 1.05% and 0.62% at December 31, 2016 and 2015, respectively.

Dominion Questar's revolving multi-year and 364-day credit facilities with limits of \$500 million and \$250 million, respectively, were terminated in October 2016. Questar Gas' short-term financing is supported by the two joint revolving credit facilities discussed above with Dominion, Virginia Power and Dominion Gas, to which Questar Gas was added as a borrower in November 2016, with an initial aggregate sub-limit of \$250 million. In December 2016, Questar Gas entered into a commercial paper program pursuant to which it began accessing the commercial paper markets.

In addition to the credit facilities mentioned above, SBL Holdco has \$30 million of credit facilities which have a stated maturity date of December 2017 with automatic one-year renewals through the maturity of the SBL Holdco term loan agreement in 2023. As of December 31, 2016, no amounts were outstanding under these facilities.

Virginia Power

Virginia Power's short-term financing is supported through its access as co-borrower to the two joint revolving credit facilities. These credit facilities can be used for working capital, as support for the combined commercial paper programs of the Companies and for other general corporate purposes. Virginia Power's share of commercial paper and letters of credit outstanding under its joint credit facilities with Dominion, Dominion Gas and Questar Gas were as follows:

		Ou	utstanding	Outstandin		
	Facility	Co	Commercial		etters of	
	Limit(1)	Paper			Credit	
(millions)						
At December 31, 2016						
Joint revolving credit facility(1)(2)	\$5,000	\$	65	\$	_	
Joint revolving credit facility(1)	500		—		1	
Total	\$5,500	\$	65(3)	\$	1	
At December 31, 2015						
Joint revolving credit facility(1)	\$4,000	\$	1,500	\$	_	
Joint revolving credit facility(1)	500		156		_	
Total	\$4,500	\$	1,656(3)	\$	_	

(1) The full amount of the facilities is available to Virginia Power, less any amounts outstanding to co-borrowers Dominion, Dominion Gas and Questar Gas. Sub-limits for Virginia Power are set within the facility limit but can be changed at the option of Dominion, Dominion Gas and Questar Gas multiple times per year. At December 31, 2016, the sub-limit for Virginia Power was an aggregate \$2.0 billion. If Virginia Power has liquidity needs in excess of its sub-limit, the sub-limit may be changed or such needs may be satisfied through short-term intercompany borrowings from Dominion. In May 2016, the maturity dates for these facilities were extended from April 2019 to April 2020. These credit facilities can be used to support bank borrowings and the issuance of commercial paper, as well as to support up to \$2.0 billion (or the sub-limit, whichever is less) of letters of credit.

(2) In January 2016, this facility limit was increased from \$4.0 billion to \$5.0 billion.

(3) The weighted-average interest rates of the outstanding commercial paper supported by these credit facilities were 0.97% and 0.60% at December 31, 2016 and 2015, respectively.

In addition to the credit facility commitments mentioned above, Virginia Power also has a \$100 million credit facility. In May 2016, the maturity date for this credit facility was extended from April 2019 to April 2020. In October 2016, this facility was reduced from \$120 million to \$100 million. As of December 31, 2016, this facility supports \$100 million of certain variable rate tax-exempt financings of Virginia Power.

Dominion Gas

Dominion Gas' short-term financing is supported by its access as co-borrower to the two joint revolving credit facilities. These credit facilities can be used for working capital, as support for the combined commercial paper programs of the Companies and for other general corporate purposes.

Dominion Gas' share of commercial paper and letters of credit outstanding under its joint credit facilities with Dominion, Virginia Power and Questar Gas were as follows:

			itstanding		standing
	Facility	Cor	Commercial		etters of
	Limit(1)		Paper		Credit
(millions)					
At December 31, 2016					
Joint revolving credit facility(1)	\$1,000	\$	460	\$	_
Joint revolving credit facility(1)	500		_		_
Total	\$1,500	\$	460(2)	\$	-
At December 31, 2015					
Joint revolving credit facility(1)	\$1,000	\$	391	\$	_
Joint revolving credit facility(1)	500		—		_
Total	\$1,500	\$	391(2)	\$	_

(1) A maximum of a combined \$1.5 billion of the facilities is available to Dominion Gas, assuming adequate capacity is available after giving effect to uses by co-borrowers Dominion, Virginia Power and Questar Gas. Sub-limits for Dominion Gas are set within the facility limit but can be changed at the option of the Companies multiple times per year. In November 2016, the aggregate sub-limit for Dominion Gas was decreased from \$750 million to \$500 million. If Dominion Gas has liquidity needs in excess of its sub-limit, the sub-limit may be changed or such needs may be satisfied through short-term intercompany borrowings from Dominion. In May 2016, the maturity dates for these facilities were extended from April 2019 to April 2020. These credit facilities can be used to support bank borrowings and the issuance of commercial paper, as well as to support up to \$1.5 billion (or the sub-limit, whichever is less) of letters of credit.

(2) The weighted-average interest rate of the outstanding commercial paper supported by these credit facilities was 1.00% and 0.63% at December 31, 2016 and 2015, respectively.

NOTE 17. LONG-TERM DEBT

Dominion Resources, Inc. total long-term debt		\$30,231	\$23,468

 Represents weighted-average coupon rates for debt outstanding as of December 31, 2016.
 Beginning June 30, 2016, amount includes foreign currency remeasurement adjustments.
 These financings relate to certain pollution control equipment at Virginia Power's generating facilities. Certain variable rate tax-exempt financings are supported by a \$100 million credit facility that terminates in April 2020.

(4) Represents debt assumed by Dominion from the merger of its former CNG subsidiary.

- (5) Represents debt obligations of Dominion Questar or Questar Gas. See Note 3 for more information.
- (6) Represents debt associated with SBL Holdco. The debt is nonrecourse to Dominion and is secured by SBL Holdco's interest in certain merchant solar facilities.
- (7) Represents debt obligations of a DEI subsidiary.
- (8) Represents debt obligations of Questar Pipeline. See Note 3 for more information.
- (9) Represents the valuation of certain fair value hedges associated with Dominion's fixed rate debt.

(10) 2015 excludes \$100 million of variable rate short-term notes that were purchased and cancelled in February 2016 using proceeds from the issuance of long-term debt. The notes would have otherwise matured in May 2016.

Based on stated maturity dates rather than early redemption dates that could be elected by instrument holders, the scheduled principal payments of long-term debt at December 31, 2016, were as follows:

The Companies short-term credit facilities and long-term debt agreements contain customary covenants and default provisions. As of December 31, 2016, there were no events of default under these covenants.

In January 2017, Dominion issued \$400 million of 1.875% senior notes and \$400 million of 2.75% senior notes that mature in 2019 and 2022, respectively.

Senior Note Redemptions

As part of Dominion's Liability Management Exercise, in December 2014, Dominion redeemed five outstanding series of senior notes with an aggregate outstanding principal of \$1.9 billion. The aggregate redemption price paid in December 2014 was \$2.2 billion and represents the principal amount outstanding, accrued and unpaid interest and the applicable makewhole premium of \$263 million. Total charges for the Liability Management Exercise of \$284 million, including the make-whole premium, were recognized and recorded in interest expense in Dominion's Consolidated Statements of Income. Proceeds from Dominion's issuance of senior notes in November 2014 were used to offset the payment of the redemption price. Also see Convertible Securities called for redemption below.

Convertible Securities

As part of Dominion's Liability Management Exercise, in November 2014, Dominion provided notice to redeem all \$22 million of outstanding contingent convertible senior notes. The senior notes were eligible for conversion during 2014. However, in lieu of redemption, holders elected to convert the remaining \$22 million of notes in December 2014 into \$26 million of common stock. Proceeds from Dominion's issuance of senior notes in November 2014 were used to offset the portion of the conversions paid in cash.

Enhanced Junior Subordinated Notes

In June 2006 and September 2006, Dominion issued \$300 million of June 2006 hybrids and \$500 million of September 2006 hybrids, respectively. Beginning June 30, 2016, the June 2006 hybrids bear interest at three-month LIBOR plus 2.825%, reset quarterly. Previously, interest was fixed at 7.5% per year. The September 2006 hybrids bear interest at the three-month LIBOR plus 2.3%, reset quarterly.

In June 2009, Dominion issued \$685 million of 8.375% June 2009 hybrids. The June 2009 hybrids were listed on the NYSE under the symbol DRU.

In October 2014, Dominion issued \$685 million of October 2014 hybrids that will bear interest at 5.75% per year until October 1, 2024. Thereafter, they will bear interest at the three-month LIBOR plus 3.057%, reset quarterly.

Dominion may defer interest payments on the hybrids on one or more occasions for up to 10 consecutive years. If the interest payments on the hybrids are deferred, Dominion may not make distributions related to its capital stock, including dividends, redemptions, repurchases, liquidation payments or guarantee payments during the deferral period. Also, during the deferral period, Dominion may not make any payments on or redeem or repurchase any debt securities that are equal in right of payment with, or subordinated to, the hybrids.

Dominion executed RCCs in connection with its issuance of the June 2006 hybrids, the September 2006 hybrids, and the June

Jun 22 2018

Combined Notes to Consolidated Financial Statements, Continued

2009 hybrids. Under the terms of the RCCs, Dominion covenants to and for the benefit of designated covered debtholders, as may be designated from time to time, that Dominion shall not redeem, repurchase, or defease all or any part of the hybrids, and shall not cause its majority owned subsidiaries to purchase all or any part of the hybrids, on or before their applicable RCC termination date, unless, subject to certain limitations, during the 180 days prior to such activity, Dominion has received a specified amount of proceeds as set forth in the RCCs from the sale of qualifying securities that have equity-like characteristics that are the same as, or more equity-like than the applicable characteristics of the hybrids at that time, as more fully described in the RCCs. In September 2011, Dominion amended the RCCs of the June 2006 hybrids and September 2006 hybrids to expand the measurement period for consideration of proceeds from the sale of common stock issuances from 180 days to 365 days. In July 2014, Dominion amended the RCC of the June 2009 hybrids to expand the measurement period for consideration of proceeds from the sale of common stock or other equity-like issuances from 180 days to 365 days. The proceeds Dominion receives from the replacement offering, adjusted by a predetermined factor, must equal or exceed the redemption or repurchase price.

As part of Dominion's Liability Management Exercise, in October 2014, Dominion redeemed all \$685 million of the June 2009 hybrids plus accrued interest with the net proceeds from the issuance of the October 2014 hybrids. In 2015, Dominion purchased and cancelled \$14 million and \$3 million of the June 2006 hybrids and the September 2006 hybrids, respectively. In the first quarter of 2016, Dominion purchased and cancelled \$38 million and \$4 million of the June 2006 hybrids and the September 2006 hybrids, respectively. In July 2016, Dominion launched a tender offer to purchase up to \$200 million in aggregate of additional June 2006 hybrids and September 2006 hybrids, which expired on August 1, 2016. In connection with the tender offer, Dominion purchased and cancelled \$125 million and \$74 million of the June 2006 hybrids and the September 2006 hybrids, respectively. All purchases were conducted in compliance with the applicable RCC. Also in July 2016, Dominion issued \$800 million of 5.25% July 2016 hybrids. The proceeds were used for general corporate purposes, including to finance the tender offer. The July 2016 hybrids are listed on the NYSE under the symbol DRUA.

From time to time, Dominion may reduce its outstanding debt and level of interest expense through redemption of debt securities prior to maturity and repurchases in the open market, in privately negotiated transactions, through additional tender offers or otherwise.

Remarketable Subordinated Notes

In June 2013, Dominion issued \$550 million of 2013 Series A 6.125% Equity Units and \$550 million of 2013 Series B 6.0% Equity Units, initially in the form of Corporate Units. The Corporate Units were listed on the NYSE under the symbols DCUA and DCUB, respectively.

Each Corporate Unit consisted of a stock purchase contract and 1/20 interest in a RSN issued by Dominion. The stock purchase contracts obligated the holders to purchase shares of Dominion common stock at a future settlement date prior to the relevant RSN maturity date. The purchase price paid under the stock purchase contracts was \$50 per Corporate Unit and the

number of shares purchased was determined under a formula based upon the average closing price of Dominion common stock near the settlement date. The RSNs were pledged as collateral to secure the purchase of common stock under the related stock purchase contracts.

In March 2016 and May 2016, Dominion successfully remarketed the \$550 million 2013 Series A 1.07% RSNs due 2021 and the \$550 million 2013 Series B 1.18% RSNs due 2019, respectively, pursuant to the terms of the related 2013 Equity Units. In connection with the remarketings, the interest rate on the Series A and Series B junior subordinated notes was reset to 4.104% and 2.962%, respectively, payable on a semi-annual basis and Dominion ceased to have the ability to redeem the notes at its option or defer interest payments. At December 31, 2016, the securities are included in junior subordinated notes in Dominion's Consolidated Balance Sheets. Dominion did not receive any proceeds from the remarketings. Remarketing proceeds belonged to the investors holding the related 2013 Equity Units and were temporarily used to purchase a portfolio of treasury securities. Upon maturity of each portfolio, the proceeds were applied on behalf of investors on the related stock purchase contract settlement date to pay the purchase price to Dominion for issuance of 8.5 million shares of its common stock on both April 1, 2016 and July 1, 2016. See Issuance of Common Stock below for a description of common stock issued by Dominion in April 2016 and July 2016 under the stock purchase contracts.

In July 2014, Dominion issued \$1.0 billion of 2014 Series A 6.375% Equity Units, initially in the form of Corporate Units. In August 2016, Dominion issued \$1.4 billion of 2016 Series A 6.75% Equity Units, initially in the form of Corporate Units. The Corporate Units are listed on the NYSE under the symbols DCUC and DCUD, respectively. The net proceeds from the 2016 Equity Units were used to finance the Dominion Questar Combination. See Note 3 for more information.

Each 2014 Series A Corporate Unit consists of a stock purchase contract and 1/20 interest in a 2014 Series A RSN issued by Dominion. Each 2016 Series A Corporate Unit consists of a stock purchase contract, a 1/40 interest in a 2016 Series A-1 RSN issued by Dominion and a 1/40 interest in a 2016 Series A-2 RSN issued by Dominion. The stock purchase contracts obligate the holders to purchase shares of Dominion common stock at a future settlement date prior to the relevant RSN maturity date. The purchase price to be paid under the stock purchase contracts is \$50 per Corporate Unit and the number of shares to be purchase dwill be determined under a formula based upon the average closing price of Dominion common stock near the settlement date. The RSNs are pledged as collateral to secure the purchase of common stock under the related stock purchase contracts.

Dominion makes quarterly interest payments on the RSNs and quarterly contract adjustment payments on the stock purchase contracts, at the rates described below. Dominion may defer payments on the stock purchase contracts and the RSNs for one or more consecutive periods but generally not beyond the purchase contract settlement date. If payments are deferred, Dominion may not make any cash distributions related to its capital stock, including dividends, redemptions, repurchases, liquidation payments or guarantee payments. Also, during the deferral period, Dominion may not make any payments on or redeem or repurchase any debt securities that are equal in right of payment with, or subordinated to, the RSNs.

Dominion has recorded the present value of the stock purchase contract payments as a liability offset by a charge to equity. Interest payments on the RSNs are recorded as interest expense and stock purchase contract payments are charged against the liability. Accretion of the stock purchase contract liability is recorded as imputed interest expense. In calculating diluted EPS, Dominion applies the treasury stock method to the Equity Units.

Pursuant to the terms of the 2014 Equity Units and 2016 Equity Units, Dominion expects to remarket the 2014 Series A RSNs during the second quarter of 2017 and both the 2016 Series A-1 and 2016 Series A-2 RSNs during the third quarter of 2019. Following a successful remarketing, the interest rate on the RSNs will be reset, interest will be payable on a semi-annual basis and Dominion will cease to have the ability to redeem the RSNs at its option or defer interest payments. Proceeds of each remarketing will belong to the investors in the related equity units and will be held and applied on their behalf at the settlement date of the related stock purchase contracts to pay the purchase price to Dominion for issuance of its common stock.

Under the terms of the stock purchase contracts, assuming no anti-dilution or other adjustments, Dominion will issue between 11.6 million and 14.5 million shares of its common stock in July 2017 and between 15.0 million and 18.7 million shares in August 2019. A total of 40.9 million shares of Dominion's common stock has been reserved for issuance in connection with the stock purchase contracts.

Selected information about Dominion's Equity Units is presented below:

Issuance Date	Units Issued	Total Net Proceeds	Total Long-term Debt	RSN Annual Interest Rate	Stock Purchase Contract Annual Rate		ock Purchase act Liability(1)	Stock Purchase Settlement Date	RSN Maturity Date
(millions, except interest rates) 7/1/2014	20	\$ 982.0	\$ 1.000.0	1.500%	4.875%	¢	142.8	7/1/2017	7/1/2020
8/15/2016(2)	28	\$1,374.8	\$ 1,400.0	2.000%(3)	4.750%	\$	190.6	8/15/2019	111/2020

(1) Payments of \$94 million and \$101 million were made in 2016 and 2015, respectively, including payments for the remarketed 2013 Series A and B notes. The stock purchase contract liability was \$212 million and \$115 million at December 31, 2016 and 2015, respectively.

(2) The maturity dates of the \$700 million Series A-1 RSNs and \$700 million Series A-2 RSNs are August 15, 2021 and August 15, 2024, respectively.

(3) Annual interest rate applies to each of the Series A-1 RSNs and Series A-2 RSNs.

NOTE 18. PREFERRED STOCK

Dominion is authorized to issue up to 20 million shares of preferred stock; however, none were issued and outstanding at December 31, 2016 or 2015.

Virginia Power is authorized to issue up to 10 million shares of preferred stock, \$100 liquidation preference. During 2014, Virginia Power redeemed 2.59 million shares, which represented all outstanding series of its preferred stock, some of which were redeemed as a part of Dominion's Liability Management Exercise in September 2014. Upon redemption, each series was no longer outstanding for any purpose and dividends ceased to accumulate. Virginia Power had no preferred stock issued and outstanding at December 31, 2016 or 2015.

NOTE 19. EQUITY

Issuance of Common Stock

DOMINION

Dominion maintains Dominion Direct[®] and a number of employee savings plans through which contributions may be invested in Dominion's common stock. These shares may either be newly issued or purchased on the open market with proceeds contributed to these plans. In January 2014, Dominion began purchasing its common stock on the open market for these plans. In April 2014, Dominion began issuing new common shares for these direct stock purchase plans.

During 2016, Dominion received cash proceeds, net of fees and commissions, of \$2.2 billion from the issuance of approximately 32 million shares of common stock through various programs resulting in approximately 628 million of shares of common stock outstanding at December 31, 2016. These proceeds include cash of \$295 million received from the issuance of 4.0 million of such shares through Dominion Direct[®] and employee savings plans.

In December 2014, Dominion filed an SEC shelf registration for the sale of debt and equity securities including the ability to sell common stock through an at-the-market program. Also in December 2014, Dominion entered into four separate sales agency agreements to effect sales under the program and pursuant to which it may offer from time to time up to \$500 million aggregate amount of its common stock. Sales of common stock can be made by means of privately negotiated transactions, as transactions on the NYSE at market prices or in such other transactions as are agreed upon by Dominion and the sales agents and in conformance with applicable securities laws. Following issuances during the first and second quarters of 2015, Dominion has the ability to issue up to approximately \$200 million of stock under the 2014 sales agency agreements; however, no additional issuances occurred under these agreements in 2016.

In both April 2016 and July 2016, Dominion issued 8.5 million shares under the related stock purchase contracts entered into as part of Dominion's 2013 Equity Units and received \$1.1 billion of total proceeds. Additionally, Dominion completed a market issuance of equity in April 2016 of 10.2 million shares and received proceeds of \$756 million through a registered underwritten public offering. A portion of the net proceeds was used to finance the Dominion Questar Combination. See Note 3 for more information.

VIRGINIA POWER

In 2016, 2015 and 2014, Virginia Power did not issue any shares of its common stock to Dominion.

Shares Reserved for Issuance

At December 31, 2016, Dominion had approximately 63 million shares reserved and available for issuance for Dominion Direct[®], employee stock awards, employee savings plans, director stock compensation plans and issuance in connection with stock purchase contracts. See Note 17 for more information.

Repurchase of Common Stock

Dominion did not repurchase any shares in 2016 or 2015 and does not plan to repurchase shares during 2017, except for shares tendered by employees to satisfy tax withholding obligations on vested restricted stock, which do not count against its stock repurchase authorization.

Purchase of Dominion Midstream Units

In September 2015, Dominion initiated a program to purchase from the market up to \$50 million of common units representing limited partner interests in Dominion Midstream, which expired in September 2016. Dominion purchased approximately 658,000 common units for \$17 million and 887,000 common units for \$25 million for the years ended December 31, 2016 and 2015, respectively.

Issuance of Dominion Midstream Units

During the fourth quarter of 2016, Dominion Midstream received \$482 million of proceeds from the issuance of common units and \$490 million of proceeds from the issuance of convertible preferred units. The net proceeds were primarily used to finance a portion of the acquisition of Questar Pipeline from Dominion. See Note 3 for more information.

The holders of the convertible preferred units are entitled to receive cumulative quarterly distributions payable in cash or additional convertible preferred units, subject to certain conditions. The units are convertible into Dominion Midstream common units on a one-for-one basis, subject to certain adjustments, (i) in whole or in part at the option of the unitholders any time after December 1, 2018 or, (ii) in whole or in part at Dominion Midstream's option, subject to certain conditions, any time after December 1, 2019. The conversion of such units would result in a potential increase to Dominion's net income attributable to noncontrolling interests.

Stock-Based Awards

The 2005 and 2014 Incentive Compensation Plans permit stock-based awards that include restricted stock, performance grants, goal-based stock, stock options, and stock appreciation rights. The Non-Employee Directors Compensation Plan permits grants of restricted stock and stock options. Under provisions of these plans, employees and non-employee directors may be granted options to purchase common stock at a price not less than its fair market value at the date of grant with a maximum term of eight years. Option terms are set at the discretion of the CGN Committee of the Board of Directors or the Board of Directors itself, as provided under each plan. At December 31, 2016, approximately 24 million shares were available for future grants under these plans.

Dominion measures and recognizes compensation expense relating to share-based payment transactions over the vesting period based on the fair value of the equity or liability instruments issued. Dominion's results for the years ended December 31, 2016, 2015 and 2014 include \$33 million, \$39 million, and \$39 million, respectively, of compensation costs and \$11 million, \$14 million, and \$14 million, respectively of income tax benefits related to Dominion's stock-based compensation arrangements. Stock-based compensation cost is reported in other operations and maintenance expense in Dominion's Consolidated Statements of Income. Excess Tax Benefits are classified as a financing cash flow. Dominion realized less than \$1 million and \$3 million of Excess Tax Benefits from the vesting of restricted stock awards during the year ended December 31, 2016 and 2015, respectively, and less than \$1 million during the year ended December 31, 2014.

RESTRICTED STOCK

Restricted stock grants are made to officers under Dominion's LTIP and may also be granted to certain key non-officer employees from time to time. The fair value of Dominion's restricted stock awards is equal to the closing price of Dominion's stock on the date of grant. New shares are issued for restricted stock awards on the date of grant and generally vest over a threeyear service period. The following table provides a summary of restricted stock activity for the years ended December 31, 2016, 2015 and 2014:

		Weighted
		 average
		Grant Date
	Shares	Fair Value
	(thousands)	
Nonvested at December 31, 2013	1,007	\$ 49.35
Granted	354	67.98
Vested	(278)	44.50
Cancelled and forfeited	(18)	53.61
Nonvested at December 31, 2014	1,065	\$ 56.74
Granted	302	73.26
Vested	(510)	50.71
Cancelled and forfeited	(2)	62.62
Nonvested at December 31, 2015	855	\$ 66.16
Granted	372	71.67
Vested	(301)	56.83
Cancelled and forfeited	(40)	71.75
Nonvested at December 31, 2016	886	\$ 71.40

As of December 31, 2016, unrecognized compensation cost related to nonvested restricted stock awards totaled \$31 million and is expected to be recognized over a weighted-average period of 1.9 years. The fair value of restricted stock awards that vested was \$21 million, \$37 million, and \$19 million in 2016, 2015 and 2014, respectively. Employees may elect to have shares of restricted stock withheld upon vesting to satisfy tax withholding obligations. The number of shares withheld will vary for each employee depending on the vesting date fair market value of Dominion stock and the applicable federal, state and local tax withholding rates.

GOAL-BASED STOCK

Goal-based stock awards are granted under Dominion's LTIP to officers who have not achieved a certain targeted level of share ownership, in lieu of cash-based performance grants. Current outstanding goal-based shares include awards granted to officers in February 2015 and February 2016. OFFICIAL COPY

Jun 22 2018

The issuance of awards is based on the achievement of two performance metrics during a two-year period: TSR relative to that of companies listed as members of the Philadelphia Utility Index as of the end of the performance period and ROIC. The actual number of shares issued will vary between zero and 200% of targeted shares depending on the level of performance metrics achieved. The fair value of goal-based stock is determined on the date of grant. Awards to officers vest at the end of the two-year performance period. All goal-based stock awards are settled by issuing new shares.

The following table provides a summary of goal-based stock activity for the years ended December 31, 2016, 2015 and 2014:

		Weighted
	Targeted	- average Grant
	Number of	Date Fair
	Shares	Value
	(thousands)	
Nonvested at December 31, 2013	5	\$53.85
Granted	13	68.83
Vested	(1)	52.48
Nonvested at December 31, 2014	17	\$65.15
Granted	14	72.72
Vested	(7)	56.22
Nonvested at December 31, 2015	24	\$72.27
Granted	12	69.93
Vested	(10)	68.83
Cancelled and forfeited	(3)	68.83
Nonvested at December 31, 2016	23	\$72.99

At December 31, 2016, the targeted number of shares expected to be issued under the February 2015 and February 2016 awards was approximately 23 thousand. In January 2017, the CGN Committee determined the actual performance against metrics established for the February 2015 awards with a performance period that ended December 31, 2016. Based on that determination, the total number of shares to be issued under the February 2015 goal-based stock awards was approximately 9 thousand.

As of December 31, 2016, unrecognized compensation cost related to nonvested goal-based stock awards was not material.

CASH-BASED PERFORMANCE GRANTS

Cash-based performance grants are made to Dominion's officers under Dominion's LTIP. The actual payout of cash-based performance grants will vary between zero and 200% of the targeted amount based on the level of performance metrics achieved.

In February 2014, a cash-based performance grant was made to officers. The performance grant was paid out in January 2016 based on the achievement of two performance metrics during 2014 and 2015: TSR relative to that of companies listed as members of the Philadelphia Utility Index as of the end of the performance period and ROIC. The total of the payout under the grant was \$10 million.

In February 2015, a cash-based performance grant was made to officers. Payout of the performance grant occurred in January 2017 based on the achievement of two performance metrics during 2015 and 2016: TSR relative to that of companies listed as members of the Philadelphia Utility Index as of the end of the performance period and ROIC. The total of the payout under the grant was \$10 million. In February 2016, a cash-based performance grant was made to officers. Payout of the performance grant is expected to occur by March 15, 2018 based on the achievement of two performance metrics during 2016 and 2017: TSR relative to that of companies listed as members of the Philadelphia Utility Index as of the end of the performance period and ROIC. At December 31, 2016, the targeted amount of the grant was \$14 million and a liability of \$6 million had been accrued for this award.

NOTE 20. DIVIDEND RESTRICTIONS

The Virginia Commission may prohibit any public service company, including Virginia Power, from declaring or paying a dividend to an affiliate if found to be detrimental to the public interest. At December 31, 2016, the Virginia Commission had not restricted the payment of dividends by Virginia Power.

The Ohio Commission may prohibit any public service company, including East Ohio, from declaring or paying a dividend to an affiliate if found to be detrimental to the public interest. At December 31, 2016, the Ohio Commission had not restricted the payment of dividends by East Ohio.

The Utah Commission may prohibit any public service company, including Questar Gas, from declaring or paying a dividend to an affiliate if found to be detrimental to the public interest. At December 31, 2016, the Utah Commission had not restricted the payment of dividends by Questar Gas.

Certain agreements associated with the Companies' credit facilities contain restrictions on the ratio of debt to total capitalization. These limitations did not restrict the Companies' ability to pay dividends or receive dividends from their subsidiaries at December 31, 2016.

See Note 17 for a description of potential restrictions on dividend payments by Dominion in connection with the deferral of interest payments on certain junior subordinated notes and equity units, initially in the form of corporate units.

NOTE 21. EMPLOYEE BENEFIT PLANS

Dominion and Dominion Gas—Defined Benefit Plans

Dominion provides certain retirement benefits to eligible active employees, retirees and qualifying dependents. Dominion Gas participates in a number of the Dominion-sponsored retirement plans. Under the terms of its benefit plans, Dominion reserves the right to change, modify or terminate the plans. From time to time in the past, benefits have changed, and some of these changes have reduced benefits.

Dominion maintains qualified noncontributory defined benefit pension plans covering virtually all employees. Retirement benefits are based primarily on years of service, age and the employee's compensation. Dominion's funding policy is to contribute annually an amount that is in accordance with the provisions of ERISA. The pension programs also provide benefits to certain retired executives under company-sponsored nonqualified employee benefit plans. The nonqualified plans are funded through contributions to grantor trusts. Dominion also provides retiree healthcare and life insurance benefits with annual employee premiums based on several factors such as age, retirement date and years of service.

Pension benefits for Dominion Gas employees not represented by collective bargaining units are covered by the Domin-

141

ion Pension Plan, a defined benefit pension plan sponsored by Dominion that provides benefits to multiple Dominion subsidiaries. Pension benefits for Dominion Gas employees represented by collective bargaining units are covered by separate pension plans for East Ohio and, for DTI, a plan that provides benefits to employees of both DTI and Hope. Employee compensation is the basis for allocating pension costs and obligations between DTI and Hope and determining East Ohio's share of total pension costs.

Retiree healthcare and life insurance benefits for Dominion Gas employees not represented by collective bargaining units are covered by the Dominion Retiree Health and Welfare Plan, a plan sponsored by Dominion that provides certain retiree healthcare and life insurance benefits to multiple Dominion subsidiaries. Retiree healthcare and life insurance benefits for Dominion Gas employees represented by collective bargaining units are covered by separate other postretirement benefit plans for East Ohio and, for DTI, a plan that provides benefits to both DTI and Hope. Employee headcount is the basis for allocating other postretirement benefit costs and obligations between DTI and Hope and determining East Ohio's share of total other postretirement benefit costs.

Pension and other postretirement benefit costs are affected by employee demographics (including age, compensation levels and years of service), the level of contributions made to the plans and earnings on plan assets. These costs may also be affected by changes in key assumptions, including expected long-term rates of return on plan assets, discount rates, healthcare cost trend rates, mortality rates and the rate of compensation increases.

Dominion uses December 31 as the measurement date for all of its employee benefit plans, including those in which Dominion Gas participates. Dominion uses the market-related value of pension plan assets to determine the expected return on plan assets, a component of net periodic pension cost, for all pension plans, including those in which Dominion Gas participates. The market-related value recognizes changes in fair value on a straight-line basis over a four-year period, which reduces year-to-year volatility. Changes in fair value are measured as the difference between the expected and actual plan asset returns, including dividends, interest and realized and unrealized investment gains and losses. Since the market-related value recognizes changes in fair value over a four-year period, the future market-related value of pension plan assets will be impacted as previously unrecognized changes in fair value are recognized.

Dominion's pension and other postretirement benefit plans hold investments in trusts to fund employee benefit payments. Dominion's pension and other postretirement plan assets experienced aggregate actual returns of \$534 million in 2016 and aggregate actual losses of \$72 million in 2015, versus expected returns of \$691 million and \$648 million, respectively. Dominion Gas' pension and other postretirement plan assets for employees represented by collective bargaining units experienced aggregate actual returns of \$130 million in 2016 and aggregate actual losses of \$13 million in 2015, versus expected returns of \$157 million and \$150 million, respectively. Differences between actual and expected returns on plan assets are accumulated and amortized during future periods. As such, any investment-related declines in these trusts will result in future increases in the net periodic cost recognized for such employee benefit plans and will be included in the determination of the amount of cash to be contributed to the employee benefit plans.

In October 2014, the Society of Actuaries published new mortality tables and mortality improvement scales. Such tables and scales are used to develop mortality assumptions for use in determining pension and other postretirement benefit liabilities and expense. Following evaluation of the new tables, Dominion changed its assumption for mortality rates to reflect a generational improvement scale. This change in assumption increased net periodic benefit cost for Dominion and Dominion Gas (for employees represented by collective bargaining units) by \$25 million and \$3 million, respectively, for 2015.

During 2016, Dominion and Dominion Gas (for employees represented by collective bargaining units) engaged their actuary to conduct an experience study of their employees demographics over a five-year period as compared to significant assumptions that were being used to determine pension and other postretirement benefit obligations and periodic costs. These assumptions primarily included mortality, retirement rates, termination rates, and salary increase rates. The changes in assumptions implemented as a result of the experience study resulted in increases of \$290 million and \$38 million in the pension and other postretirement benefits obligations, respectively, at December 31, 2016 for Dominion and \$24 million and \$9 million in the pension and other postretirement benefits obligations, respectively, at December 31, 2016 for Dominion Gas. In addition, these changes will increase net periodic benefit costs for Dominion by \$42 million for 2017. The increase in net periodic benefit costs for Dominion Gas for 2017 is immaterial.

Plan Amendments and Remeasurements

In the third quarter of 2016, Dominion remeasured an other postretirement benefit plan as a result of an amendment that changed post-65 retiree medical coverage for certain current and future Local 50 retirees effective April 1, 2017. The remeasurement resulted in a decrease in Dominion's accumulated postretirement benefit obligation of \$37 million. The impact of the remeasurement on net periodic benefit credit was recognized prospectively from the remeasurement date and increased the net periodic benefit credit for 2016 by \$9 million. The discount rate used for the remeasurement was 3.71% and the demographic and mortality assumptions were updated using plan-specific studies and mortality improvement scales. The expected long-term rate of return used was consistent with the measurement as of December 31, 2015.

In the third quarter of 2014, East Ohio remeasured its other postretirement benefit plan as a result of an amendment that changed medical coverage upon the attainment of age 65 for certain future retirees effective January 1, 2016. For employees represented by collective bargaining units, the remeasurement resulted in an increase in the accumulated postretirement benefit obligation of \$22 million. The impact of the remeasurement on net periodic benefit credit was recognized prospectively from the remeasurement date and reduced net periodic benefit credit for 2014, for employees represented by collective bargaining units, by less than \$1 million. The discount rate used for the remeasurement was 4.20% and the expected long-term rate of return used was 8.50%. All other assumptions used for the remeasurement were consistent with the measurement as of December 31, 2013.

Funded Status

The following table summarizes the changes in pension plan and other postretirement benefit plan obligations and plan assets and includes a statement of the plans' funded status for Dominion and Dominion Gas (for employees represented by collective bargaining units):

		Pension Benefits	Other Postr	retirement Benefits

(1) 2016 amount relates primarily to a plan amendment that changed post-65 retiree medical coverage for certain current and future Local 50 retirees effective April 1, 2017. 2015 amount relates primarily to a plan amendment that changed retiree medical benefits for certain nonunion employees after Medicare eligibility.

(2) Relates primarily to a settlement for certain executives.

(3) Reflected in other deferred credits and other liabilities in Dominion Gas' Consolidated Balance Sheets.

Combined Notes to Consolidated Financial Statements, Continued

The ABO for all of Dominion's defined benefit pension plans was \$7.3 billion and \$5.8 billion at December 31, 2016 and 2015, respectively. The ABO for the defined benefit pension plans covering Dominion Gas employees represented by collective bargaining units was \$640 million and \$578 million at December 31, 2016 and 2015, respectively.

Under its funding policies, Dominion evaluates plan funding requirements annually, usually in the fourth quarter after receiving updated plan information from its actuary. Based on the funded status of each plan and other factors, Dominion determines the amount of contributions for the current year, if any, at that time. During 2016, Dominion and Dominion Gas made no contributions to the qualified defined benefit pension plans and no contributions are currently expected in 2017. In January 2017, Dominion made a \$75 million contribution to Dominion Questar's qualified pension plan to satisfy a regulatory condition to closing of the Dominion Questar Combination. In July 2012, the MAP 21 Act was signed into law. This Act includes an increase in the interest rates used to determine plan sponsors' pension contributions for required funding purposes. In 2014, the HATFA of 2014 was signed into law. Similar to the MAP 21 Act, the HATFA of 2014 adjusts the rules for calculating interest rates used in determining funding obligations. It is estimated that the new interest rates will reduce required pension contributions through 2019. Dominion believes that required pension contributions will rise subsequent to 2019, resulting in an estimated \$200 million reduction in net cumulative required contributions over a 10-year period.

Certain regulatory authorities have held that amounts recovered in utility customers' rates for other postretirement benefits, in excess of benefits actually paid during the year, must be deposited in trust funds dedicated for the sole purpose of paying such benefits. Accordingly, certain of Dominion's subsidiaries, including Dominion Gas, fund other postretirement benefit costs through VEBAs. Dominion's remaining subsidiaries do not prefund other postretirement benefit costs but instead pay claims as presented. Dominion's contributions to VEBAs, all of which pertained to Dominion Gas employees, totaled \$12 million for both 2016 and 2015, and Dominion expects to contribute approximately \$12 million to the Dominion VEBAs in 2017, all of which pertains to Dominion Gas employees.

Dominion and Dominion Gas do not expect any pension or other postretirement plan assets to be returned during 2017.

The following table provides information on the benefit obligations and fair value of plan assets for plans with a benefit obligation in excess of plan assets for Dominion and Dominion Gas (for employees represented by collective bargaining units):

Plan Assets

Dominion's overall objective for investing its pension and other postretirement plan assets is to achieve appropriate long-term rates of return commensurate with prudent levels of risk. As a participating employer in various pension plans sponsored by Dominion, Dominion Gas is subject to Dominion's investment policies for such plans. To minimize risk, funds are broadly diversified among asset classes, investment strategies and investment advisors. The strategic target asset allocations for Dominion's pension funds are 28% U.S. equity, 18% non-U.S. equity, 35% fixed income, 3% real estate and 16% other alternative investments. U.S. equity includes investments in large-cap, mid-cap and small-cap companies located in the U.S. Non-U.S. equity includes investments in large-cap and small-cap companies located outside of the U.S. including both developed and emerging markets. Fixed income includes corporate debt instruments of companies from diversified industries and U.S. Treasuries. The U.S. equity, non-U.S. equity and fixed income investments are in individual securities as well as mutual funds. Real estate includes equity real estate investment trusts and investments in partnerships. Other alternative investments include partnership investments in private equity, debt and hedge funds that follow several different strategies.

Dominion also utilizes common/collective trust funds as an investment vehicle for its defined benefit plans. A common/collective trust fund is a pooled fund operated by a bank or trust company for investment of the assets of various organizations and

individuals in a well-diversified portfolio. Common/collective trust funds are funds of grouped assets that follow various investment strategies.

Strategic investment policies are established for Dominion's prefunded benefit plans based upon periodic asset/liability studies. Factors considered in setting the investment policy include employee demographics, liability growth rates, future discount rates, the funded status of the plans and the expected long-term rate of return on plan assets. Deviations from the plans' strategic allocation are a function of Dominion's assessments regarding short-term risk and reward opportunities in the capital markets and/or short-term market movements which result in the plans' actual asset allocations varying from the strategic target asset allocations. Through periodic rebalancing, actual allocations are brought back in line with the target. Future asset/liability studies will focus on strategies to further reduce pension and other postretirement plan risk, while still achieving attractive levels of returns. Financial derivatives may be used to obtain or manage market exposures and to hedge assets and liabilities.

For fair value measurement policies and procedures related to pension and other postretirement benefit plan assets, see Note 6.

Liquidity is emphasized to provide for redemption of units on any business day. Principal preservation is also a prime objective. Admissions and withdrawals are made daily. Interest is accrued daily and distributed monthly.

Combined Notes to Consolidated Financial Statements, Continued

The Plan's investments are determined based on the fair values of the investments and the underlying investments, which have been determined as follows:

- *Cash and Cash Equivalents*—Investments are held primarily in short-term notes and treasury bills, which are valued at cost plus accrued interest.
- *Common and Preferred Stocks*—Investments are valued at the closing price reported on the active market on which the individual securities are traded.
- *Insurance Contracts*—Investments in Group Annuity Contracts with John Hancock were entered into after 1992 and are stated at fair value based on the fair value of the underlying securities as provided by the managers and include investments in U.S. government securities, corporate debt instruments, state and municipal debt securities.
- Corporate Debt Instruments—Investments are valued using pricing models maximizing the use of observable inputs for similar securities. This includes basing value on yields currently available on comparable securities of issuers with similar credit ratings. When quoted prices are not available for identical or similar instruments, the instrument is valued under a discounted cash flows approach that maximizes observable inputs, such as current yields of similar instruments, but includes adjustments for certain risks that may not be observable, such as credit and liquidity risks or a broker quote, if available.
- Government Securities—Investments are valued using pricing models maximizing the use of observable inputs for similar securities.
- Common/Collective Trust Funds-Common/collective trust funds invest in debt and equity securities and other instruments with characteristics similar to those of the funds' benchmarks. The primary objectives of the funds are to seek investment returns that approximate the overall performance of their benchmark indexes. These benchmarks are major equity indices, fixed income indices, and money market indices that focus on growth, income, and liquidity strategies, as applicable. Investments in common/collective trust funds are stated at the NAV as determined by the issuer of the common/collective trust funds and is based on the fair value of the underlying investments held by the fund less its liabilities. The NAV is used as a practical expedient to estimate fair value. The common/collective trust funds do not have any unfunded commitments, and do not have any applicable liquidation periods or defined terms/periods to be held. The majority of the common/collective trust funds have limited withdrawal or redemption rights during the term of the investment.
- Alternative Investments—Investments in real estate funds, private equity funds, debt funds and hedge funds are stated at fair value based on the NAV of the Plan's proportionate share of the partnership, joint venture or other alternative investment's fair value as determined by reference to audited financial statements or NAV statements provided by the investment manager. The NAV is used as a practical expedient to estimate fair value.

Net Periodic Benefit (Credit) Cost

Net periodic benefit (credit) cost is reflected in other operations and maintenance expense in the Consolidated Statements of Income. The components of the provision for net periodic benefit (credit) cost and amounts recognized in other comprehensive income and regulatory assets and liabilities for Dominion's and Dominion Gas' (for employees represented by collective bargaining units) plans are as follows:

(2) The Society of Actuaries model used to determine healthcare cost trend rates was updated in 2014. The new model converges to the ultimate trend rate much more quickly than previous models.

The components of AOCI and regulatory assets and liabilities for Dominion's and Dominion Gas' (for employees represented by collective bargaining units) plans that have not been recognized as components of net periodic benefit (credit) cost are as follows:

				Other
			F	Postretirement
		Pension Benefits		Benefits
At December 31,	2016	2015	2016	2015
(millions)				
Dominion				
Net actuarial loss	\$3,200	\$2,381	\$ 283	\$ 114
Prior service (credit) cost	4	5	(419)	(237)
Total(1)	\$3,204	\$2,386	\$(136)	\$(123)
Dominion Gas				
Net actuarial loss	\$ 458	\$ 380	\$ 60	\$ 33
Prior service (credit) cost	—	1	7	7
Total(2)	\$ 458	\$ 381	\$67	\$ 40

- (1) As of December 31, 2016, of the \$3.2 billion and \$(136) million related to pension benefits and other postretirement benefits, \$1.9 billion and \$(103) million, respectively, are included in AOCI, with the remainder included in regulatory assets and liabilities. As of December 31, 2015, of the \$2.4 billion and \$(123) million related to pension benefits and other postretirement benefits, \$1.4 billion and \$(90) million, respectively, are included in AOCI, with the remainder included in regulatory assets and liabilities.
- (2) As of December 31, 2016, of the \$458 million related to pension benefits, \$167 million is included in AOCI, with the remainder included in regulatory assets and liabilities; the \$67 million related to other postretirement benefits is included entirely in regulatory assets and liabilities. As of December 31, 2015, of the \$381 million related to pension benefits, \$138 million is included in AOCI, with the remainder included in regulatory assets and liabilities; the \$40 million related to other postretirement benefits is included in the remainder included in regulatory assets and liabilities; the \$40 million related to other postretirement benefits is included entirely in regulatory assets and liabilities.

The following table provides the components of AOCI and regulatory assets and liabilities for Dominion's and Dominion Gas' (for employees represented by collective bargaining units) plans as of December 31, 2016 that are expected to be amortized as components of net periodic benefit (credit) cost in 2017:

			Other Postretiremen		
	Pensio	on Benefits		Benefits	
(millions)					
Dominion					
Net actuarial loss	\$	161	\$	13	
Prior service (credit) cost		1		(47)	
Dominion Gas					
Net actuarial loss	\$	16	\$	2	
Prior service (credit) cost		_		1	

The expected long-term rates of return on plan assets, discount rates, healthcare cost trend rates and mortality are critical assumptions in determining net periodic benefit (credit) cost. Dominion develops assumptions, which are then compared to the forecasts of an independent investment advisor (except for the expected long-term rates of return) to ensure reasonableness. An internal committee selects the final assumptions used for Dominion's pension and other postretirement plans, including those in which Dominion Gas participates, including discount rates, expected long-term rates of return, healthcare cost trend rates and mortality rates.

including those in which Dominion Gas participates, by using a combination of:
Expected inflation and risk-free interest rate assumptions;
Historical return analysis to determine long term historic returns as

well as historic risk premiums for various asset classes;

Dominion determines the expected long-term rates of return on plan

assets for its pension plans and other postretirement benefit plans,

- Expected future risk premiums, asset volatilities and correlations;
- Forecasts of an independent investment advisor;
- Forward-looking return expectations derived from the yield on longterm bonds and the expected long-term returns of major stock market indices; and
- Investment allocation of plan assets.

Dominion determines discount rates from analyses of AA/Aa rated bonds with cash flows matching the expected payments to be made under its plans, including those in which Dominion Gas participates.

Mortality rates are developed from actual and projected plan experience for postretirement benefit plans. Dominion's actuary conducts an experience study periodically as part of the process to select its best estimate of mortality. Dominion considers both standard mortality tables and improvement factors as well as the plans' actual experience when selecting a best estimate. During 2016, Dominion conducted a new experience study as scheduled and, as a result, updated its mortality assumptions for all its plans, including those in which Dominion Gas participates.

Assumed healthcare cost trend rates have a significant effect on the amounts reported for Dominion's retiree healthcare plans, including those in which Dominion Gas participates. A one percentage point change in assumed healthcare cost trend rates would have had the following effects for Dominion's and Dominion Gas' (for employees represented by collective bargaining units) other postretirement benefit plans:

	Othe	Other Postretirement Bene

Dominion Gas (Employees Not Represented by Collective Bargaining Units) and Virginia Power—Participation in Defined Benefit Plans

Virginia Power employees and Dominion Gas employees not represented by collective bargaining units are covered by the Dominion Pension Plan described above. As participating employers, Virginia Power and Dominion Gas are subject to Dominion's funding policy, which is to contribute annually an amount that is in accordance with ERISA. During 2016, Virginia Power and Dominion Gas made no contributions to the Dominion Pension Plan, and no contributions to this plan are currently

OFFICIAL COP

expected in 2017. Virginia Power's net periodic pension cost related to this plan was \$79 million, \$97 million and \$75 million in 2016, 2015 and 2014, respectively. Dominion Gas' net periodic pension credit related to this plan was \$(45) million, \$(38) million and \$(37) million in 2016, 2015 and 2014, respectively. Net periodic pension (credit) cost is reflected in other operations and maintenance expense in their respective Consolidated Statements of Income. The funded status of various Dominion subsidiary groups and employee compensation are the basis for determining the share of total pension costs for participating Dominion subsidiaries. See Note 24 for Virginia Power and Dominion Gas amounts due to/from Dominion related to this plan.

Retiree healthcare and life insurance benefits, for Virginia Power employees and for Dominion Gas employees not represented by collective bargaining units, are covered by the Dominion Retiree Health and Welfare Plan described above. Virginia Power's net periodic benefit (credit) cost related to this plan was \$(29) million, \$(16) million and \$(18) million in 2016, 2015 and 2014, respectively. Dominion Gas' net periodic benefit (credit) cost related to this plan was \$(4) million, \$(5) million and \$(5) million for 2016, 2015 and 2014, respectively. Net periodic benefit (credit) cost is reflected in other operations and maintenance expenses in their respective Consolidated Statements of Income. Employee headcount is the basis for determining the share of total other postretirement benefit costs for participating Dominion subsidiaries. See Note 24 for Virginia Power and Dominion Gas amounts due to/from Dominion related to this plan.

Dominion holds investments in trusts to fund employee benefit payments for the pension and other postretirement benefit plans in which Virginia Power and Dominion Gas' employees participate. Any investment-related declines in these trusts will result in future increases in the net periodic cost recognized for such employee benefit plans and will be included in the determination of the amount of cash that Virginia Power and Dominion Gas will provide to Dominion for their shares of employee benefit plan contributions.

Certain regulatory authorities have held that amounts recovered in rates for other postretirement benefits, in excess of benefits actually paid during the year, must be deposited in trust funds dedicated for the sole purpose of paying such benefits. Accordingly, Virginia Power and Dominion Gas fund other postretirement benefit costs through VEBAs. During 2016 and 2015, Virginia Power made no contributions to the VEBA and does not expect to contribute to the VEBA in 2017. Dominion Gas made no contributions to the VEBAs for employees not represented by collective bargaining units during 2016 and 2015 and does not expect to contribute in 2017.

Defined Contribution Plans

Dominion also sponsors defined contribution employee savings plans that cover substantially all employees. During 2016, 2015 and 2014, Dominion recognized \$44 million, \$43 million and \$41 million, respectively, as employer matching contributions to these plans. Dominion Gas participates in these employee savings plans, both specific to Dominion Gas and that cover multiple Dominion subsidiaries. During 2016, 2015 and 2014, Dominion Gas recognized \$7 million as employer matching contributions to these plans. Virginia Power also participates in these employee savings plans. During 2016, 2015 and 2014, Virginia Power recognized \$19 million, \$18 million and \$17 million, respectively, as employer matching contributions to these plans.

Organizational Design Initiative

In the first quarter of 2016, the Companies announced an organizational design initiative that reduced their total workforces during 2016. The goal of the organizational design initiative was to streamline leadership structure and push decision making lower while also improving efficiency. For the year ended December 31, 2016, Dominion recorded a \$65 million (\$40 million after-tax) charge, including \$33 million (\$20 million after-tax) at Virginia Power and \$8 million (\$5 million after-tax) at Dominion Gas, primarily reflected in other operations and maintenance expense in their Consolidated Statements of Income due to severance pay and other costs related to the organizational design initiative. The terms of the severance under the organizational design initiative were consistent with the Companies' existing severance plans.

NOTE 22. COMMITMENTS AND CONTINGENCIES

As a result of issues generated in the ordinary course of business, the Companies are involved in legal proceedings before various courts and are periodically subject to governmental examinations (including by regulatory authorities), inquiries and investigations. Certain legal proceedings and governmental examinations involve demands for unspecified amounts of damages, are in an initial procedural phase, involve uncertainty as to the outcome of pending appeals or motions, or involve significant factual issues that need to be resolved, such that it is not possible for the Companies to estimate a range of possible loss. For such matters for which the Companies cannot estimate a range of possible loss, a statement to this effect is made in the description of the matter. Other matters may have progressed sufficiently through the litigation or investigative processes such that the Companies are able to estimate a range of possible loss. For legal proceedings and governmental examinations for which the Companies are able to reasonably estimate a range of possible losses, an estimated range of possible loss is provided, in excess of the accrued liability (if any) for such matters. Any accrued liability is recorded on a gross basis with a receivable also recorded for any probable insurance recoveries. Estimated ranges of loss are inclusive of legal fees and net of any anticipated insurance recoveries. Any estimated range is based on currently available information and involves elements of judgment and significant uncertainties. Any estimated range of possible loss may not represent the Companies' maximum possible loss exposure. The circumstances of such legal proceedings and governmental examinations will change from time to time and actual results may vary significantly from the current estimate. For current proceedings not specifically reported below, management does not anticipate that the liabilities, if any, arising from such proceedings would have a material effect on the financial position, liquidity or results of operations of the Companies.

Environmental Matters

The Companies are subject to costs resulting from a number of federal, state and local laws and regulations designed to protect human health and the environment. These laws and regulations affect future planning and existing operations. They can result in increased capital, operating and other costs as a result of compliance, remediation, containment and monitoring obligations.

AIR

CAA

The CAA, as amended, is a comprehensive program utilizing a broad range of regulatory tools to protect and preserve the nation's air quality. At a minimum, states are required to establish regulatory programs to address all requirements of the CAA. However, states may choose to develop regulatory programs that are more restrictive. Many of the Companies' facilities are subject to the CAA's permitting and other requirements.

MATS

In December 2011, the EPA issued MATS for coal and oil-fired electric utility steam generating units. The rule establishes strict emission limits for mercury, particulate matter as a surrogate for toxic metals and hydrogen chloride as a surrogate for acid gases. The rule includes a limited use provision for oil-fired units with annual capacity factors under 8% that provides an exemption from emission limits, and allows compliance with operational work practice standards. Compliance was required by April 16, 2015, with certain limited exceptions. However, in June 2014, the VDEQ granted a one-year MATS compliance extension for two coal-fired units at Yorktown power station to defer planned retirements and allow for continued operation of the units to address reliability concerns while necessary electric transmission upgrades are being completed. These coal units will need to continue operating until at least April 2017 due to delays in transmission upgrades needed to maintain electric reliability. Therefore, in October 2015 Virginia Power submitted a request to the EPA for an additional one year compliance extension under an EPA Administrative Order. The order was signed by the EPA in April 2016 allowing the Yorktown units to operate for up to one additional year, as required to maintain reliable power availability while transmission upgrades are being made.

In June 2015, the U.S. Supreme Court issued a decision holding that the EPA failed to take cost into account when the agency first decided to regulate the emissions from coal- and oil-fired plants, and remanded the MATS rule back to the U.S. Court of Appeals for the D.C. Circuit. However, the Supreme Court did not vacate or stay the effective date and implementation of the MATS rule. In November 2015, in response to the Supreme Court decision, the EPA proposed a supplemental finding that consideration of cost does not alter the agency's previous conclusion that it is appropriate and necessary to regulate coal- and oil-fired electric utility steam generating units under Section 112 of the CAA. In December 2015, the U.S. Court of Appeals for the D.C. Circuit issued an order remanding the MATS rulemaking proceeding back to the EPA without setting aside judgment, noting that EPA had represented it was on track to issue a final finding regarding its consideration of cost. In April 2016, the EPA issued a final supplemental finding that consideration of costs does not alter its conclusion regarding appropriateness and necessity for the regulation. These actions do not change Virginia Power's plans to close coal units at Yorktown power station by April 2017 or the need to complete necessary electricity transmission upgrades which are expected to be in service approximately 20 months following receipt of all required permits and approvals for construction. Since the MATS rule remains in effect and Dominion is complying with the requirements of the rule, Dominion does not expect any adverse impacts to its operations at this time.

Jun 22 2018

CSAPR

In July 2011, the EPA issued a replacement rule for CAIR, called CSAPR, that required 28 states to reduce power plant emissions that cross state lines. CSAPR established new SO2 and NOX emissions cap and trade programs that were completely independent of the current ARP. Specifically, CSAPR required reductions in SO2 and NOX emissions from fossil fuel-fired electric generating units of 25 MW or more through annual NOX emissions caps, NOX emissions caps during the ozone season (May 1 through September 30) and annual SO2 emission caps with differing requirements for two groups of affected states. Following numerous petitions by industry participants for review and a successful motion for stay, in October 2014, the U.S. Court of Appeals for the D.C. Circuit ordered that the EPA's motion to lift the stay of CSAPR be granted. Further, the Court granted the EPA's request to shift the CSAPR compliance deadlines by three years, so that Phase 1 emissions budgets (which would have gone into effect in 2012 and 2013) applied in 2015 and 2016, and Phase 2 emissions budgets will apply in 2017 and beyond. CSAPR replaced CAIR beginning in January 2015. In September 2016, the EPA issued a revision to CSAPR that reduces the ozone season NOX emission budgets in 22 states beginning in 2017. The cost to comply with CSAPR, including the recent revision to the CSAPR ozone season NOX program, is not expected to be material to Dominion's or Virginia Power's Consolidated Financial Statements.

Ozone Standards

In October 2015, the EPA issued a final rule tightening the ozone standard from 75-ppb to 70-ppb. To comply with this standard, in April 2016 Virginia Power submitted the NOX Reasonable Available Control Technology analysis for Unit 5 at Possum Point power station. In December 2016, the VDEQ determined that NOX controls are required on Unit 5. Installation and operation of these NOX controls including an associated water treatment system will be required by mid-2019 with an expected cost in the range of \$25 to \$35 million.

The EPA is expected to complete attainment designations for a new standard by December 2017 and states will have until 2020 or 2021 to develop plans to address the new standard. Until the states have developed implementation plans, the Companies are unable to predict whether or to what extent the new rules will ultimately require additional controls. However, if significant expenditures are required to implement additional controls, it could materially affect the Companies' results of operations and cash flows.

NOx and VOC Emissions

In April 2016, the Pennsylvania Department of Environmental Protection issued final regulations, with an effective date of January 2017, to reduce NOX and VOC emissions from combustion sources. To comply with the regulations, Dominion Gas is installing emission control systems on existing engines at several compressor stations in Pennsylvania. The compliance costs associated with engineering and installation of controls and compliance demonstration with the regulation are expected to be approximately \$25 million.

NSPS

In August 2012, the EPA issued the first NSPS impacting new and modified facilities in the natural gas production and gathering sectors and made revisions to the NSPS for natural gas processing and transmission facilities. These rules establish equipment performance specifications and emissions standards for control of VOC emissions for natural gas production wells, tanks, pneumatic controllers, and compressors in the upstream sector. In June 2016, the EPA issued a final NSPS regulation, for the oil and natural gas sector, to regulate methane and VOC emissions from new and modified facilities in transmission and storage, gathering and boosting, production and processing facilities. All projects which commenced construction after September 2015 will be required to comply with this regulation. Dominion and Dominion Gas are still evaluating whether potential impacts on results of operations, financial condition and/or cash flows related to this matter will be material.

CLIMATE CHANGE REGULATION

Carbon Regulations

In October 2013, the U.S. Supreme Court granted petitions filed by several industry groups, states, and the U.S. Chamber of Commerce seeking review of the U.S. Court of Appeals for the D.C. Circuit's June 2012 decision upholding the EPA's regulation of GHG emissions from stationary sources under the CAA's permitting programs. In June 2014, the U.S. Supreme Court ruled that the EPA lacked the authority under the CAA to require PSD or Title V permits for stationary sources based solely on GHG emissions. However, the Court upheld the EPA's ability to require BACT for GHG for sources that are otherwise subject to PSD or Title V permitting for conventional pollutants. In August 2016, the EPA issued a draft rule proposing to reaffirm that a source's obligation to obtain a PSD or Title V permit for GHGs is triggered only if such permitting requirements are first triggered by non-GHG, or conventional, pollutants that are regulated by the New Source Review program, and to set a significant emissions rate at 75,000 tons per year of CO2 equivalent emissions under which a source would not be required to apply BACT for its GHG emissions. Until the EPA ultimately takes final action on this rulemaking, the Companies cannot predict the impact to their financial statements.

In July 2011, the EPA signed a final rule deferring the need for PSD and Title V permitting for CO2 emissions for biomass projects. This rule temporarily deferred for a period of up to three years the consideration of CO2 emissions from biomass projects when determining whether a stationary source meets the PSD and Title V applicability thresholds, including those for the application of BACT. The deferral policy expired in July 2014. In July 2013, the U.S. Court of Appeals for the D.C. Circuit vacated this rule; however, a mandate making this decision effective has not been issued. Virginia Power converted three coal-fired generating stations, Altavista, Hopewell and Southampton, to biomass during the CO2 deferral period. It is unclear how the court's decision or the EPA's final policy regarding the treatment of specific feedstock will affect biomass sources that were permitted during the deferral period; however, the expenditures to comply with any new requirements could be material to Dominion's and Virginia Power's financial statements.

Methane Emissions

In July 2015, the EPA announced the next generation of its voluntary Natural Gas STAR Program, the Natural Gas STAR Methane Challenge Program. The program covers the entire natural gas sector from production to distribution, with more emphasis on transparency and increased reporting for both annual emissions and reductions achieved through implementation measures. In March 2016, East Ohio, Hope, DTI and Questar Gas (prior to the Dominion Questar Combination) joined the EPA as founding partners in the new Methane Challenge program and submitted implementation plans in September 2016. DCG joined the EPA's voluntary Natural Gas STAR Program in July 2016 and submitted an implementation plan in September 2016. Dominion Gas do not expect the costs related to these programs to have a material impact on their results of operations, financial condition and/or cash flows.

WATER

The CWA, as amended, is a comprehensive program requiring a broad range of regulatory tools including a permit program to authorize and regulate discharges to surface waters with strong enforcement mechanisms. The Companies must comply with applicable aspects of the CWA programs at their operating facilities.

In October 2014, the final regulations under Section 316(b) of the CWA that govern existing facilities and new units at existing facilities that employ a cooling water intake structure and that have flow levels exceeding a minimum threshold became effective. The rule establishes a national standard for impingement based on seven compliance options, but forgoes the creation of a single technology standard for entrainment. Instead, the EPA has delegated entrainment technology decisions to state regulators. State regulators are to make case-by-case entrainment technology determinations after an examination of five mandatory facilityspecific factors, including a social cost-benefit test, and six optional facility-specific factors. The rule governs all electric generating stations with water withdrawals above two MGD, with a heightened entrainment analysis for those facilities over 125 MGD. Dominion and Virginia Power have 14 and 11 facilities, respectively, that may be subject to the final regulations. Dominion anticipates that it will have to install impingement control technologies at many of these stations that have once-through cooling systems. Dominion and Virginia Power are currently evaluating the need or potential for entrainment controls under the final rule as these decisions will be made on a case-by-case basis after a thorough review of detailed biological, technology, cost and benefit studies. While the impacts of this rule could be material to Dominion's and Virginia Power's results of operations, financial condition and/or cash flows, the existing regulatory framework in Virginia provides rate recovery mechanisms that could substantially mitigate any such impacts for Virginia Power.

In September 2015, the EPA released a final rule to revise the Effluent Limitations Guidelines for the Steam Electric Power Generating Category. The final rule establishes updated standards for wastewater discharges that apply primarily at coal and oil steam generating stations. Affected facilities are required to convert from wet to dry or closed cycle coal ash management, improve existing wastewater treatment systems and/or install new

wastewater treatment technologies in order to meet the new discharge limits. Virginia Power has eight facilities that may be subject to additional wastewater treatment requirements associated with the final rule. While the impacts of this rule could be material to Dominion's and Virginia Power's results of operations, financial condition and/or cash flows, the existing regulatory framework in Virginia provides rate recovery mechanisms that could substantially mitigate any such impacts for Virginia Power.

SOLID AND HAZARDOUS WASTE

The CERCLA, as amended, provides for immediate response and removal actions coordinated by the EPA in the event of threatened releases of hazardous substances into the environment and authorizes the U.S. government either to clean up sites at which hazardous substances have created actual or potential environmental hazards or to order persons responsible for the situation to do so. Under the CERCLA, as amended, generators and transporters of hazardous substances, as well as past and present owners and operators of contaminated sites, can be jointly, severally and strictly liable for the cost of cleanup. These potentially responsible parties can be ordered to perform a cleanup, be sued for costs associated with an EPA-directed cleanup, voluntarily settle with the U.S. government concerning their liability for cleanup costs, or voluntarily begin a site investigation and site remediation under state oversight.

From time to time, Dominion, Virginia Power, or Dominion Gas may be identified as a potentially responsible party to a Superfund site. The EPA (or a state) can either allow such a party to conduct and pay for a remedial investigation, feasibility study and remedial action or conduct the remedial investigation and action itself and then seek reimbursement from the potentially responsible parties. Each party can be held jointly, severally and strictly liable for the cleanup costs. These parties can also bring contribution actions against each other and seek reimbursement from their insurance companies. As a result, Dominion, Virginia Power, or Dominion Gas may be responsible for the costs of remedial investigation and actions under the Superfund law or other laws or regulations regarding the remediation of waste. The Companies do not believe these matters will have a material effect on results of operations, financial condition and/or cash flows.

In September 2011, the EPA issued a UAO to Virginia Power and 22 other parties, pursuant to CERCLA, ordering specific remedial action of certain areas at the Ward Transformer Superfund site located in Raleigh, North Carolina. In September 2016, the U.S., on behalf of the EPA, lodged a proposed Remedial Design/Remedial Action Consent Decree with the U.S. District Court for the Eastern District of North Carolina, settling claims related to the site between the EPA and a number of parties, including Virginia Power. In November 2016, the court approved and entered the final Consent Decree and closed the case. The Consent Decree identifies Virginia Power as a non-performing cash-out party to the settlement and resolves Virginia Power's alleged liability under CERCLA with respect to the site, including liability pursuant to the UAO. Virginia Power's cash settlement for this case was less than \$1 million.

Dominion has determined that it is associated with 19 former manufactured gas plant sites, three of which pertain to Virginia Power and 12 of which pertain to Dominion Gas. Studies conducted by other utilities at their former manufactured gas plant sites have indicated that those sites contain coal tar and other potentially harmful materials. None of the former sites with which the Companies are associated is under investigation by any state or federal environmental agency. At one of the former sites, Dominion is conducting a state-approved post closure groundwater monitoring program and an environmental land use restriction has been recorded. Another site has been accepted into a state-based voluntary remediation program. Virginia Power is currently evaluating the nature and extent of the contamination from this site as well as potential remedial options. Preliminary costs for options under evaluation for the site range from \$1 million to \$22 million. Due to the uncertainty surrounding the other sites, the Companies are unable to make an estimate of the potential financial statement impacts.

See below for discussion on ash pond and landfill closure costs.

Other Legal Matters

The Companies are defendants in a number of lawsuits and claims involving unrelated incidents of property damage and personal injury. Due to the uncertainty surrounding these matters, the Companies are unable to make an estimate of the potential financial statement impacts; however, they could have a material impact on results of operations, financial condition and/or cash flows.

APPALACHIAN GATEWAY

Pipeline Contractor Litigation

Following the completion of the Appalachian Gateway project in 2012, DTI received multiple change order requests and other claims for additional payments from a pipeline contractor for the project. In July 2013, DTI filed a complaint in U.S. District Court for the Eastern District of Virginia for breach of contract as well as accounting and declaratory relief. The contractor filed a motion to dismiss, or in the alternative, a motion to transfer venue to Pennsylvania and/or West Virginia, where the pipelines were constructed. DTI filed an opposition to the contractor's motion in August 2013. In November 2013, the court granted the contractor's motion on the basis that DTI must first comply with the dispute resolution process. In July 2015, the contractor filed a complaint against DTI in U.S. District Court for the Western District of Pennsylvania. In August 2015, DTI filed a motion to dismiss, or in the alternative, a motion to transfer venue to Virginia. In March 2016, the Pennsylvania court granted the motion to dismiss and transferred the case to the U.S. District Court for the Eastern District of Virginia. In April 2016, the Virginia court issued an order staying the proceedings and ordering mediation. A mediation occurred in May 2016 but was unsuccessful. In July 2016, DTI filed a motion to dismiss. This case is pending. DTI has accrued a liability of \$6 million for this matter. Dominion Gas cannot currently estimate additional financial statement impacts, but there could be a material impact to its financial condition and/or cash flows.

Gas Producers Litigation

In connection with the Appalachian Gateway project, Dominion Field Services, Inc. entered into contracts for firm purchase rights with a group of small gas producers. In June 2016, the gas pro-

Jun 22 2018

ducers filed a complaint in the Circuit Court of Marshall County, West Virginia against Dominion, DTI and Dominion Field Services, Inc., among other defendants, claiming that the contracts are unenforceable and seeking compensatory and punitive damages. During the third quarter of 2016, Dominion, DTI and Dominion Field Services, Inc. were served with the complaint. Also in the third quarter of 2016, Dominion and DTI, with the consent of the other defendants, removed the case to the U.S. District Court for the Northern District of West Virginia. In October 2016, the defendants filed a motion to dismiss and the plaintiffs filed a motion to remand. In February 2017, the U.S. District Court entered an order remanding the matter to the Circuit Court of Marshall County, West Virginia. This case is pending. Dominion and Dominion Gas cannot currently estimate financial statement impacts, but there could be a material impact to their financial condition and/or cash flows.

ASH POND AND LANDFILL CLOSURE COSTS

In September 2014, Virginia Power received a notice from the Southern Environmental Law Center on behalf of the Potomac Riverkeeper and Sierra Club alleging CWA violations at Possum Point power station. The notice alleges unpermitted discharges to surface water and groundwater from Possum Point power station's historical and active ash storage facilities. A similar notice from the Southern Environmental Law Center on behalf of the Sierra Club was subsequently received related to Chesapeake power station. In December 2014, Virginia Power offered to close all of its coal ash ponds and landfills at Possum Point power station, Chesapeake and Bremo power stations as settlement of the potential litigation. While the issue is open to potential further negotiations, the Southern Environmental Law Center declined the offer as presented in January 2015 and, in March 2015, filed a lawsuit related to its claims of the alleged CWA violations at Chesapeake power station. Virginia Power filed a motion to dismiss in April 2015, which was denied in November 2015. A trial was held in June 2016. This case is pending. As a result of the December 2014 settlement offer, Virginia Power recognized a charge of \$121 million in other operations and maintenance expense in its Consolidated Statements of Income for the year ended December 31, 2014.

In April 2015, the EPA's final rule regulating the management of CCRs stored in impoundments (ash ponds) and landfills was published in the Federal Register. The final rule regulates CCR landfills, existing ash ponds that still receive and manage CCRs, and inactive ash ponds that do not receive, but still store CCRs. Virginia Power currently operates inactive ash ponds, existing ash ponds, and CCR landfills subject to the final rule at eight different facilities. The enactment of the final rule in April 2015 created a legal obligation for Virginia Power to retrofit or close all of its inactive and existing ash ponds over a certain period of time, as well as perform required monitoring, corrective action, and post-closure care activities as necessary. The CCR rule requires that groundwater impacts associated with ash ponds be remediated. It is too early in the implementation phase of the rule to determine the scope of any potential groundwater remediation, but the costs, if required, could be material.

In April 2016, the EPA announced a partial settlement with certain environmental and industry organizations that had challenged the final CCR rule in the U.S. Court of Appeals for the D.C. Circuit. As part of the settlement, certain exemptions included in the final rule for inactive ponds that closed by April 2018 will be removed, resulting in inactive ponds ultimately being subject to the same requirements as existing ponds. In June 2016, the court issued an order approving the settlement, which requires the EPA to modify provisions in the final CCR rule concerning inactive ponds. In August 2016, the EPA issued a final rule, effective October 2016, extending certain compliance deadlines in the final CCR rule for inactive ponds.

In February and March 2016, respectively, two parties filed administrative appeals in the Circuit Court for the City of Richmond challenging certain provisions, relating to ash pond dewatering activities, of Possum Point power station's wastewater discharge permit issued by the VDEQ in January 2016. One of those parties withdrew its appeal in June 2016. In November 2016, the court dismissed the remaining appeal.

In 2015, Virginia Power recorded a \$386 million ARO related to future ash pond and landfill closure costs, which resulted in a \$99 million incremental charge recorded in other operations and maintenance expense in its Consolidated Statement of Income, a \$166 million increase in property, plant, and equipment associated with asset retirement costs, and a \$121 million reduction in other noncurrent liabilities related to reversal of the contingent liability described above since the ARO obligation created by the final CCR rule represents similar activities. In 2016, Virginia Power recorded an increase to this ARO of \$238 million, which resulted in a \$197 million incremental charge recorded in other operations and maintenance expense in its Consolidated Statement of Income, a \$17 million increase in property, plant, and equipment and a \$24 million increase in regulatory assets. The actual AROs related to the CCR rule may vary substantially from the estimates used to record the obligation at December 31, 2016.

In December 2016, the U.S. Congress passed and the President signed legislation that creates a framework for EPA- approved state CCR permit programs. Under this legislation, an approved state CCR permit program functions in lieu of the self-implementing Federal CCR rule. The legislation allows states more flexibility in developing permit programs to implement the environmental criteria in the CCR rule. It is unknown how long it will take for the EPA to develop the framework for state program approvals. The EPA has enforcement authority until these new CCR rules are in place and state programs are approved. The EPA and states with approved programs both will have authority to enforce CCR requirements under their respective rules and programs. Dominion cannot forecast potential incremental impacts or costs related to existing coal ash sites until rules implementing the 2016 CCR legislation are in place.

COVE POINT

Dominion is constructing the Liquefaction Project at the Cove Point facility, which would enable the facility to liquefy domestically-produced natural gas and export it as LNG. In September 2014, FERC issued an order granting authorization for Cove Point to construct, modify and operate the Liquefaction Project. In October 2014, several parties filed a motion with FERC to stay the order and requested rehearing. In May 2015, FERC denied the requests for stay and rehearing.

Jun 22 2018

Combined Notes to Consolidated Financial Statements, Continued

Two parties have separately filed petitions for review of the FERC order in the U.S. Court of Appeals for the D.C. Circuit, which petitions were consolidated. Separately, one party requested a stay of the FERC order until the judicial proceedings are complete, which the court denied in June 2015. In July 2016, the court denied one party's petition for review of the FERC order authorizing the Liquefaction Project. The court also issued a decision remanding the other party's petition for review of the FERC order to FERC for further explanation of FERC's decision that a previous transaction with an existing import shipper was not unduly discriminatory. Cove Point believes that on remand FERC will be able to justify its decision.

In September 2013, the DOE granted Non-FTA Authorization approval for the export of up to 0.77 bcfe/day of natural gas to countries that do not have an FTA for trade in natural gas. In June 2016, a party filed a petition for review of this approval in the U.S. Court of Appeals for the D.C. Circuit. This case is pending.

FERC

The FERC staff in the Office of Enforcement, Division of Investigations, is conducting a non-public investigation of Virginia Power's offers of combustion turbines generators into the PJM day-ahead markets from April 2010 through September 2014. The FERC staff notified Virginia Power of its preliminary findings relating to Virginia Power's alleged violation of FERC's rules in connection with these activities. Virginia Power has provided its response to the FERC staff's preliminary findings letter explaining why Virginia Power's conduct was lawful and refuting any allegation of wrongdoing. Virginia Power is cooperating fully with the investigation; however, it cannot currently predict whether or to what extent it may incur a material liability.

GREENSVILLE COUNTY

Virginia Power is constructing Greensville County and related transmission interconnection facilities. In July 2016, the Sierra Club filed an administrative appeal in the Circuit Court for the City of Richmond challenging certain provisions in Greensville County's PSD air permit issued by VDEQ in June 2016. Virginia Power is currently unable to make an estimate of the potential impacts to its consolidated financial statements related to this matter.

Nuclear Matters

In March 2011, a magnitude 9.0 earthquake and subsequent tsunami caused significant damage at the Fukushima Daiichi nuclear power station in northeast Japan. These events have resulted in significant nuclear safety reviews required by the NRC and industry groups such as the Institute of Nuclear Power Operations. Like other U.S. nuclear operators, Dominion has been gathering supporting data and participating in industry initiatives focused on the ability to respond to and mitigate the consequences of design-basis and beyond-design-basis events at its stations.

In July 2011, an NRC task force provided initial recommendations based on its review of the Fukushima Daiichi accident and in October 2011 the NRC staff prioritized these recommendations into Tiers 1, 2 and 3, with the Tier 1 recommendations consisting of actions which the staff determined should be started without unnecessary delay. In December 2011, the NRC Commissioners approved the agency staff's prioritization and recommendations, and that same month an appropriations act directed the NRC to require reevaluation of external hazards (not limited to seismic and flooding hazards) as soon as possible.

Based on the prioritized recommendations, in March 2012, the NRC issued orders and information requests requiring specific reviews and actions to all operating reactors, construction permit holders and combined license holders based on the lessons learned from the Fukushima Daiichi event. The orders applicable to Dominion requiring implementation of safety enhancements related to mitigation strategies to respond to extreme natural events resulting in the loss of power at plants, and enhancing spent fuel pool instrumentation have been implemented. The information requests issued by the NRC request each reactor to reevaluate the seismic and external flooding hazards at their site using present-day methods and information, conduct walkdowns of their facilities to ensure protection against the hazards in their current design basis, and to reevaluate their emergency communications systems and staffing levels. The walkdowns of each unit have been completed, audited by the NRC and found to be adequate. Reevaluation of the emergency communications systems and staffing levels was completed as part of the effort to comply with the orders. Reevaluation of the seismic and external flooding hazards is expected to continue through 2018. Dominion and Virginia Power do not currently expect that compliance with the NRC's information requests will materially impact their financial position, results of operations or cash flows during the implementation period. The NRC staff is evaluating the implementation of the longer term Tier 2 and Tier 3 recommendations. Dominion and Virginia Power do not expect material financial impacts related to compliance with Tier 2 and Tier 3 recommendations.

Nuclear Operations

NUCLEAR DECOMMISSIONING-MINIMUM FINANCIAL ASSURANCE

The NRC requires nuclear power plant owners to annually update minimum financial assurance amounts for the future decommissioning of their nuclear facilities. Decommissioning involves the decontamination and removal of radioactive contaminants from a nuclear power station once operations have ceased, in accordance with standards established by the NRC. The 2016 calculation for the NRC minimum financial assurance amount, aggregated for Dominion's and Virginia Power's nuclear units, excluding joint owners' assurance amounts and Millstone Unit 1 and Kewaunee, as those units are in a decommissioning state, was \$2.9 billion and \$1.8 billion, respectively, and has been satisfied by a combination of the funds being collected and deposited in the nuclear decommissioning trusts and the real annual rate of return growth of the funds allowed by the NRC. The 2016 NRC minimum financial assurance amounts above were calculated using preliminary December 31, 2016 U.S. Bureau of Labor Statistics indices. Dominion believes that the amounts currently available in its decommissioning trusts and their expected earnings will be sufficient to cover expected decommissioning costs for the Millstone and Kewaunee units. Virginia Power also believes that the decommissioning funds and

their expected earnings for the Surry and North Anna units will be sufficient to cover decommissioning costs, particularly when combined with future ratepayer collections and contributions to these decommissioning trusts, if such future collections and contributions are required. This reflects a positive long-term outlook for trust fund investment returns as the decommissioning of the units will not be complete for decades. Dominion and Virginia Power will continue to monitor these trusts to ensure they meet the NRC minimum financial assurance requirement, which may include, if needed, the use of parent company guarantees, surety bonding or other financial instruments recognized by the NRC. See Note 9 for additional information on nuclear decommissioning trust investments.

NUCLEAR INSURANCE

The Price-Anderson Amendments Act of 1988 provides the public up to \$13.36 billion of liability protection per nuclear incident, via obligations required of owners of nuclear power plants, and allows for an inflationary provision adjustment every five years. Dominion and Virginia Power have purchased \$375 million of coverage from commercial insurance pools for each reactor site with the remainder provided through a mandatory industry retrospective rating plan. In the event of a nuclear incident at any licensed nuclear reactor in the U.S., the Companies could be assessed up to \$127 million for each of their licensed reactors not to exceed \$19 million per year per reactor. There is no limit to the number of incidents for which this retrospective premium can be assessed. However, the NRC granted an exemption in March 2015 to remove Kewaunee from the Secondary Financial Protection program.

The current levels of nuclear property insurance coverage for Dominion's and Virginia Power's nuclear units is as follows:

	Coverage
(billions)	
Dominion	
Millstone	\$ 1.70
Kewaunee	1.06
Virginia Power(1)	
Surry	\$ 1.70
North Anna	1.70

(1) Surry and North Anna share a blanket property limit of \$200 million.

Dominion's and Virginia Power's nuclear property insurance coverage for Millstone, Surry and North Anna exceeds the NRC minimum requirement for nuclear power plant licensees of \$1.06 billion per reactor site. Kewaunee meets the NRC minimum requirement of \$1.06 billion. This includes coverage for premature decommissioning and functional total loss. The NRC requires that the proceeds from this insurance be used first, to return the reactor to and maintain it in a safe and stable condition and second, to decontaminate the reactor and station site in accordance with a plan approved by the NRC. Nuclear property insurance is provided by NEIL, a mutual insurance company, and is subject to retrospective premium assessments in any policy year in which losses exceed the funds available to the insurance company. Dominion's and Virginia Power's maximum retrospective premium assessment for the current policy period is \$87 million and \$49 million, respectively. Based on the severity of the incident, the Board of Directors of the nuclear insurer has the discretion to lower or eliminate the maximum retrospective premium assessment. Dominion and Virginia Power have the financial responsibility for any losses that exceed the limits or for which insurance proceeds are not available because they must first be used for stabilization and decontamination.

Millstone and Virginia Power also purchase accidental outage insurance from NEIL to mitigate certain expenses, including replacement power costs, associated with the prolonged outage of a nuclear unit due to direct physical damage. Under this program, Dominion and Virginia Power are subject to a retrospective premium assessment for any policy year in which losses exceed funds available to NEIL. Dominion's and Virginia Power's maximum retrospective premium assessment for the current policy period is \$23 million and \$10 million, respectively.

ODEC, a part owner of North Anna, and Massachusetts Municipal and Green Mountain, part owners of Millstone's Unit 3, are responsible to Dominion and Virginia Power for their share of the nuclear decommissioning obligation and insurance premiums on applicable units, including any retrospective premium assessments and any losses not covered by insurance.

SPENT NUCLEAR FUEL

Dominion and Virginia Power entered into contracts with the DOE for the disposal of spent nuclear fuel under provisions of the Nuclear Waste Policy Act of 1982. The DOE failed to begin accepting the spent fuel on January 31, 1998, the date provided by the Nuclear Waste Policy Act and by Dominion's and Virginia Power's contracts with the DOE. Dominion and Virginia Power have previously received damages award payments and settlement payments related to these contracts.

By mutual agreement of the parties, the settlement agreements are extendable to provide for resolution of damages incurred after 2013. The settlement agreements for the Surry, North Anna and Millstone plants have been extended to provide for periodic payments for damages incurred through December 31, 2016, and additional extensions are contemplated by the settlement agreements. Possible settlement of the Kewaunee claims for damages incurred after December 31, 2013 is being evaluated.

In 2016, Virginia Power and Dominion received payments of \$30 million for resolution of claims incurred at North Anna and Surry for the period of January 1, 2014 through December 31, 2014, and \$22 million for resolution of claims incurred at Millstone for the period of July 1, 2014 through June 30, 2015.

In 2015, Virginia Power and Dominion received payments of \$8 million for resolution of claims incurred at North Anna and Surry for the period of January 1, 2013 through December 31, 2013, and \$17 million for resolution of claims incurred at Millstone for the period of July 1, 2013 through June 30, 2014.

In 2014, Virginia Power and Dominion received payments of \$27 million for the resolution of claims incurred at North Anna and Surry for the period January 1, 2011 through December 31, 2012 and \$17 million for the resolution of claims incurred at Millstone for the period of July 1, 2012 through June 30, 2013. In 2014, Dominion also received payments totaling \$7 million for the resolution of claims incurred at Kewaunee for periods from January 1, 2011 through December 31, 2013.

Dominion and Virginia Power continue to recognize receivables for certain spent nuclear fuel-related costs that they believe are probable of recovery from the DOE. Dominion's receivables

Combined Notes to Consolidated Financial Statements, Continued

for spent nuclear fuel-related costs totaled \$56 million and \$87 million at December 31, 2016 and 2015, respectively. Virginia Power's receivables for spent nuclear fuel-related costs totaled \$37 million and \$54 million at December 31, 2016 and 2015, respectively.

Pursuant to a November 2013 decision of the U.S Court of Appeals for the D.C. Circuit, in January 2014 the Secretary of the DOE sent a recommendation to the U.S. Congress to adjust to zero the current fee of \$1 per MWh for electricity paid by civilian nuclear power generators for disposal of spent nuclear fuel. The processes specified in the Nuclear Waste Policy Act for adjustment of the fee have been completed, and as of May 2014, Dominion and Virginia Power are no longer required to pay the waste fee. In 2014, Dominion and Virginia Power recognized fees of \$16 million and \$10 million, respectively.

Dominion and Virginia Power will continue to manage their spent fuel until it is accepted by the DOE.

Long-Term Purchase Agreements

At December 31, 2016, Virginia Power had the following long-term commitments that are noncancelable or are cancelable only under certain conditions, and that third parties have used to secure financing for the facilities that will provide the contracted goods or services:

	2017	2018	2019	2020	2021	Thereafter	Total
(millions)							
Purchased electric capacity(1)	\$149	\$93	\$60	\$52	\$46	\$ —	\$400

(1) Commitments represent estimated amounts payable for capacity under power purchase contracts with qualifying facilities and independent power producers, the last of which ends in 2021. Capacity payments under the contracts are generally based on fixed dollar amounts per month, subject to escalation using broad-based economic indices. At December 31, 2016, the present value of Virginia Power's total commitment for capacity payments is \$347 million. Capacity payments totaled \$248 million, \$305 million, and \$330 million, and energy payments totaled \$126 million, \$198 million, and \$304 million for the years ended 2016, 2015 and 2014, respectively.

Lease Commitments

The Companies lease real estate, vehicles and equipment primarily under operating leases. Payments under certain leases are escalated based on an index such as the consumer price index. Future minimum lease payments under noncancelable operating and capital leases that have initial or remaining lease terms in excess of one year as of December 31, 2016 are as follows:

	2017	2018	2019	2020	2021	Thereafter	Total
(millions)							
Dominion(1)	\$72	\$69	\$58	\$39	\$32	\$ 238	\$508
Virginia Power	\$33	\$30	\$24	\$20	\$16	\$ 32	\$155
Dominion Gas	\$27	\$26	\$21	\$8	\$5	\$ 18	\$105

(1) Amounts include a lease agreement for the Dominion Questar corporate office, which is accounted for as a capital lease. At December 31, 2016, the Consolidated Balance Sheets include \$30 million in property, plant and equipment and \$35 million in other deferred credits and other liabilities. The Consolidated Statements of Income include less than \$1 million recorded in depreciation, depletion and amortization for the year ended December 31, 2016. Rental expense for Dominion totaled \$104 million, \$99 million, and \$92 million for 2016, 2015 and 2014, respectively. Rental expense for Virginia Power totaled \$52 million, \$51 million, and \$43 million for 2016, 2015, and 2014, respectively. Rental expense for Dominion Gas totaled \$37 million, \$37 million, and \$35 million for 2016, 2015 and 2014, respectively. The majority of rental expense is reflected in other operations and maintenance expense in the Consolidated Statements of Income.

In July 2016, Dominion signed an agreement with a lessor to construct and lease a new corporate office property in Richmond, Virginia. The lessor is providing equity and has obtained financing commitments from debt investors, totaling \$365 million, to fund the estimated project costs. The project is expected to be completed by mid-2019. Dominion has been appointed to act as the construction agent for the lessor, during which time Dominion will request cash draws from the lessor and debt investors to fund all project costs, which totaled \$46 million as of December 31, 2016. If the project is terminated under certain events of default, Dominion could be required to pay up to 89.9% of the then funded amount. For specific full recourse events, Dominion could be required to pay up to 100% of the then funded amount.

The five-year lease term will commence once construction is substantially complete and the facility is able to be occupied. At the end of the initial lease term, Dominion can (i) extend the term of the lease for an additional five years, subject to the approval of the participants, at current market terms, (ii) purchase the property for an amount equal to the project costs or, (iii) subject to certain terms and conditions, sell the property to a third party using commercially reasonable efforts to obtain the highest cash purchase price for the property. If the project is sold and the proceeds from the sale are insufficient to repay the investors for the project costs, Dominion may be required to make a payment to the lessor, up to 87% of project costs, for the difference between the project costs and sale proceeds.

Guarantees, Surety Bonds and Letters of Credit

At December 31, 2016, Dominion had issued \$48 million of guarantees, primarily to support equity method investees. No significant amounts related to these guarantees have been recorded.

Dominion also enters into guarantee arrangements on behalf of its consolidated subsidiaries, primarily to facilitate their commercial transactions with third parties. If any of these subsidiaries fail to perform or pay under the contracts and the counterparties seek performance or payment, Dominion would be obligated to satisfy such obligation. To the extent that a liability subject to a guarantee has been incurred by one of Dominion's consolidated subsidiaries, that liability is included in the Consolidated Financial Statements. Dominion is not required to recognize liabilities for guarantees issued on behalf of its subsidiaries unless it becomes probable that it will have to perform under the guarantees. Terms of the guarantees typically end once obligations have been paid. Dominion currently believes it is unlikely that it would be required to perform or otherwise incur any losses associated with guarantees of its subsidiaries' obligations.

At December 31, 2016, Dominion had issued the following subsidiary guarantees:

	Max	imum Exposure
(millions)		
Commodity transactions(1)	\$	2,074
Nuclear obligations(2)		169
Cove Point(3)		1,900
Solar(4)		1,130
Other(5)		545
Total(6)	\$	5,818

(1) Guarantees related to commodity commitments of certain subsidiaries. These guarantees were provided to counterparties in order to facilitate physical and financial transaction related commodities and services.

(2) Guarantees related to certain DEI subsidiaries' regarding all aspects of running a nuclear facility.

- (3) Guarantees related to Cove Point, in support of terminal services, transportation and construction. Cove Point has two guarantees that have no maximum limit and, therefore, are not included in this amount.
- (4) Includes guarantees to facilitate the development of solar projects. Also includes guarantees entered into by DEI on behalf of certain subsidiaries to facilitate the acquisition and development of solar projects.
- (5) Guarantees related to other miscellaneous contractual obligations such as leases, environmental obligations, construction projects and insurance programs. Due to the uncertainty of worker's compensation claims, the parental guarantee has no stated limit. Also included are guarantees related to certain DEI subsidiaries' obligations for equity capital contributions and energy generation associated with Fowler Ridge and NedPower. As of December 31, 2016, Dominion's maximum remaining cumulative exposure under these equity funding agreements is \$36 million through 2019 and its maximum annual future contributions could range from approximately \$4 million to \$19 million.
- (6) Excludes Dominion's guarantee for the construction of the new corporate office property discussed further within Lease Commitments above.

Additionally, at December 31, 2016, Dominion had purchased \$149 million of surety bonds, including \$71 million at Virginia Power and \$22 million at Dominion Gas, and authorized the issuance of letters of credit by financial institutions of \$85 million to facilitate commercial transactions by its subsidiaries with third parties. Under the terms of surety bonds, the Companies are obligated to indemnify the respective surety bond company for any amounts paid.

As of December 31, 2016, Virginia Power had issued \$14 million of guarantees primarily to support tax-exempt debt issued through conduits. The related debt matures in 2031 and is included in long-term debt in Virginia Power's Consolidated Balance Sheets. In the event of default by a conduit, Virginia Power would be obligated to repay such amounts, which are limited to the principal and interest then outstanding.

Indemnifications

As part of commercial contract negotiations in the normal course of business, the Companies may sometimes agree to make payments to compensate or indemnify other parties for possible future unfavorable financial consequences resulting from specified events. The specified events may involve an adverse judgment in a lawsuit or the imposition of additional taxes due to a change in tax law or interpretation of the tax law. The Companies are unable to develop an estimate of the maximum potential amount of any other future payments under these contracts because events that would obligate them have not yet occurred or, if any such event has occurred, they have not been notified of its occurrence. However, at December 31, 2016, the Companies believe any other future payments, if any, that could ultimately become payable under these contract provisions, would not have a material impact on their results of operations, cash flows or financial position.

NOTE 23. CREDIT RISK

Credit risk is the risk of financial loss if counterparties fail to perform their contractual obligations. In order to minimize overall credit risk, credit policies are maintained, including the evaluation of counterparty financial condition, collateral requirements and the use of standardized agreements that facilitate the netting of cash flows associated with a single counterparty. In addition, counterparties may make available collateral, including letters of credit or cash held as margin deposits, as a result of exceeding agreed-upon credit limits, or may be required to prepay the transaction.

The Companies maintain a provision for credit losses based on factors surrounding the credit risk of their customers, historical trends and other information. Management believes, based on credit policies and the December 31, 2016 provision for credit losses, that it is unlikely that a material adverse effect on financial position, results of operations or cash flows would occur as a result of counterparty nonperformance.

GENERAL

DOMINION

As a diversified energy company, Dominion transacts primarily with major companies in the energy industry and with commercial and residential energy consumers. These transactions principally occur in the Northeast, mid-Atlantic, Midwest and Rocky Mountain regions of the U.S. Dominion does not believe that this geographic concentration contributes significantly to its overall exposure to credit risk. In addition, as a result of its large and diverse customer base, Dominion is not exposed to a significant concentration of credit risk for receivables arising from electric and gas utility operations.

Dominion's exposure to credit risk is concentrated primarily within its energy marketing and price risk management activities, as Dominion transacts with a smaller, less diverse group of counterparties and transactions may involve large notional volumes and potentially volatile commodity prices. Energy marketing and price risk management activities include marketing of merchant generation output, structured transactions and the use of financial contracts for enterprise-wide hedging purposes. Gross credit exposure for each counterparty is calculated as outstanding receivables plus any unrealized on- or off-balance sheet exposure, taking into account contractual netting rights. Gross credit exposure is calculated prior to the application of any collateral. At December 31, 2016, Dominion's credit exposure totaled \$98 million. Of this amount, investment grade counterparties, including those internally rated, represented 53%, and no single counterparty, whether investment grade or non-investment grade, exceeded \$9 million of exposure.

VIRGINIA POWER

Virginia Power sells electricity and provides distribution and transmission services to customers in Virginia and northeastern North Carolina. Management believes that this geographic concentration risk is mitigated by the diversity of Virginia Power's customer base, which includes residential, commercial and

Jun 22 2018

Table of Contents

Combined Notes to Consolidated Financial Statements, Continued

industrial customers, as well as rural electric cooperatives and municipalities. Credit risk associated with trade accounts receivable from energy consumers is limited due to the large number of customers. Virginia Power's exposure to potential concentrations of credit risk results primarily from sales to wholesale customers. Virginia Power's gross credit exposure for each counterparty is calculated as outstanding receivables plus any unrealized on- or off-balance sheet exposure, taking into account contractual netting rights. Gross credit exposure is calculated prior to the application of collateral. At December 31, 2016, Virginia Power's credit exposure totaled \$42 million. Of this amount, investment grade counterparties, including those internally rated, represented 33%, and no single counterparty, whether investment grade or non-investment grade, exceeded \$6 million of exposure.

DOMINION GAS

Dominion Gas transacts mainly with major companies in the energy industry and with residential and commercial energy consumers. These transactions principally occur in the Northeast, mid-Atlantic and Midwest regions of the U.S. Dominion Gas does not believe that this geographic concentration contributes to its overall exposure to credit risk. In addition, as a result of its large and diverse customer base, Dominion Gas is not exposed to a significant concentration of credit risk for receivables arising from gas utility operations.

In 2016, DTI provided service to 289 customers with approximately 96% of its storage and transportation revenue being provided through firm services. The ten largest customers provided approximately 40% of the total storage and transportation revenue and the thirty largest provided approximately 70% of the total storage and transportation revenue.

East Ohio distributes natural gas to residential, commercial and industrial customers in Ohio using rates established by the Ohio Commission. Approximately 98% of East Ohio revenues are derived from its regulated gas distribution services. East Ohio's bad debt risk is mitigated by the regulatory framework established by the Ohio Commission. See Note 13 for further information about Ohio's PIPP and UEX Riders that mitigate East Ohio's overall credit risk.

CREDIT-RELATED CONTINGENT PROVISIONS

The majority of Dominion's derivative instruments contain credit-related contingent provisions. These provisions require Dominion to provide collateral upon the occurrence of specific events, primarily a credit downgrade. If the credit-related contingent features underlying these instruments that are in a liability position and not fully collateralized with cash were fully triggered as of December 31, 2016 and 2015, Dominion would have been required to post an additional \$3 million and \$12 million, respectively, of collateral to its counterparties. The collateral that would be required to be posted includes the impacts of any offsetting asset positions and any amounts already posted for derivatives, non-derivative contracts and derivatives elected under the normal purchases and normal sales exception, per contractual terms. Dominion had posted no collateral at December 31, 2016 and 2015, related to derivatives with credit-related contingent provisions that are in a liability position and not fully collateralized with cash. The collateral posted includes any amounts paid related to non-derivative contracts and derivatives

elected under the normal purchases and normal sales exception, per contractual terms. The aggregate fair value of all derivative instruments with credit-related contingent provisions that are in a liability position and not fully collateralized with cash as of December 31, 2016 and 2015 was \$9 million and \$49 million, respectively, which does not include the impact of any offsetting asset positions. Credit-related contingent provisions for Virginia Power and Dominion Gas were not material as of December 31, 2016 and 2015. See Note 7 for further information about derivative instruments.

NOTE 24. RELATED-PARTY TRANSACTIONS

Virginia Power and Dominion Gas engage in related party transactions primarily with other Dominion subsidiaries (affiliates). Virginia Power's and Dominion Gas' receivable and payable balances with affiliates are settled based on contractual terms or on a monthly basis, depending on the nature of the underlying transactions. Virginia Power and Dominion Gas are included in Dominion's consolidated federal income tax return and, where applicable, combined income tax returns for Dominion's transactions with equity method investments are described in Note 9. A discussion of significant related party transactions follows.

VIRGINIA POWER

Transactions with Affiliates

Virginia Power transacts with affiliates for certain quantities of natural gas and other commodities in the ordinary course of business. Virginia Power also enters into certain commodity derivative contracts with affiliates. Virginia Power uses these contracts, which are principally comprised of commodity swaps, to manage commodity price risks associated with purchases of natural gas. See Notes 7 and 19 for more information. As of December 31, 2016, Virginia Power's derivative assets and liabilities with affiliates were \$41 million and \$8 million, respectively. As of December 31, 2015, Virginia Power's derivative assets and liabilities with affiliates were \$13 million, respectively.

Virginia Power participates in certain Dominion benefit plans as described in Note 21. At December 31, 2016 and 2015, Virginia Power's amounts due to Dominion associated with the Dominion Pension Plan and reflected in noncurrent pension and other postretirement benefit liabilities in the Consolidated Balance Sheets were \$396 million and \$316 million, respectively. At December 31, 2016 and 2015, Virginia Power's amounts due from Dominion associated with the Dominion Retiree Health and Welfare Plan and reflected in noncurrent pension and other postretirement benefit assets in the Consolidated Balance Sheets were \$130 million and \$77 million, respectively.

DRS and other affiliates provide accounting, legal, finance and certain administrative and technical services to Virginia Power. In addition, Virginia Power provides certain services to affiliates, including charges for facilities and equipment usage.

The financial statements for all years presented include costs for certain general, administrative and corporate expenses assigned by DRS to Virginia Power on the basis of direct and allocated methods in accordance with Virginia Power's services agreements with DRS. Where costs incurred cannot be determined by specific identification, the costs are allocated based on the proportional level of effort devoted by DRS resources that is attributable to the entity, determined by reference to number of employees, salaries and wages and other similar measures for the relevant DRS service. Management believes the assumptions and methodologies underlying the allocation of general corporate overhead expenses are reasonable.

Presented below are significant transactions with DRS and other affiliates:

Year Ended December 31,	2016	2015	2014
(millions)			
Commodity purchases from affiliates	\$571	\$555	\$543
Services provided by affiliates(1)	454	422	432
Services provided to affiliates	22	22	22

(1) Includes capitalized expenditures of \$144 million, \$143 million and \$146 million for the year ended December 31, 2016, 2015, and 2014, respectively.

Virginia Power has borrowed funds from Dominion under short-term borrowing arrangements. There were \$262 million and \$376 million in short-term demand note borrowings from Dominion as of December 31, 2016 and 2015, respectively. The weighted-average interest rate of these borrowings was 0.97% and 0.60% at December 31, 2016 and 2015, respectively. Virginia Power had no outstanding borrowings, net of repayments under the Dominion money pool for its nonregulated subsidiaries as of December 31, 2016 and 2015. Interest charges related to Virginia Power's borrowings from Dominion were immaterial for the years ended December 31, 2016, 2015 and 2014.

There were no issuances of Virginia Power's common stock to Dominion in 2016, 2015 or 2014.

DOMINION GAS

Transactions with Related Parties

Dominion Gas transacts with affiliates for certain quantities of natural gas and other commodities at market prices in the ordinary course of business. Additionally, Dominion Gas provides transportation and storage services to affiliates. Dominion Gas also enters into certain other contracts with affiliates, which are presented separately from contracts involving commodities or services. As of December 31, 2016 and 2015, all of Dominion Gas' commodity derivatives were with affiliates. See Notes 7 and 19 for more information. See Note 9 for information regarding transactions with an affiliate.

Dominion Gas participates in certain Dominion benefit plans as described in Note 21. At December 31, 2016 and 2015, Dominion Gas' amounts due from Dominion associated with the Dominion Pension Plan and reflected in noncurrent pension and other postretirement benefit assets in the Consolidated Balance Sheets were \$697 million and \$652 million, respectively. At December 31, 2016 and 2015, Dominion Gas' amounts due from Dominion and liabilities due to Dominion associated with the Dominion Retiree Health and Welfare Plan were immaterial. DRS and other affiliates provide accounting, legal, finance and certain administrative and technical services to Dominion Gas. Dominion Gas provides certain services to related parties, including technical services.

The financial statements for all years presented include costs for certain general, administrative and corporate expenses assigned by DRS to Dominion Gas on the basis of direct and allocated methods in accordance with Dominion Gas' services agreements with DRS. Where costs incurred cannot be determined by specific identification, the costs are allocated based on the proportional level of effort devoted by DRS resources that is attributable to the entity, determined by reference to number of employees, salaries and wages and other similar measures for the relevant DRS service. Management believes the assumptions and methodologies underlying the allocation of general corporate overhead expenses are reasonable. The costs of these services follow:

Year Ended December 31,	2016	2015	2014
(millions)			
Purchases of natural gas and transportation and			
storage services from affiliates	\$9	\$ 10	\$ 34
Sales of natural gas and transportation and			
storage services to affiliates	69	69	84
Services provided by related parties(1)	141	133	106
Services provided to related parties(2)	128	101	17

(1) Includes capitalized expenditures of \$49 million, \$57 million and \$49 million for the year ended December 31, 2016, 2015, and 2014, respectively.
(2) Amounts primarily attributable to Atlantic Coast Pipeline.

The following table presents affiliated and related party balances reflected in Dominion Gas' Consolidated Balance Sheets:

At December 31.	2016	2015
(millions)		
Other receivables(1)	\$10	\$7
Customer receivables from related parties	1	4
Imbalances receivable from affiliates	2	1
Imbalances payable to affiliates(2)	4	_
Affiliated notes receivable(3)	18	14

 (1) Represents amounts due from Atlantic Coast Pipeline, a related party VIE.
 (2) Amounts are presented in other current liabilities in Dominion Gas' Consolidated Balance Sheets.

(3) Amounts are presented in other deferred charges and other assets in Dominion Gas' Consolidated Balance Sheets.

Dominion Gas' borrowings under the IRCA with Dominion totaled \$118 million and \$95 million as of December 31, 2016 and 2015, respectively. The weighted-average interest rate of these borrowings was 1.08% and 0.65% at December 31, 2016 and 2015, respectively. Interest charges related to Dominion Gas' total borrowings from Dominion were immaterial for the years ended December 31, 2016 and 2015 and \$4 million for the year ended December 31, 2014. Combined Notes to Consolidated Financial Statements, Continued

NOTE 25. OPERATING SEGMENTS

The Companies are organized primarily on the basis of products and services sold in the U.S. A description of the operations included in the Companies' primary operating segments is as follows:

Primary Operating			Virginia	Dominion
Segment	Description of Operations	Dominion	Power	Gas
DVP	Regulated electric			
	distribution	х	х	
	Regulated electric			
	transmission	х	х	
Dominion Generation	Regulated electric fleet	Х	Х	
	Merchant electric fleet	х		
Dominion Energy	Gas transmission and			
	storage	X(1)		Х
	Gas distribution and			
	storage	х		х
	Gas gathering and			
	processing	х		х
	LNG import and storage	х		
	Nonregulated retail			
	energy marketing	х		

(1) Includes remaining producer services activities.

In addition to the operating segments above, the Companies also report a Corporate and Other segment.

Dominion

The Corporate and Other Segment of Dominion includes its corporate, service company and other functions (including unallocated debt). In addition, Corporate and Other includes specific items attributable to Dominion's operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

In March 2014, Dominion exited the electric retail energy marketing business. As a result, the earnings impact from the electric retail energy marketing business has been included in the Corporate and Other Segment of Dominion for 2014 first quarter results of operations.

In the second quarter of 2013, Dominion commenced a restructuring of its producer services business, which aggregates natural gas supply, engages in natural gas trading and marketing activities and natural gas supply management and provides price risk management services to Dominion affiliates. The restructuring, which was completed in the first quarter of 2014, resulted in the termination of natural gas trading and certain energy marketing activities. As a result, the earnings impact from natural gas trading and certain energy marketing activities has been included in the Corporate and Other Segment of Dominion for 2014.

In 2016, Dominion reported after-tax net expenses of \$484 million in the Corporate and Other segment, with \$180 million of these net expenses attributable to specific items related to its operating segments. The net expenses for specific items in 2016 primarily related to the impact of the following items:

A \$197 million (\$122 million after-tax) charge related to future ash pond and landfill closure costs at certain utility generation facilities, attributable to Dominion Generation: and

- A \$59 million (\$36 million after-tax) charge related to an organizational design initiative, attributable to:
 - DVP (\$5 million after-tax);
 - Dominion Energy (\$12 million after-tax); and
 - Dominion Generation (\$19 million after-tax).

In 2015, Dominion reported after-tax net expenses of \$391 million in the Corporate and Other segment, with \$136 million of these net expenses attributable to specific items related to its operating segments.

The net expenses for specific items in 2015 primarily related to the impact of the following items:

- A \$99 million (\$60 million after-tax) charge related to future ash pond and landfill closure costs at certain utility generation facilities, attributable to Dominion Generation; and
- An \$85 million (\$52 million after-tax) write-off of deferred fuel costs associated with Virginia legislation enacted in February 2015, attributable to Dominion Generation.

In 2014, Dominion reported after-tax net expenses of \$970 million in the Corporate and Other segment, with \$544 million of these net expenses attributable to specific items related to its operating segments.

The net expenses for specific items in 2014 primarily related to the impact of the following items:

- \$374 million (\$248 million after-tax) in charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities, attributable to Dominion Generation;
- A \$319 million (\$193 million after-tax) net loss related to the producer services business discussed above, attributable to Dominion Energy; and
- A \$121 million (\$74 million after-tax) charge related to a settlement offer to incur future ash pond closure costs at certain utility generation facilities, attributable to Dominion Generation.

The following table presents segment information pertaining to Dominion's operations:

Intersegment sales and transfers for Dominion are based on contractual arrangements and may result in intersegment profit or loss that is eliminated in consolidation.

Virginia Power

The majority of Virginia Power's revenue is provided through tariff rates. Generally, such revenue is allocated for management reporting based on an unbundled rate methodology among Virginia Power's DVP and Dominion Generation segments.

The Corporate and Other Segment of Virginia Power primarily includes specific items attributable to its operating segments that are not included in profit measures evaluated by executive management in assessing the segments' performance or in allocating resources.

In 2016, Virginia Power reported after-tax net expenses of \$173 million for specific items attributable to its operating segments in the Corporate and Other segment.

The net expenses for specific items in 2016 primarily related to the impact of the following item:

 A \$197 million (\$121 million after-tax) charge related to future ash pond and landfill closure costs at certain utility generation facilities, attributable to Dominion Generation.

In 2015, Virginia Power reported after-tax net expenses of \$153 million for specific items attributable to its operating segments in the Corporate and Other segment.

The net expenses for specific items in 2015 primarily related to the impact of the following items:

- A \$99 million (\$60 million after-tax) charge related to future ash pond and landfill closure costs at certain utility generation facilities, attributable to Dominion Generation; and
- An \$85 million (\$52 million after-tax) write-off of deferred fuel costs associated with Virginia legislation enacted in February 2015, attributable to Dominion Generation.

In 2014, Virginia Power reported after-tax net expenses of \$342 million for specific items attributable to its operating segments in the Corporate and Other segment.

The net expenses for specific items in 2014 primarily related to the impact of the following items:

- \$374 million (\$248 million after-tax) in charges associated with Virginia legislation enacted in April 2014 relating to the development of a third nuclear unit located at North Anna and offshore wind facilities, attributable to Dominion Generation; and
- A \$121 million (\$74 million after-tax) charge related to a settlement offer to incur future ash pond closure costs at certain utility generation facilities, attributable to Dominion Generation.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

DOMINION

Senior management, including Dominion's CEO and CFO, evaluated the effectiveness of Dominion's disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation process, Dominion's CEO and CFO have concluded that Dominion's disclosure controls and procedures are effective. There were no changes in Dominion's internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, Dominion's internal control over financial reporting.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL Over Financial Reporting

Management of Dominion understands and accepts responsibility for Dominion's financial statements and related disclosures and the effectiveness of internal control over financial reporting (internal control). Dominion continuously strives to identify opportunities to enhance the effectiveness and efficiency of internal control, just as Dominion does throughout all aspects of its business.

Dominion maintains a system of internal control designed to provide reasonable assurance, at a reasonable cost, that its assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed and recorded in accordance with established procedures. This system includes written policies, an organizational structure designed to ensure appropriate segregation of responsibilities, careful selection and training of qualified personnel and internal audits.

The Audit Committee of the Board of Directors of Dominion, composed entirely of independent directors, meets periodically with the independent registered public accounting firm, the internal auditors and management to discuss auditing, internal control, and financial reporting matters of Dominion and to ensure that each is properly discharging its responsibilities. Both the independent registered public accounting firm and the internal auditors periodically meet alone with the Audit Committee and have free access to the Committee at any time.

SEC rules implementing Section 404 of the Sarbanes-Oxley Act of 2002 require Dominion's 2016 Annual Report to contain a management's report and a report of the independent registered public accounting firm regarding the effectiveness of internal control. As a basis for the report, Dominion tested and evaluated the design and operating effectiveness of internal controls. Based on its assessment as of December 31, 2016, Dominion makes the following assertions:

Management is responsible for establishing and maintaining effective internal control over financial reporting of Dominion.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal controls can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

Management evaluated Dominion's internal control over financial reporting as of December 31, 2016. This assessment was based on criteria for effective internal control over financial reporting described in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that Dominion maintained effective internal control over financial reporting as of December 31, 2016.

Dominion's independent registered public accounting firm is engaged to express an opinion on Dominion's internal control over financial reporting, as stated in their report which is included herein.

In September 2016, Dominion acquired Dominion Questar. Dominion excluded all of the acquired Dominion Questar's business from the scope of management's assessment of the effectiveness of Dominion's internal control over financial reporting as of December 31, 2016. Dominion Questar constituted 3% of Dominion's total revenues for 2016 and 6% of Dominion's total assets as of December 31, 2016.

February 28, 2017

OFFICIAL COP

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Dominion Resources, Inc. Richmond, Virginia

We have audited the internal control over financial reporting of Dominion Resources, Inc. and subsidiaries ("Dominion") as of December 31, 2016, based on criteria established in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. As described in Management's Annual Report on Internal Control over Financial Reporting, management excluded from its assessment the internal control over financial reporting the acquired Dominion Questar businesses which were acquired on September 16, 2016 and who constitute 3% of total revenues and 6% of total assets of the consolidated financial statement amounts at and for the year ended December 31, 2016. Accordingly, our audit did not include the internal control over financial reporting of Questar businesses. Dominion's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Dominion's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Dominion maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control-Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended December 31, 2016 of Dominion and our report dated February 28, 2017 expressed an unqualified opinion on those financial statements.

/s/ Deloitte & Touche LLP Richmond, Virginia February 28, 2017

VIRGINIA POWER

Senior management, including Virginia Power's CEO and CFO, evaluated the effectiveness of Virginia Power's disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation process, Virginia Power's CEO and CFO have concluded that Virginia Power's disclosure controls and procedures are effective. There were no changes in Virginia Power's internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, Virginia Power's internal control over financial reporting.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL Over Financial Reporting

Management of Virginia Power understands and accepts responsibility for Virginia Power's financial statements and related disclosures and the effectiveness of internal control over financial reporting (internal control). Virginia Power continuously strives to identify opportunities to enhance the effectiveness and efficiency of internal control, just as it does throughout all aspects of its business.

Virginia Power maintains a system of internal control designed to provide reasonable assurance, at a reasonable cost, that its assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed and recorded in accordance with established procedures. This system includes written policies, an organizational structure designed to ensure appropriate segregation of responsibilities, careful selection and training of qualified personnel and internal audits.

The Board of Directors also serves as Virginia Power's Audit Committee and meets periodically with the independent registered public accounting firm, the internal auditors and management to discuss Virginia Power's auditing, internal accounting control and financial reporting matters and to ensure that each is properly discharging its responsibilities.

SEC rules implementing Section 404 of the Sarbanes-Oxley Act require Virginia Power's 2016 Annual Report to contain a management's report regarding the effectiveness of internal control. As a basis for the report, Virginia Power tested and evaluated the design and operating effectiveness of internal controls. Based on the assessment as of December 31, 2016, Virginia Power makes the following assertions:

Management is responsible for establishing and maintaining effective internal control over financial reporting of Virginia Power.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal controls can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

Management evaluated Virginia Power's internal control over financial reporting as of December 31, 2016. This assessment was based on criteria for effective internal control over financial reporting described in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that Virginia Power maintained effective internal control over financial reporting as of December 31, 2016.

This annual report does not include an attestation report of Virginia Power's independent registered public accounting firm regarding internal control over financial reporting. Management's report is not subject to attestation by Virginia Power's independent registered public accounting firm pursuant to a permanent exemption under the Dodd-Frank Act.

February 28, 2017

DOMINION GAS

Senior management, including Dominion Gas' CEO and CFO, evaluated the effectiveness of Dominion Gas' disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation process, Dominion Gas' CEO and CFO have concluded that Dominion Gas' disclosure controls and procedures are effective. There were no changes in Dominion Gas' internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, Dominion Gas' internal control over financial reporting.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of Dominion Gas understands and accepts responsibility for Dominion Gas' financial statements and related disclosures and the effectiveness of internal control over financial reporting (internal control). Dominion Gas continuously strives to identify opportunities to enhance the effectiveness and efficiency of internal control, just as it does throughout all aspects of its business.

Dominion Gas maintains a system of internal control designed to provide reasonable assurance, at a reasonable cost, that its assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed and recorded in accordance with established procedures. This system includes written policies, an organizational structure designed to ensure appropriate segregation of responsibilities, careful selection and training of qualified personnel and internal audits.

The Board of Directors also serves as Dominion Gas' Audit Committee and meets periodically with the independent registered public accounting firm, the internal auditors and management to discuss Dominion Gas' auditing, internal accounting control and financial reporting matters and to ensure that each is properly discharging its responsibilities.

SEC rules implementing Section 404 of the Sarbanes-Oxley Act require Dominion Gas' 2016 Annual Report to contain a management's report regarding the effectiveness of internal control. As a basis for the report, Dominion Gas tested and evaluated the design and operating effectiveness of internal controls. Based on the assessment as of December 31, 2016, Dominion Gas makes the following assertions:

Management is responsible for establishing and maintaining effective internal control over financial reporting of Dominion Gas.

There are inherent limitations in the effectiveness of any internal control, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal controls can provide only reasonable assurance with respect to financial statement preparation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

Management evaluated Dominion Gas' internal control over financial reporting as of December 31, 2016. This assessment was based on criteria for effective internal control over financial reporting described in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management believes that Dominion Gas maintained effective internal control over financial reporting as of December 31, 2016.

This annual report does not include an attestation report of Dominion Gas' independent registered public accounting firm regarding internal control over financial reporting. Management's report is not subject to attestation by Dominion Gas' independent registered public accounting firm pursuant to a permanent exemption under the Dodd-Frank Act.

Item 14. Principal Accountant Fees and Services

DOMINION

The information concerning principal accountant fees and services contained under the heading *Auditor Fees and Pre-Approval Policy* in the 2017 Proxy Statement is incorporated by reference.

VIRGINIA POWER AND DOMINION GAS

The following table presents fees paid to Deloitte & Touche LLP for services related to Virginia Power and Dominion Gas for the fiscal years ended December 31, 2016 and 2015.

Type of Fees	2016	2015
(millions)		
Virginia Power		
Audit fees	\$1.82	\$1.87
Audit-related fees	_	_
Tax fees	_	_
All other fees	_	_
Total Fees	\$1.82	\$1.87
Dominion Gas		
Audit fees	\$1.05	\$1.06
Audit-related fees	0.16	0.19
Tax fees	_	_
All other fees	_	_
Total Fees	\$1.21	\$1.25

Audit fees represent fees of Deloitte & Touche LLP for the audit of Virginia Power's and Dominion Gas' annual consolidated financial statements, the review of financial statements included in Virginia Power's and Dominion Gas' quarterly Form 10-Q reports, and the services that an independent auditor would customarily provide in connection with subsidiary audits, statutory requirements, regulatory filings, and similar engagements for the fiscal year, such as comfort letters, attest services, consents, and assistance with review of documents filed with the SEC.

Audit-related fees consist of assurance and related services that are reasonably related to the performance of the audit or review of Virginia Power's and Dominion Gas' consolidated financial statements or internal control over financial reporting. This category may include fees related to the performance of audits and attest services not required by statute or regulations, due diligence related to mergers, acquisitions, and investments, and accounting consultations about the application of GAAP to proposed transactions.

Virginia Power's and Dominion Gas' Boards of Directors have adopted the Dominion Audit Committee pre-approval policy for their independent auditor's services and fees and have delegated the execution of this policy to the Dominion Audit Committee. In accordance with this delegation, each year the Dominion Audit Committee pre-approves a schedule that details the services to be provided for the following year and an estimated charge for such services. At its January 2017 meeting, the Dominion Audit Committee approved Virginia Power's and Dominion Gas' schedules of services and fees for 2017. In accordance with the pre-approval policy, any changes to the pre-approved schedule may be pre-approved by the Dominion Audit Committee or a delegated member of the Dominion Audit Committee.

Part IV Item 15. Exhibits and Financial Statement Schedules

(a) Certain documents are filed as part of this Form 10-K and are incorporated by reference and found on the pages noted.

1. Financial Statements

See Index on page 60.

2. All schedules are omitted because they are not applicable, or the required information is either not material or is shown in the financial statements or the related notes.

3. Exhibits (incorporated by reference unless otherwise noted)

* This Table of Contents does not constitute part of the Indenture or have any bearing upon the interpretation of any of its terms and provisions.

 THIS EIGHTH SUPPLEMENTAL INDENTURE is made as of the 1st day of December, 2016, by and between DOMINION RESOURCES, INC., a Virginia corporation, having its principal office at 120 Tredegar Street, Richmond, Virginia 23219 (the "Company"), and DEUTSCHE BANK TRUST COMPANY AMERICAS, a New York banking corporation, as Trustee, having a corporate trust office at 60 Wall Street, 16th Floor, New York, New York 10005 (herein called the "Trustee").

WITNESSETH:

WHEREAS, the Company has heretofore entered into an Indenture dated as of June 1, 2015, between the Company and the Trustee (as amended, restated or otherwise modified, the "Base Indenture") with respect to senior debt securities;

WHEREAS, the Base Indenture is incorporated herein by this reference and the Base Indenture, as heretofore supplemented, as further supplemented by this Eighth Supplemental Indenture, and as may be hereafter supplemented or amended from time to time, is herein called the "Indenture";

WHEREAS, under the Base Indenture, a new series of Securities may at any time be established in accordance with the provisions of the Base Indenture and the terms of such series may be described by a supplemental indenture executed by the Company and the Trustee;

WHEREAS, the Company proposes to create under the Indenture a new series of Securities;

WHEREAS, additional Securities of other series hereafter established, except as may be limited in the Base Indenture as at the time supplemented and modified, may be issued from time to time pursuant to the Indenture as at the time supplemented and modified; and

WHEREAS, all conditions necessary to authorize the execution and delivery of this Eighth Supplemental Indenture and to make it a valid and binding obligation of the Company have been done or performed.

NOW, THEREFORE, in consideration of the agreements and obligations set forth herein and for other good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree as follows:

ARTICLE I 2016 SERIES F 1.875% SENIOR NOTES DUE 2018

SECTION 101. Establishment. There is hereby established a new series of Securities to be issued under the Indenture, to be designated as the Company's 2016 Series F 1.875% Senior Notes due 2018 (the "Series F Senior Notes").

There are to be authenticated and delivered \$250,000,000 principal amount of Series F Senior Notes, and such principal amount of the Series F Senior Notes may be increased from time to time pursuant to the penultimate paragraph of Section 301 of the Base Indenture. All Series F Senior Notes need not be issued at the same time and such series may be reopened at

Exhibit JRC-1

any time, without the consent of any Holder, for issuances of additional Series F Senior Notes. Any such additional Series F Senior Notes will have the same interest rate, maturity and other terms as those initially issued, and shall be consolidated with and part of the same series of Series F Senior Notes initially issued under this Eighth Supplemental Indenture. Further Series F Senior Notes may also be authenticated and delivered as provided by Sections 304, 305, 306, 905 or 1107 of the Base Indenture.

The Series F Senior Notes shall be issued as Registered Securities in global form without coupons, in substantially the form set out in <u>Exhibit A</u> hereto. The entire initially issued principal amount of the Series F Senior Notes shall initially be evidenced by one or more certificates issued to Cede & Co., as nominee for The Depository Trust Company.

The form of the Trustee's Certificate of Authentication for the Series F Senior Notes shall be in substantially the form set forth in <u>Exhibit B</u> hereto.

Each Series F Senior Note shall be dated the date of authentication thereof and shall bear interest from the date of original issuance thereof or from the most recent Interest Payment Date to which interest has been paid or duly provided for.

SECTION 102. <u>Definitions</u>. The following defined terms used herein shall, unless the context otherwise requires, have the meanings specified below. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Base Indenture. Unless the context otherwise requires, any reference to a "Section" refers to a Section of this Eighth Supplemental Indenture.

"Adjusted Treasury Rate" means, with respect to any Redemption Date, the rate per annum equal to the semiannual equivalent yield to maturity or interpolated (on a day count basis) of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for such Redemption Date.

"Business Day" means a day other than (i) a Saturday or a Sunday, (ii) a day on which banks in New York, New York are authorized or obligated by law or executive order to remain closed or (iii) a day on which the Corporate Trust Office is closed for business.

"Comparable Treasury Issue" means the United States Treasury security selected by an Independent Investment Banker as having a maturity comparable to the remaining term of the Series F Senior Notes to be redeemed that would be utilized, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term in years and months of the Series F Senior Notes.

"Comparable Treasury Price" for any Redemption Date means (i) the average of the Reference Treasury Dealer Quotations for such Redemption Date, after excluding the highest and lowest Reference Treasury Dealer Quotations, or (ii) if the Independent Investment Banker obtains fewer than five such Reference Treasury Dealer Quotations, the average of all such quotations.

"Distribution Compliance Period" has the meaning set forth in Section 204.

OFFICIAL COPY

"Independent Investment Banker" means Credit Suisse Securities (USA) LLC and its successors or affiliates, as selected by the Company, or if such firm is unwilling or unable to serve as such, an independent investment and banking institution of national standing appointed by the Company.

"Interest Payment Dates" means June 15 and December 15 of each year, commencing on June 15, 2017.

"Original Issue Date" means December 15, 2016.

"Outstanding," when used with respect to the Series F Senior Notes, means, as of the date of determination, all Series F Senior Notes theretofore authenticated and delivered under the Indenture, except:

(i) Series F Senior Notes theretofore canceled by the Trustee or delivered to the Trustee for cancellation;

(ii) Series F Senior Notes for whose payment at the Maturity thereof money in the necessary amount has been theretofore deposited (other than pursuant to Section 402 of the Base Indenture) with the Trustee or any Paying Agent (other than the Company) in trust or set aside and segregated in trust by the Company (if the Company shall act as its own Paying Agent) for the Holders of such Series F Senior Notes, provided that, if such Series F Senior Notes are to be redeemed, notice of such redemption has been duly given pursuant to this Indenture or provision therefor satisfactory to the Trustee has been made;

(iii) Series F Senior Notes with respect to which the Company has effected defeasance or covenant defeasance pursuant to Section 402 of the Base Indenture, except to the extent provided in Section 402 of the Base Indenture; and

(iv) Series F Senior Notes that have been paid pursuant to Section 306 of the Base Indenture or in exchange for or in lieu of which other Series F Senior Notes have been authenticated and delivered pursuant to the Indenture, other than any such Series F Senior Notes in respect of which there shall have been presented to the Trustee proof satisfactory to it that such Series F Senior Notes are held by a bona fide purchaser in whose hands such Series F Senior Notes are valid obligations of the Company; provided, however, that in determining whether the Holders of the requisite principal amount of Outstanding Series F Senior Notes have given any request, demand, authorization, direction, notice, consent or waiver under the Indenture or are present at a meeting of Holders of Series F Senior Notes for quorum purposes, Series F Senior Notes owned by the Company or any other obligor upon the Series F Senior Notes or any Affiliate of the Company or such other obligor shall be disregarded and deemed not to be Outstanding, except that, in determining whether the Trustee shall be protected in making any such determination or relying upon any such request, demand, authorization, direction, notice, consent or waiver, only Series F Senior Notes which a Responsible Officer of the Trustee actually knows to be so owned shall be so disregarded. Series F Senior Notes so owned which shall have been pledged in good faith may be regarded as Outstanding if the pledgee establishes to the satisfaction of the Trustee (A) the pledgee's right so to act with respect to such Series F Senior Notes and (B) that the pledgee is not the Company or any other obligor upon the Series F senior Notes or an Affiliate of the Company or such other obligor.

"Primary Treasury Dealer" means a primary United States government securities dealer in the United States as designated by the Federal Reserve Bank of New York.

"QIB" means a "qualified institutional buyer" as defined in Rule 144A.

"Reference Treasury Dealer" means (i) Credit Suisse Securities (USA) LLC and its successors or affiliates; provided that, if such firm or its successors ceases to be a Primary Treasury Dealer, the Company shall substitute another Primary Treasury Dealer; and (ii) up to four other Primary Treasury Dealers selected by the Company.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any Redemption Date, the average, as determined by the Independent Investment Banker, of the bid and asked prices for the Comparable Treasury Issue related to the Series F Senior Notes being redeemed (expressed in each case as a percentage of its principal amount) quoted in writing to the Independent Investment Banker at 3:30 p.m., New York City time, on the third Business Day preceding such Redemption Date.

"Regular Record Date" means, with respect to each Interest Payment Date, the close of business on the Business Day preceding such Interest Payment Date; provided that, with respect to Series F Senior Notes that are not represented by one or more Global Securities, the Regular Record Date shall be the close of business on the 15th calendar day (whether or not a Business Day) preceding such Interest Payment Date.

"Regulation S" means Regulation S promulgated under the Securities Act.

"Regulation S Global Security" has the meaning set forth in Section 105.

"Restricted Legend" has the meaning set forth in Section 202.

"Restricted Security" has the meaning set forth in Section 202.

"Rule 144A" means Rule 144A promulgated under the Securities Act.

"Rule 144A Global Security" has the meaning set forth in Section 105.

"Securities Act" means the Securities Act of 1933, as amended.

"Series F Senior Notes" has the meaning set forth in Section 101.

"Stated Maturity" means December 15, 2018.

The terms "Company," "Trustee," "Base Indenture," and "Indenture" shall have the respective meanings set forth in the recitals to this Eighth Supplemental Indenture and the paragraph preceding such recitals.

SECTION 103. Payment of Principal and Interest. The principal of the Series F Senior Notes shall be due at the Stated Maturity (unless earlier redeemed). The unpaid principal amount of the Series F Senior Notes shall be ar interest at the rate of 1.875% per annum until paid or duly provided for, such interest to accrue from the Original Issue Date or from the most recent Interest Payment Date to which interest has been paid or duly provided for. Interest shall be paid semi-annually in arrears on each Interest Payment Date to the Person in whose name the Series F Senior Notes are registered on the Regular Record Date for such Interest Payment Date; provided that interest payable at the Stated Maturity of principal or on a Redemption Date as provided herein will be paid to the Person to whom principal is payable. Any such interest that is not so punctually paid or duly provided for will forthwith cease to be payable to the Holders on such Regular Record Date for the payment of such defaulted interest to be fixed by the Trustee (in accordance with Section 307 of the Base Indenture), notice where of shall be given to Holders of the Series F Senior Notes not less than ten (10) days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Series F Senior Notes may be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Base Indenture.

Payments of interest on the Series F Senior Notes will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for the Series F Senior Notes shall be computed and paid on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series F Senior Notes is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day that is a Business Day (and without any interest or payment in respect of any such delay), in each case with the same force and effect as if made on the date the payment was originally payable.

Payment of the principal and interest on the Series F Senior Notes shall be made at the office of the Paying Agent in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts, with any such payment that is due at the Stated Maturity of any Series F Senior Notes, upon redemption or repurchase being made upon surrender of such Series F Senior Notes to the Paying Agent. Payments of interest (including interest on any Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least sixteen (16) days prior to the date for payment by the Person entitled thereto. In the event that any date on which principal and interest is payable on the Series F Senior Notes is not a Business Day, then payment of the principal and interest payable on such date will be made on the next succeeding day that is a Business Day (and without any interest or payment in respect of any such delay), in each case with the same force and effect as if made on the date the payment was originally payable.

SECTION 104. Denominations. The Series F Senior Notes may be issued in denominations of \$2,000, or any greater integral multiple of \$1,000.

SECTION 105. <u>Global Securities</u>. The Series F Senior Notes offered and sold to QIBs in reliance on Rule 144A will be initially issued in the form of one or more Global Securities (the "Rule 144A Global Security"), and the Series F Senior Notes offered and sold in offshore transactions to non-U.S. persons in reliance on Regulation S will be initially issued in the form of one or more Global Securities (the "Regulation S Global Security"), in each case registered in the name of the Depositary (which shall be The Depository Trust Company) or its nominee. Except under the limited circumstances described below, Series F Senior Notes represented by such Global Securities will not be exchangeable for, and will not otherwise be issuable as, Series F Senior Notes in definitive form registered in names other than the Depositary or its nominee. The Global Securities described above may not be transferred except by the Depositary to a nominee of the Depositary or by a nominee of the Depositary to the Depositary or another nominee of the Depositary or its nominee.

Owners of beneficial interests in such a Global Security will not be considered the Holders thereof for any purpose under the Indenture, and no Global Security representing a Series F Senior Note shall be exchangeable, except for another Global Security of like denomination and tenor to be registered in the name of the Depositary or its nominee or to a successor Depositary or its nominee or except as described below. The rights of Holders of such Global Security shall be exercised only through the Depositary.

A Global Security shall be exchangeable for Series F Senior Notes registered in the names of persons other than the Depositary or its nominee only if (i) the Depositary notifies the Company that it is unwilling or unable to continue as a Depositary for such Global Security and no successor Depositary shall have been appointed by the Company within 90 days of receipt by the Company of such notification, or if at any time the Depositary ceases to be a clearing agency registered under the Exchange Act at a time when the Depositary is required to be so registered to act as such Depositary and no successor Depositary shall have been appointed by the Company within 90 days after it becomes aware of such cessation, (ii) the Company in its sole discretion, and subject to the procedures of the Depositary, determines that such Global Security shall be so exchangeable, in which case Series F Senior Notes in definitive form will be printed and delivered to the Depositary, or (iii) an Event of Default has occurred and is continuing with respect to the Series F Senior Notes. Any Global Security that is exchangeable pursuant to the preceding sentence shall be exchangeable for Series F Senior Notes registered in such names as the Depositary shall direct.

SECTION 106. <u>Redemption</u>. The Series F Senior Notes are redeemable, in whole or in part, at any time and from time to time, at the option of the Company, at a Redemption Price equal to the greater of:

(i) 100% of the principal amount of Series F Senior Notes then Outstanding to be so redeemed, or

(ii) the sum of the present values of the remaining scheduled payments of principal and interest on the Series F Senior Notes to be redeemed (not including any portion of such payments of interest accrued as of the Redemption Date) discounted to the Redemption Date on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the

Adjusted Treasury Rate, plus 12.5 basis points, as calculated by an Independent Investment Banker, plus, in either of the above cases, accrued and unpaid interest thereon to the Redemption Date.

The Adjusted Treasury Rate shall be calculated on the third Business Day preceding the Redemption Date.

Unless the Company defaults in the payment of the Redemption Price, on and after the Redemption Date, interest will cease to accrue on the Series F Senior Notes or portions thereof called for redemption.

In the event of the redemption of the Series F Senior Notes in part only, a new Series F Senior Note or Notes for the unredeemed portion will be issued in the name or names of the Holders thereof upon surrender thereof.

The Company shall notify the Trustee in writing of the Redemption Price promptly after the calculation thereof and the Trustee shall have no responsibility for such calculation. The notice of redemption shall be sent in accordance with the terms of the Base Indenture.

SECTION 107. Sinking Fund; Conversion. The Series F Senior Notes shall not have a sinking fund. The Series F Senior Notes are not convertible into or exchangeable for Equity Securities and/or any other securities.

SECTION 108. Additional Interest on Overdue Amounts. Any principal of and installment of interest on the Series F Senior Notes that is overdue shall bear interest at the rate of 1.875% (to the extent that the payment of such interest shall be legally enforceable), from the dates such amounts are due until they are paid or made available for payment, and such interest shall be payable on demand.

SECTION 109. <u>Paying Agent</u>. The Trustee shall initially serve as Paying Agent and Security Registrar with respect to the Series F Senior Notes, with the Place of Payment initially being the Corporate Trust Office. The Company may change the Paying Agent or Security Registrar without prior notice to Holders of the Series F Senior Notes, and the Company or any of its subsidiaries may act as Paying Agent or Security Registrar.

ARTICLE II TRANSFER AND EXCHANGE

SECTION 201. <u>Transfer and Exchange of Global Securities</u>. The transfer and exchange of beneficial interests in the Global Securities shall be effected through the Depositary, in accordance with this Eighth Supplemental Indenture (including applicable restrictions on transfer set forth herein, if any) and the procedures of the Depositary therefor.

SECTION 202. <u>Restricted Legend</u>. Except as otherwise provided in Section 203 and as indicated on Exhibit A, each Series F Senior Note (each a "Restricted Security") shall bear the following legend (the "Restricted Legend") on the face thereof:

OFFICIAL COPY

THIS SERIES F SENIOR NOTE (OR ITS PREDECESSOR) WAS ORIGINALLY ISSUED IN A TRANSACTION EXEMPT FROM REGISTRATION UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "SECURITIES ACT"), AND THIS SERIES F SENIOR NOTE MAY NOT BE OFFERED, SOLD OR OTHERWISE TRANSFERRED IN THE ABSENCE OF SUCH REGISTRATION OR AN APPLICABLE EXEMPTION THEREFROM. EACH PURCHASER OF THIS SERIES F SENIOR NOTE IS HEREBY NOTIFIED THAT THE SELLER OF THIS SERIES F SENIOR NOTE MAY BE RELYING ON THE EXEMPTION FROM THE PROVISIONS OF SECTION 5 OF THE SECURITIES ACT PROVIDED BY RULE 144A THEREUNDER.

THE HOLDER OF THIS SERIES F SENIOR NOTE AGREES FOR THE BENEFIT OF THE COMPANY THAT (A) THIS SERIES F SENIOR NOTE MAY BE OFFERED, RESOLD, PLEDGED OR OTHERWISE TRANSFERRED, ONLY (I) IN THE UNITED STATES TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT) IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, (II) OUTSIDE THE UNITED STATES IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 904 UNDER THE SECURITIES ACT, (III) PURSUANT TO AN EXEMPTION FROM REGISTRATION UNDER THE SECURITIES ACT PROVIDED BY RULE 144 THEREUNDER (IF AVAILABLE), (IV) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, OR (V) TO AN INSTITUTIONAL "ACCREDITED INVESTOR" (AS DEFINED IN RULE 501(A)(1), (2), (3) OR (7) OF REGULATION D UNDER THE SECURITIES ACT) THAT IS ACQUIRING THE NOTE FOR ITS OWN ACCOUNT, OR FOR THE ACCOUNT OF SUCH AN INSTITUTIONAL "ACCREDITED INVESTOR" FOR INVESTMENT PURPOSES AND NOT WITH A VIEW TO, OR FOR OFFER OR SALE IN CONNECTION WITH, ANY DISTRIBUTION IN VIOLATION OF THE SECURITIES ACT, IN EACH OF CASES (I) THROUGH (V) IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES, AND (B) THE HOLDER WILL, AND EACH SUBSEQUENT HOLDER IS REQUIRED TO, NOTIFY ANY PURCHASER OF THIS SERIES F SENIOR NOTE FROM IT OF THE RESALE RESTRICTIONS REFERRED TO IN CLAUSE (A) ABOVE.

THE HOLDER AGREES THAT IT WILL DELIVER TO EACH PERSON TO WHOM THIS SERIES F SENIOR NOTE OR AN INTEREST HEREIN IS TRANSFERRED A NOTICE SUBSTANTIALLY TO THE EFFECT OF THIS LEGEND.

THE HOLDER AGREES THAT, BEFORE THE HOLDER OFFERS, SELLS OR OTHERWISE TRANSFERS THIS SERIES F SENIOR NOTE, THE COMPANY MAY REQUIRE THE HOLDER OF THIS SERIES F SENIOR NOTE TO DELIVER A WRITTEN OPINION, CERTIFICATIONS AND/OR OTHER INFORMATION THAT IT REASONABLY REQUIRES TO CONFIRM THAT SUCH PROPOSED TRANSFER IS BEING MADE PURSUANT TO AN EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE UNITED STATES.

AS USED IN THIS SERIES F SENIOR NOTE, THE TERMS "OFFSHORE TRANSACTION," "U.S. PERSON" AND "UNITED STATES" HAVE THE MEANINGS GIVEN TO THEM BY RULE 902 OF REGULATION S UNDER THE SECURITIES ACT.

Exhibit JRC-1

SECTION 203. <u>Removal of Restricted Legend</u>. The Company may instruct the Trustee in writing to cancel any Series F Senior Note and, upon receipt of a Company Order, authenticate a replacement Series F Senior Note, registered in the name of the Holder thereof (or its transferee), that does not bear the Restricted Legend, and the Trustee will comply with such instruction, if the Company determines (upon the advice of counsel and such other certifications and evidence as the Company may reasonably require) that a Series F Senior Note is eligible for resale pursuant to Rule 144 under the Securities Act (or a successor provision) and that the Restricted Legend is no longer necessary or appropriate in order to ensure that subsequent transfers of such Series F Senior Note (or a beneficial interest therein) are effected in compliance with the Securities Act; provided, however, that in such circumstances, the Trustee shall require an Opinion of Counsel and an Officers' Certificate prior to authenticating any such replacement Series F Senior Note.

SECTION 204. <u>Registration of Transfer or Exchange</u>. The registration of transfer or exchange of any Series F Senior Note (or a beneficial interest therein) that bears the Restricted Legend may only be made in compliance with the provisions of the Restricted Legend and as set forth below.

(i) Prior to and including the 40th day after the later of the commencement of the offering of the Series F Senior Notes and the Original Issue Date (such period through and including such 40th day, the "Distribution Compliance Period"), transfers by an owner of a beneficial interest in a Regulation S Global Security to a transferee who takes delivery of such interest through a Rule 144A Global Security of that series will be made only upon receipt by the Trustee of a written certification from the transferor of the beneficial interest to the effect that such transfer is being made to a Person whom the transferor reasonably believes is purchasing for its own account or accounts as to which it exercises sole investment discretion and is a QIB in a transaction meeting the requirements of Rule 144A and the requirements of applicable securities laws of any state of the United States or any other jurisdiction.

(ii) Transfers by an owner of a beneficial interest in the Rule 144A Global Security to a transferee who takes delivery through the Regulation S Global Security of that series, whether before or after the expiration of the Distribution Compliance Period, will be made only upon receipt by the Trustee of a certification from the transferor to the effect that such transfer is being made in accordance with Rule 904 of Regulation S or Rule 144 under the Securities Act and that, if such transfer is being made prior to the expiration of the Distribution Compliance Period, the interest transferred will be held immediately thereafter through Euroclear Bank S.A./NV, as operator of the Euroclear System or Clearstream Banking, *société anonyme*, Luxembourg.

(iii) Any beneficial interest in one of the Global Securities that is transferred to a Person who takes delivery in the form of an interest in another Global Security of that series will, upon transfer, cease to be an interest in the initial Global Security of that series and will become an interest in the other Global Security of that series and, accordingly, will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to beneficial interests in such other Global Security of that series for as long as it remains such an interest.

SECTION 205. <u>Preservation of Information</u>. The Trustee will retain copies of all certificates, opinions and other documents received in connection with the registration of transfer or exchange of a Series F Senior Note (or a beneficial interest therein) in accordance with its customary policy, and the Company will have the right to request copies thereof at any reasonable time upon written notice to the Trustee.

SECTION 206. Acknowledgment of Restrictions; Indemnification; No Obligation of Trustee. By its acceptance of any Series F Senior Note bearing the Restricted Legend, each Holder of such a Series F Senior Note acknowledges the restrictions on registrations of transfer or exchange of such Series F Senior Note set forth in this Eighth Supplemental Indenture and in the Restricted Legend and agrees that it will register the transfer or exchange of such Series F Senior Note only as provided in this Eighth Supplemental Indenture. The Security Registrar shall not register a transfer or exchange of any Series F Senior Note only as provided in this Eighth Supplemental Indenture. The Security Registrar shall not register a transfer or exchange of any Series F Senior Note unless such transfer or exchange complies with the restrictions on transfer or exchange of such Series F Senior Note set forth in this Eighth Supplemental Indenture. In connection with any registration of transfer or exchange of Series F Senior Notes, each Holder agrees by its acceptance of the Series F Senior Notes to furnish the Security Registrar or the Company such certifications, legal opinions or other information as either of them may reasonably require to confirm that such registration of transfer or exchange is being made pursuant to an exemption from, or a transaction not subject to, the registration requirements of the Securities Act; provided that the Security Registrar shall not be required to determine (but may rely on a determination made by the Company with respect to) the sufficiency of any such certifications, legal opinions or other information.

The Security Registrar shall retain copies of all letters, notices and other written communications received pursuant to the Indenture in accordance with its customary policy. The Company shall have the right to request copies of all such letters, notices or other written communications at any reasonable time upon the giving of written notice to the Security Registrar.

Each Holder of a Series F Senior Note agrees to indemnify the Company, the Security Registrar and the Trustee against any liability that may result from the transfer, exchange or assignment of such Holder's Series F Senior Note in violation of any provision of this Eighth Supplemental Indenture and/or applicable United States Federal or state securities law.

The Trustee shall have no obligation or duty to monitor, determine or inquire as to compliance with any restrictions on transfer or exchange imposed under this Eighth Supplemental Indenture or under applicable law with respect to any registrations of transfer or exchange of any interest in any Series F Senior Note (including any transfers between or among members of, or participants in, the Depositary or beneficial owners of interests in any Global Security) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by the terms of, this Eighth Supplemental Indenture, and to examine the same to determine substantial compliance as to form with the express requirements hereof.

ARTICLE III MISCELLANEOUS PROVISIONS

SECTION 301. <u>Ratification and Incorporation of Base Indenture</u>. As supplemented hereby, the Base Indenture is in all respects ratified and confirmed by the Company. The Base Indenture and this Eighth Supplemental Indenture shall be read, taken and construed as one and the same instrument.

SECTION 302. Executed in Counterparts. This Eighth Supplemental Indenture may be executed in several counterparts, each of which shall be deemed to be an original, and such counterparts shall together constitute but one and the same instrument. The exchange of copies of this Eighth Supplemental Indenture and of signature pages by facsimile or PDF transmission shall constitute effective execution and delivery of this Eighth Supplemental Indenture as to the parties hereto and may be used in lieu of the original, manually executed Eighth Supplemental Indenture for all purposes. Signatures of the parties hereto transmitted by facsimile or PDF shall be deemed to be their original signatures for all purposes.

SECTION 303. <u>Assignment</u>. The Company shall have the right at all times to assign any of its rights or obligations under the Indenture with respect to the Series F Senior Notes to a direct or indirect wholly-owned subsidiary of the Company; provided that, in the event of any such assignment, the Company shall remain primarily liable for the performance of all such obligations. The Indenture may also be assigned by the Company in connection with a transaction described in Article VIII of the Base Indenture.

SECTION 304. <u>Trustee's Disclaimer</u>. All of the provisions contained in the Base Indenture in respect of the rights, powers, privileges, protections, duties and immunities of the Trustee, including without limitation its right to be indemnified, shall be applicable in respect of the Series F Senior Notes and of this Eighth Supplemental Indenture as fully and with like effect as if set forth herein in full. The Trustee accepts the amendments of the Indenture effected by this Eighth Supplemental Indenture, but on the terms and conditions set forth in the Indenture, including the terms and provisions defining and limiting the liabilities and responsibilities of the Trustee. Without limiting the generality of the foregoing, the Trustee shall not be responsible in any manner whatsoever for or with respect to any of the recitals or statements contained herein, all of which recitals or statements are made solely by the Company, or for or with respect to (i) the validity or sufficiency of this Eighth Supplemental Indenture or any of the terms or provision hereof, (ii) the proper authorization hereof by the Company by action or otherwise, (iii) the due execution hereof by the Company, or (iv) the consequences of any amendment herein provided for, and the Trustee makes no representation with respect to any such matters.

[Signature Page Follows]

IN WITNESS WHEREOF, each party hereto has caused this instrument to be signed in its name and behalf by its duly authorized officer, all as of the day and year first above written.

DOMINION RESOURCES, INC.

[Up to]** \$_____ 2016 SERIES F 1.875% SENIOR NOTE DUE 2018

CUSIP No.

No. R-

Dominion Resources, Inc., a corporation duly organized and existing under the laws of Virginia (herein called the "Company", which term includes any successor Person under the

Indenture hereinafter referred to), for value received, hereby promises to pay to [Cede & Co.]**, or registered assigns (the "Holder"), the principal sum [of)] [specified in Schedule I hereto]** on December 15, 2018 and to pay interest thereon from December 15, Dollars (\$ 2016 or from the most recent Interest Payment Date to which interest has been paid or duly provided for, semi-annually in arrears on June 15 and December 15 of each year, commencing on June 15, 2017, at the rate of 1.875% per annum, until the principal hereof is paid or made available for payment, provided that any principal, and any such installment of interest, that is overdue shall bear interest at the rate of 1.875% per annum (to the extent that the payment of such interest shall be legally enforceable), from the dates such amounts are due until they are paid or made available for payment, and such interest shall be payable on demand. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date will, as provided in such Indenture, be paid to the Person in whose name this Series F Senior Note (or one or more Predecessor Securities) is registered at the close of business on the Regular Record Date for such interest; provided that the interest payable at Stated Maturity or on a Redemption Date will be paid to the Person to whom principal is payable. The Regular Record Date shall be the close of business on the Business Day preceding such Interest Payment Date; provided, that with respect to Series F Senior Notes that are not represented by one or more Global Securities, the Regular Record Date shall be the close of business on the fifteenth (15th) calendar day (whether or not a Business Day) preceding such Interest Payment Date. Any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Series F Senior Note (or one or more Predecessor Securities) is registered at the close of business on a Special Record Date for the payment of such Defaulted Interest to be fixed by the Trustee, notice whereof shall be given to Holders of Series F Senior Notes not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange on which the Series F Senior Notes may be listed, and upon such notice as may be required by such exchange, all as more fully provided in said Indenture.

Payments of interest on the Series F Senior Notes will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for the Series F Senior Notes shall be computed and paid on the basis of a 360-day year of twelve 30-day months. In the event that any date on which interest is payable on the Series F Senior Notes is not a Business Day, then payment of the interest payable on such date will be made on the next succeeding day that is a Business Day (and without any interest or payment in respect of any such delay), in each case with the same force and effect as if made on the date the payment was originally payable.

Payment of the principal of and interest on this Series F Senior Note will be made at the office of the Paying Agent, in the Borough of Manhattan, City and State of New York, in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts, with any such payment that is due at the Stated Maturity of any Series F Senior Note, upon redemption or repurchase being made upon surrender of such Series F Senior Note to such office or agency; provided, however, that at the option of the Company payment of interest, subject to such surrender where applicable, may be made (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least sixteen (16)

Exhibit JRC-1

days prior to the date for payment by the Person entitled thereto. In the event that any date on which principal and interest is payable on the Series F Senior Notes is not a Business Day, then payment of the principal and interest payable on such date will be made on the next succeeding day that is a Business Day (and without any interest or payment in respect of any such delay), in each such case with the same force and effect as if made on the date the payment was originally payable.

Reference is hereby made to the further provisions of this Series F Senior Note set forth on the reverse hereof, which further provisions shall for all purposes have the same effect as if set forth at this place.

Unless the certificate of authentication hereon has been executed by the Trustee referred to on the reverse hereof by manual signature, this Series F Senior Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

4

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed.

DOMINION RESOURCES, INC.

By: Name: Title:

[REVERSE OF 2016 SERIES F 1.875% SENIOR NOTE]

This Security is one of a duly authorized issue of securities of the Company (herein called the "Securities"), issued and to be issued in one or more series under an Indenture dated as of June 1, 2015 (the "Base Indenture"), between the Company and Deutsche Bank Trust Company Americas, as Trustee (the "Trustee"), as heretofore supplemented and as further supplemented by an Eighth Supplemental Indenture dated as of December 1, 2016 (the "Eighth Supplemental Indenture" and, together with the Base Indenture, as it may be hereafter supplemented or amended from time to time, the "Indenture," which term shall have the meaning assigned to it in such instrument), by and between the Company and the Trustee, and reference is hereby made to the Indenture for a statement of the respective rights, limitations of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Securities are, and are to be, authenticated and delivered. This Security is one of the series designated on the face hereof (the "Series F Senior Notes") which is unlimited in aggregate principal amount.

The Series F Senior Notes are redeemable, in whole or in part, at any time and from time to time in the manner and with the effect provided in the Indenture.

If an Event of Default with respect to Series F Senior Notes shall occur and be continuing, the principal of the Series F Senior Notes may be declared due and payable in the manner and with the effect provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Securities of each series to be affected under the Indenture at any time by the Company and the Trustee for the series of Securities affected, with the consent of the Holders of a majority in principal amount of the Securities at the time Outstanding of each series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Securities of each series at the time Outstanding, on behalf of the Holders of all Securities of such series, to waive certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Series F Senior Note shall be conclusive and binding upon such Holder and upon all future Holders of this Series F Senior Note and of any Series F Senior Note issued upon the registration of transfer hereof or in exchange therefor or in lieu hereof, whether or not notation of such consent or waiver is made upon this Series F Senior Note.

As provided in and subject to the provisions of the Indenture, the Holder of this Series F Senior Note shall not have the right to institute any proceeding with respect to the Indenture or for the appointment of a receiver or trustee or for any other remedy thereunder, unless such Holder shall have previously given the Trustee written notice of a continuing Event of Default with respect to the Series F Senior Notes, the Holders of not less than a majority in principal amount of the Series F Senior Notes at the time Outstanding shall have made written request to the Trustee to institute proceedings in respect of such Event of Default as Trustee and offered the Trustee indemnity or security reasonably satisfactory to it, and the Trustee shall not have received from the Holders of a majority in principal amount of Series F Senior Notes at the time Outstanding a direction inconsistent with such request, and shall have failed to institute any such

proceeding for 60 days after receipt of such notice, request and offer of indemnity. The foregoing shall not apply to any suit instituted by the Holder of this Series F Senior Note for the enforcement of any payment of principal hereof or premium, if any, or interest hereon on or after the respective due dates expressed or provided for herein.

No reference herein to the Indenture and no provision of this Series F Senior Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of, premium, if any, and interest on this Series F Senior Note at the times, place and rate, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Series F Senior Note is registrable in the Security Register, upon surrender of this Series F Senior Note for registration of transfer at the office or agency of the Company in any place where the principal of, premium, if any, and interest on this Series F Senior Note are payable, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar duly executed by, the Holder hereof or his attorney duly authorized in writing, and thereupon one or more new Series F Senior Notes of like tenor, of authorized denominations and for the same aggregate principal amount, will be issued to the designated transferees.

The Series F Senior Notes are issuable only in registered form without coupons in denominations of \$2,000 and any greater integral multiple of \$1,000. As provided in the Indenture and subject to certain limitations therein set forth, Series F Senior Notes are exchangeable for a like aggregate principal amount of Series F Senior Notes having the same Stated Maturity and of like tenor of any authorized denominations as requested by the Holder upon surrender of the Series F Senior Note or Series F Senior Notes to be exchanged at the office or agency of the Company.

No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Series F Senior Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Security is registered as the owner hereof for all purposes, whether or not this Series F Senior Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

All terms used in this Series F Senior Note that are defined in the Indenture shall have the meanings assigned to them in the Indenture.

DOMINION RESOURCES, INC. 2017 PERFORMANCE GRANT PLAN (TRANSITION GRANTS)

1. Purpose. The purpose of the 2017 Performance Grant Plan (Transition Grants) (the "Plan") is to set forth the terms of 2017 Transition Performance Grants ("Performance Grants") awarded by Dominion Resources, Inc., a Virginia corporation (the "Company"), pursuant to the Dominion Resources, Inc. 2014 Incentive Compensation Plan and any amendments thereto (the "2014 Incentive Compensation Plan"). This Plan contains the Performance Goals for the awards, the Performance Criteria, the target and maximum amounts payable, and other applicable terms and conditions.

2. Definitions. Capitalized terms used in this Plan not defined in this Section 2 will have the meaning assigned to such terms in the 2014 Incentive Compensation Plan.

a. <u>Cause</u>. For purposes of this Plan, the term "Cause" will have the meaning assigned to that term under a Participant's Employment Continuity Agreement with the Company, as such Agreement may be amended from time to time.

b. Date of Grant. February 1, 2017.

c. <u>Disability or Disabled</u>. Means a "disability" as defined under Treasury Regulation Section 1.409A-3(i)(4). The Committee, as defined in the 2014 Incentive Compensation Plan document, will determine whether or not a Disability exists and its determination will be conclusive and binding on the Participant.

d. Participant. An officer of the Company or a Dominion Company who receives a Performance Grant on the Date of Grant.

e. <u>Performance Period</u>. The 24-month period beginning on January 1, 2017 and ending on December 31, 2018.

f. <u>Price-Earnings Ratio</u>. The closing price of a share of common stock on the last trading day of the Performance Period divided by the annual operating earnings per share reported for the 12-month period ending on the last day of the Performance Period.

g. <u>Retire or Retirement</u>. For purposes of this Plan, the term Retire or Retirement means a voluntary termination of employment on a date when the Participant is eligible for early or normal retirement benefits under the terms of the Dominion Pension Plan, or would be eligible if any crediting of deemed additional years of age or service applicable to the Participant under the Company's Benefit Restoration Plan or New Benefit Restoration Plan was applied under the Dominion Pension Plan, as in effect at the time of the determination, unless the Company's Chief Executive Officer in his sole discretion (or, if the Participant is the Company's Chief Executive Officer, the Committee in its sole discretion) determines that the Participant's retirement is detrimental to the Company.

h. Target Amount. The dollar amount designated in the written notice to the Participant communicating the Performance Grant.

OFFICIAL COPY

3. Performance Grants. A Participant will receive a written notice of the amount designated as the Participant's Target Amount for the Performance Grant payable under the terms of this Plan. The actual payout may be from 0% to 200% of the Target Amount, depending on the achievement of the Performance Goals.

4. Performance Achievement and Time of Payment. Upon the completion of the Performance Period, the Committee will determine the final Performance Goal achievement of each of the Performance Criteria described in Section 6. The Company will then calculate the final amount of each Participant's Performance Grant based on such Performance Goal achievement. Except as provided in Sections 7(b) or 8, the Committee will determine the time of payout of the Performance Grants, provided that in no event will payment be made later than March 15, 2019.

5. Forfeiture. Except as provided in Sections 7 and 8, a Participant's right to payout of a Performance Grant will be forfeited if the Participant's employment with the Company or a Dominion Company terminates for any reason before the end of the Performance Period.

6. Performance Goals. Payout of Performance Grants will be based on the Performance Goal achievement described in this Section 6 of the Performance Criteria defined in Exhibit A.

a. <u>TSR Performance</u>. Total Shareholder Return Performance ("TSR Performance") will determine fifty percent (50%) of the Target Amount ("TSR Percentage"). TSR Performance is defined in Exhibit A. The percentage of the TSR Percentage that will be paid out, if any, is based on the following table:

Relative	
TSR Performance	Percentage Payout
Percentile Ranking	of TSR Percentage
85 th or above	200%
50th	100%
25th	50%
Below 25th	0%

To the extent that the Company's Relative TSR Performance ranks in a percentile between the 25th and 85th percentile in the table above, then the TSR Percentage payout will be interpolated between the corresponding TSR Percentage payout set forth above. No payment of the TSR Percentage will be made if the Relative TSR Performance is below the 25th percentile, except that a payment of 25% of the TSR Percentage will be made if the Company's Relative TSR Performance is below the 25th percentile, except that a payment of 25% of the TSR Percentage will be made if the Company's Relative TSR Performance is below the 25th percentile but its Absolute TSR Performance is at least 9%. In addition to the foregoing payments, and regardless of the Company's Relative TSR Performance, either (but not both) of the following may be earned: (i) an additional payment of 25% of the TSR Percentage will be made if the Company's Absolute TSR Performance is at least 10% but less than 15%, and/or if the Company's Price-Earnings Ratio is at or above the 50th percentile and below the top third of the group of companies (inclusive of the Company) used to measure Relative TSR Performance is at least 15%, and/or if the Company's Price-Earnings Ratio is at or above the top third of the group of companies (inclusive of the Company) used to measure Relative TSR Performance in accordance with Exhibit A hereto, or (ii) an additional payment of 50% of the TSR Percentage will be made if the Company's Absolute TSR Performance is at least 15%, and/or if the Company's Price-Earnings Ratio is at or above the top third of the group of companies (inclusive of the Company) used to measure Relative TSR Performance in accordance with Exhibit A hereto (in either case, the "Performance Adder"). The Committee may reduce or eliminate payment of the Performance Adder in its sole discretion.

The aggregate payments under this Section 6(a) may not exceed 250% of the TSR Percentage. In addition, the overall percentage payment under the entire Performance Grant may not exceed 200%.

b. <u>ROIC Performance</u>. Return on Invested Capital Performance ("ROIC Performance") will determine fifty percent (50%) of the Target Amount ("ROIC Percentage"). ROIC Performance is defined in Exhibit A. The percentage of the ROIC Percentage that will be paid out, if any, is based on the following table:

ROIC Performance	Percentage Payout of ROIC Percentage
6.75% and above	200%
6.41%	125%
6.03% - 6.27%	100%
5.88%	50%
Below 5.88%	0%

- To the extent that the Company's ROIC Performance is greater than 5.88% and less than 6.03%, the ROIC Percentage payout will be interpolated between the applicable Percentage Payout of ROIC Percentage range set forth above.
- To the extent that the Company's ROIC Performance is greater than 6.27% and less than 6.41%, the ROIC Percentage payout will be interpolated between the applicable Percentage Payout of ROIC Percentage range set forth above.
- To the extent that the Company's ROIC Performance is greater than 6.41% and less than 6.75%, the ROIC Percentage payout will be interpolated between the applicable Percentage Payout of ROIC Percentage range set forth above.

7. Retirement, Involuntary Termination without Cause, Death or Disability.

a. <u>Retirement or Involuntary Termination without Cause</u>. Except as provided in Section 8, if a Participant Retires during the Performance Period or if a Participant's employment is involuntarily terminated by the Company or a Dominion Company without Cause during the Performance Period, and in either case the Participant would have been eligible for a payment if the Participant had remained employed until the end of the Performance Period, the Participant will receive a pro-rated payout of the Participant's Performance Grant equal to the payment the Participant would have received had the Participant remained employed until the end of the Performance Period multiplied by a fraction, the numerator of which is the number of whole months from the Date of Grant to the first day of the month coinciding with or immediately following the date of the Performance Period at the time provided in Section 4 based on the Performance Goal achievement approved by the Committee. If the Participant Retires, however, no payment will be made if the Company's Chief Executive Officer in his sole discretion (or, if the Participant is the Company's Chief Executive Officer, the Committee in its sole discretion) determines that the Participant's Retirement is detrimental to the Company.

- 3 -

b. <u>Death or Disability</u>. If, while employed by the Company or a Dominion Company, a Participant dies or becomes Disabled during the Performance Period, the Participant or, in the event of the Participant's death, the Participant's Beneficiary will receive a lump sum cash payment equal to the product of (i) and (ii) where:

- (i) is the amount that would be paid based on the predicted performance used for determining the compensation cost recognized by the Company for the Participant's Performance Grant for the latest financial statement filed with the Company's Annual Report on Form 10-K or Quarterly Report on Form 10-Q immediately prior to the event; and
- (ii) is a fraction, the numerator of which is the number of whole months from the Date of Grant to the first day of the calendar month coinciding with or immediately following the date of the Participant's death or Disability, and the denominator of which is twentythree (23).

Payment under this Section 7(b) will be made as soon as administratively feasible (and in any event within sixty (60) days) after the date of the Participant's death or Disability, and the Participant shall not have the right to any further payment under this Agreement. In the event of the Participant's death, payment will be made to the Participant's designated Beneficiary.

8. Qualifying Change of Control. Upon a Qualifying Change of Control prior to the end of the Performance Period, provided the Participant has remained continuously employed with Dominion or a Dominion Company from the Date of Grant to the date of the Qualifying Change of Control, the Participant will receive a lump sum cash payment equal to the greater of (i) the Target Amount or (ii) the total payout that would be made at the end of the Performance Period if the predicted performance used for determining the compensation cost recognized by the Company for the Participant's Performance Grant for the latest financial statement filed with the Company's Annual Report on Form 10-K or Quarterly Report on Form 10-Q immediately prior to the Qualifying Change of Control was the actual performance for the Performance Period (in either case, the "COC Payout Amount"). Payment will be made on or as soon as administratively feasible following the Qualifying Change of Control date. If a Qualifying Change of Control occurs prior to the end of the Performance Period and after a Participant has Retired or been involuntarily terminated without Cause pursuant to Section 7(a) above, then the Participant will receive a pro-rated payout of the Participant's Performance Grant, equal to the COC Payout Amount multiplied by the fraction set forth in Section 7(a) above, with payment occurring in a cash lump sum on or as soon as administratively feasible (but in any event within sixty (60) days) after the Qualifying Change of Control date. Following any payment under this Section 8, the Participant shall not have the right to any further payment under this Agreement.

9. Termination for Cause. Notwithstanding any provision of this Plan to the contrary, if the Participant's employment with the Company or a Dominion Company is terminated for Cause (as defined by the Employment Continuity Agreement between the Participant and the Company), the Participant will forfeit all rights to his or her Performance Grant.

- 4 -

10. Clawback of Award Payment.

a. <u>Restatement of Financial Statements</u>. If the Company's financial statements are required to be restated at any time within a two (2) year period following the end of the Performance Period as a result of fraud or intentional misconduct, the Committee may, in its discretion, based on the facts and circumstances surrounding the restatement, direct the Company to recover all or a portion of the Performance Grant payout from the Participant if the Participant's conduct directly caused or partially caused the need for the restatement.

b. <u>Fraudulent or Intentional Misconduct</u>. If the Company determines that the Participant has engaged in fraudulent or intentional misconduct related to or materially affecting the Company's business operations or the Participant's duties at the Company, the Committee may, in its discretion, based on the facts and circumstances surrounding the misconduct, direct the Company to withhold payment, or if payment has been made, to recover all or a portion of the Performance Grant payout from the Participant.

c. <u>Recovery of Payout</u>. The Company reserves the right to recover a Performance Grant payout pursuant to this Section 10 by (i) seeking repayment from the Participant; (ii) reducing the amount that would otherwise be payable to the Participant under another Company benefit plan or compensation program to the extent permitted by applicable law; (iii) withholding future annual and long-term incentive awards or salary increases; or (iv) taking any combination of these actions.

d. <u>No Limitation on Remedies</u>. The Company's right to recover a Performance Grant payout pursuant to this Section 10 shall be in addition to, and not in lieu of, actions the Company may take to remedy or discipline a Participant's misconduct including, but not limited to, termination of employment or initiation of a legal action for breach of fiduciary duty.

e. <u>Subject to Future Rulemaking</u>. The Performance Grant payout is subject to any claw back policies the Company may adopt in order to conform to the requirements of Section 954 of the Dodd-Frank Wall Street Reform Act and Consumer Protection Act and resulting rules issued by the Securities and Exchange Commission or national securities exchanges thereunder and that the Company determines should apply to this Performance Grant Plan.

11. Miscellaneous.

a. <u>Nontransferability</u>. Except as provided in Section 7(b), a Performance Grant is not transferable and is subject to a substantial risk of forfeiture until the end of the Performance Period.

b. <u>No Right to Continued Employment</u>. A Performance Grant does not confer upon a Participant any right with respect to continuance of employment by the Company, nor will it interfere in any way with the right of the Company to terminate a Participant's employment at any time.

c. <u>Tax Withholding</u>. The Company will withhold Applicable Withholding Taxes from the payout of Performance Grants.

d. <u>Application of Code Section 162(m)</u>. Performance Grants are intended to constitute "qualified performance-based compensation" within the meaning of section 1.162-27(e) of the Income Tax Regulations. The Committee will certify the achievement of the Performance Goals described in Section 6. To the maximum extent possible, this Plan will be interpreted and construed in accordance with this subsection 11(d).

e. <u>Negative Discretion</u>. Pursuant to Section 6(c) of the 2014 Incentive Compensation Plan, the Committee retains the authority to exercise negative discretion to reduce payments under this Plan as it deems appropriate.

f. Governing Law. This Plan shall be governed by the laws of the Commonwealth of Virginia, without regard to its choice of law provisions.

g. <u>Conflicts</u>. In the event of any material conflict between the provisions of the 2014 Incentive Compensation Plan and the provisions of this Plan, the provisions of the 2014 Incentive Compensation Plan will govern.

h. <u>Participant Bound by Plan</u>. By accepting a Performance Grant, a Participant acknowledges receipt of a copy of this Plan and the 2014 Incentive Compensation Plan document and prospectus, which are accessible on the Company Intranet, and agrees to be bound by all the terms and provisions thereof.

i. <u>Binding Effect</u>. This Plan will be binding upon and inure to the benefit of the legatees, distributes, and personal representatives of Participants and any successors of the Company.

j. <u>Section 409A</u>. This Plan and the Performance Grants hereunder are intended to comply with Section 409A of the Internal Revenue Code of 1986, as amended ("Code Section 409A"), and shall be interpreted to the maximum extent possible in accordance with such intent. To the extent necessary to comply with Code Section 409A, no payment will be made earlier than six months after a Participant's termination of employment other than for death if the Performance Grant is subject to Code Section 409A and the Participant is a "specified employee" (within the meaning of Code Section 409A(a)(2)(B)(i)).

DOMINION RESOURCES, INC. 2017 PERFORMANCE GRANT PLAN PERFORMANCE CRITERIA

Total Shareholder Return

Relative TSR Performance will be measured based on where the Company's total shareholder return during the Performance Period ranks in relation to the total shareholder returns of the companies that are members of the Company's compensation peer group as of the Grant Date as set forth below (the "Comparison Companies"):

Ameren Corporation American Electric Power Company CenterPoint Energy Consolidated Edison Company DTE Energy Company Duke Energy Corporation Edison International Entergy Corporation Eversource Energy Exelon Corporation FirstEnergy Corporation NextEra Energy Pacific Gas & Electric Company PPL Corporation Public Service Enterprise Group Southern Company Xcel Energy

The Comparison Companies shall be adjusted during the Performance Period as follows:

- (i) In the event of a merger, acquisition or business combination transaction of a Comparison Company with or by another Comparison Company, effective upon the public announcement of the transaction, the surviving entity shall remain a Comparison Company and the non-surviving entity shall cease to be a Comparison Company (provided that, if the proposed transaction is subsequently terminated before the Relative TSR Performance is calculated, then the non-surviving company shall be retroactively reinstated as a Comparison Company);
- (ii) If it is publicly announced that a Comparison Company will be acquired by another company that is not a Comparison Company, or in the event a "going private transaction" is publicly announced where the Comparison Company will not be the surviving entity or will otherwise no longer be publicly traded, the company shall cease to be a Comparison Company as of the date such announcement is made (provided that, if the proposed transaction is subsequently terminated before the Relative TSR Performance is calculated, then the company shall be retroactively reinstated as a Comparison Company);
- (iii) In the event of a spinoff, divestiture, or sale of assets of a Comparison Company, the Comparison Company shall no longer be a Comparison Company if the company's reported revenue for the four most recently reported quarters ending on or before the last day of the Performance Period falls below 40% of Dominion's reported revenue for last year of the Performance Period; and
- (iv) In the event of a bankruptcy of a Comparison Company, such company shall remain a Comparison Company and its stock price will continue to be tracked for purposes of Relative TSR Performance. If the company liquidates, it will remain a Comparison Company and its stock price will be reduced to zero for the remaining Performance Period.

Absolute TSR Performance will be the Company's total shareholder return on a compounded annual basis for the Performance Period. In general, total shareholder return consists of the difference between the value of a share of common stock at the beginning and end of the Performance Period, plus the value of dividends paid as if reinvested in stock and other appropriate adjustments for such events as stock splits. For purposes of TSR Performance, the total shareholder return of the Company and the Comparison Companies will be calculated using Bloomberg L.P. As soon as practicable after the completion of the Performance Period, the total shareholder returns of the Comparison Companies will be obtained from Bloomberg L.P. and ranked from highest to lowest by the Committee. The Company's total shareholder return will then be ranked in terms of which percentile it would have placed in among the Comparison Companies.

Return on Invested Capital

Return on Invested Capital (ROIC)

The following terms are used to calculate ROIC for purposes of the 2017 Performance Grant:

ROIC means Total Return divided by Average Invested Capital. Performance will be calculated for the two successive fiscal years within the Performance Period, added together and then divided by two to arrive at an annual average ROIC for the Performance Period.

Total Return means Operating Earnings plus After-tax Interest & Related Charges, all determined for the two successive fiscal years within the Performance Period.

Operating Earnings means operating earnings as disclosed on the Company's earnings report furnished on Form 8-K for the applicable fiscal year.

Average Invested Capital means the Average Balances for Long & Short-term Debt plus Preferred Equity plus Common Shareholders' Equity. The Average Balances for a year are calculated by performing the calculation at the end of each month during the fiscal year plus the last month of the prior fiscal year and then averaging those amounts over 13 months. Long and short-term debt shall exclude debt that is non-recourse to Dominion Resources, Inc. (Dominion) or its subsidiaries where Dominion or its subsidiaries has not made an associated investment. Short-term debt shall be net of cash and cash equivalents.

Average Invested Capital will be calculated by excluding (i) accumulated other comprehensive income/(loss) from Common Shareholders' Equity (as shown on the Company's financial statements during the Performance Period); (ii) impacts from changes in accounting principles that were not prescribed as of the Date of Grant; and (iii) the effects of incremental impacts from non-operating gains or losses during the Performance Period, as disclosed on the Company's earnings report furnished on Form 8-K, that were not included in the projection on which the original ROIC calculation was based at the time of the grant.

DOMINION RESOURCES, INC. RESTRICTED STOCK AWARD AGREEMENT

PARTICIPANT «First_Name» «Last_Name»	DATE OF GRANT	NUMBER OF SHARES OF RESTRICTED STOCK GRANTED «##,###»
PERSONNEL NUMBER	VESTING DATE	VESTING SCHEDULE <u>Vesting Date</u> <u>Percentage</u> 1000/
«#####»		100%

THIS AGREEMENT, effective as of the Date of Grant shown above, between Dominion Resources, Inc., a Virginia Corporation (the "Company") and the Participant named above is made pursuant and subject to the provisions of the Dominion Resources, Inc. 2014 Incentive Compensation Plan and any amendments thereto (the "Plan"). All terms used in this Agreement that are defined in the Plan have the same meaning given to such terms in the Plan.

- 1. <u>Award of Stock</u>. Pursuant to the Plan, the Number of Shares of Restricted Stock Granted shown above (the "Restricted Stock") were awarded to the Participant on the Date of Grant shown above, subject to the terms and conditions of the Plan, and subject further to the terms and conditions set forth in this Agreement.
- 2. <u>Vesting</u>. Except as provided in Sections 3, 4, 5 or 6, one hundred percent (100%) of the shares of Restricted Stock awarded under this Agreement will vest on the Vesting Date shown above.
- 3. <u>Forfeiture</u>. Except as provided in Sections 4 or 5, the Participant will forfeit any and all rights in the Restricted Stock if the Participant's employment with the Company or a Dominion Company terminates for any reason prior to the Vesting Date.
- 4. Death, Disability, Retirement or Involuntary Termination without Cause. Except as provided in Section 5, if the Participant terminates employment due to death, Disability, or Retirement (as such term is defined in Section 8(e)) before the Vesting Date or if the Participant's employment is involuntarily terminated by the Company or a Dominion Company without Cause (as defined in the Employment Continuity Agreement between the Participant and the Company) before the Vesting Date, the Participant will become vested in the number of shares of Restricted Stock awarded under this Agreement multiplied by a fraction, the numerator of which is the number of whole months from February 1, _______ to the first day of the month coinciding with or immediately following the date of the Participant's termination of employment, and the denominator of which is the

1

number of whole months from February 1, ______ to the Vesting Date, rounded down to the nearest whole share. If the Participant Retires, however, the Participant's Restricted Stock will not vest if the Company's Chief Executive Officer in his sole discretion (or, if the Participant is the Company's Chief Executive Officer, the Committee in its sole discretion) determines that the Participant's Retirement is detrimental to the Company. The vesting will occur on the date of the Participant's termination of employment due to death, Disability, Retirement, or termination by the Company without Cause. Any shares of Restricted Stock that do not vest in accordance with this Section 4 will be forfeited.

- 5. <u>Change of Control</u>. Upon a Change of Control prior to the Vesting Date, provided the Participant has remained continuously employed with Dominion or a Dominion Company from the Date of Grant to the date of the Change of Control, the Participant's rights in the Restricted Stock will become vested as follows:
 - a. A portion of the Restricted Stock will be immediately vested equal to the number of shares of Restricted Stock awarded under this Agreement multiplied by a fraction, the numerator of which is the number of whole months from February 1, ______ to the Change of Control date, and the denominator of which is the number of whole months from February 1, ______ to the Vesting Date, rounded down to the nearest whole share.
 - b. Unless previously forfeited, the remaining shares of Restricted Stock will become vested after a Change of Control at the earliest of the following events and in accordance with the terms described in subsections (i) through (iii) below:
 - (i) <u>Vesting Date</u>. All remaining shares of Restricted Stock will become vested on the Vesting Date.
 - (ii) <u>Death, Disability or Retirement</u>. If the Participant terminates employment due to death, Disability or Retirement (as defined in Section 8(e)) before the Vesting Date, the Participant will become vested in the remaining shares of Restricted Stock multiplied by a fraction, the numerator of which is the number of whole months from the first day of the month in which the Change of Control occurs to the first day of the month coinciding with or immediately following the Participant's termination of employment, and the denominator of which is the number of whole months from the first day of the month in which the Change of Control occurs to the Vesting Date, rounded down to the nearest whole share. If the Participant Retires, however, the Participant's Restricted Stock will not vest if the Company's Chief Executive Officer in his sole discretion (or, if the Participant is the Company's Chief Executive Officer, the Committee in its sole discretion) determines that the

Participant's Retirement is detrimental to the Company. The vesting will occur on the date of the Participant's termination of employment due to death, Disability, or Retirement. Any shares of the Restricted Stock that do not vest in accordance with the terms of this subsection (ii) will be forfeited.

- (iii) <u>Involuntary Termination without Cause</u>. All remaining shares of Restricted Stock will become vested upon the Participant's involuntary termination by the Company or a Dominion Company without Cause before the Vesting Date, or upon the Participant's Constructive Termination before the Vesting Date, as such terms are defined by the Employment Continuity Agreement between the Participant and the Company.
- 6. <u>Termination for Cause</u>. Notwithstanding any provision of this Agreement to the contrary, if the Participant's employment with the Company or a Dominion Company is terminated for Cause (as defined by the Employment Continuity Agreement between the Participant and the Company), the Participant will forfeit all Restricted Stock shares awarded pursuant to this Agreement.
- 7. <u>Clawback of Award Payment</u>.
 - a. <u>Restatement of Financial Statements</u>. If the Company's financial statements are required to be restated at any time within a two (2) year period following the Vesting Date as a result of fraud or intentional misconduct, the Committee may, in its discretion, based on the facts and circumstances surrounding the restatement, direct the Company to withhold issuance of all or a portion of the shares granted pursuant to this Agreement, or if shares have been issued, to recover all or a portion of the shares from the Participant if the Participant's conduct directly caused or partially caused the need for the restatement.
 - b. <u>Fraudulent or Intentional Misconduct</u>. If the Company determines that the Participant has engaged in fraudulent or intentional misconduct related to or materially affecting the Company's business operations or the Participant's duties at the Company, the Committee may, in its discretion, based on the facts and circumstances surrounding the misconduct, direct the Company to withhold issuance of all or a portion of the shares granted pursuant to this Agreement, or if shares have been issued, to recover all or a portion of the shares from the Participant.
 - c. <u>Recovery of Payout</u>. The Company reserves the right to recover a Restricted Stock Award payout pursuant to this Section 7 by (i) seeking recovery of the vested shares from the Participant; (ii) reducing the amount that would otherwise be payable to the Participant under another Company benefit plan or compensation program to the extent permitted by applicable law; (iii) withholding future annual and long-term incentive awards or salary increases; or (iv) taking any combination of these actions.

Jun 22 2018

- d. <u>No Limitation on Remedies</u>. The Company's right to recover Restricted Stock or issued shares pursuant to this Section 7 shall be in addition to, and not in lieu of, actions the Company may take to remedy or discipline a Participant's misconduct including, but not limited to, termination of employment or initiation of a legal action for breach of fiduciary duty.
- e. <u>Subject to Future Rulemaking</u>. The Restricted Stock granted under this Agreement is subject to any claw back policies the Company may adopt in order to conform to the requirements of Section 954 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and resulting rules issued by the Securities and Exchange Commission or national securities exchanges thereunder and that the Company determines should apply to said Restricted Stock.
- 8. <u>Terms and Conditions</u>.
 - a. <u>Nontransferability</u>. Except as provided in Sections 4 and 5, the shares of Restricted Stock are not transferable and are subject to a substantial risk of forfeiture until the Vesting Date.
 - b. <u>Uncertificated Shares; Power of Attorney</u>. The Company may issue the Restricted Shares in uncertificated form. Such uncertificated shares shall be credited to a book entry account maintained by the Company (or its transfer agent) on behalf of the Participant. As a condition of accepting this award, the Participant hereby irrevocably appoints Dominion Resources Services, Inc., or its successor, as the Participant's attorney-in-fact, with full power of substitution, to transfer (or provide instructions to the Company's transfer agent to transfer) such shares on the Company's books.
 - c. <u>Custody of Share Certificates; Stock Power</u>. The Company will retain custody of any share certificates for the Restricted Stock that may be issued until such shares vest or are forfeited. If share certificates are issued, the Participant shall execute and deliver a stock power, endorsed in blank, to Dominion Resources Services, Inc., with respect to such shares.
 - d. <u>Shareholder Rights</u>. The Participant will have the right to receive dividends and will have the right to vote the shares of Restricted Stock awarded under Section 1, both vested and unvested.
 - e. <u>Retirement</u>. For purposes of this Agreement, the term Retire or Retirement means a voluntary termination when the Participant is eligible for early or normal retirement benefits under the terms of the Dominion

Pension Plan, or would be eligible if any crediting of deemed additional years of age or service applicable to the Participant under the Company's Benefit Restoration Plan or New Benefit Restoration Plan was applied under the Pension Plan, as in effect at the time of the determination, unless the Company's Chief Executive Officer in his sole discretion (or, if the Participant is the Company's Chief Executive Officer, the Committee in its sole discretion) determines that the Participant's retirement is detrimental to the Company.

- f. Delivery of Shares.
 - (i) <u>Share Delivery</u>. On or as soon as administratively feasible after the Vesting Date or the date on which the shares of Restricted Stock have become vested due to the occurrence of an event described in Section 4 or 5, the Company will remove (or provide instructions to its transfer agents to remove) the transfer restrictions described herein, and (if any share certificate has been issued) shall deliver to the Participant (or in the event of the Participant's death, the Participant's Beneficiary) any such certificates free of the transfer restrictions described herein. The Company will also cancel any stock power covering such shares.
 - (ii) <u>Withholding of Taxes</u>. No Company Stock will be delivered until the Participant (or the Participant's Beneficiary) has paid to the Company the amount that must be withheld under federal, state and local income and employment tax laws (the "Applicable Withholding Taxes") or the Participant and the Company have made satisfactory arrangements for the payment of such taxes. Unless the Participant makes an alternative election, the Company will retain the number of shares of Restricted Stock (valued at their Fair Market Value) required to satisfy the Applicable Withholding Taxes. As an alternative to the Company retaining shares, the Participant or the Participant's Beneficiary may elect to (i) deliver Mature Shares (valued at their Fair Market Value) or (ii) make a cash payment to satisfy Applicable Withholding Taxes.
- g. <u>Fractional Shares</u>. Fractional shares of Company Stock will not be issued.
- h. <u>No Right to Continued Employment</u>. This Agreement does not confer upon the Participant any right with respect to continuance of employment by the Company or a Dominion Company, nor shall it interfere in any way with the right of the Company or a Dominion Company to terminate the Participant's employment at any time.
- i. <u>Change in Capital Structure</u>. The number and fair market value of shares of Restricted Stock awarded by this Agreement shall be automatically adjusted as provided in Section 18(a) of the Plan if the Company has a change in capital structure.

- j. <u>Governing Law</u>. This Agreement shall be governed by the laws of the Commonwealth of Virginia, other than its choice of law provisions.
- k. <u>Conflicts</u>. In the event of any conflict between the provisions of the Plan and the provisions of this Agreement, the provisions of the Plan shall govern.
- 1. <u>Participant Bound by Plan</u>. By accepting this Agreement, Participant hereby acknowledges receipt of a copy of the prospectus and Plan document accessible on the Company Intranet and agrees to be bound by all the terms and provisions thereof.
- m. <u>Binding Effect</u>. This Agreement shall be binding upon and inure to the benefit of the legatees, distributees, and personal representatives of the Participant and any successors of the Company.

Dominion Resources, Inc. 2017 Base Salaries for Named Executive Officers*

The 2017 base salaries for Dominion's named executive officers are as follows: Thomas F. Farrell II, Chairman, President and Chief Executive Officer— \$1,554,992; Mark F. McGettrick, Executive Vice President and Chief Financial Officer—\$879,828; David A. Christian, Executive Vice President and Chief Innovation Officer—\$703,960; Paul D. Koonce, Executive Vice President and President and Chief Executive Officer—Dominion Generation Group— \$703,960; and David A. Heacock, President—Dominion Nuclear—\$530,674 (Mr. Heacock retired effective March 1, 2017).

* Effective March 1, 2017

<u>Meeting Fees</u> Board meetings Committee meetings

\$2,000 per meeting \$2,000 per meeting

Dominion Resources, Inc. and Subsidiaries Computation of Ratio of Earnings to Fixed Charges

(millions of dollars)

		Years	Ended Decemb	oer 31,	
	2016(a)	2015(b)	2014(c)	2013(d)	2012(e)
Earnings, as defined:					
Income from continuing operations including noncontrolling interest before income tax expense	\$2,867	\$2,828	\$1,778	\$2,704	\$2,265
Distributed income from unconsolidated investees, less equity in earnings	(32)	12	(8)	17	(13)
Fixed charges included in income	1,068	953	1,237	930	880
Total earnings, as defined	\$3,903	\$3,793	\$3,007	\$3,651	\$3,132
Fixed charges, as defined:					
Interest charges	\$1,033	\$ 920	\$1,208	\$ 899	\$ 845
Rental interest factor	35	33	29	31	35
Fixed charges included in income	1,068	953	1,237	930	880
Preference security dividend requirement of consolidated subsidiary	_	_	17	25	25
Capitalized Interest	124	67	39	28	24
Interest from discontinued operations				85	80
Total fixed charges, as defined	\$1,192	\$1,020	\$1,293	\$1,068	\$1,009
Ratio of Earnings to Fixed Charges	3.27	3.72	2.33	3.42	3.10

Earnings for the twelve months ended December 31, 2016 include a \$197 million charge associated with future ash pond and landfill closure costs; a (a) \$65 million charge associated with an organizational design initiative; \$74 million in transaction and transition costs associated with the Dominion Ouestar combination; a \$23 million charge related to storm and restoration costs; a \$45 million charge related to other items; partially offset by \$34 million of net gain related to our investments in nuclear decommissioning trust funds. Excluding the effect of these items from the calculation would result in a higher ratio of earnings to fixed charges for the twelve months ended December 31, 2016.

Earnings for the twelve months ended December 31, 2015 include a \$85 million write-off of prior-period deferred fuel costs associated with Virginia (b) legislation; a \$99 million charge associated with ash pond and landfill closure costs and a \$78 million charge related to other items; partially offset by \$60 million of net gain related to our investments in nuclear decommissioning trust funds. Excluding the effect of these items from the calculation would result in a higher ratio of earnings to fixed charges for the twelve months ended December 31, 2015.

Earnings for the twelve months ended December 31, 2014 include a \$374 million charge related to North Anna nuclear power station and offshore (c) wind facilities; a \$284 million charge associated with our liability management effort, which is included in fixed charges; \$121 million accrued charge associated with ash pond and landfill closure costs; \$93 million charge related to other items; partially offset by a \$100 million net gain on the sale of our electric retail energy marketing business and \$72 million of net gain related to our investments in nuclear decommissioning trust funds. Excluding the effect of these items from the calculation would result in a higher ratio of earnings to fixed charges for the twelve months ended December 31, 2014.

Jun 22 2018

Exhibit JRC-1

- (d) Earnings for the twelve months ended December 31, 2013 include a \$55 million impairment charge related to certain natural gas infrastructure assets; a \$40 million charge in connection with the Virginia State Corporation Commission's final ruling associated with its biennial review of Virginia Power's base rates for 2011-2012 test years; a \$28 million charge associated with our operating expense reduction initiative, primarily reflecting severance pay and other employee related costs; a \$26 million charge related to the expected early shutdown of certain coal-fired generating units; a \$29 million charge related to our investments in nuclear decommissioning trust funds; a \$47 million benefit due to a downward revision in the nuclear decommissioning asset retirement obligations for certain merchant nuclear units that are no longer in service; a \$29 million net benefit primarily resulting from the sale of Elwood power station. Excluding the net effect of these items from the calculation would result in a higher ratio of earnings to fixed charges for the twelve months ended December 31, 2013.
- (e) Earnings for the twelve months ended December 31, 2012 include \$438 million of impairment and other charges related the planned shut-down of Kewaunee nuclear power station; \$87 million of restoration costs associated with severe storms affecting our Dominion Virginia Power and Dominion North Carolina service territories; partially offset by a \$36 million net gain related to our investments in nuclear decommissioning trust funds and \$4 million net benefit related to other items. Excluding the net effect of these items from the calculation would result in a higher ratio of earnings to fixed charges for the twelve months ended December 31, 2012.

Richmond, Virginia February 28, 2017

I, Thomas F. Farrell II, certify that:

- 1. I have reviewed this report on Form 10-K of Dominion Resources, Inc.;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Date: February 28, 2017

- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

BEFORE THE

NORTH CAROLINA UTILITIES COMMISSION

CHARLES RIVER ASSOCIATES

DOCKET NO. E-22, SUB 551 DOCKET NO. G-5, SUB 585

DIRECT TESTIMONY

OF

DAVID HUNGER

JUNE 22, 2018

1

QUALIFICATIONS AND PURPOSE

2 Q. PLEASE STATE YOUR NAME, OCCUPATION, AND BUSINESS3 ADDRESS.

I.

A. My name is David Hunger. I am a Vice President within the Energy
Practice of Charles River Associates ("CRA"). My address is 1201 F St.
NW, Suite 800, Washington, DC.

7 Q. WHAT IS YOUR EDUCATION AND PROFESSIONAL8 BACKGROUND?

9 I am experienced in energy market analysis, and was formerly a senior A. 10 economist at the Federal Energy Regulatory Commission ("FERC"). For 11 14 years at FERC, I led or participated in analyses involving mergers and 12 other corporate transactions, market power in market-based rates cases, 13 affiliate transactions, investigations of market manipulation in electricity 14 and natural gas markets, demand response compensation, compliance cases 15 for capacity and energy market rules in Regional Transmission 16 Organizations ("RTOs"), and competition issues in electricity markets. 17 Since leaving FERC and joining CRA in June 2013, I have testified in 18 numerous FERC proceedings involving Federal Power Act section 203 and 19 market-based rates as well as market power and market design in the 20 organized markets administered by independent system operators ("ISOs") 21 and RTOs. I have submitted testimony on energy-related matters before 22 FERC, state public utility commissions, federal court and an arbitration 23 tribunal.

1		Ι	hold a B.	A. in Mathematics	from the Univers	sity of Massac	husetts
2		and a M	.S. and P	h.D. in economics	from the Univer	sity of Orego	n. My
3		experience	ce, educat	tion, and prior testin	nony are describ	ed in my curr	riculum
4		vitae, sub	mitted al	ongside this testime	ony as Exhibit Dl	H-1.	
5	Q.	HAVE	YOU	PREVIOUSLY	TESTIFIED	BEFORE	THIS

6 COMMISSION?

7 No, I have not. As I state above, however, I have previously testified in a A. 8 large number of proceedings before FERC. I have also appeared before 9 several state public utility commissions, in federal court, and before an 10 arbitration tribunal. Testimony I have authored (or co-authored) has addressed a range of issues related to markets and competition, and most 11 12 frequently my testimony is related to the types of market power and 13 merger-related competition concerns that I address here.

14 Q. WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS15 PROCEEDING?

SCANA Corporation ("SCANA") and Dominion Energy, Inc. ("Dominion 16 A. Energy") (together, "Merging Entities") have petitioned the North Carolina 17 18 Utilities Commission ("Commission") for review and approval of a 19 proposed transaction whereby SCANA will become a wholly-owned 20 subsidiary of Dominion Energy (the "proposed transaction"). I have been 21 asked by the Merging Entities to analyze whether the proposed transaction 22 has adverse competitive impacts on wholesale or retail electricity and 23 natural gas markets in North Carolina. This is the same market power analysis required by the Commission in its Order Requiring Filing
 Analyses in Docket No. M-100, Sub 129, promulgated on November 2,
 2000.

4 II. DESCRIPTION OF TRANSACTION AND ANALYSIS 5 Q. HAVE YOU PROVIDED THE REQUIRED MARKET POWER 6 ANALYSIS?

A. I have. The report with the required market power analysis was filed in
this matter as Exhibit 5 to the Joint Application for the proposed
transaction. I am sponsoring that exhibit.

10 Q. PLEASE SUMMARIZE THE PROPOSED TRANSACTION.

- 11 Dominion Energy is an energy company that owns and operates regulated A. 12 and unregulated (competitive) gas and electric utilities and utility assets in 13 the Eastern and Rocky Mountain regions of the United States. SCANA is a 14 holding company with subsidiaries operating primarily in South Carolina, 15 North Carolina, and Georgia. If approved, the result of the proposed 16 transaction would be SCANA becoming a wholly-owned subsidiary of 17 Dominion Energy. The proposed transaction will result in the merged 18 entity holding the following gas and electric utility assets in North Carolina: 19
- Virginia Electric Power Company's retail electric service territory
 (Dominion Energy North Carolina);

- Public Service Company of North Carolina Inc.'s (PSNC) retail gas service territory;
 - Electric generating assets currently owned by Dominion Energy; and
- Contracts for interstate and intrastate pipeline capacity, as well as
 ownership shares in an interstate LNG storage facility.
- 6 Q. PLEASE SUMMARIZE YOUR ANALYSIS.

1

2

3

11

- A. Because of the numerous types of competition that are potentially affected
 by a merger between two large, diversified energy companies, I first lay
 out the possible competitive market segments that need to be addressed.
 This framework is shown in Table 1.
 - Table 1: Analytic Framework for Market Power Analysis

		Energ	у Туре
		Gas	Electric
t Level	Retail	Effect on retail gas competition and rates	Effect on retail electric competition and rates
Market Level	Wholesale	Effect on wholesale gas competition	Effect on wholesale electric competition
		Cross-fuel con	npetition issues

To fulfill the Commission's requirements and address possible competitive
concerns associated with the North Carolina markets for electricity and gas,
I systematically address the following sectors: wholesale gas, wholesale

1		electricity, retail gas, and retail electricity. I also address possible concerns
2		over effects on competition between retail electric and gas service. As part
3		of my analytic approach, I perform a Herfindahl-Hirschman Index ("HHI")
4		market concentration analysis for wholesale gas supply, as this is the only
5		sector for which this analysis is appropriate in the context of this testimony.
6		I do not address other market power analyses related to the merger
7		as provided by other consultants or by CRA before this or other regulatory
8		bodies.
9	Q.	PLEASE SUMMARIZE YOUR CONCLUSIONS.
10	A.	I conclude that the proposed transaction does not raise competitive
11		concerns in any of the studied markets, and will not create an increased
12		ability to exercise market power.
13		In the market power analysis, I address the full range of competitive
14		concerns in gas and electricity markets associated with the proposed
15		transaction as it relates to North Carolina. To summarize, the specific
16		findings for each market sector include:
17 18 19 20 21 22 23 24 25 26 27 28		• Wholesale Gas: A quantitative market concentration analysis was completed, applying the HHI metric, for firm gas capacity in North Carolina. The results show that the market is moderately concentrated, and the proposed transaction will increase the market concentration, but it will remain moderately concentrated. Furthermore, the HHI analysis takes a conservative view of the market, and it should be expected that accounting for additional suppliers and utility obligations would further dilute the market. A sensitivity analysis was also performed on the market impacts of expected pipeline development in the region, leading to the conclusion that planned pipeline capacity, should the pipelines be completed, would not raise competitive concerns, and would improve market supply and competitive alternatives. The presence of EEPC's
28		market supply and competitive alternatives. The presence of FERC'

Direct Testimony of David Hunger Docket No. E-22, Sub 551 Docket No. G-5, Sub 585 Page 5 of 6

- 1 open access regulatory regime as well as oversight and enforcement 2 also relieve any potential concerns regarding an adverse effect in the 3 relevant wholesale natural gas capacity markets.
- 4 Wholesale Electricity: Within North Carolina, there will be no change 5 in ownership of generation, and therefore no concentration of the market that would raise concerns over the exercise of market power. 6 7 Looking at potential supply into North Carolina from outside of North 8 Carolina, there likely will be a slight increase in market concentration 9 caused by the proposed transaction. However, the pool of potential suppliers in neighboring regions that could provide counterparties for 10 11 import transactions is extensive, and, therefore, I do not expect there to be any concerns over the accumulation of wholesale electric market 12 power as a result of the proposed transaction in the overall North 13 Carolina footprint. I also conclude that the vertical combination of 14 15 natural gas and electricity assets will not harm competition.
- Retail Gas: There is no competitive retail regime for gas service in
 North Carolina. Thus, the merger cannot and will not have an impact
 on retail gas competition.
 - **Retail Electricity**: As with retail gas, there is no competitive retail regime for electricity service in North Carolina. Thus, the merger cannot and will not have an impact on retail electricity competition.
- 22 Cross-fuel Competition: First, there is no overlap in service territories ٠ 23 between retail service provided by PSNC (retail gas) and Dominion 24 Energy North Carolina (retail electric) so there is no concern about 25 reduced competition for utility customers who have the ability to 26 switch between electricity and gas for certain needs. And second, the 27 Commission has approved similar rates of return on equity and similar 28 capital structures – and the utilities have similar credit ratings – for the 29 two retail utilities operated in North Carolina by the Merging Entities. 30 Thus, the proposed transaction should not raise concerns that, following 31 the merger, there will be incentives to invest in one type of 32 infrastructure over another to the disservice of customers.
- 33 Q. DOES THIS CONCLUDE YOUR TESTIMONY?
- 34 A. Yes.

EXHIBIT DH-1

David Hunger Vice President PhD, Economics University of Oregon

MS, Applied Economics University of Oregon

BA, Mathematics University of Massachusetts, Boston

David Hunger is Vice President with the Energy Practice of CRA. Formerly a senior economist at the Federal Energy Regulatory Commission, Dr. Hunger is an expert in energy market merger analysis and market-based rate matters, as well as energy and capacity market rules in the FERC-regulated Regional Transmission Organizations. For 14 years at the Commission, he took part in or led analyses involving mergers and other corporate transactions, market power in market-based rates cases, affiliate transactions, investigations of market manipulation in electricity and natural gas markets, demand response compensation, compliance cases for capacity and energy market rules in Regional Transmission Organizations (RTOs), merchant transmission, and competition issues in electricity markets. Since leaving the Commission and joining CRA in 2013, he has testified in multiple Commission proceedings involving organized capacity markets administered by RTOs; as well as merger and market-power cases at the state and federal level.

Experience

2013 - Present	Vice President, Charles River Associates – Energy Practice
1999–2013	Federal Energy Regulatory Commission
	1999 - 2000 Economist, Office of Economic Policy
	2000 - 2002 <i>Economist</i> , Office of Markets, Tariffs, and Rates - Division of Corporate Applications
	2002 - 2003 Economist, Office of Market Oversight and Investigations
	2003 – 2007 <i>Senior Economist</i> , Office of Energy Market Regulation – West Division
	2007-2009 <i>Supervisory Energy Industry Analyst</i> - Office of Energy Market Regulation – West Division
	2009 – 2010 <i>Deputy Director</i> , Office of Energy Market Regulation – West Division
	2010 – 2013 Senior Economist, Office of Energy Policy and Innovation
	Dr. Hunger was the technical lead on FERC Order No. 707 (Affiliate Transactions, 2007); Supplemental Merger Policy Statement (2007); and Order No. 745 (Demand Response Compensation, 2012). In addition, Dr. Hunger worked on market design issues in each of the FERC-regulated RTOs.

2001–2014	<i>Affiliated Professor</i> , Georgetown University, Graduate Public Policy Institute Classes taught: Microeconomic Theory, Energy Policy, and Master's Thesis advising.
2012 –2014	<i>Adjunct Professor</i> , Penn State University, Energy Business and Finance – Energy and Environmental Economics
2000–2001	Adjunct Assistant Professor of Economics, American University. Classes taught: Principles of Microeconomics and Principles of Macroeconomics
1998–1999	Assistant Professor of Economics, Oglethorpe University. Classes taught: Managerial Economics and International Economics (MBA); Principles of Economics, Intermediate Microeconomics, Macroeconomics, International Economics and Industrial Organization (undergraduate)
1994–1998	<i>Graduate Teaching Fellow</i> , Department of Economics, University of Oregon Classes taught: Econometrics, Industrial Organization, and Principles of Microeconomics

Filed Testimony

PJM Capacity Repricing and MOPR-Ex Proposal Docket No. ER18-1314-000. Affidavit on behalf of FirstEnergy Service Company and East Kentucky Power Cooperative, before the Federal Energy Regulatory Commission. May 7, 2018.

Walnut Ridge Wind, LLC Docket No. ER18-1419-000. Application for Market Based Rates Authorization, with Edo Macan, before the Federal Energy Regulatory Commission. April 23, 2018.

PJM Fast Start Compensation Proposal Docket No. EL18-34-000. Affidavit on behalf of FirstEnergy Service Company, AES Ohio Generation, LLC and East Kentucky Power Cooperative in Support of Reply Comments, before the Federal Energy Regulatory Commission. March 12, 2018

Grid Reliability and Resilience Pricing. Docket No. RM18-1-000. Affidavit on behalf of FirstEnergy Service Company in Response to Initial Comments, before the Federal Energy Regulatory Commission. November 7, 2017.

Grid Reliability and Resilience Pricing. Docket No. RM18-1-000. Affidavit on behalf of FirstEnergy Service Company, before the Federal Energy Regulatory Commission. October 23, 2017.

Great Plains Energy, Inc. and Westar Energy, Inc. Docket No. EC17-171-000 Application under Section 203 of the Federal Power Act for Merger Authorization, with Edo Macan, before the Federal Energy Regulatory Commission, September 1, 2017 (Authorized February 28, 2018, 162 FERC ¶ 61,174).

Nevada Power Company, PacifiCorp, and Sierra Pacific Power Company. Docket Nos. ER17-2394-000, *et al.* Application for Market Based Rates Authorization in the CAISO Energy Imbalance Market, with Edo Macan, before the Federal Energy Regulatory Commission. August 31, 2017 (Approved October 30, 2017, 161 FERC ¶ 61,117).

BlueWater Gas Storage LLC, Docket No. CP06-368, Notice of Change in Circumstances, Updated Market Power Analysis for Market Based Rates for Gas Storage, before the Federal Energy Regulatory Commission. July 10, 2017.

South Carolina Electric & Gas Company, Docket No. ER10-2498, Updated Market Power Analysis, before the Federal Energy Regulatory Commission. June 27, 2017.

British Columbia Power Exchange Corporation, et al v. State of California, ex rel. Bill Lockyer, Attorney General of the State of California, Docket No. EL02-71-057. Answering Testimony on Behalf of Shell Energy North America (US), L.P., before the Federal Energy Regulatory Commission. February 2, 2017.

Triennial Market Power Update Analysis of FirstEnergy Companies. Docket Nos. ER10-2727-000 *et al.,* before the Federal Energy Regulatory Commission. December 23, 2016.

Antero Resources Corp. v. South Jersey Resources Group, LLC and South Jersey Gas Co. (South Jersey). Civil Action No. 15-cv-00656-MEH. United States District Court for the District of Colorado. Expert Report filed on behalf of South Jersey related to changes in published natural gas index prices. December 2, 2016.

Notice of Inquiry: Modifications to Commission Requirements for Review of Transactions under Section 203 of the Federal Power Act and Market-Based Rate Applications under Section 205 of the Federal Power Act Docket No. RM16-21-000. Comments of Market Power Experts, before the Federal Energy Regulatory Commission. November 28, 2016.

Application for Authorization under Section 203 of the Federal Power Act for the merger of Great Plains Energy, Inc. and Westar Energy, Inc., Docket No. EC16-146-000. Affidavit in Reply to Staff Deficiency Letter on behalf of Great Plains Energy, Inc. and Westar Energy, Inc. before the Federal Energy Regulatory Commission, November 7, 2016.

Complaint of the New England Power Generators Association, Inc. Docket No. EL16-120-000. Reply Affidavit in Support of Complaint by New England Power Generators Association regarding Peak Energy Rent Adjustment rules in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission, November 4, 2016.

Complaint of the New England Power Generators Association, Inc. Docket No. EL16-120-000. Affidavit in Support of Complaint by New England Power Generators Association regarding Peak Energy Rent Adjustment rules in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission, September 30, 2016.

Testimony in the Matter of Southwest Power Pool, Inc. vs. AES Shady Point, LLC. Testimony on behalf of AES Shady Point related to a dispute regarding termination of transmission service before the American Arbitration Association. AAA Case No. 01-15-0004-4670. August 4, 2016.

Application for Authorization under Section 203 of the Federal Power Act for the Merger of Great Plains Energy, Inc. and Westar Energy, Inc. Docket No. EC16-146-000. Testimony of the competitive effects of the merger on behalf of Great Plains Energy, Inc. and Westar Energy, Inc. before the Federal Energy Regulatory Commission, with Edo Macan, July 11, 2016.

Reply Affidavit in Support of Answer of the FirstEnergy Companies. Docket No. EL16-49-000. Affidavit responding to specific proposed minimum offer price rules to existing resources in the PJM capacity market. April 20, 2016.

Affidavit in Support of Protest of the FirstEnergy Companies. Docket No. EL16-49-000. Affidavit related to the proposed imposition of a minimum offer price rule to existing resources in the PJM capacity market. April 11, 2016.

Rebuttal Testimony on Behalf of Wisconsin Electric Power Company. Docket No.:6800-CE-176. Affidavit in Support of Reply Comments by Wisconsin Energy Corporation, before the Public Service Commission of Wisconsin, in the matter of Wisconsin Power and Light Company's proposal to construct the proposed Riverside Energy Center combined-cycle generating unit. December 4, 2015.

Affidavit In Support of the PJM Utilities Coalition Answer to the Indicated Market Participants Motion for Clarification; or in the Alternative, Complaint. Docket No. ER15-623-000. Affidavit in Support of Answer by American Electric Power, FirstEnergy Service Company, The Dayton Power & Light Company, Buckeye Power, Inc. and East Kentucky Electric Cooperative, related to proposed alternative auction clearing mechanism in the Transition Incremental Auctions for the Capacity Performance Product, before the Federal Energy Regulatory Commission. August 17, 2015.

Supplemental Affidavit In Support of the PJM Utilities Coalition Answer to the PJM Deficiency Response. Docket No. ER15-623-001. Affidavit in Support of Comments by American Electric Power, FirstEnergy Service Company, The Dayton Power & Light Company, Buckeye Power, Inc. and East Kentucky Electric Cooperative, related to the PJM Capacity Performance Proposal before the Federal Energy Regulatory Commission. April 24, 2015.

Initial Comments of Indicated PJM Transmission Owners on Remand, Midwest Independent Transmission System Operator, Inc. Docket No. ER10-1791-003. Affidavit in Support of Comments by American Electric Power Service Corporation; The Dayton Power and Light Company; Exelon Corporation; FirstEnergy Service Company; Old Dominion Electric Cooperative; Pepco Holdings, Inc.; PPL Electric Utilities Corporation; Public Service Electric and Gas Company; and Rockland Electric Company, related to export pricing to PJM Interconnection, L.L.C. for Multi-Value Projects by the Midcontinent Independent System Operator, Inc., before the Federal Energy Regulatory Commission. April 22, 2015

Comments and Protest of the PJM Utilities Coalition, PJM Interconnection, L.L.C, Docket No. *ER15-852-000.* Affidavit in Support of Comments and Protest by American Electric Power, FirstEnergy Service Company, The Dayton Power & Light Company, Buckeye Power, Inc. and East Kentucky Electric Cooperative, related to the PJM RPM Wholesale Load Reduction Proposal before the Federal Energy Regulatory Commission. February, 2015.

Reply Comments of the PJM Utilities Coalition, PJM Interconnection, L.L.C, Docket No. ER15-623-000. Supplemental Affidavit in Support of Reply Comments American Electric Power, FirstEnergy Service Company, The Dayton Power & Light Company, Buckeye Power, Inc. and East Kentucky Electric Cooperative, related to the PJM capacity Performance Proposal before the Federal Energy Regulatory Commission. February, 2015. Application of Wisconsin Energy Corporation for Approval of a Transaction by which Wisconsin Energy Corporation Would Acquire All of the Outstanding Common Stock of Integrys Energy Group, Inc. Docket No. 9400-YO-100 Affidavit in Support of Reply Comments by Wisconsin Energy Corporation, before the Public Service Commission of Wisconsin. January, 2015.

Comments and Limited Protest of the PJM Utilities Coalition, PJM Interconnection, L.L.C, Docket No. ER15-623-000. Affidavit in Support of Comments and Limited Protest by American Electric Power, FirstEnergy Service Company, The Dayton Power & Light Company, Buckeye Power, Inc. and East Kentucky Electric Cooperative, related to the PJM Capacity Performance Proposal before the Federal Energy Regulatory Commission. January, 2015.

Answer of the New England Power Generators Association, Inc. in FERC Docket No. EL15-25-000. Affidavit in Support of Answer to Comments and Protests in the Complaint by New England Power Generators Association regarding Peak Energy Rent Adjustment rules in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission, January, 2015.

Application for Authorization under Section 203 of the Federal Power Act for the merger of Wisconsin Energy Corporation and Integrys Energy Group, Inc. Docket No. EC14-126-000. Response to Staff Data Request on behalf of Wisconsin Energy Corporation and Integrys Energy Group, Inc. before the Federal Energy Regulatory Commission. December, 2014. Authorized by the Commission (151 FERC ¶ 61,015) on April 7, 2015.

Complaint of the New England Power Generators Association, Inc. in FERC Docket No. EL15-25-000. Affidavit in Support of Complaint by New England Power Generators Association regarding Peak Energy Rent Adjustment rules in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission, December, 2014.

Application for Authorization under Section 203 of the Federal Power Act for the merger of Wisconsin Energy Corporation and Integrys Energy Group, Inc. Docket No. EC14-126-000. Testimony of the competitive effects of the merger on behalf of Wisconsin Energy Corporation and Integrys Energy Group, Inc. before the Federal Energy Regulatory Commission, with William H. Hieronymus, August, 2014. Authorized by the Commission (151 FERC ¶ 61,015) on April 7, 2015.

Petition for Determination Of Cost Effective Generation Alternative To Meet Need Prior to 2018, by Duke Energy Florida, Inc. Docket No. 140111-EI A Testimony on behalf of Calpine Construction Finance Company, L.P.; before the Florida Public Service Commission. July, 2014

ISO-New England Inc. and New England Power Pool Participants Committee. Docket No. ER14-1639-000. Affidavit in Support of Brookfield Energy Marketing LP's Answer to the ISO-NE Answer, related to MOPR exemption for renewables in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission. May, 2014.

Protest of the New England Power Generators Association, Inc. and the Electric Power Supply Association. Docket No. ER14-1639-000. Affidavit in Support of Protest by NEPGA and EPSA regarding Minimum Offer Price Rules exemptions in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission. April, 2014.

Revisions to the PJM Open Access Transmission Tariff and Reliability Assurance Agreement Among Load Serving Entities in the PJM Region to Limit and Protect Against Speculative Offers Submitted in RPM Auctions. Docket No. ER14-1461-000. Affidavit in Support of Comments by American Electric Power, Duke Energy Ohio, FirstEnergy Corp, Dayton Power & Light, and East Kentucky Electric Cooperative, before the Federal Energy Regulatory Commission. March, 2014.

Southwest Power Pool, Inc. Docket Nos. ER14-1174-000 and EL14-21-000. Affidavit in Support of Comments of the Southwest Power Pool Transmission Owners, related to excess flows from MISO through SPP, before the Federal Energy Regulatory Commission, February, 2014.

Complaint by New England Power Generators Association, Inc. v. ISO-NE, Inc. Respondent. Docket No. EL14-17-000. Affidavit in Support of Complaint by New England Power Generators Association regarding non-price retirement rules in the ISO-NE Forward Capacity Market, before the Federal Energy Regulatory Commission, January, 2014.

Limited and Sub-Annual DR Resources filing submitted by PJM Interconnection, L.L.C. Docket No. ER14-504-000. Affidavit in support of Reply Comments by American Electric Power, Duke Energy Ohio, FirstEnergy Corp, Dayton Power & Light, East Kentucky Electric Cooperative, and PPL Companies before the Federal Energy Regulatory Commission, January, 2014.

Capacity Imports Filing submitted by PJM Interconnection, L.L.C. Docket No. ER14-503-000. Affidavit in support of Reply Comments by American Electric Power, Duke Energy Ohio, FirstEnergy Corp., Dayton Power & Light, East Kentucky Electric Cooperative, and PPL Companies before the Federal Energy Regulatory Commission, January, 2014.

Limited and Sub-Annual DR Resources filing submitted by PJM Interconnection, L.L.C. Docket No. ER14-504-000. Affidavit in support of filing by American Electric Power, Duke Energy Ohio, FirstEnergy Corp, Dayton Power & Light, East Kentucky Electric Cooperative, and PPL Companies before the Federal Energy Regulatory Commission, December, 2013.

Capacity Imports Filing submitted by PJM Interconnection, L.L.C. Docket No. ER14-503-000. Affidavit in support of filing by American Electric Power, Duke Energy Ohio, FirstEnergy Corp., Dayton Power & Light, East Kentucky Electric Cooperative, and PPL Companies before the Federal Energy Regulatory Commission, December, 2013.

Demand Response Sell Offer Plan Filing submitted by PJM Interconnection, L.L.C. Docket No. ER13-2108-000. Affidavit in support of filing by American Electric Power, Duke Energy Ohio, FirstEnergy Corp., and Dayton Power & Light before the Federal Energy Regulatory Commission, December, 2013.

In the Matter of PJM Up-to Congestion Transactions, Federal Energy Regulatory Commission Docket Nos. IN10-5-000 and IN15-3-000, Affidavit on Behalf of Powhatan Energy Fund regarding claims of market manipulation, October, 2013.
