APR 20 2015

Clerk's Office  
N.C. Utilities Commission

Wind and Solar are the future...how selfish for Duke Energy to hold us back out of greed.

Waste bi-products of oil, coal, gas, nuclear are threatening our environment and our world.

Compare this to waste bi- products of wind and solar.

We have to start caring more about our planet than money.

We are counting on you to do the right thing.

Thank you,  
Diane Vaught  
Durham
