Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Raquel Green

Dear North Carolina Utilities Commission,

this is ridiculous. we have no way of switching companies and Duke and PNG are terrible corporate citizens - destroying the planet and making a killing while doing it. DUKE/PNG has a monopoly that they are exploiting at NC citizens' expense. It is time we got rid of Duke and PNG altogether and allow competition in the industry. Duke and PNG could never compete on a level playing field. They provide horrible service and still rake in billions because they hide behind the government and funnel money to our legislators who, in turn, keep green-lighting rate hikes. It is un-American. It needs to stop.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Aurelie Ward

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Stay warm and go without food/medication? That should not be a choice people have to make.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Fracking is a poor option for our future. The gas gets into the water table and contaminates the water. We need to spend out money and efforts on creating new types of energy, not continuing on with fossil fuels that are running out.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Dear North Carolina Utilities Commission,

The company should pay for its environmental damage, not charge customers for their mistakes. Shareholders should feel the impact of the mistakes the company has made and if this is not acceptable to them, they should vote in company management that will not make these huge mistakes. Please do not reward a company that feels it is acceptable to damage how North Carolinian's live and their health.

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Please consider helping us, average lower and middle class citizens, by preventing Duke Energy from increasing its burden of cost on our lives. Many of us work hard and try to make an honest living, only to stress each month about how to pay bills and sustain ourselves (all the while increasing the already-enormous profits of big business). What's more, rejecting Duke Energy's rate hike will help prevent increased over-reliance on fossil fuels when we, as a society, should be considering alternative energy sources. Thus, you have two substantial and just reasons - for the sake of the public and for the sake of our earth - to deny Duke Energy's request for a rate hike. Thank you for your time, consideration, and service to our country.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Dear North Carolina Utilities Commission,

After looking over some of the PNG financials, it's hard to fathom why they need another rate hike. Other than to further damage the environment with unsound ventures, as mentioned above. Also, being owned by Duke Energy, one has to wonder, how long do we continue to placate to big money capitalist's that have no regard for the environment.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

It is outrageous to raise rates so much when the product you are providing is contributing to the undeniable climate change the whole planet is experiencing. No thanks!

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Nancy Zora
