Regarding Docket Nos. EMP-118, Sub o and Sub 1: Timbermill Wind

NC Utilities Commission

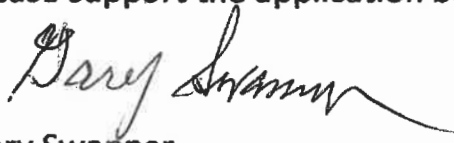

To whom it may concern:

The Timbermill Wind Project has an application before the Commission. I have been attending meetings, listening to the debate on the project for several years here in Chowan County.

I have lived in Chowan and Edenton all my life and know many of the landowners that are participating in the project. I see the project as a win/win, both for our county and the company proposing the Wind Farm.

I have seen and visited the Amazon Wind Farm in the county next door and have been very pleased to learn firsthand more about clean energy. If we are to secure the future for our future generations we must invest in clean energy.

Please support the application before you. Thank you for reviewing my letter.

Gary Swanner

Edenton NC 27932
